How to pair your Belkin AUD002 with your wireless device

The **Belkin AUD002** is a 3.5 mm *Bluetooth*® 5.0 headphone that is made for kids. It is designed to work with the most popular distance learning applications. It features up to 30 hours of continuous audio playback time from a battery at 100% charge at 50% volume, and it has a built-in microphone for video and phone calls. It can be used either through a wired or wireless connection via Bluetooth within a 30 ft connection range.

This article will show you how to pair your headphone with a wireless device.

1. Press the power button on the headphone for 2 seconds.
2. On your mobile device, turn ON Bluetooth to begin searching for nearby devices. Note that steps in enabling your Bluetooth may vary depending on your device's operating system.
3. Wait until the blue light flashes on your headphone, which means that it is pairing with your device. The blue light will turn solid and then turn OFF, indicating that the headphone is now paired with your wireless device.

How to reset your Belkin SOUNDFORM™ Mini Wireless On-Ear Headphones for Kids

The **Belkin SOUNDFORM™ Mini Wireless On-Ear Headphones for Kids** is a 3.5 mm *Bluetooth*® 5.0 headphone that is made for kids. It is designed to work with the most popular distance learning applications. It features up to 30-hour continuous audio playback time from a battery at 100% charge at 50% volume, and it has a built-in microphone for video and phone calls. It can be used wired or wirelessly through a Bluetooth connection within a 30-ft range.

The steps below will show you how to reset your headphone.

Step 1:

Press and hold both the + and - volume buttons on the headphone for 10 seconds. The power light will blink red.

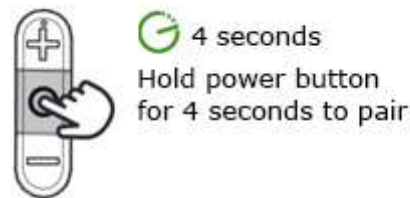

Step 2:

Wait until the power light blinks blue three times, and then turn OFF.

Step 3:

Press and hold the power button for 4 seconds. Your headphone should now be ready to pair again.

You have now successfully reset your headset.
