

Data Sheet

E3000 Series Enterprise Router

The Cradlepoint NetCloud for Branch with E3000 Series Enterprise Router is suited for fixed offices, healthcare, financial services and retail locations, ideally when combined with need for security services at scale with performance. The all-in-one form factor includes full-featured routing, security, switching with PoE ports and Wi-Fi, making it easy to connect branches to the Internet and critical applications without the need for extra hardware or complicated configurations. And the embedded LTE or 5G modem means that connectivity is always available from day one without waiting for a wired connection.

Notable Features

- Gain agility through an embedded Cat 18 LTE or 5G NR modem for fast day-1 or primary connectivity.
- Terminate a primary wired broadband link with LTE or 5G as failover for highly resilient hybrid connectivity.
- Enable larger branch locations needing security and connections to cloud-based applications.
- Integrate into your existing network with standards-based dynamic routing and VPN tunnel support.
- Define policies through centralized, cloud-based management for easy deployment at scale.
- Add a second cellular modem for dual LTE or 5G connectivity.
- Add hardware redundancy by pairing mirrored routers with VRRP to optimize uptime.

Ideal for Wireless WAN

For an all wireless WAN, the E3000 Series router offers Gigabit LTE or 5G NR1 performance, which can support the throughput and service needs of an enterprise branch office or store with the ability to add a second LTE or 5G connection for increased available bandwidth and reliability. For organizations moving to a Wireless WAN, the E3000 Series router offers the ability to pair with a wired link and use LTE or 5G as a failover connection or a primary connection.

5G Performance Embedded or Optimized

The E3000 Enterprise Branch Router offers 5G performance in two form factors. As a router with embedded 5G, the platform ships standard with the modem as well as a second slot for dual modem capabilities. As a 5G-optimized LTE router, it has the ability to act as a controller for a Cradlepoint 5G Wideband Adapter so that the modem can be placed for optimal signal coverage. The unique capability of Cradlepoint to operate the adapter in captive mode means that the two separate, Ethernet-connected appliances can be managed as a single entity. The two form factors ensure 5G performance in the manner that best suits the deployment needs.

Performance

Stateful Firewall Throughput:	IPS Throughput:	Application Aware Services & Analytics	IPSec VPN Throughput:	Concurrent VPN Tunnels:	Concurrent Sessions (TCP):	Typical Client Count:
2 Gbps	1.5 Gbps	1.5 Gbps	400 Mbps	20	130,000	100

Performance testing was conducted based on requirements as defined in RFC2544 using fixed-frame 1518 byte packets. Throughput results reflect uni-directional UDP traffic with less than 1% packet loss as tested with wired connections.

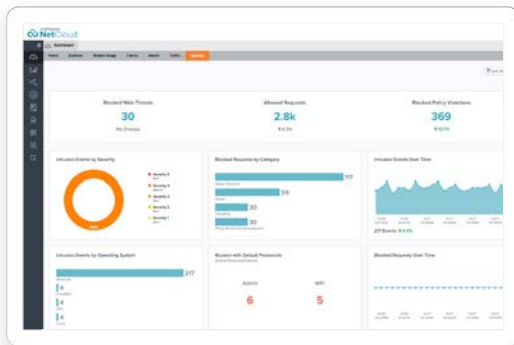

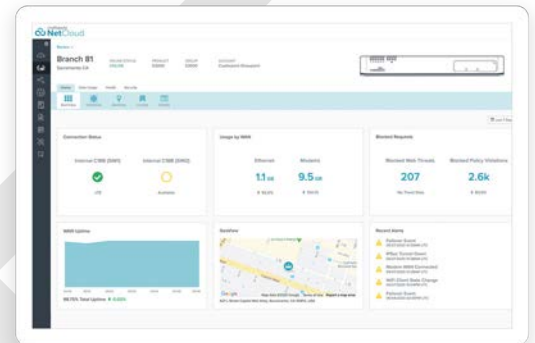

Results do not reflect performance of the cellular wireless operator networks.

Key Software Capabilities

The Cradlepoint NetCloud for Branch with E3000 Series Router provides everything needed to unlock the power of LTE or 5G at the network edge and connect users and IoT devices to critical applications and services. NetCloud includes routing, VPN, SD-WAN, and security capabilities for robust, enterprise-class performance. Cloud-based management designed for simplification, insights and scale includes group policy definition, reports, troubleshooting, and analytics dashboards. The service includes a warranty for as long as there is an active subscription on the router, online training, live and online support, and all software and firmware updates.

Router Services

The next generation hardware has the processing power to handle demanding router-delivered services, dynamic routing protocols, and application aware traffic steering, supported with our exclusive NetCloud Essentials + Advanced software package.

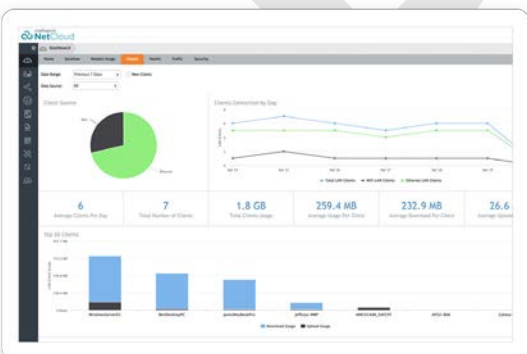

Security Services

NetCloud Essentials + Advanced packages include security features and options, such as stateful zone-based firewall, intrusion prevention, and threat protection, to optimize the E3000 series router to meet the evolving security needs of distributed environments. Additional security add-ons from leading technology partners make a rich security stack manageable from NetCloud.

Connection Manager

Connection Manager provides the ability to manage all WAN connections types, both wireless and wired, from a single software-defined policy. Our custom-built modem software ensures users establish Wireless WAN connectivity faster while maintaining the highest level of resiliency.

Cloud Services

NetCloud Manager delivers true zero-touch deployment with the ability to define and deliver policy across entire groups of endpoints. Users can create a cloud-orchestrated hub and spoke VPN network and gain insights and analytics required for rapid troubleshooting and diagnostic workflows.

Hardware Specifications

The following features are delivered through the hardware.

INTERFACES		ENVIRONMENTAL	
Modem:	One of the following: <ul style="list-style-type: none"> — Embedded 5GB Low/Mid-Band Modem <ul style="list-style-type: none"> — 4 x SMA cellular antenna connectors — Embedded C18B Modem <ul style="list-style-type: none"> — 4 x SMA cellular antenna connectors Optional dual modem: <ul style="list-style-type: none"> — Modular MC400 modem 	Temperature:	Operating: 0 °C to 50 °C (32 °F to 122 °F) Storage: -20 °C to 85 °C (-4 °F to 185 °F)

Ordering Guide

NetCloud Enterprise Branch Essentials packages and plans contain all the features and capabilities required for small to mid-sized branch applications. Essentials Packages include 24x7 support (phone support: 24 hour weekdays with emergency response on weekends, web: 24x7, chat: 24x5) and a limited lifetime warranty.

For additional capabilities, a **NetCloud Enterprise Branch Advanced Plan** can be added to the NetCloud Enterprise Branch Essentials Package at any time.

See additional details of what is included in the Essential and Advanced NetCloud software: cradlepoint.com/netcloud-service

For more details on the E3000 series router, included with the NetCloud Enterprise Branch Packages, see below.

Accessories

INCLUDED	PART NUMBER
One of the following power supplies:	
— Power Supply, 54V, 3.3A, 2x2 Large, 2 meters (most of World)	170751-000
— Power Supply, 54V, 3.3A, 2x2 Large, 2 meters (Mexico)	170751-001
C14 Line Cord (Qty. 1, varies based on the regional NetCloud package ordered)	N/A
Cellular Antenna, Charcoal, 600 MHz - 6 GHz, SMA (Qty 4)	170801-000
Wi-Fi Antenna, Charcoal, Dual-Band 2.4/5 GHz, RPSMA (Qty 4)	170836-000
Antenna Alignment Tool (E3000-C18B models only)	N/A
Wall Mount Screw Pack	N/A
Rack Mount Brackets	N/A
Rubber Feet for Desk Mounting	N/A
OPTIONAL	PART NUMBER
Power Supply C14 Line Cord Options:	
— Line Cord, U.S. (C14), 1.8 meters, North America	170671-001
— Line Cord, EU (C14), 1.8 meters, European Union	170671-002
— Line Cord, UK (C14), 1.8 meters, United Kingdom	170671-003
— Line Cord, AU (C14), 1.8 meters, Australia	170671-004
Enterprise Branch E3000 Cat 18 LTE Advanced Pro Modular Modem Kit [†]	BF-MC400-1200M-B
— MC400-1200M-B Cat 18 LTE Advanced Pro Modular Modem	MC400-1200M-B
— E3000 MC400-1200M-B Modem Door with Screw	N/A
— Cellular Antenna, Charcoal, 600 MHz - 6 GHz, SMA (Qty 4)	170801-000
Enterprise Branch E3000 Cat 6 LTE Advanced Modular Modem Kit [†]	BF-MC400LP6
— MC400LP6 Cat 6 LTE Advanced Pro Modular Modem	MC400LP6
— Cellular Antenna, Charcoal, 600 MHz - 6 GHz, SMA (Qty 2)	170801-000
Bluetooth Low Energy 5.1 (BLE) Module for E300 and E3000 Series Routers	BF-MC20-BT

[†] Refer to the [Cradlepoint MC400 Modular Modem webpage](#) for more information about modular modems.

Support & Warranty

The E3000 Series router is only sold as a component of NetCloud Branch Packages.

- NetCloud Packages include support for the full subscription term.
- All Cradlepoint hardware products are covered by a limited lifetime warranty for as long as they have a subscription license to an active NetCloud Service Plan.
