FUJITSU Display P2410 TE

Widescreen 60.5 cm (23.8 inch) superior display
The heart of smart workplaces

The FUJITSU Display P2410 TE is an IPS-based widescreen display that combines smart workplace concepts with advanced ergonomics. It comes with a multi-functional USB Type-C hub that makes it ideal for modern and shared workspaces.

Multifunctional USB Type–C means:
- 95W power delivery for external devices
- Transmission of video signals, data, LAN & audio

It contains a Fujitsu patented solution that generates an All-In-One user experience with Mini PC ESPRIMO G and LIFEBOOK series.

The factory pre-calibrated display provides high color fidelity for single as multi-monitor usage.
KVM function reduces USB hardware needs by using one display for a number of devices.

Fujitsu innovated the display housing by offering the worldwide first right-hand USB hub that ensures an optimal cable course and is ergonomically perfect for most users.

Retina protection by low blue light panel that culls damaging blue light without any loss or changes of color.
The integrated Autobrightness sensor adapts the brightness of the display to an optimum, saves energy and increases constant productivity due to reduced eye strain.

DisplayView™ software enables you to configure your monitor easily for remote management and administrative tasks.
Prolonged product lifecycle through feasible firmware updates done by the user.

Focusing on environmental friendliness, the packaging is styrofoam free and solely consisting of cardboard, which is more than 90% recycled.
