

## Ultra short-throw lens designed for select Epson® projectors.

Project supersized images using the ELPLX01 ultra short-throw lens with select Epson Pro L and Pro G Series projectors<sup>1</sup>, up to 8,000 lumens. Featuring a 0.35 throw ratio and zero offset, this versatile lens is the ideal solution for installation in narrow spaces and rear-projection applications. Plus, its wide lens shift range offers even more flexibility when needed. Also available in white. Also available in [white](#).

- **Model:** V12H004X01
  
- **Ideal for space-constrained applications** — ultra short-throw lens delivers large-size images from a short distance
- **Installation flexibility** — 0.35 throw ratio, plus zero offset
- **Versatile** — ideal solution for installation in narrow spaces, on low ceilings and in rear-projection applications
- **Positioning flexibility** — wide lens shift range
- **Bright, larger-than-life images virtually anywhere** — project in tight locations that were previously not an option for projection applications
- **Compatible** — supports select Epson interchangeable lens projectors<sup>1</sup> up to 8,000 lumens
- **Supported screen size** — 100" to 300"
- **F-number** — 1.9
- **Focal length** — 5.8 mm
- **Ideal for dynamic displays** — facilitates front projection from above and rear projection from below the floor surface for dynamic window displays and other immersive experiences
