

QNAP

ConnectX-4 Lx

Introducing the QXG-25G2SF-CX4
25GbE Network Expansion Card

NEW

01

QNAP 25GbE PCIe Expansion Card

02

**Mellanox SN2010 25GbE/100GbE
Management Switch**

03

**QNAP NAS X 25GbE card X
25GbE/100GbE switch**

QNAP

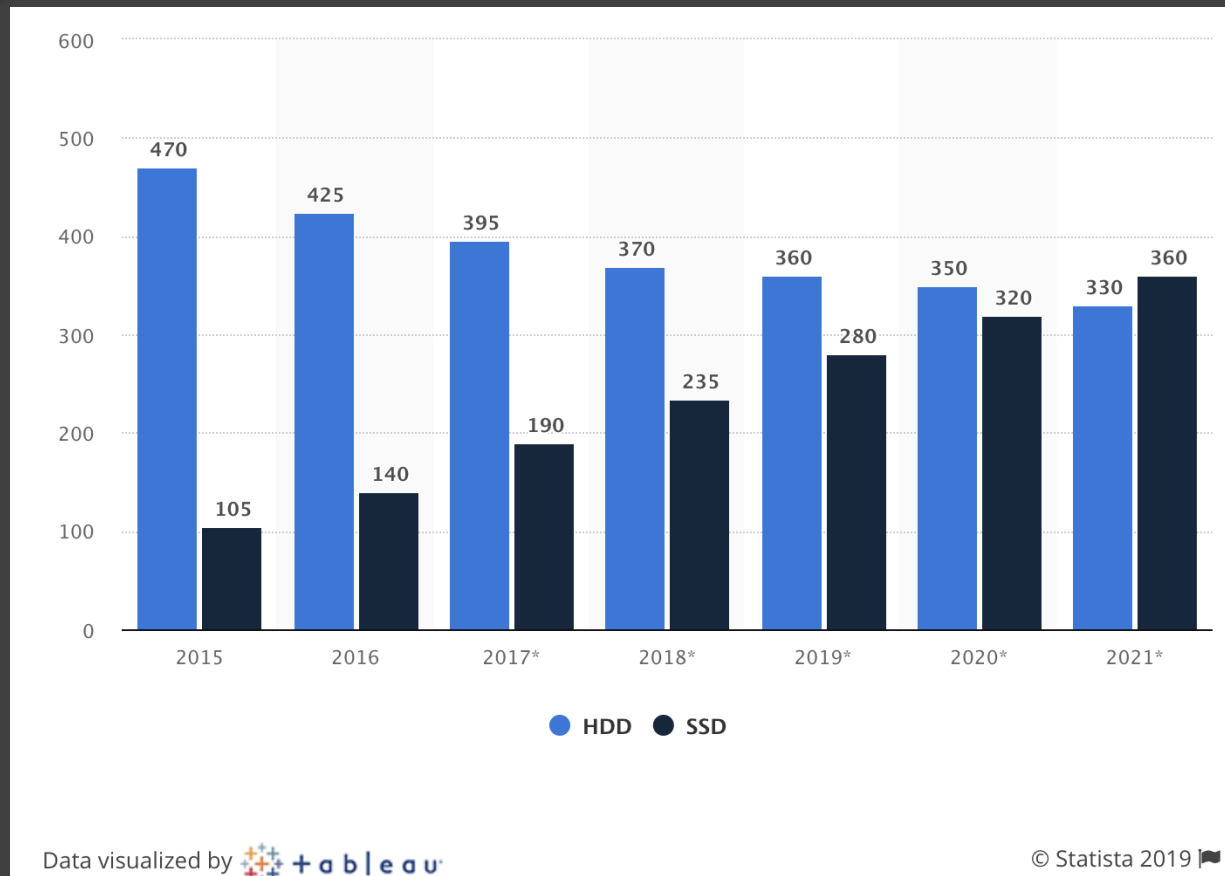

Over 10GbE: QNAP 25GbE PCIe expansion card

Fast Growing market and technology of SSD

Shipments of hard and solid state disk (HDD/SSD) drives worldwide from 2015 to 2021 (in millions)

<https://www.statista.com/statistics/285474/hdds-and-ssds-in-pcs-global-shipments-2012-2017/>

10GbE is not enough for Multi users

10GbE throughput

10GbE throughput

10GbE throughput

PC/work station

10GbE Card

(1) NVMe SSD or (2) Enterprise SATA SSD (SLC/MLC)

SSD cache

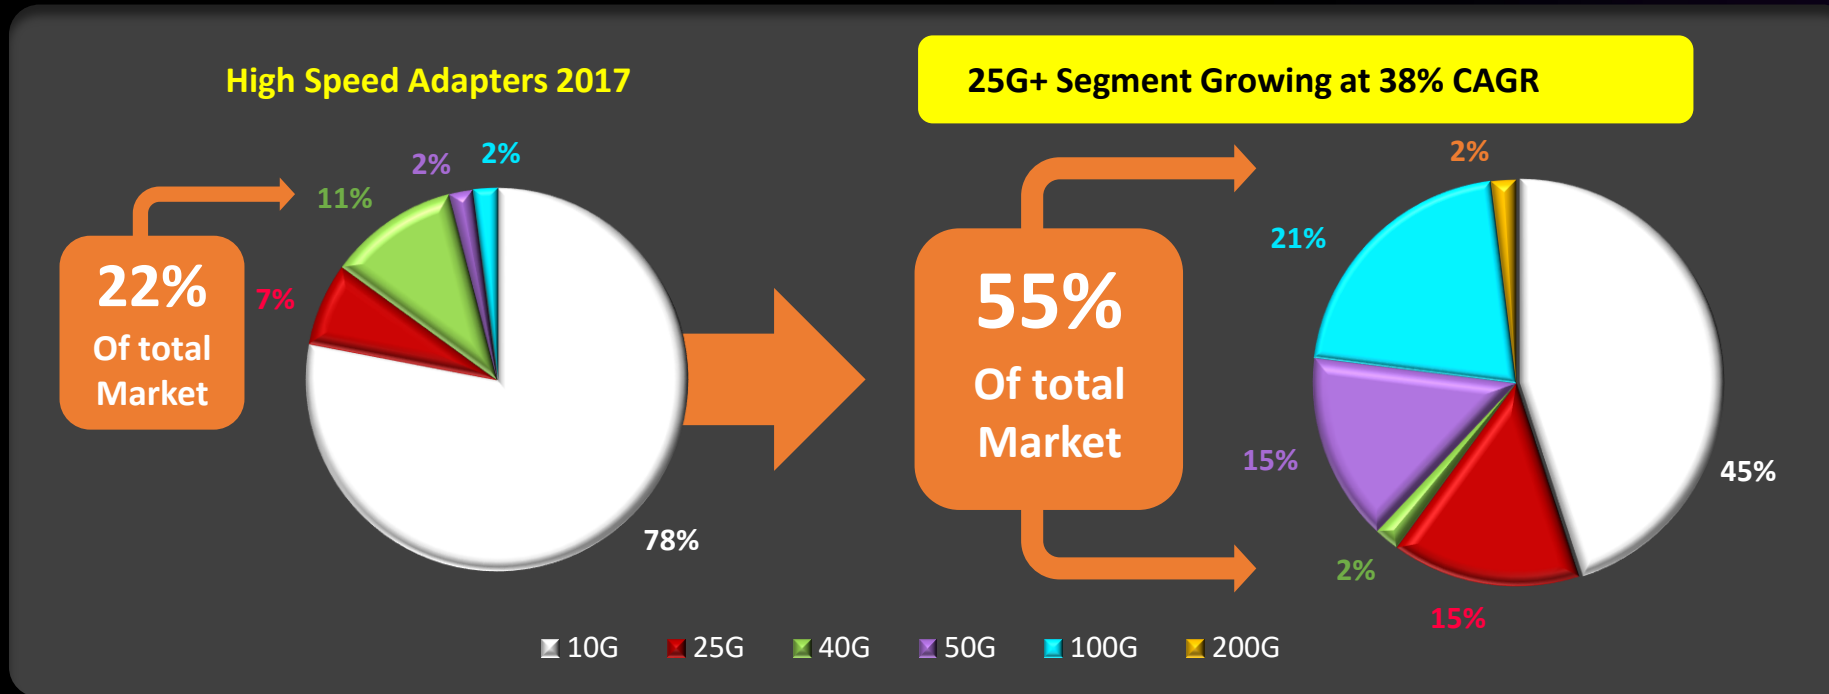

Qtier

25GbE+ networking card market

- 25GbE+ market is estimated to grow up from 22%(2017) to be doubled to 55%(after 2018)
- For future cloud applications, Big data, High speed storage, Virtualization technologies and A.I.

Source: Mellanox

QNAP 10GbE/25GbE High speed card

QXG-10G2SF-CX4

Dual port 10GbE SFP+ Half-height card

- 2 x SFP+ connectors
- Supports 10GbE Transmission

QXG-25G2SF-CX4

Dual port 25GbE SFP28 half-height card

- 2 x SFP28 connectors
- Supports 25/10GbE Transmission

Mellanox

ConnectX®-4 Lx networking chip

- Supports iSER/RoCE

Hardware specification

Dual port 25GbE/10GbE connectors

Cooling heatsink and fan

PCIe Gen3 x8 interface
Provides maximum **64Gbit/sec bandwidth**

Low profile bracket is installed when ship
Full height and QNAP flat bracket is bundled

25GbE SFP28 DAC cable

10GbE SFP+ DAC cable

Go with QNAP high end NAS to experience high speed throughput

TS-x83XU

1U: Gen3 x16 (CPU)
2U & 3U : Slot 2 with Gen3 x8 (CPU)
4U: slot 4 with Gen3 x8 (CPU)

TS-x77XU

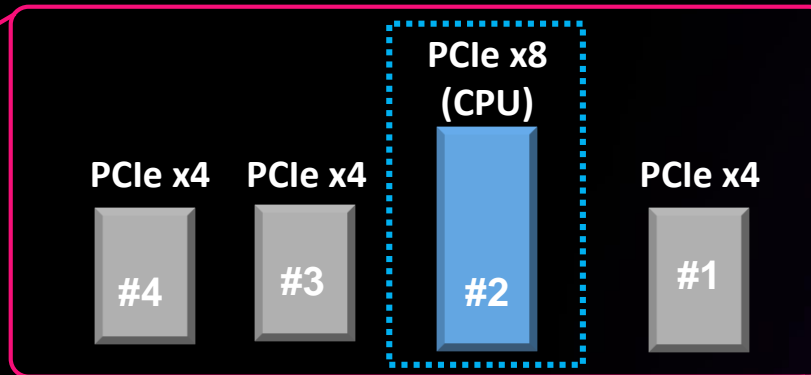

1U: Gen3 x16 (CPU)
2U & 3U : Slot 2 and 4 with Gen3 x8 (CPU)
4U: slot 2 and 3 with Gen3 x8 (CPU)

TVS-x72XU

1U: Gen3 x16 (CPU)
2U & 3U : Slot 2 with Gen3 x8 (CPU)
4U: slot 4 with Gen3 x8 (CPU)

TS-1283XU

*The PCIe bandwidth will drop to Gen3 x4 when another card is installed on next slot

Supporting QNAP models

QXG-10G2SF-CX4

QNAP X86 models which attaches at least one PCIe Gen2 x2 above PCIe slot
(Suggest to install on models with **Gen3 x4**)

TS-x73

TVS-x73e

QXG-25G2SF-CX4

QNAP X86 models which attaches at least one PCIe Gen3 x4 above PCIe slot
(Suggest to install on models with **Gen3 x8**)

TS-x83XU
TVS-x72XU
TS-x77XU

TVS-x82

TS-x77

Supporting O.S.

- QTS 4.3.6 and latter
- Window/Linux: Driver is required to install on your PC/workstation

*Please check the compatibility list

Offload tasks from CPU with iSER

25GbE X iSER Broadcast
is coming soon!

- iSER allows data to **bypass general network drivers, the socket layer**, and to directly enter memory buffers of the server and storage.
- Increasing performance, lower CPU loading

25GbE Performance Demo-AJA

TS-x83XU

PC:
Intel (R) Core(TM) i7-6700 3.40GHz.
Windows 10, 64GB RAM, QXG-25G2SF-CX4 on board,
Samsung SSD 960 PRO 1TB NVMe

NAS:
1283XU. Intel(R) Xeon(R) E-2124 CPU @ 3.30GHz.
QTS 4.3.6.0805, 4GB RAM, QXG-25G2SF-CX4 on board,
Samsung SSD850 Pro 512GB*12 (RAID 0)

25GbE High speed throughput-File drag and drop

Speed : 962 MB/s

Speed : 0.98 GB/s

Speed : 940 MB/s

- Recommended PC/ Workstation spec
- Intel x86 i5/i7(or same level) above
 - Minimum Basic clock rate :3.3 GHz
 - NVMe SSD

2.9GB/s

- Recommended Server spec
- QNAP Intel X72 / AMD x77 above
 - 12 x enterprise SATA SSD, RAID5 or RAID10

QNAP

Mellanox SN2010 25GbE/100GbE Management Switch

Spectrum the Best ESF Switch – SN2010

Ethernet Storage Fabric needs dedicated ESF switches

Physical

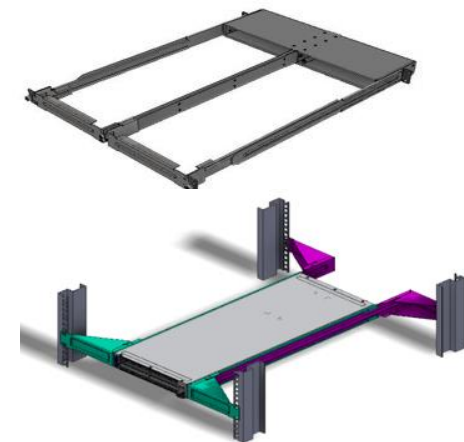

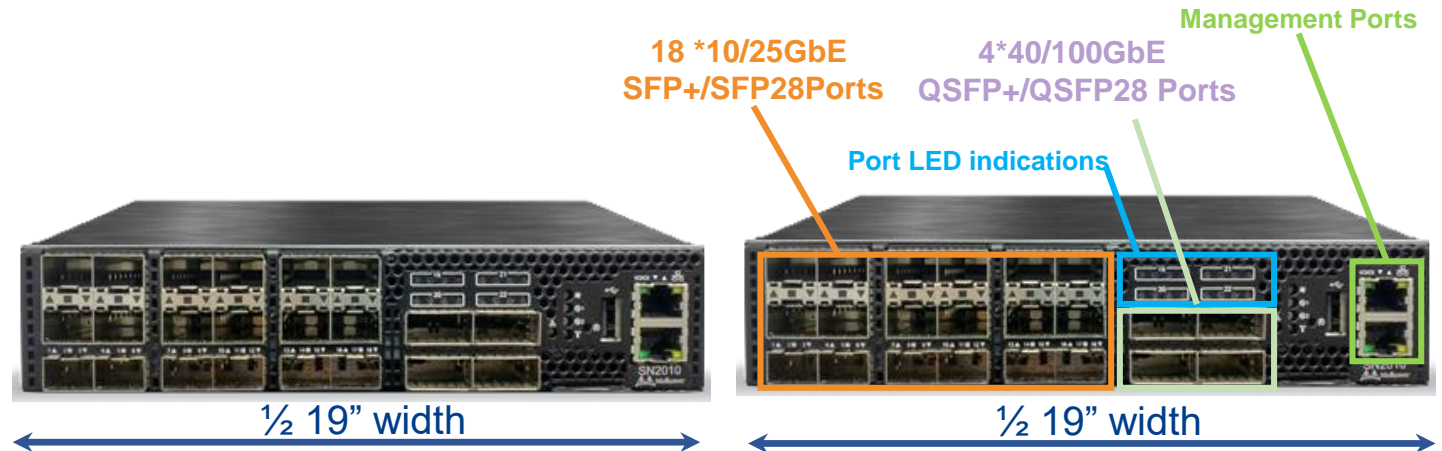

- 18 x SFP+/SFP28 ports
- 4 x QSFP/QSFP28 ports
- ½ 19" width, 1RU height
- 57W typical power consumption (ATIS)
- Weight: 4.5Kg
- Power supply redundancy
- Management port
- Rail kit for 2 x SN2010 in 1RU, 19"
- x86 Quad core Atom CPU
- 8GB RAM, 16GB SSD

Performance

- 2.52Bpps -> Zero Packet Loss
- 300ns latency

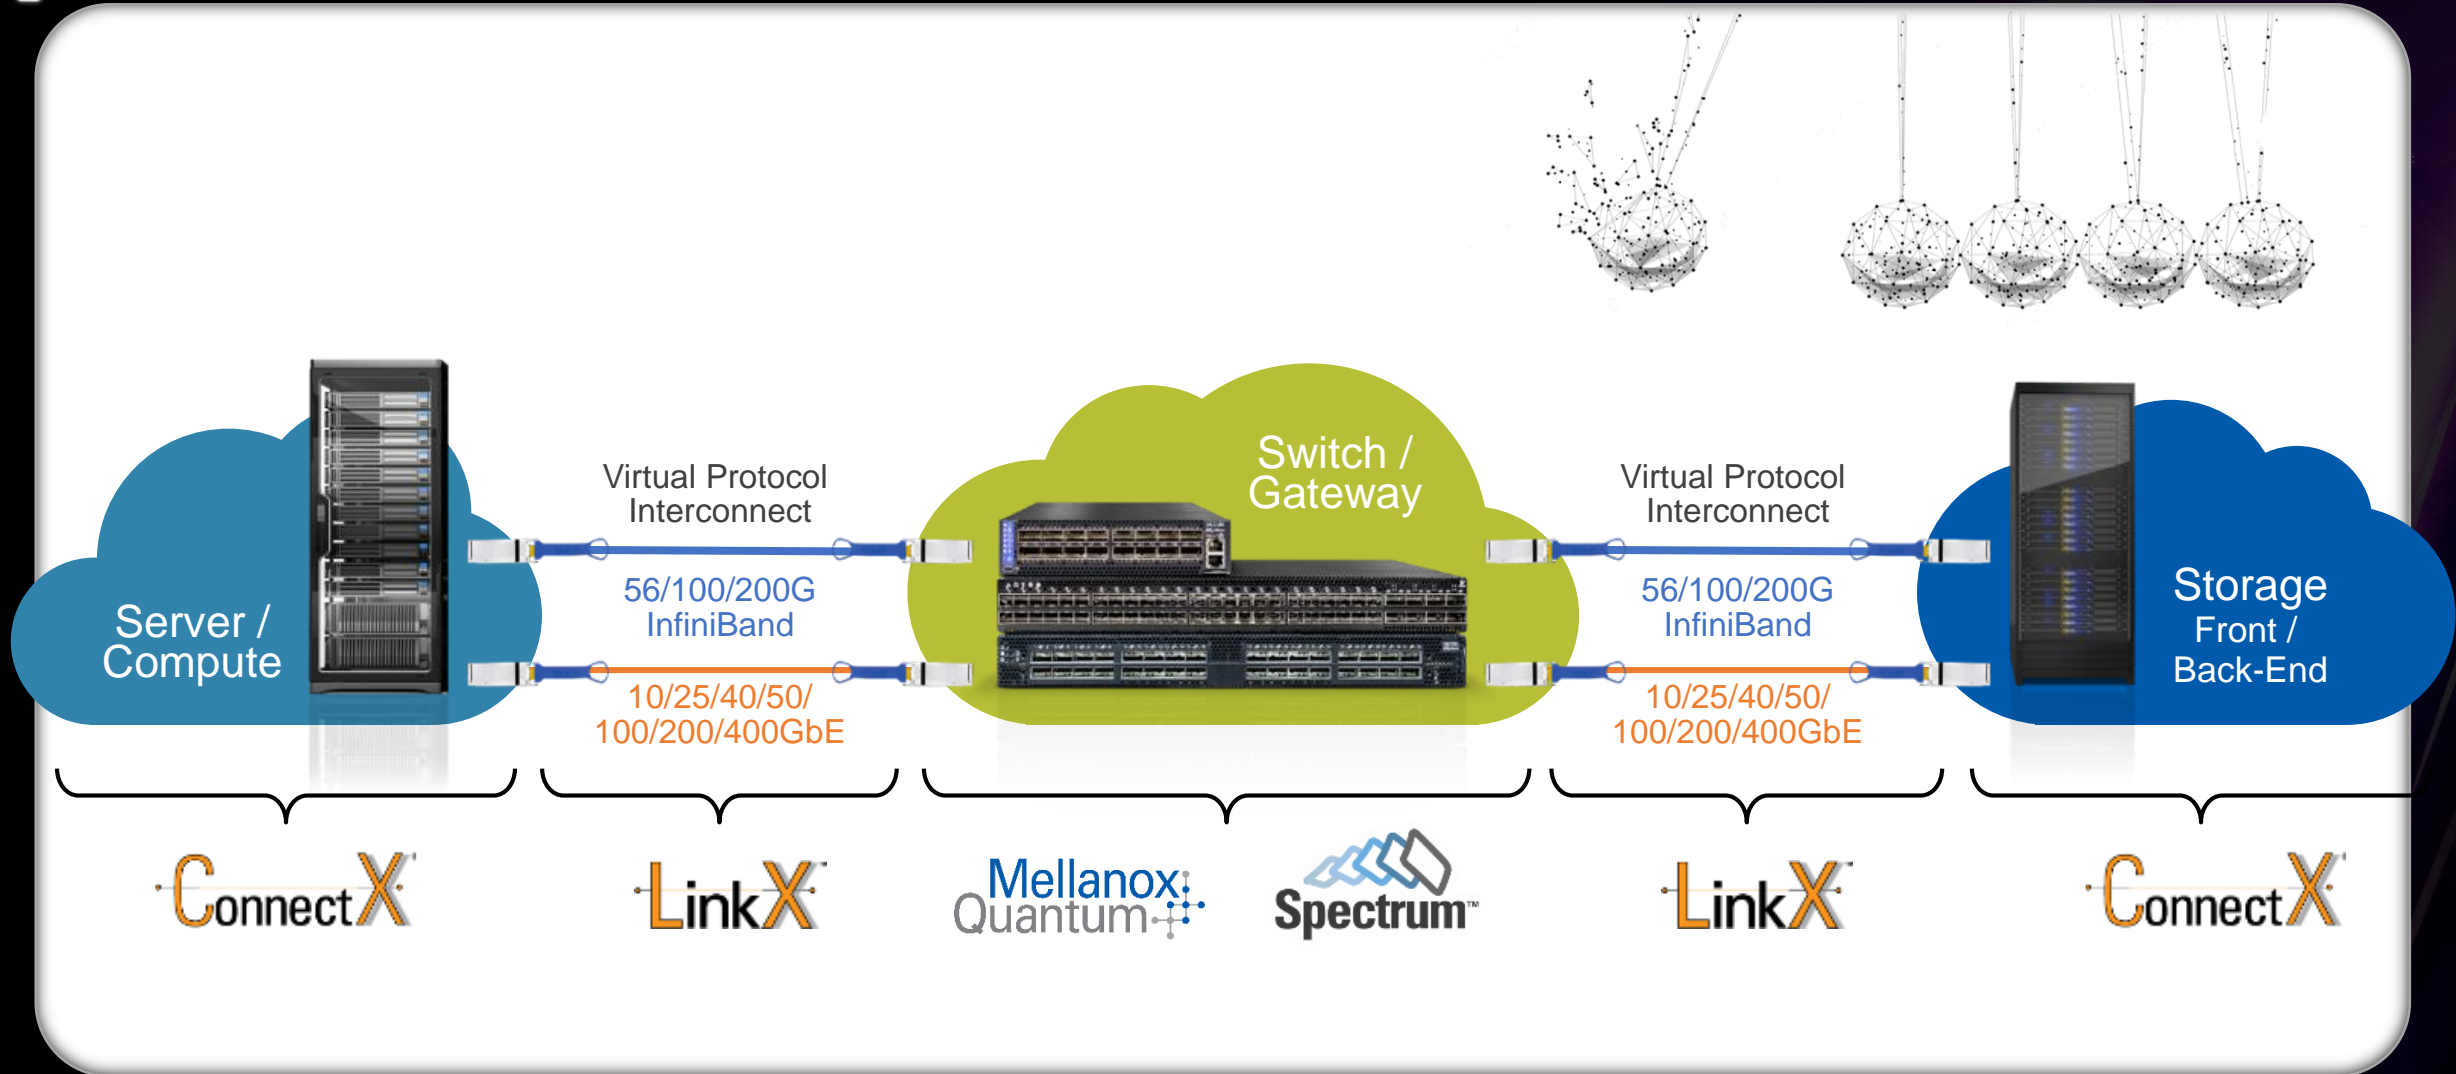

Network OS

- Mellanox Onyx
- Cumulus Linux
- ONIE Version for coming Oss

Leading Supplier of End-to-End Interconnect Solutions

Today's Storage Landscape

STORAGE ICEBERG

PRIMARY STORAGE

- Traditional SAN
- 20% of capacity

SECONDARY STORAGE

- 80% of capacity
- Rapid growth
- Diverse data types
- Scale-out, Ethernet-based
- Tiered storage

The Storage World is Changing

Changes

Effects

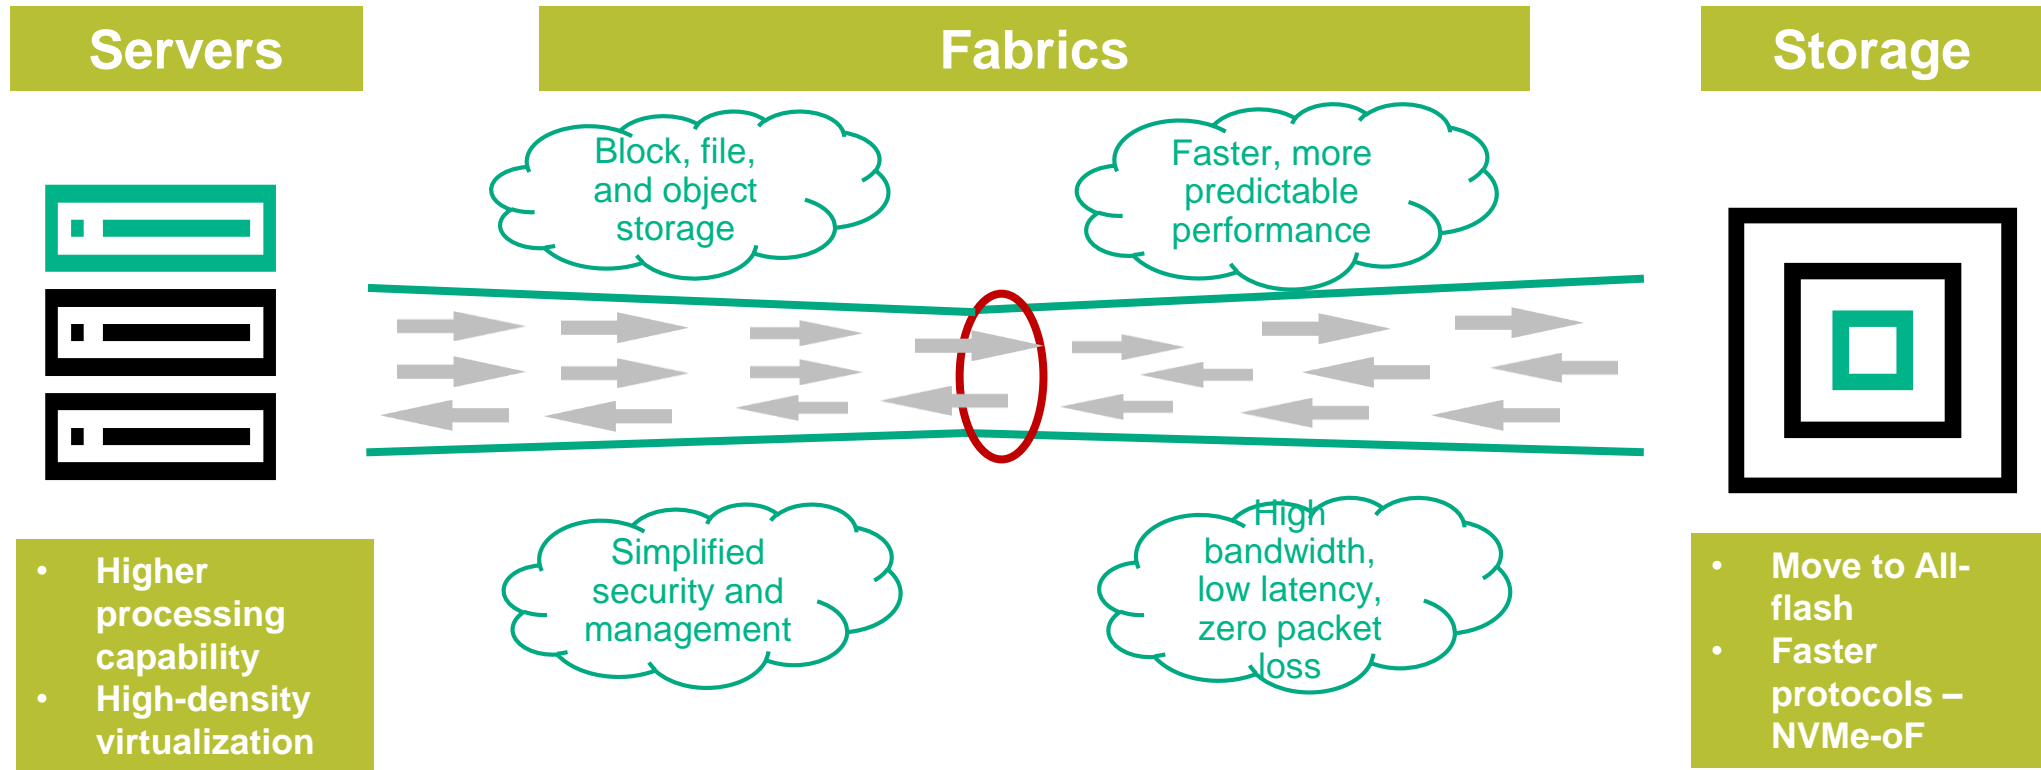

Flash, Faster servers		Faster networking; 10/25/40/50/100GbE
Social/Mobile/Video		Huge data growth; more file and object content
Hyperconverged		Distributed “Server-SAN” on Ethernet
Cloud		Virtualization, software-defined, price pressure
Big Data		File and distributed storage
Distributed applications		More east-west traffic

Bottom Line: More Ethernet Storage Traffic

ESF Re-defining the Modern Data Centers

Predictable Performance, Deterministic & Secure Fabrics

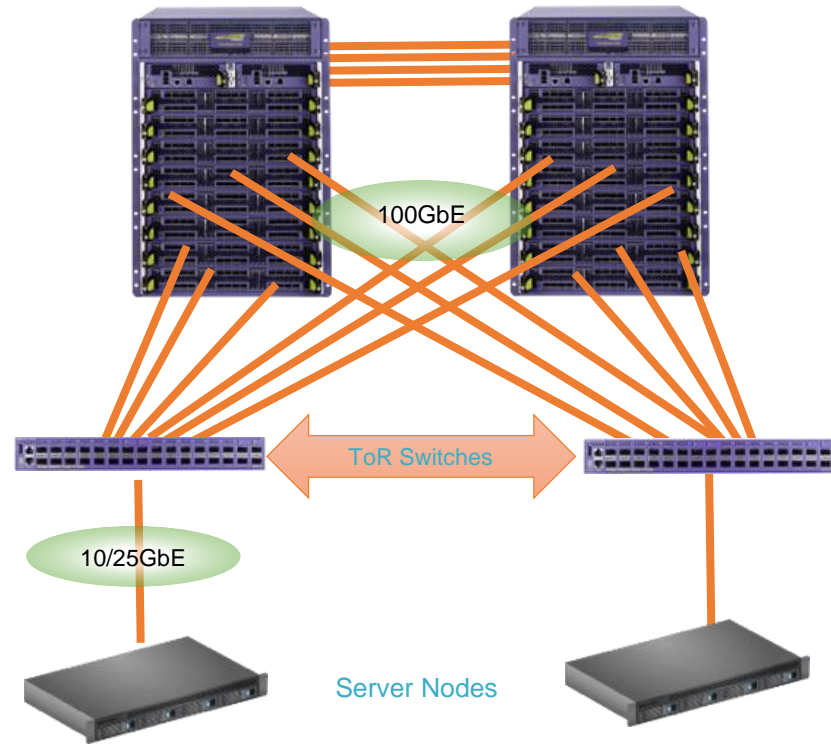

Data Center modernization requires a faster, lossless Ethernet Storage Fabric

From Chassis to Leaf/Spine

Same Cable/Optic/Port Count
Superior Price & Performance

Scale Up Network

Full Rack

Multiple Racks

Leaf /Spine
Scale Out Network

Why Cloud Data centers move to 25GbE?

10/40GbE Challenges

- Cloud Data Center need larger pipes
 - Access to Storage
 - Increase of East-West Traffic
 - VM (Virtual Machine) migration is data intensive

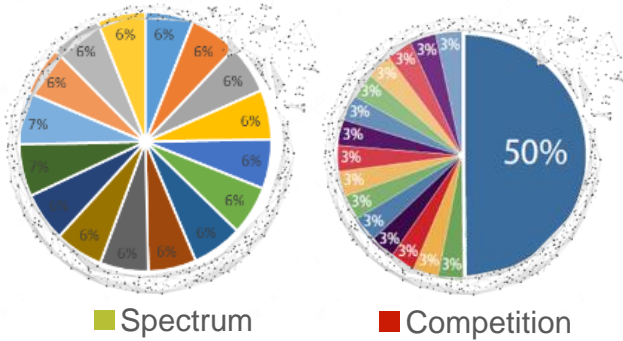

25/100GbE Value

- Delivers 2.5 MORE
 - 2.5X higher throughput
 - 2.5X the bandwidth for 1.25X the price
- For 2.5X lower CAPEX
 - Fewer optics/cables
 - Fewer spine switches
- Future proof
- Similar Cost / Power

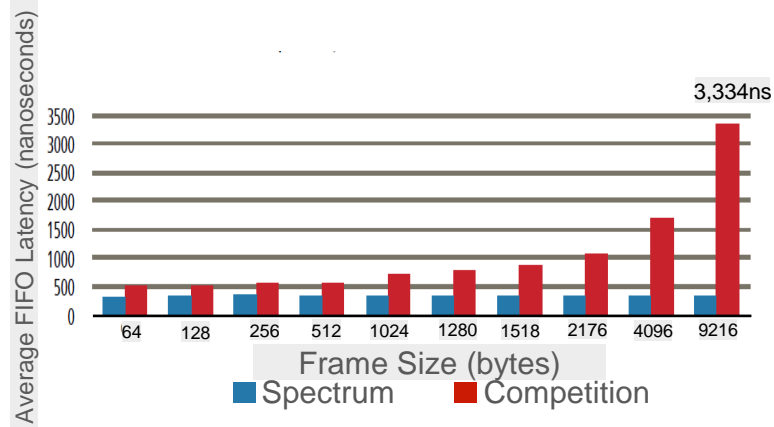

Spectrum - Fair & Predictable High Performance Switch

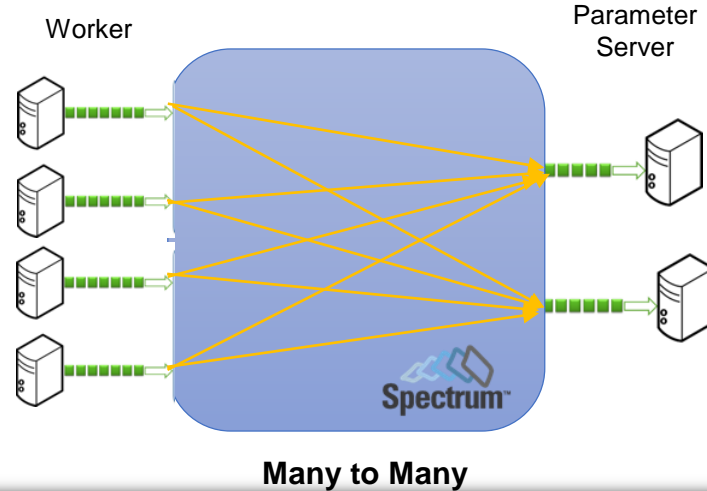

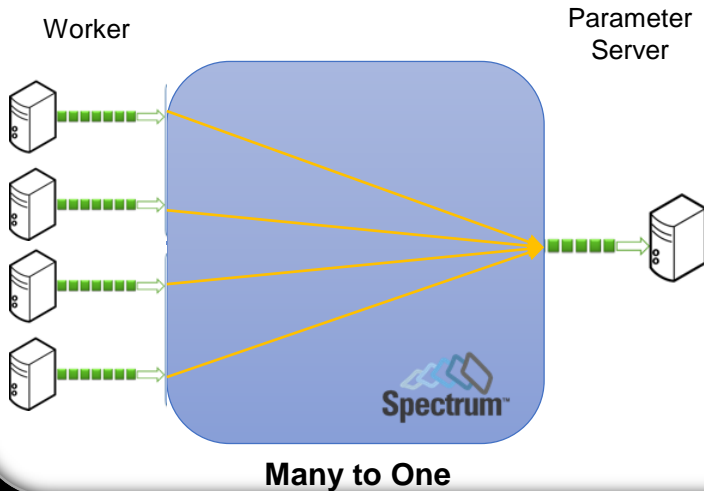

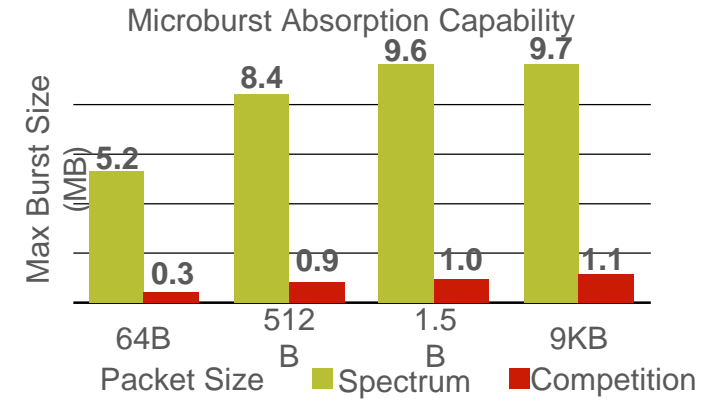

Fairness & QoS

Guaranteed Low Latency

Congestion Management

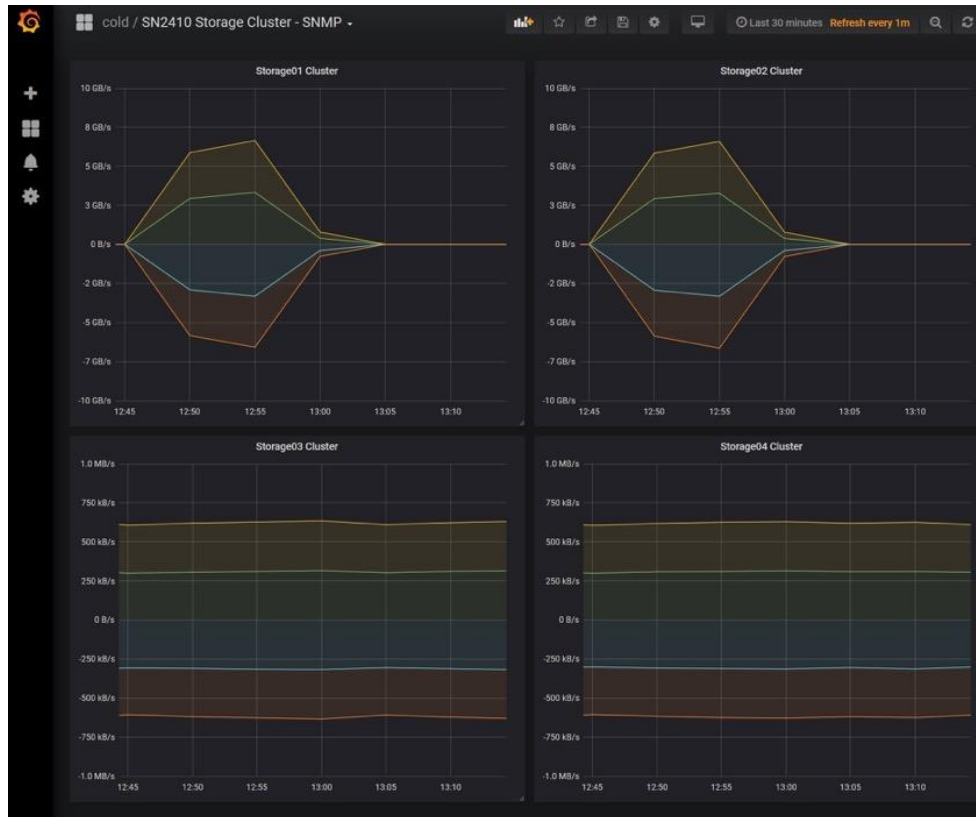

NIC + Software latency: TCP -> 6us; RDMA -> 1us
 Spectrum latency @ 3 hops: < 1us
 Other switch latency @ 3 hops: > 10us

Why Network Telemetry?

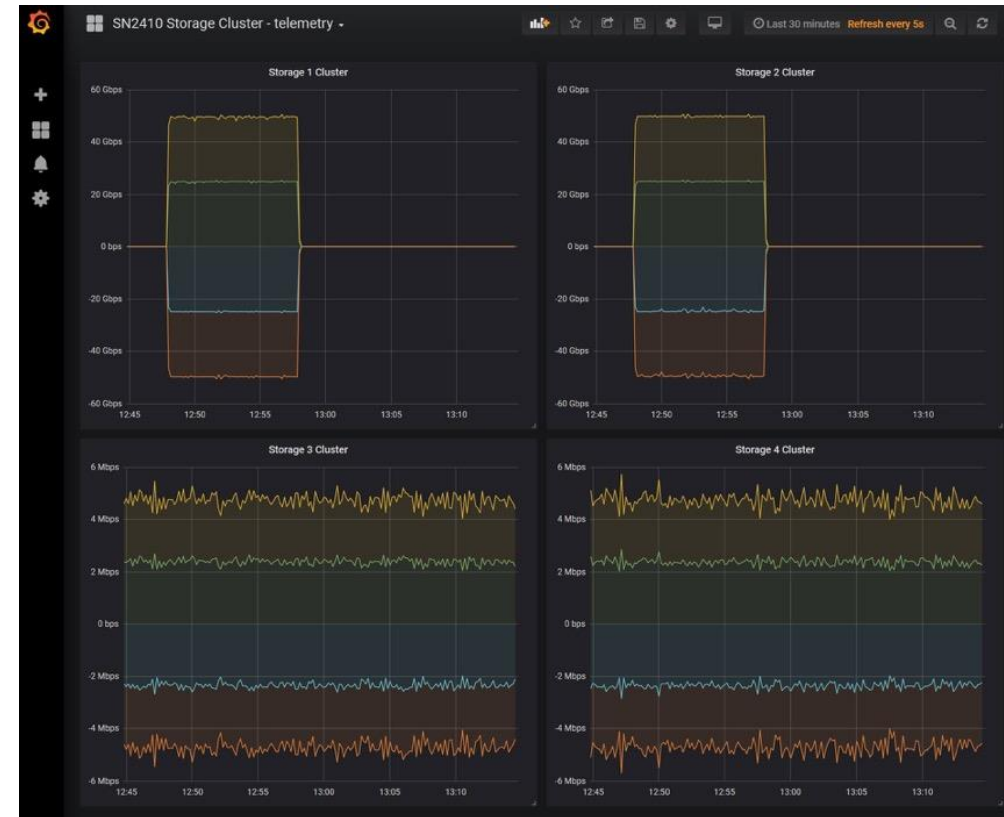

Before data flow

SNMP

Real time Data flow

Telemetry

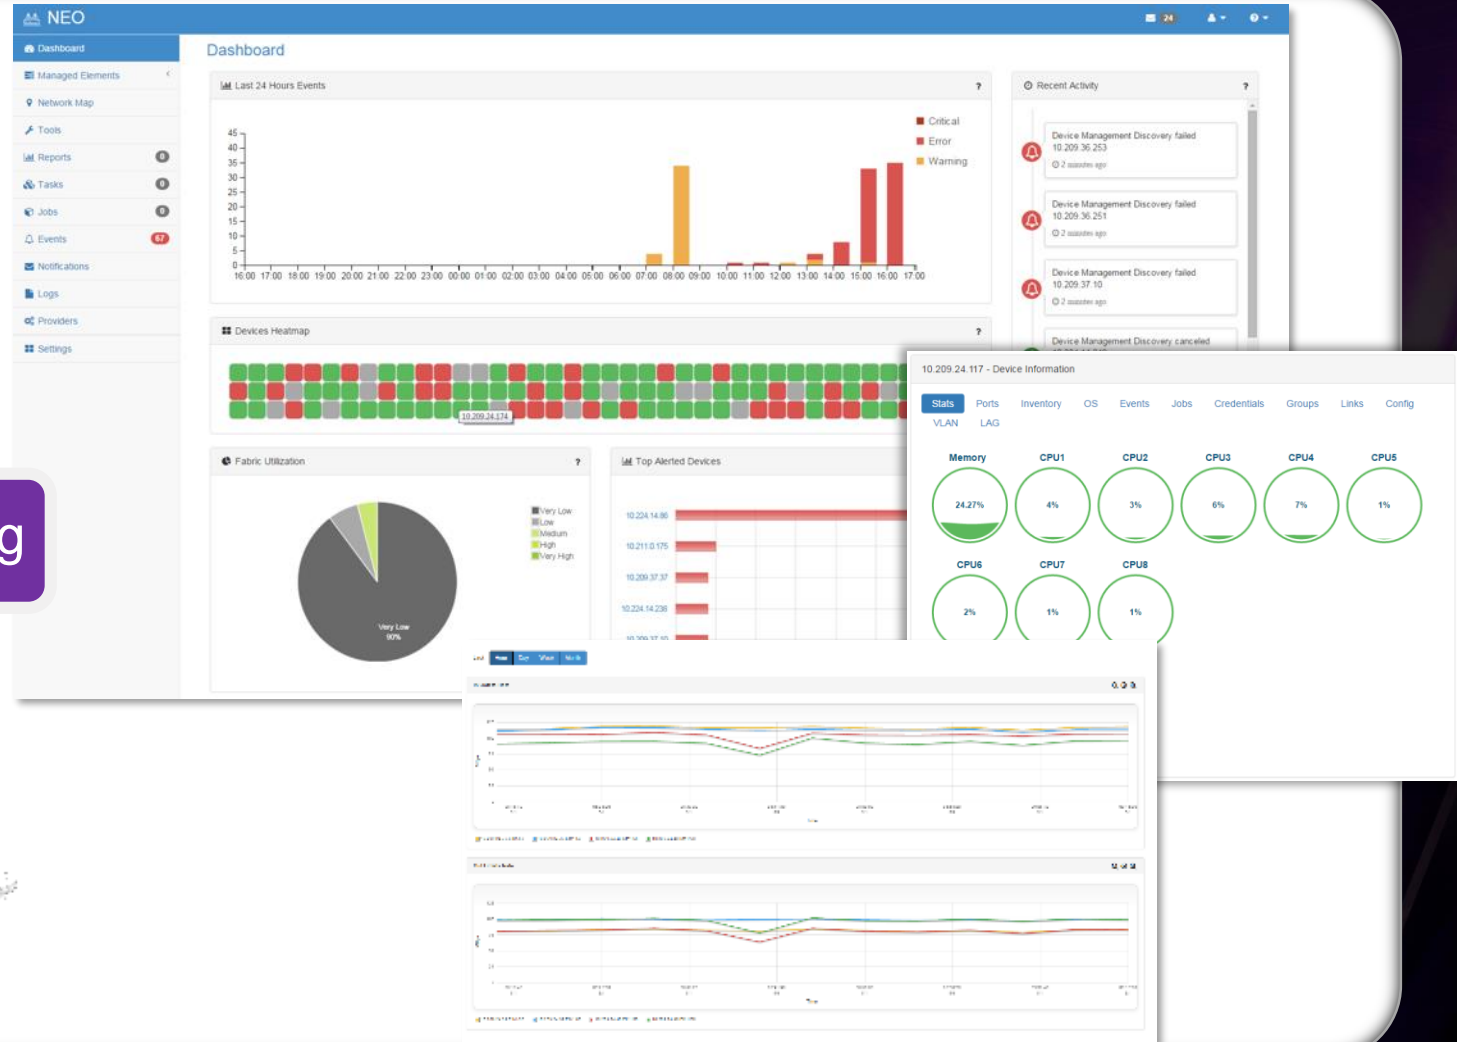

Mellanox NEO

Simplified deployment

Diagnostics and troubleshooting

Stay Competitive

Mellanox NEO - at a glance

The screenshot displays the Mellanox NEO Network Map interface. The top navigation bar includes 'Dashboard', 'Managed Elements', 'Network Map', 'Services', 'Configuration Management', 'Telemetry', 'Network Health', 'Tasks', and 'Jobs'. The main area shows a 'Network Map' with two 'Onyx' nodes connected by a line, both labeled with IP address '10.12.96.228'. Below the map, there are two tables: one for system properties and one for error statistics. A 'Cable Info' section is also visible, providing detailed information about the cable connecting the nodes.

Property	Eth1/31	Eth1/31
System	10.12.96.228	10.12.96.222
MTU	9216	9216
Active Speed	100 Gbps	100 Gbps

Error	Eth1/31	Eth1/31
System	10.12.96.228	10.12.96.222
In Discards	0	0
Out Discards	0	0
In Errors	0	0
Out Errors	0	0
Symbol Error	0	0

Property	Value
Cable And Module Type	Passive copper cable
Identifier	QSFP28
Length	1m
Part Number	MCP1600-C001
Revision	A2
Serial Number	MT1622VS02834
Supported Speeds And Type	100GBASE-CR4
Vendor	Mellanox

Extended NEO visibility with Mellanox cables information, including cable's serial number, part number, type, length and revision.

Invisible Infrastructure with QNAP and Mellanox

Mellanox Ethernet Storage Fabric

Management Software

- ✓ Zero-touch Network Provisioning
- ✓ Enhanced Network Security
- ✓ Efficient Enterprise Cloud Networking
