SECURITY FEATURES

In addition to Secure Boot, Run-time integrity checks, and Trusted Platform Module (TPM), the new devices have been enhanced with added Security.

- **Allow Listing** is an anti-malware measure that manages the list of programs that are previously allowed to run and prevents programs that are not on the list from running. Even if malware enters the device, it will not be executed. The Allow Listing capability can prevent not only known malware but also unknown malware from compromising the device.
- **PDF Digital Signature** allows you to add a digital signature to a scanned PDF document. You can obtain the same effect on an electronic document as a seal, signature, etc. An electronic certificate is a certificate issued by a recognized authority that certifies that "This digital signature is the formal signature of a real organization and person.". Recipients of electronic documents can verify that the PDF document has not been forged or altered by verifying that the digital signature matches the digital certificate. (Feature N/A at initial product launch - Future Firmware Update required)
- **TLS 1.3** supports the latest encryption network protocol for more higher security communication. This is the highest level of communication protocol (successor to SSL) which is a faster, safer and more secure method of cryptography that encrypts data by providing secure communication between web browsers and servers. IP-based protocols, such as HTTPS, SMTP, POP3, FTP support TLS to encrypt data. Web browsers utilize a TLS certificate (also more commonly referred to as SSL) to help them recognize that it belongs to a digitally signed certificate authority
- **Hard Drive Overwrite** The data security function can be erased by overwriting seven times. Compatible with US "DoD 5220.22 M ECE standard" and Germany "BSI/VSITR standard."
- **S/MIME** (Secure/Multipurpose Internet Mail Extensions) is an email encryption standard. Digital certificates can be used to encrypt and digitally sign email.
- **SIEM (Security Information and Event Management)** sends a security event log to an external SIEM server using the Syslog protocol. By using this protocol, a user can monitor unauthorized access or leakage of confidential information by a malicious operation.
- **Device-specific administrator initial password California IoT Security Act SB 327)** There is a risk of intrusion by external access if you continue to use the initial device password. Starting with the 3554ci series, the initial password is the device serial number on both the panel and Command Center.
- **OCSP/CRL (Online Certificate Status Protocol/ Certificate Revocation List Settings)** OCSP/CRL settings can verify the validity of certificates used in encrypted communications
- **Secure Boot** performs a comprehensive check to ensure Firmware, LINUX and Java platforms are at 100% integrity during start up.
- **Run-time Integrity** checks are performed periodically to ensure the Firmware, including the Java Platform has not been compromised during the operation of the MFP.
- **Trusted Platform Module (TPM)** is a security chip set that applies a Cipher Key on the Kyocera Data Security Kit for an additional layer of protection for HyPAS applications, Address book, Logs, Image data, Document box and User lists.

**DEALER LIMITED WARRANTIES FOR Copystar MZ3200i / MZ4000i
 MULTIFUNCTIONAL PRODUCTS**

Copystar, a Division of KYOCERA Document Solutions America, Inc. (“Copystar”) warrants its new Multifunctional Products (referred to herein as “MFP”) to Authorized Dealers as follows:

Mainframes and Accessories. The MFP’s mainframe and accessories are warranted against defects in workmanship and material under normal use and service for a period of 36 months from installation with first end-user, or 39 months from Copystar’s invoice date to Dealer, or the specified number of copies/prints as listed below, whichever occurs first (referred to herein as “MFP Warranty Period”). Copystar’s obligation hereunder is expressly limited to providing Dealer with the parts required to repair the MFP or crediting Dealer’s account for the cost of said parts, at Copystar’s election.

Maintenance Kits. Maintenance Kits consist of the developing unit, the drum unit, and the fixing unit. Components of Maintenance Kits included with the original MFP are warranted against defects in material and workmanship for a period of 36 months from date of installation with first end-user, or 39 months from Copystar’s invoice date to Dealer (referred to herein as Original Maintenance Kit Warranty Period), or the specified number of copies/prints listed below (referred to herein as Original Maintenance Kit Copy Allowance), whichever occurs first. Replacement Maintenance Kits purchased and installed after the Original Maintenance Kit Copy Allowance has expired, shall have a limited warranty for the specified number of copies/prints listed below, or until the Original Maintenance Kit Warranty Period expires, whichever occurs first. Replacement Maintenance Kits purchased and installed after the Original Maintenance Kit Warranty Period has expired shall have a limited warranty of 90 days. To be covered by this 90 day warranty, the Replacement Kit must be installed and registered prior to the MFP exceeding 10% of the Original Maintenance Kit Copy Allowance.

These warranties do not cover MFPs or components of Maintenance Kits which: (a) have become damaged due to operator negligence, misuse, accidents, improper storage or unusual physical or electrical stress, (b) have used parts or supplies which are not genuine Copystar brand parts or supplies, (c) have been installed or serviced by a technician not employed by Copystar or an Authorized Copystar Dealer, (d) have had the serial number modified, altered, or removed, or (e) Dealer fails to register the installation information for the MFP with Copystar utilizing **MyCopystar**.

THESE WARRANTIES SHALL BE IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. COPYSTAR SHALL NOT BE LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES WHICH MAY ARISE OUT OF THE USE OF, OR INABILITY TO USE, THE MFP.

MFP MODEL	TOTAL COPIES/PRINTS	ORIGINAL MAINTENANCE KIT COPY/PRINT ALLOWANCE
MZ3200i	1,800,000	600,000
MZ4000i	1,800,000	600,000

WARRANTY RETURNS

To submit any Parts RETURN, simply log-on to our Order and Tracking System, go to Returns and request a Return Authorization. Select the appropriate Return Type.

To Process your Warranty Claim and verify other key information, the Maintenance Pages, Status Page, Service Status Page, Event Log & Image Quality Samples (U089/LLU Report) must be included if the item is to be returned to the National Return Center or Uploaded, if prompted to do so. If all of these are not Included or Uploaded with the Warranty Claim, your request may be delayed or denied.

To ensure quality, especially of new products, we will have parts returned on new product introductions for a period of approximately six months.

For assistance with the Parts Warranty Return System, please contact the Parts Warranty Help Line at 866-596-2372, Option 3.
