

OmniView PRO3 USB & PS/2 KVM Switch

Manage up to 256 servers from one console with the industry's leading KVM for small-to-medium size businesses.

The OmniView PRO3 USB & PS/2 KVM Switch provides easy and dependable server control with extraordinary performance. The Switch enables network administrators to monitor and control up to four, eight, or 16 USB- and PS/2-platform servers from a single console. The PRO Series KVM Switches are the industry's most popular for small-to-medium server rooms, branch locations, and test and development labs. Designed to grow along with your server network, the Switch can be daisy-chained together using dedicated daisy chain ports with other OmniView PRO Series KVM or SMB KVM Switches to support up to 256 servers.

Benefits

- Micro-Cabling Technology reduces cable bulk by 55% when compared to conventional KVM cabling
- USB & PS/2 compatibility gives expanded connectivity in a mixed server environment
- Dedicated Daisy-Chain ports let you expand your KVM configuration without sacrificing CPU ports
- Saves setup time and simplifies viewing and switching between multiple servers with OSD
- Provides continuous server monitoring with programmable AutoScan and hot keys
- Ensures consistent compatibility with flash-upgradeable firmware
- Available in 4-, 8- and 16-port models
- Comes with a Belkin 3-Year Warranty and free technical support
