The proposed 2021-2024 Iowa Statewide Transportation Improvement Program (STIP) project listing is contained herein. This draft is prepared in accordance with Title 23, United States Code.

The draft STIP has been produced based on the current federal transportation bill, the Fixing America's Surface Transportation Act (FAST-Act), which was signed into law on December 4, 2015. Under the FAST-Act FHWA federal funding programs include the National Highway Performance Program (NHPP), National Highway Freight Program (NHFP), Surface Transportation Block Grant Program (STBG), Transportation Alternatives Set-Aside (TAP), Congestion Mitigation and Air Quality Improvement Program (CMAQ), Highway Safety Improvement Program (HSIP), Railway-Highway Crossings, and Metropolitan Planning.

The projects identified in the draft STIP document are the result of regional and statewide transportation planning efforts conducted by the Iowa DOT and each of the 27 Metropolitan Planning Organizations (MPO) and Regional Planning Affiliations (RPA) located throughout the state.

Primary system projects are identified and programmed as part of the Iowa Transportation Improvement Program (Five-Year Program) process. The Five-Year Program document is updated and approved annually by the Iowa Transportation Commission (Commission). The Five-Year Program is used to inform Iowans of planned investments in the multimodal transportation system and encompasses investments in aviation, transit, railroads, trails, and highways. A copy of the current Five-Year Program can be found at: [https://iowadot.gov/program\\_management/five-year-program](https://iowadot.gov/program_management/five-year-program)

The Iowa DOT's programming process is transparent, aligns available tools and plans, and incorporates appropriate and extensive stakeholder input. The major procedural steps include problem statement development, scoping, project advancement, project prioritization, program synthesis, and final programming. It is important to note that this process is also governed by Iowa's long range transportation planning documents. As such, projects programmed in the Five-Year Program are consistent with Iowa's long-range State Transportation Plan – Iowa in Motion 2045, and several other planning documents, as discussed below. A copy of the State Transportation Plan can be found at: <https://iowadot.gov/iowainmotion/iowa-in-motion-home>

The FAST Act continued the provisions for performance-based planning and programming (PBPP) that were established in the prior federal reauthorization act, Moving Ahead for Progress in the 21<sup>st</sup> Century (MAP-21). The phase-in of federal PBPP requirements is ongoing; specific processes and requirements have moved into implementation and others will continue to do so over the next few years. Iowa in Motion 2045 was adopted prior to initial state performance targets being developed; these targets will be included in the next update of the plan. Currently, statewide targets have been set for federally-required measures in the areas of safety (all roads), pavement condition (Interstate and non-Interstate National Highway System (NHS)), bridge condition (NHS), system reliability (Interstate and non-Interstate NHS), freight movement (Interstate), and transit asset management (small urban and rural transit systems). Additional background on performance measures and targets, links to Iowa DOT performance-based plans, and current Iowa DOT performance targets are available at [https://iowadot.gov/systems\\_planning/planning/federal-performance-management-and-asset-management](https://iowadot.gov/systems_planning/planning/federal-performance-management-and-asset-management). Discussion below provides an overview of the various performance-based plans and target-setting processes, and their connection to the investments included in the STIP.

Iowa in Motion 2045 established the following vision for Iowa DOT: “A safe and efficient multimodal transportation system that enables the social and economic well-being of all Iowans, provides enhanced access and mobility for people and freight, and accommodates the unique needs of urban and rural areas in an environmentally conscious manner.” The plan focuses on four investment areas, with a heavy emphasis on stewardship:

- Stewardship through maintaining a state of good repair
- Modification through rightsizing the system
- Optimization through improving operational efficiency and resiliency
- Transformation through increasing mobility and travel choices

Iowa in Motion 2045 includes analysis and strategies for the various modes of transportation in the state. For highways, this includes considerations related to capacity, mobility and safety, freight, condition, operations, and bridges. Pavement and bridge needs are anticipated to be addressed primarily through asset management as described in the Transportation Asset Management Plan (TAMP), which is highlighted below. The STIP helps to address the following identified needs by including investments that implement applicable strategies.

- Capacity needs were identified for three interurban interstate corridors and for several Interstate, NHS, and other State routes in urban areas. Strategies to address these needs include targeting investment toward areas anticipated to become congested by 2045, and considering targeting anticipatory investments at locations with potential congestion issues beyond 2045. Strategies include added capacity and/or operational improvements.
- Mobility and safety, or “Super-2” needs, were identified for five U.S. routes across Iowa, all of which are part of the NHS. Strategies to address these needs include targeting investment toward improvements such as wider paved shoulders, turn lanes, passing lanes, limited access, and geometric improvements. These improvements are largely anticipated to be opportunistic, and are likely to occur at spot locations when other pavement, bridge, or safety issues are being addressed.
- The operations analysis focused on prioritizing interstate corridors from an operations perspective, and implementing appropriate transportation system management and operations (TSMO) strategies on those corridors.

The 2019 Strategic Highway Safety Plan (SHSP) includes engineering strategies to help address issues with lane departure crashes and to improve intersections. These improvements are being implemented as appropriate throughout the State’s highway system. Strategies to help prevent lane departures include the installation of countermeasures such as centerline rumble strips, shoulder/edgeline rumble strips, curve delineation, shoulder treatments, and median cable barriers. Strategies to help improve intersections include implementing innovative improvements such as roundabouts, reduced conflict intersections, diverging diamond interchanges, and offset turn lanes; traffic signal modifications; intersection lighting; and bicycle/pedestrian intersection improvements.

The HSIP program of projects included in the draft STIP has been produced based on the strategies contained in the SHSP and the Iowa DOT’s safety performance measure target setting process. Numerous stakeholder groups, including MPOs, participated in the target setting process. Working in partnership with local agencies, investments have been identified and programmed which will construct effective countermeasures to reduce traffic fatalities and serious injuries. Projects chosen for HSIP investment are based on crash history, roadway characteristics, and the existence of an infrastructure countermeasures that

can address the types of crashes present. The Iowa DOT continues to utilize a systemic safety improvement process rather than relying on “hot spot” safety improvements.

Pavement and bridge projects on the Interstate System and non-Interstate NHS are determined in alignment with the Transportation Asset Management Plan (TAMP) and the performance target setting process. The TAMP helps connect the vision of Iowa in Motion 2045 with the projects programmed in the Five-Year Program and STIP. The TAMP describes how the existing highway system is managed. Preserving and improving this system is critical for achieving the system vision. The TAMP also connects Iowa in Motion 2045 and system/modal plans to Iowa DOT’s Five-Year Program and the STIP. Iowa in Motion 2045 defines a vision for the transportation system over the next 20 years, while the Five-Year Program and STIP identify specific investments over the next four to five years. The TAMP has a 10-year planning horizon and helps ensure that investments in the Five-Year Program and STIP are consistent with Iowa DOT’s longer-term vision.

Pavement and bridge projects are identified and programmed in the STIP in a manner that is consistent with the strategies identified in the TAMP and the target-setting process. Pavement and bridge target setting involved an internal DOT working group and coordination with MPOs and local owners of NHS assets. The methodology used to set targets used current and historical data on condition and funding to forecast future condition. Asset management focuses on performing the right treatment at the right time to optimize investments and outcomes. The TAMP discusses the major investment categories that the Commission allocates funding through. Once the Commission approves the funding for these categories, Iowa DOT recommends the allocation of the funds to specific projects using the processes described in the TAMP. The TAMP includes a 10-year forecast of funding for pavement and bridge stewardship projects, and funding amounts in the STIP generally align with this forecast.

The Iowa DOT strives to maintain the bridge inventory in a condition that provides safe and efficient movement of people and freight. Bridges are managed by using a bridge management process with forecasting capabilities to better identify future needs across the entire inventory. The ability to predict bridge needs beyond a short-term time horizon improves the ability to make better decisions today and predict what funding needs are necessary for a stable bridge inventory. Bridge projects are

programmed to help meet the desired program outcomes documented in the TAMP.

The Iowa DOT works to provide a safe, serviceable, and sustainable roadway system using its pavement management system. The pavement management system will assist program administrators in the selection of economical options for pavement decisions for the construction, reconstruction, rehabilitation, preservation, and maintenance of pavements. The pavement management system will be used to model and predict future pavements conditions based on various funding levels. This analysis will determine the level of funding to maintain the pavement system in a state of good repair. Pavement projects are programmed to help meet the desired program outcomes documented in the TAMP.

Projects focused on improving pavement and bridge condition also often help improve system reliability and freight movement. Additional projects focused specifically on improving these areas of system performance are developed in alignment with the target-setting process for related performance measures, and the freight improvement strategies and freight investment plan included in the State Freight Plan. This plan includes a detailed analysis and prioritization of freight bottlenecks, which are locations that should be considered for further study and possibly for future improvements. A detailed analysis was performed to prioritize the bottlenecks based on their value to the overall system, traffic and infrastructure condition, and travel time performance. The process also involved extensive input from State, MPO, RPA, and industry representatives. State projects identified in the freight investment plan and programmed in the STIP were highly ranked, freight bottlenecks. System reliability and freight target setting involved an internal DOT working group and coordination with MPOs. The methodology used to set targets used current and historical data on condition and funding to forecast future condition.

The State Freight Plan identifies several strategies that help direct investments made in the STIP. These include:

- Target investment to address mobility issues that impact freight movements.
- Emphasize the Iowa Multimodal Freight Network and utilize designs that are compatible with significant freight movements.
- Right-size the highway system and apply cost-effective solutions to locations with existing and anticipated issues.

Public transit capital projects included in the STIP align with the transit asset management (TAM) planning and target setting processes undertaken by the Iowa DOT, transit agencies, and MPOs. The Iowa DOT establishes a group TAM plan and group targets for all small urban and rural providers while large urban providers establish their own TAM plans and targets. Investments are made in alignment with TAM plans with the intent of keeping the state's public transit vehicles and facilities in a state of good repair and meeting transit asset management targets. The Iowa DOT allocates funding for transit rollingstock in accordance with the Public Transit Management System process. In addition, the Iowa DOT awards public transit infrastructure grants in accordance with the project priorities established in Iowa Code chapter 924. Additional state and federal funding sources that can be used by transit agencies for vehicle and facility improvements are outlined in the funding chapter of the Transit Manager's Handbook. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

Projects included in the STIP, but not located on the primary system, are identified and programmed through Iowa's regional planning process. The Iowa DOT regional process includes the targeting of federal highway funds directly to 18 RPAs and 9 MPOs. These organizations provide additional inputs to the four-year program by conducting regional transportation planning efforts including the project selection for "targeted" STBG funding. Projects identified by each agency are local priorities and are consistent with each agency's long-range transportation plan.

In addition to the STBG funded projects noted above the STIP also includes county and city bridge projects to be funded with federal aid funding. STBG funds are targeted directly to Iowa's 99 counties for investment in secondary road bridge infrastructure. The Iowa DOT also operates a city bridge program which makes STBG funding available for investment in municipal bridge projects. City and county bridge projects funded with FHWA funding are included in MPO and RPA TIPs and carried forward to the STIP.

A number of additional grant programs are administered by the Iowa DOT which target FHWA funding to locally sponsored projects. Funding available to local sponsors includes CMAQ, NHFP, and Recreational Trail among others. The projects selected for funding as part of these grant programs are programmed in MPO and RPA TIPs and included in the draft STIP.

In February 2018 Iowa's Transportation Commission approved a Federal Aid Swap policy that allows certain locally sponsored projects to swap federal aid dollars for state Primary Road Funds dollars. Specifically, the Federal Aid Swap policy applies to STBG, bridge, CMAQ, and HSIP funding targeted to locally sponsored projects. Swap funded projects have been included in the STIP document in order to provide a comprehensive listing of transportation improvements funded through the state of Iowa's federal aid apportionments and Primary Road Funds dollars.

Some proposed obligations may be identified under a broader category of statewide improvements that are subject to alternate programming requirements. Examples of statewide programming entries include the DOT's Railroad Highway program, the Highway Safety Improvement Program Secondary, Emergency Relief projects, and State Planning and Research funding, among others.

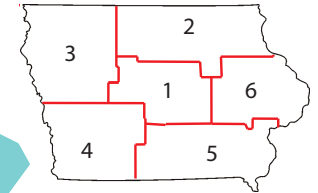

In addition to the FHWA program of projects outlined above the draft STIP includes all projects for which Federal Transit Administration (FTA) funding may be utilized. The transit portion of the STIP was developed by Iowa's MPOs and RPAs in cooperation with the state's large urban, small urban and regional transit systems.

This draft STIP will be made available to all Iowans consistent with the Iowa DOT's public participation plan. Comments received by September 7, 2020, will be considered prior to the STIP submittal to the FHWA/FTA in September 2020. Comments on the draft STIP should be submitted directly to the Iowa DOT Program Management Bureau or Iowa DOT district planners. The draft STIP includes areas of responsibility and contact information for these points of contact.

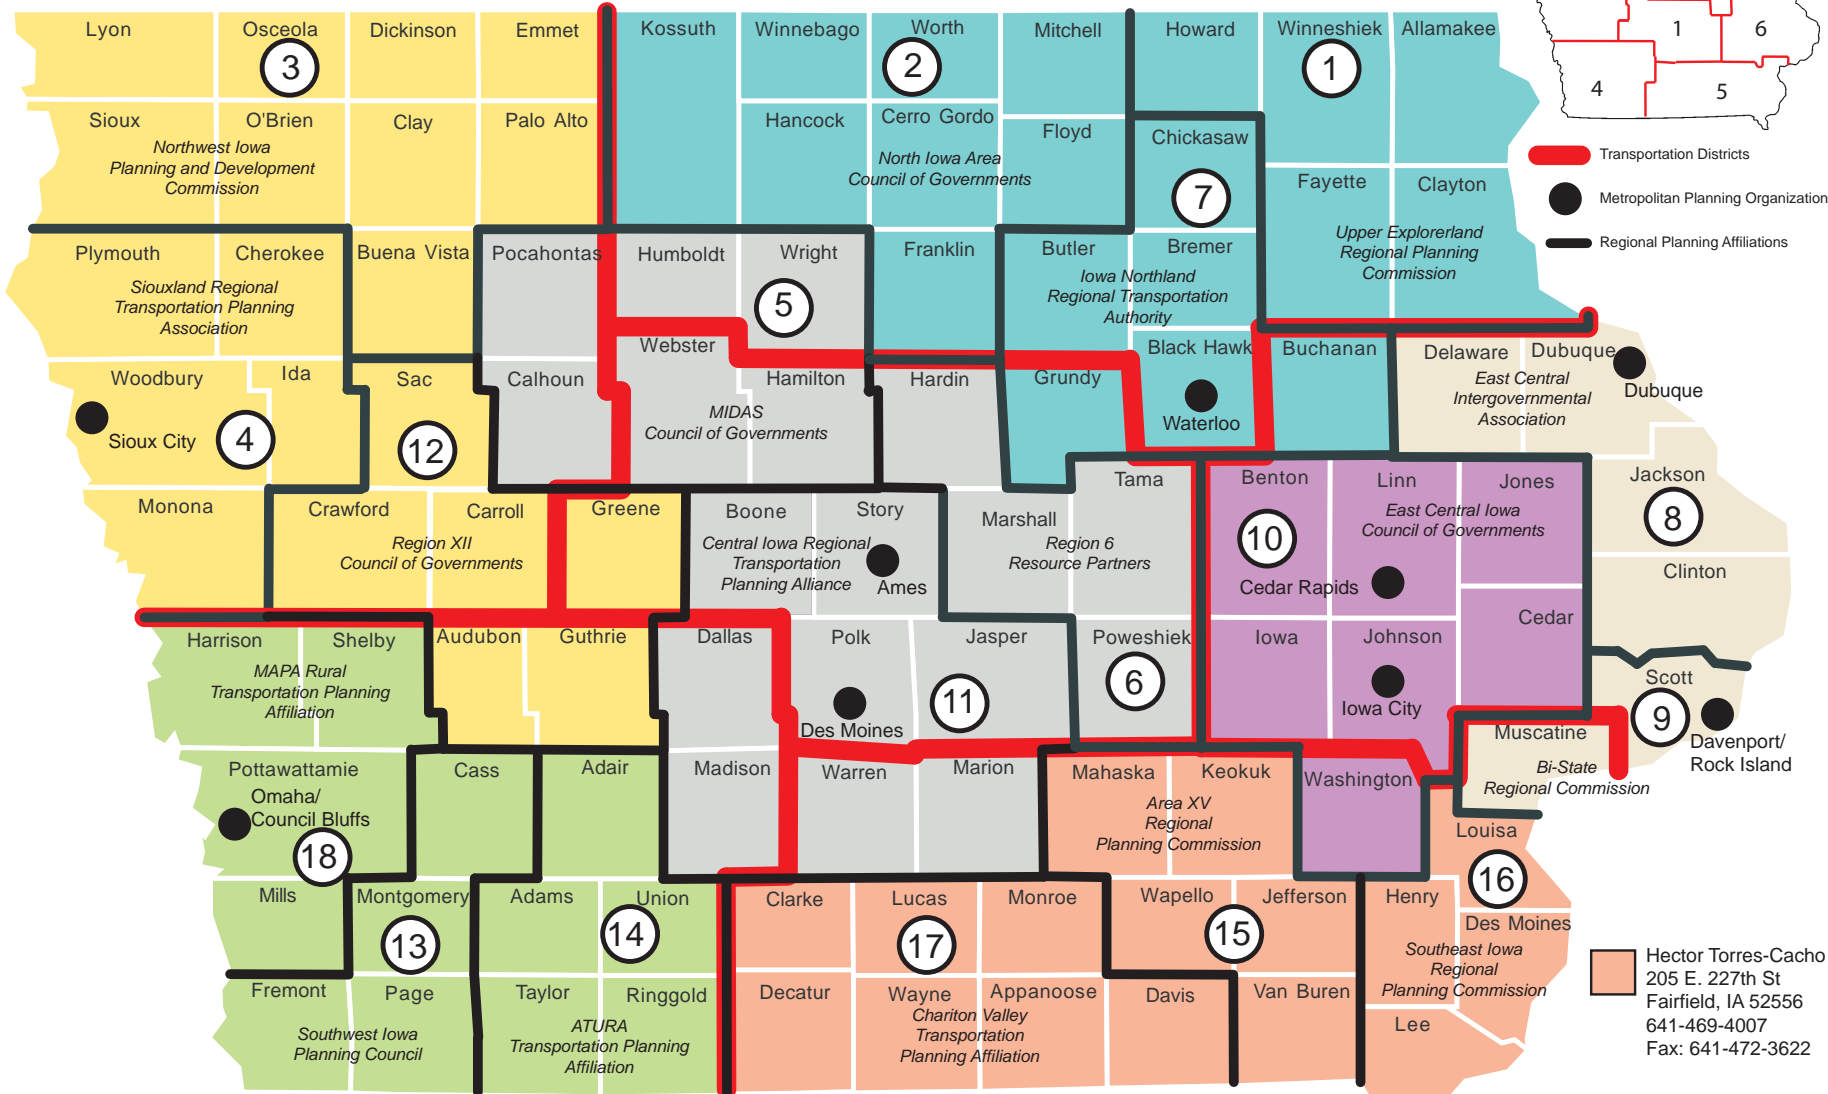

Inclusion of a project in the draft STIP does not guarantee federal-aid eligibility for the project. Eligibility for federal aid will be determined on a case-by-case basis when project authorization is requested from the FHWA or FTA.

2021 Transportation Improvement Program

**Map key:**  
 ●/— Road or Bridge work  
 ●/— Trail or Enhancement Work  
 [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

- To locate project in print listing:**
1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
  2. Locate county in which project sits
  3. Find the TPMS number - e.g. "10238"

2021 Transportation Improvement Program

**Map key:**

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

**To locate project in print listing:**

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA-05 - MIDAS Council of Governments

## 2021 Transportation Improvement Program

### Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

### To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

## 2021 Transportation Improvement Program

### Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

### To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA-07 - Iowa Northland Regional Transportation Authority

## 2021 Transportation Improvement Program

### Map key:

- / - Road or Bridge work
- / - Trail or Enhancement Work
- [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

### To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

## 2021 Transportation Improvement Program

### Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

### To locate project in print listing:

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA-12 - Region XII Council of Governments

## 2021 Transportation Improvement Program

### Map key:

- / - Road or Bridge work
- / - Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

### To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA-13 - Southwest Iowa Planning Council

## 2021 Transportation Improvement Program

### Map key:

- / - Road or Bridge work
- / - Trail or Enhancement Work
- [STBG-5771] Funding program ("STBG") and TPMS ID number ("5771")

### To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA-14 - ATURA Transportation Planning Affiliation

## 2021 Transportation Improvement Program

### Map key:

- / — Road or Bridge work
- / — Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

### To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

## 2021 Transportation Improvement Program

### Map key:

- / - Road or Bridge work
- / - Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

### To locate project in print listing:

1. Look under funding program - i.e. STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

2021 Transportation Improvement Program

**Map key:**

- / - Road or Bridge work
- / - Trail or Enhancement Work
- STBG-5771 Funding program ("STBG") and TPMS ID number ("5771")

**To locate project in print listing:**

1. Look under funding program - i.e STBG, SWAP, STBG-TAP, etc.
2. Locate county in which project sits
3. Find the TPMS number - e.g. "10238"

RPA-18 - Metropolitan Area Planning Agency
