CATALOGUE

“L” before the Herd Book number indicates Pedigree Luig Male. “P” indicates Pedigree Luig Female. “A” indicates Appendix “A” Female. “B” indicates Appendix “B” Female. [P] After family name indicates: the animal is polled. “P/12345*” indicates dam classified, and L/12345# indicates that the sire has passed a breed inspection. All bulls entered have been inspected by the Fieldsman. “SV” after the name indicates that the animal has been sire verified by DNA hair sample.

CONDITIONS OF ENTRY

1. The Sale is conducted under the “General Conditions of Sale” which are exhibited in the Market and in accordance with the Regulations as approved by The Luig Cattle Society Limited.
2. Please note: Stock will be sold as they appear in the ring. Any prospective buyer wishing to purchase one of a pair must consult the vendor prior to them entering the ring to see if they are prepared to sell them as singles.
3. **All bulls will be subject to the Society’s upset price of 2,000gns.**
4. There will be no transfer fee for bulls or heifers bought at official Society Sales.
5. All Luig Cattle Society Sales are conducted under the National Beef Association terms and conditions of sale incorporating bull breeding and female breeding warranties. To cover the cost of the warranty service detailed on the following page, a charge of £4.00 + vat per bull and £2.00 + vat per female will be split equally between purchaser and seller, applied by the Auctioneer at the point of sale.

HEALTH INFORMATION

Since 2010 all official Luig Cattle Society Sales are run under the same health rules and are therefore BVD-safe. All stock must come from herds which are members of a CHECS approved health scheme and are either BVD accredited free or the sale stock have tested virus negative. Additionally all stock forward are vaccinated against BVD. For herds testing for Johnes’s, the Risk Level categories are displayed and are defined as follows:

Status	Level
Risk Level 1	This is directly equivalent to the previous CHECS Accredited Free status. Level 1 status is associated with the lowest risk source when buying in stock. Health plan required.
Risk Level 2	Herds with level 2 status have had one or two clear consecutive herd tests. Health plan required.
Risk Level 3	Herds with level 3 status have reactors identified at the annual herd test, but these are no more than 3% of animals tested. Health plan required.
Risk Level 4	Herds with level 4 status have reactors identified at the annual herd test, and this amount to more than 3% of the animals tested. Health plan required.
Risk Level 5	Any herd that is not carrying out the required testing or does not have a suitable health plan in place falls into this category. Level 5 status is considered to be the greatest risk source when buying in stock.

NBA BREEDING WARRANTIES

The following points should be noted:

Bull Breeding Warranty

Each bull is sold with the warranty by the vendor that it is capable of getting stock by natural service. This shall be deemed to be fulfilled as soon as six females or 50% of the herd (whichever is the lesser number of the animals put to the bull) are in calf to the bull by natural service subsequent to the sale. The trial period is six months from date of sale or within 6 months of attaining the age of 14 months, whichever is the later.

Female Breeding Warranties

Maiden Heifers: Every maiden heifer over the age of twelve months at the date of sale is sold with warranties by the Vendor

- That it shall be fertile up to the age of twenty-eight months
- That it is not in calf

Females in Calf: Every cow or heifer stated in the Sale Catalogue or by the Auctioneers at the time of the sale to have been served on a date not less than twelve weeks before the date of the sale is sold with warranties by the Vendor

- That it is in calf
- That it is in calf to the bull described in the Sale Catalogue, or by the Auctioneers at the time of the sale
- That the expected calving date will be within a period of 263 to 303 days of the service date

Females with veterinary surgeon's certificate of positive pregnancy diagnosis: Scanning is a matter of opinion and not a warranty. Every cow or heifer stated in the Sale Catalogue or by the Auctioneer at the time of the sale to be sold with a Veterinary Surgeon's certificate of positive pregnancy diagnosis is sold with the same warranties by the Vendor as described for Females in Calf (above). Please note time limits below.

Claims and Time Limits

A claim by a purchaser will only be valid if the purchaser has given notice in writing to the Auctioneers of the intended claim with following time limits:

Bull - Within six calendar months from the date of the sale.

Maiden Heifer or recently served heifer –

- Within three calendar months from the date of the sale or
- Within one calendar month from the date when the heifer attains the age of twenty-eight months whichever is the later date.

Cow or heifer sold as being in-calf or as running with the bull and which proves not to be in-calf:

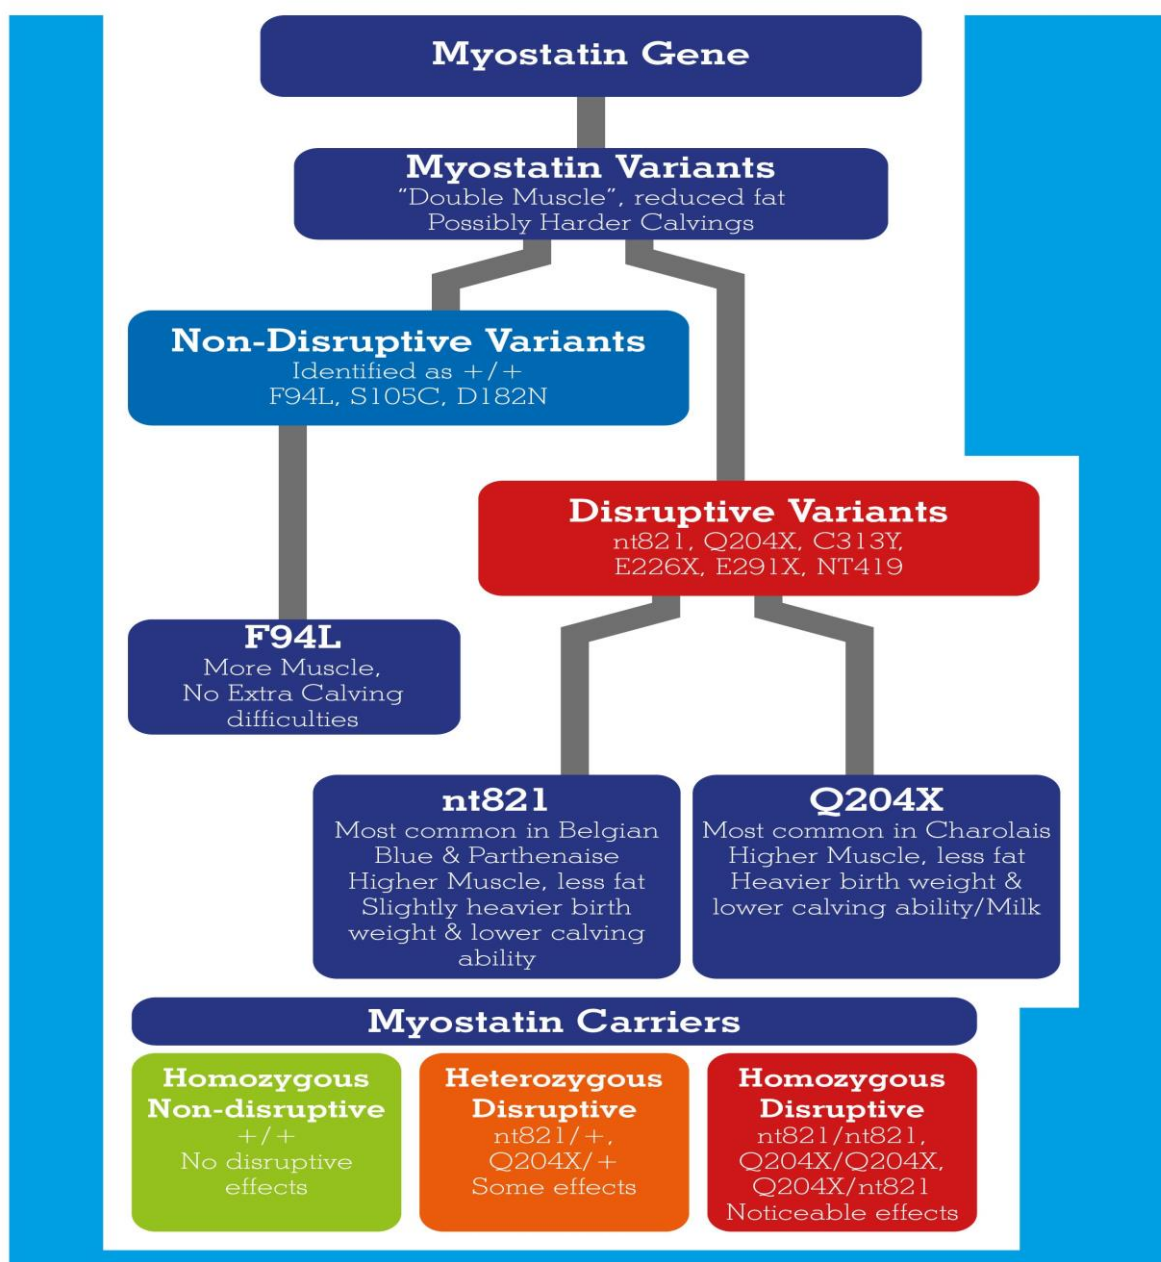

- Within twenty-eight days from the date of the sale.

Extending the breeding warranty

If it is found impracticable to try the bull/female fairly within the time limits stated, due to the purchaser's normal calving programme, the purchaser shall (at the discretion of the vendor), **ON THE DAY OF THE SALE**, or within the next seven days, give the auctioneer notice **in writing** of the month in which it is proposed to commence using the bull/running the heifers with a bull.

Myostatin – variants and use in your breeding programme

The Luing Cattle Society has embarked on a program of DNA testing using 50K SNP technology. The aims are to begin to catalogue the service sire population so that sire verification for all animals is possible within a few years. Within a small population it is even more important to be confident in the genetics that you purchase and use within your herd. Additionally, the LCS has taken the opportunity to explore the prevalence of the Myostatin gene (expressed in 9 different possible variants) within our population. It is not possible to report on a full set of results yet, but early indications are that the Luing has only F94L variant present in its population, at a prevalence of circa 17%. The following diagram explains the various types of Myostatin and provides some clarity around both the non-disruptive type (F94L) and the disruptive types (NT, Q etc). The F94L variant is found in many UK beef breeds, including the Shorthorn population. Myostatin results have not been automatically published in this catalogue, because we do not have a full set of results at the time of print to be able to offer all vendors the same opportunity.

PEDIGREE LUING IN-CALF HEIFERS

MR J LODER, UPPER CHATTO

LOT 1 UPPERCHATTO XABELLE P/48782 (UK561971/101030) (X30) Red, Polled, 08 Feb 2018

WALLETS MARTS CASTLE DOUGLAS LIMITED

“The Premier Market for the Premier Sale”

WALLETS MARTS are honoured to be official auctioneers to the Luing Cattle Society and this year will host the 56th Annual Show and Sale of 162 Luing Cattle at Castle Douglas on Friday 5th February 2021. With top quality consignments forward from all the leading breeders' prospective purchasers are presented with an unsurpassed opportunity to source their suckler replacements. This sale is considered to be BVD Safe and all stock comes from herds which are members of a CHeCS accredited health scheme and are either BVD accredited free or the sale stock have tested negative for the virus. Additionally, for the convenience of the purchaser, all stock forward are vaccinated against BVD. All health information, including Johnes risk level and TB status can be found in the index in the front of the catalogue. Haulage and after sale lairage can be organised by the auctioneers if required.

New Market Street, Castle Douglas, DG7 1HY
