Statistical Area Classification

The Statistical Area Classification (SAC) groups census subdivisions according to whether they are a component of a census metropolitan area, a census agglomeration, a census metropolitan area and census agglomeration influenced zone (strong MIZ, moderate MIZ, weak MIZ or no MIZ), or the territories (Northwest Territories, Yukon Territory and Nunavut). The SAC is used for data dissemination purposes

Classification des secteurs statistiques (CSS)

La Classification des secteurs statistiques (CSS) regroupe les subdivisions de recensement selon qu'elles font partie d'une région métropolitaine de recensement, d'une agglomération de recensement, d'une zone d'influence des régions métropolitaines de recensement et des agglomérations de recensement (ZIM forte, ZIM modérée, ZIM faible ou ZIM sans influence) ou des territoires (Territoires du Nord-Ouest, Territoire du Yukon et Nunavut). La CSS est utilisée aux fins de la diffusion des données.

Rural/urban size code

This variable is derived using the urban area population size provided by the Geography division and a variable resulting from the linkage with the Census of Agriculture which indicates the resident status of a farm household. Based on these two variables you end up with the variable Rusize which indicates: 1. If a household is located within an urban area. In this case, Rusize will contain the population size of the urban area. 2. If a household is not located in an urban area and is considered a farm household. Rusize will contain a value of -2 (Rural Farm). 3. If a household is not located in an urban area and is not considered a farm household. Rusize will contain a value of -1 (Rural Non-Farm).

Code de la taille de la région rurale et urbaine

Cette variable est calculée au moyen de la taille de la population urbaine fournie par la Division de la géographie et d'une variable résultant du couplage avec les données du Recensement de l'agriculture qui indique le statut de résident d'un ménage agricole. Ces deux variables permettent de créer la variable Rusize, associée aux valeurs suivantes : 1. Si le ménage réside dans une région urbaine, la valeur associée à la variable Rusize est la taille de la population de la région urbaine. 2. Si le ménage ne réside pas dans une région urbaine et est considéré comme un ménage agricole, la valeur associée à la variable Rusize est -2 (rural agricole). 3. Si le ménage ne réside pas dans une région urbaine et n'est pas considéré comme un ménage agricole, la valeur associée à la variable Rusize est -1 (rural non agricole).

Aboriginal : Aboriginal Identity - Summary

Refers to those persons who reported identifying with at least one Aboriginal group, i.e. North American Indian, Métis or Inuit and/or reported being registered under the Indian Act of Canada and/or reported being a member of an Indian Band or First Nation. Users should be aware that the counts associated with this variable are more affected than most by the incomplete enumeration of certain Indian reserves and Indian settlements. The extent of the impact will depend on the geographical area under study. In 2001, a total of 30 Indian reserves and Indian settlements were incompletely enumerated by the census. The populations of these 30 communities are not included in the census counts.

Autochtone : Identité autochtone - Sommaire

Personne ayant indiqué appartenance à au moins un groupe autochtone, c'est-à-dire Indien de l'Amérique du Nord, Métis ou Inuit, et/ou ayant déclaré être un(e) Indien(ne) inscrit(e) en vertu de la Loi sur les Indiens du Canada et/ou ayant déclaré être membre d'une bande indienne ou d'une première nation. Les utilisateurs de données sont priés de noter que les chiffres associés à la présente variable sont particulièrement susceptibles de subir l'influence d'un état de dénombrement incomplet dans certains établissements indiens et réserves indiennes. L'incidence d'un tel état sera fonction de la région géographique à l'étude. En tout, au recensement de 2001, 30 réserves et établissements indiens ont été incomplètement dénombrés. Les chiffres de population de ces 30 collectivités ne sont pas compris dans les chiffres du recensement.

On-reserve

On-reserve population is a derived census variable that is captured by using the CSD type according to criteria established by Indian and Northern Affairs Canada (INAC). On-reserve population includes all people living in any of seven CSD types legally affiliated with First Nations or Indian Bands, as well as selected CSDs of various other types that are northern communities in Saskatchewan, the Northwest Territories and the Yukon Territory. More details are found in the 2001 Census Dictionary under Census subdivision.

Sur réserve

La population dans les réserves est une variable du recensement dérivée, déterminée d'après le genre de SDR et les critères établis par le ministère des Affaires indiennes et du Nord Canada (AINC). La population dans les réserves comprend toutes les personnes qui vivent dans l'une des sept types de SDR légalement affiliées aux Premières nations ou aux bandes indiennes ainsi que les personnes qui vivent dans des SDR choisies de divers autres genres, telles que les communautés nordiques de la Saskatchewan, des Territoires du Nord-Ouest et du Yukon. Consulter le Dictionnaire du recensement de 2001 sous la rubrique subdivision de recensement pour plus d'information.

Labour Market Activities : Full-time or Part-Time Weeks Worked in 2000

Refers to persons 15 years of age and over, excluding institutional residents, who worked for pay or in self-employment in 2000. These persons were asked to report whether the weeks they worked in 2000 were full-time weeks (30 hours or more per week) or not, on the basis of all jobs held. Persons with a part-time job for part of the year and a full-time job for another part of the year were to report the information for the job at which they worked the most weeks.

Activités sur le marché du travail : Semaines travaillées à plein temps ou à temps partiel en 2000

Variable s'appliquant aux personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui ont travaillé à un emploi salarié ou à leur compte en 2000. Ces dernières devaient préciser si elles avaient travaillé des semaines complètes (30 heures ou plus par semaine) ou non en 2000, pour l'ensemble des emplois occupés. Les personnes qui avaient un emploi à temps partiel pendant une partie de l'année et un emploi à plein temps pendant l'autre partie devaient répondre en fonction de l'emploi pour lequel elles avaient travaillé le plus grand nombre de semaines.

Labour Market Activities : Hours Worked for Pay or in Self-employment

Refers to the actual number of hours that persons 15 years of age and over, excluding institutional residents, worked for pay or in self-employment at all jobs held in the week (Sunday to Saturday) prior to Census Day. This includes hours worked for wages, salaries, tips, commissions, piece-rate payments or payments 'in kind' (payments in goods or services rather than money). Hours worked in one's own business, farm or professional practice or hours worked without pay in a family business or farm owned or operated by a relative living in the same household are also included.

Activités sur le marché du travail : Heures travaillées à un emploi salarié ou à son compte

Nombre réel d'heures travaillées, à un emploi salarié ou à leur compte, par les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, dans tous les emplois occupés pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement. Ce nombre inclut les heures travaillées pour un salaire ou un traitement, pour des pourboires, à commission, à la pièce ou contre rémunération «en nature» (paiements sous forme de biens et de services plutôt qu'en espèces). Les heures travaillées à son propre compte ou dans une ferme ou une entreprise ou dans l'exercice d'une profession ou encore sans rémunération dans une entreprise ou une ferme familiale ou dans l'exercice d'une profession appartenant à un parent membre du même ménage ou exploitée par celui-ci sont également incluses.

Labour Market Activities : Industry (Based on 1980 Standard Industrial Classification)

Refers to the general nature of the business carried out in the establishment where the person worked. If the person did not have a job during the week (Sunday to Saturday) prior to enumeration (May 15, 2001), data relate to the job of longest duration since January 1, 2000. Persons with two or more jobs were to report the information for the job at which they worked the most hours. The variable 'Industry (based on the 1980 Standard Industrial Classification)' permits direct comparisons between 1986, 1991, 1996 and 2001 Census industry data.

Activités sur le marché du travail : Industrie (Selon la Classification Type des Industries de 1980)

Nature générale de l'activité de l'établissement où travaille la personne. Si la personne n'avait pas d'emploi au cours de la semaine (du dimanche au samedi) ayant précédé le recensement (le 15 mai 2001), elle devait donner des renseignements sur l'emploi qu'elle avait occupé le plus longtemps depuis le 1er janvier 2000. Les personnes qui avaient deux emplois ou plus devaient fournir des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures de travail. La variable Industrie [selon la Classification type des industries (CTI) de 1980] permet d'établir des comparaisons directes entre les données sur l'industrie des recensements de 1986, 1991, 1996 et 2001.

Labour Market Activities : On Temporary Lay-off or Absent from Job or Business

Refers to whether persons were, during the week (Sunday to Saturday) prior to Census Day (May 15, 2001), (a) on temporary lay-off from a job to which they expected to return or (b) absent from their job or business for the entire week. Reasons for absence included a vacation, an illness, a strike or lock-out at the respondent's place of employment, or other reasons, including maternity leave, bad weather, fire, personal or family responsibilities, and attendance at training courses if wages or salaries were received from the employer. Data were collected for persons who did not work for pay or in self-employment in the week prior to enumeration. This variable is used to derive the respondent's labour force activity status. Other than for specialized research in consultation with census labour market analysts, the use of this variable on its own is not recommended.

Activités sur le marché du travail: Mises à pied temporaire ou absence du travail ou de l'entreprise

Variable indiquant les personnes qui ont déclaré être, pendant la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001), a) temporairement mises à pied et qui s'attendaient à être rappelées, b) absentes de leur travail ou de l'entreprise pendant toute la semaine. Les raisons pour les absences incluent les vacances, la maladie, la grève ou le lock-out au lieu de travail du recensé, le congé de maternité, le mauvais temps, l'incendie, les raisons personnelles ou familiales, les cours de formation (si elles ont touché un salaire ou un traitement de leur employeur). Les données ont été recueillies pour les personnes qui n'ont pas travaillé à un emploi salarié ou à leur compte durant la semaine ayant précédé le recensement. La présente variable est utilisée pour déterminer l'activité du recensé. Il n'est pas recommandé de l'utiliser individuellement, si ce n'est dans le cadre de travaux de recherche spécialisés effectués en consultation avec les analystes du marché du travail du recensement.

It refers to whether or not those persons actively looked for paid work in the four weeks prior to Census Day. The work sought could be either full time (30 hours or more per week) or part time (1 to 29 hours per week). 'Actively looked' means using such job search methods as contacting a Canada Employment Centre, checking with employers, or placing or answering newspaper ads. This variable is used to derive the respondent's labour force activity status. Other than for specialized research in consultation with census labour market analysts, the use of this variable on its own is not recommended.

Activités sur le marché du travail : Recherche d'un emploi salarié (à plein ou à temps partiel)

Cette variable s'adresse aux personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui n'ont pas travaillé à un emploi salarié ou à leur compte durant la semaine ayant précédé le recensement. Cette variable indique si les personnes visées ont cherché activement un emploi salarié au cours des quatre semaines ayant précédé le jour du recensement. Il peut s'agir d'un travail à plein temps (30 heures ou plus par semaine) ou d'un travail à temps partiel (de 1 à 29 heures par semaine). 'Chercher activement un emploi' signifie, par exemple, s'adresser à un Centre d'emploi du Canada ou à des employeurs, faire paraître une demande d'emploi dans les journaux ou répondre à une offre d'emploi. La présente variable est utilisée pour déterminer l'activité du recensé. Il n'est pas recommandé de l'utiliser individuellement, si ce n'est dans le cadre de travaux de recherche spécialisés effectués en consultation avec les analystes du marché du travail du recensement.

Labour Market Activities : Detailed Industry (Based on the 1997 NAICS)

Refers to the general nature of the business carried out in the establishment where the person worked. If the person did not have a job during the week (Sunday to Saturday) prior to enumeration (May 15, 2001), the data relate to the job of longest duration since January 1, 2000. Persons with two or more jobs were required to report the information for the job at which they worked the most hours. The 2001 industry data are produced according to the 1997 NAICS. The NAICS provides enhanced industry comparability among the three North American Free Trade Agreement (NAFTA) trading partners (Canada, United States and Mexico). This classification consists of a systematic and comprehensive arrangement of industries structured into 20 sectors, 99 subsectors and 300 industry groups. The criteria used to create these categories are similarity of input structures, labour skills or production processes used by the establishment. For further information on the classification, see North American Industry Classification System, Canada, 1997, Catalogue No. 12-501-XPE. The variable 'Industry (based on the 1997 NAICS)' does not permit direct comparison to any previous census industry data. The 1980 Standard Industrial Classification should be used for comparisons between the 1986, 1991, 1996 and 2001 Censuses.

Activités sur le marché du travail : Industrie détaillée (d'après SCIAN de 1997)

Nature générale de l'activité de l'établissement où travaille la personne. Si la personne n'avait pas d'emploi au cours de la semaine (du dimanche au samedi) ayant précédé le recensement (le 15 mai 2001), elle devait donner des renseignements sur l'emploi qu'elle avait occupé le plus longtemps depuis le 1er janvier 2000. Les personnes qui avaient deux emplois ou plus devaient fournir des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures de travail. Les données sur l'industrie du recensement de 2001 sont produites en fonction du Système de classification des industries de l'Amérique du Nord (SCIAN) de 1997. Ce dernier, qui assure une meilleure comparabilité entre les données sur l'industrie des trois partenaires de l'Accord de libre-échange nord-américain (ALENA) (Canada, États-Unis et Mexique), consiste en un répertoire systématique et détaillé des industries regroupées en 20 secteurs, 99 sous-secteurs et 300 groupes. Les critères utilisés pour créer ces catégories sont la similitude des structures d'intrants, des qualifications de la main-d'oeuvre ou des processus de production utilisés par l'établissement. Pour obtenir plus de renseignements au sujet de cette classification, reportez-vous au Système de classification des industries de l'Amérique du Nord, Canada, 1997, no 12-501-XPF au catalogue. La variable Industrie (selon le SCIAN de 1997) ne permet pas d'établir de comparaisons directes avec les données sur l'industrie des recensements antérieurs. Il faut utiliser la Classification type des industries de 1980 pour effectuer des comparaisons entre les données des recensements de 1986, 1991, 1996 et 2001.

Labour Market Activities : Industry Sectors

Refers to the general nature of the business carried out in the establishment where the person worked. If the person did not have a job during the week (Sunday to Saturday) prior to enumeration (May 15, 2001), the data relate to the job of longest duration since January 1, 2000. Persons with two or more jobs were required to report the information for the job at which they worked the most hours. The 2001 industry data are produced according to the 1997 NAICS. The NAICS provides enhanced industry comparability among the three North American Free Trade Agreement (NAFTA) trading partners (Canada, United States and Mexico). This classification consists of a systematic and comprehensive arrangement of industries structured into 20 sectors, 99 subsectors and 300 industry groups. The criteria used to create these categories are similarity of input structures, labour skills or production processes used by the establishment. For further information on the classification, see North American Industry Classification System, Canada, 1997, Catalogue No. 12-501-XPE. The variable 'Industry (based on the 1997 NAICS)' does not permit direct comparison to any previous census industry data. The 1980 Standard Industrial Classification should be used for comparisons between the 1986, 1991, 1996 and 2001 Censuses.

Activités sur le marché du travail : Secteurs d'industrie

Nature générale de l'activité de l'établissement où travaille la personne. Si la personne n'avait pas d'emploi au cours de la semaine (du dimanche au samedi) ayant précédé le recensement (le 15 mai 2001), elle devait donner des renseignements sur l'emploi qu'elle avait occupé le plus longtemps depuis le 1er janvier 2000. Les personnes qui avaient deux emplois ou plus devaient fournir des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures de travail. Les données sur l'industrie du recensement de 2001 sont produites en fonction du Système de classification des industries de l'Amérique du Nord (SCIAN) de 1997. Ce dernier, qui assure une meilleure comparabilité entre les données sur l'industrie des trois partenaires de l'Accord de libre-échange nord-américain (ALENA) (Canada, États-Unis et Mexique), consiste en un répertoire systématique et détaillé des industries regroupées en 20 secteurs, 99 sous-secteurs et 300 groupes. Les critères utilisés pour créer ces catégories sont la similitude des structures d'intrants, des qualifications de la main-d'oeuvre ou des processus de production utilisés par l'établissement. Pour obtenir plus de renseignements au sujet de cette classification, reportez-vous au Système de classification des industries de l'Amérique du Nord, Canada, 1997, no 12-501-XPF au catalogue. La variable Industrie (selon le SCIAN de 1997) ne permet pas d'établir de comparaisons directes avec les données sur l'industrie des recensements antérieurs. Il faut utiliser la Classification type des industries de 1980 pour effectuer des comparaisons entre les données des recensements de 1986, 1991, 1996 et 2001.

Labour Market Activities : Occupation (Based on the 2001 NOC - HRD Canada)

Occupation based on the 2001 National Occupational Classification - Refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the most important duties in their job. Data are available for persons 15 years of age and over, excluding institutional residents. If the person did not have a job during the week prior to enumeration, the data relate to the job of longest duration since January 1, 2000. Persons with two or more jobs were to report the information for the job at which they worked the most hours. SPECIAL NOTE: For persons with a place of work in one of the territories and outside of Whitehorse and Yellowknife, the PWCMA should show 0 since the MIZ concept is not applied in the territories.

Activités sur le marché du travail : Profession (Selon la CNP de 2001 - DRH Canada)

Profession selon la Classification Nationale des Professions de 2001 - Genre de travail que faisaient les personnes pendant la semaine de référence. Le genre de travail exécuté est défini d'après le type d'emploi occupé par le recensé et la description des tâches les plus importantes qui s'y rattachent. Les données ont trait aux personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'institution. Si le recensé n'avait pas d'emploi au cours de la semaine ayant précédé le recensement, les données portent sur l'emploi qu'il avait occupé le plus longtemps depuis le 1er janvier 2000. REMARQUE: Pour les personnes dont le lieu de travail est situé dans un des territoires et à l'extérieur de Whitehorse et de Yellowknife, la variable PWCMA devrait avoir la valeur 0 (zéro). Le concept de ZIM (zones d'influence métropolitaine) ne s'applique pas pour ces territoires.

Labour Market Activities : Occupation (Based on the 2001 NOC-S)

Refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the main activities in their job. If the person did not have a job during the week (Sunday to Saturday) prior to enumeration (May 15, 2001), the data relate to the job of longest duration since January 1, 2000. Persons with two or more jobs were to report the information for the job at which they worked the most hours. The 2001 occupation data are classified according to the 2001 National Occupational Classification for Statistics (NOC-S 2001). This classification is composed of four levels of aggregation. There are 10 broad occupational categories containing 47 major groups that are further subdivided into 140 minor groups. At the most detailed level, there are 520 occupation unit groups. Occupation unit groups are formed on the basis of the education, training, or skill level required to enter the job, as well as the kind of work performed, as determined by the tasks, duties and responsibilities of the occupation. For information on the NOC-S 2001, see the National Occupational Classification for Statistics, 2001, Catalogue No. 12-583-XPE.

Activités sur le marché du travail : Profession (d'après CNP-S de 2001)

Genre de travail que faisaient les personnes pendant la semaine de référence, défini d'après le type d'emploi occupé par le recensé et la description des tâches les plus importantes qui s'y rattachent. Si le recensé n'avait pas d'emploi au cours de la semaine (du dimanche au samedi) ayant précédé le recensement (le 15 mai 2001), les données portent sur l'emploi qu'il avait occupé le plus longtemps depuis le 1er janvier 2000. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail. Les données sur la profession du recensement de 2001 sont produites selon la Classification nationale des professions pour statistiques 2001 (CNP-S 2001). Cette classification comprend quatre niveaux d'agrégation. Elle comprend 10 grandes catégories professionnelles englobant 47 grands groupes, lesquels comprennent à leur tour 140 sous-groupes. Ces sous-groupes renferment 520 groupes de base. Les titres de profession sont classés selon le niveau de scolarité, de formation ou de compétence nécessaire pour exercer cette profession, ainsi que le genre de travail exécuté, déterminé d'après les tâches, les fonctions et les responsabilités reliées au poste. Pour plus de renseignements sur la CNP-S 2001, se reporter à la Classification nationale des professions pour statistiques 2001, no 12-583-XPF au catalogue.

Labour Market Activities : Class of Worker (Derived)

This variable classifies persons who reported a job into the following categories: (a) persons who worked mainly for wages, salaries, commissions, tips, piece-rates, or payments 'in kind' (payments in goods or services rather than money); (b) persons who worked mainly for themselves, with or without paid help, operating a business, farm or professional practice, alone or in partnership; (c) persons who worked without pay in a family business, farm or professional practice owned or operated by a related household member; unpaid family work does not include unpaid housework, unpaid childcare, unpaid care to seniors and volunteer work. The job reported was the one held in the week (Sunday to Saturday) prior to enumeration (May 15, 2001) if the person was employed, or the job of longest duration since January 1, 2000, if the person was not employed during the reference week. Persons with two or more jobs in the reference week were asked to provide information for the job at which they worked the most hours.

Activités sur le marché du travail : Catégorie des travailleurs (Variable dérivée)

Variable permettant de classer les personnes qui ont déclaré un emploi selon les catégories suivantes : a) personnes qui ont travaillé principalement pour un salaire, pour un traitement, à commission, pour des pourboires, à la pièce ou contre rémunération « en nature » (paiements sous forme de biens ou de services, plutôt qu'en espèces); b) personnes qui ont travaillé surtout à leur compte, avec ou sans aide rémunérée dans une entreprise, une ferme ou à exercer une profession, seules ou avec des associés; c) personnes qui ont travaillé sans rémunération à exercer une profession ou dans une entreprise ou une ferme familiale appartenant à un parent du même ménage ou exploitée par celui-ci; le travail familial non rémunéré ne comprend pas les travaux ménagers non rémunérés, les soins aux enfants non rémunérés, les soins ou l'aide aux personnes âgées non rémunérés, ni le travail bénévole. L'emploi déclaré désigne l'emploi que la personne occupait au cours de la semaine (du dimanche au samedi) ayant précédé le recensement (le 15 mai 2001) si elle avait travaillé, l'emploi qu'elle a occupé le plus longtemps depuis le 1er janvier 2000, si la personne n'avait pas travaillé au cours de la semaine de référence. Les personnes ayant occupé deux emplois ou plus cette semaine-là devaient donner des renseignements sur celui auquel elles avaient consacré le plus grand nombre d'heures.

Labour Market Activities : Derived Occupation Variable for Historical Comparisons

Refers to the kind of work persons were doing during the reference week, as determined by their kind of work and the description of the main activities in their job. If the person did not have a job during the week (Sunday to Saturday) prior to enumeration (May 15, 2001), the data relate to the job of longest duration since January 1, 2000. Persons with two or more jobs were to report the information for the job at which they worked the most hours. This variable has been created in order to facilitate comparison of occupation data coded to the 2001 National Occupational Classification for Statistics (NOC-S 2001) with 1991 and 1996 Census occupation data coded to the 1991 Standard Occupational Classification (SOC).

Activités sur le marché du travail : Variable dérivée Profession, pour comparaisons historiques

Genre de travail que faisaient les personnes pendant la semaine de référence, défini d'après le type d'emploi occupé par le recensé et la description des tâches les plus importantes qui s'y rattachent. Si le recensé n'avait pas d'emploi au cours de la semaine (du dimanche au samedi) ayant précédé le recensement (le 15 mai 2001), les données portent sur l'emploi qu'il avait occupé le plus longtemps depuis le 1er janvier 2000. Les personnes qui avaient deux emplois ou plus devaient donner des renseignements sur l'emploi auquel elles avaient consacré le plus d'heures de travail. La présente variable a été créée afin de faciliter la comparaison entre les données sur la profession codées selon la Classification nationale des professions pour statistiques 2001 (CNP-S 2001) et les données sur la profession des recensements de 1991 et de 1996 codées selon la Classification type des professions de 1991 (CTP).

Labour Market Activities : Labour Force Activity - 1971 Census Concepts

The historical labour force activity classifies persons 15 years of age and over, including institutional residents, in the week (Sunday to Saturday) prior to Census Day (May 15, 2001), as employed, unemployed or not in the labour force according to the labour force activity concepts used in the 1971 Census. The labour force activity concepts have remained fairly consistent since 1971. However, some changes in the questions asked and in processing, as well as some minor conceptual changes, have been introduced throughout the past six censuses. These differences need to be taken into consideration whenever data from two or more census years are being compared. This derived variable which takes into account as many of these differences as possible should be used in doing historical tabulations that include 1971 or 1976 Census data. When doing historical tabulations that include 1981 to 2001 Census data only, the regular labour force activity variable: Labour Market Activities: Labour Force Activity (in Reference Week) can be used.

Activités sur le marché du travail : Activité - Selon les concepts du recensement de 1971

Activité historique sur le marché du travail des personnes âgées de 15 ans et plus, y compris les pensionnaires d'un établissement institutionnel, au cours de la semaine (du dimanche au samedi) ayant précédé le jour du recensement (le 15 mai 2001). Les recensés sont classés dans les catégories « personnes occupées », « chômeurs » ou « inactifs » conformément aux concepts relatifs à l'activité utilisés au recensement de 1971. Bien que les concepts relatifs à l'activité soient demeurés virtuellement inchangés depuis 1971, certaines modifications ont été apportées aux questions, aux procédures de traitement et aux concepts au cours des six derniers recensements. Il faut tenir compte de ces modifications chaque fois que l'on compare des données portant sur deux années de recensement ou plus. La présente variable, qui tient compte du plus grand nombre possible de ces différences, doit être utilisée aux fins des totalisations historiques qui portent sur les données des recensements de 1971 ou de 1976. En revanche, dans le cas des totalisations historiques qui portent uniquement sur les données des recensements de 1981 à 2001, on peut utiliser la variable régulière «Activités sur le marché du travail : Activité (pendant la semaine de référence)».

JTW : Place of work status

Refers to the usual place of work of non-institutional residents 15 years of age and over who have worked since January 1, 2000. The variable usually relates to the individual's job in the week prior to enumeration. However, if the person had not worked in that week but had worked at some time since January 1, 2000, the information related to the job held longest during that period. Respondent-completed responses include: Worked at home - Persons whose job is located in the same building as their place of residence, persons who live and work on the same farm, and teleworkers who spend most of their work week working at home. Worked outside Canada - Persons who work as diplomats, Armed Forces personnel and other persons enumerated abroad. Includes also recent immigrants who may not currently be employed but whose job of longest duration since January 1, 2000 was held outside Canada. No fixed workplace - Persons who do not go from home to the same workplace location at the beginning of each shift. Such persons include building and landscape contractors, travelling salespersons, independent truck drivers, etc. Worked at usual place - Persons who are not included in the categories described above and who report to the same (usual) workplace location at the beginning of each shift are included here. Respondents were asked to provide the street address, city, town, village, township, municipality or Indian reserve, province/territory and postal code of their workplace. If the full street address was not known, the name of the building or nearest street intersection could be substituted. Teleworkers who spend less than one-half of their work week working at their home office were asked to report the full address of their employer. Persons whose actual workplace location varied but who reported regularly to an employer's headquarters at the beginning of each shift were asked to report the full address of the headquarters. These persons are counted as working at a usual place. Place of work status can be used to select a target population when tabulating workers in specified geographic areas. Including those who worked at a usual place and those who worked at home will count all persons working in the area. In some cases clients may wish to exclude persons who worked at home from tabulations.

DDT : Statut de lieu de travail

Lieu de travail habituel des personnes âgées de 15 ans ou plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui ont travaillé depuis le 1er janvier 2000. La variable se rapportent habituellement à l'emploi occupé par les recensés au cours de la semaine ayant précédé le recensement. Toutefois, dans le cas des personnes qui n'ont pas travaillé cette semaine-là, mais qui avaient travaillé à un moment quelconque depuis le 1er janvier 2000, les données portent sur l'emploi occupé le plus longtemps au cours de cette période. Réponses fournies par les recensés À domicile - Les personnes dont le lieu de travail et la résidence se trouvaient dans le même immeuble, celles qui habitaient la ferme où elles travaillaient et les télétravailleurs qui travaillaient à domicile pendant la plus grande partie de leur semaine de travail. En dehors du Canada - Les diplomates, les membres des Forces armées et les autres personnes dénombrées à l'étranger, de même que les nouveaux immigrants ne travaillant pas en ce moment, mais dont l'emploi de plus longue durée depuis le 1er janvier 2000 avait été exercé à l'extérieur du Canada. Sans adresse de travail fixe - Les personnes qui ne se rendaient pas au même lieu de travail au début de chaque quart, notamment les entrepreneurs en bâtiments, les entrepreneurs paysagistes, les représentants de commerce, les chauffeurs de camion indépendants, etc. Lieu habituel de travail - Les personnes qui ne sont pas incluses dans les catégories ci dessus et qui se rendent au même lieu de travail (habituel) au début de chaque quart sont incluses ici. Les recensés devaient inscrire le numéro de voirie, la ville, le village, le canton, la municipalité ou la réserve indienne, la province ou le territoire et le code postal de leur lieu de travail. Ceux qui ne connaissaient pas l'adresse complète pouvaient donner uniquement le nom de l'immeuble ou de l'intersection la plus proche. Les télétravailleurs qui passaient moins que la moitié de la semaine de travail à leur bureau à domicile devaient donner l'adresse complète de leur employeur. Les personnes qui travaillaient à des endroits différents, mais se présentaient à un siège social au début de chaque quart devaient donner l'adresse complète du siège social. Ces personnes sont dénombrées en tant que personnes travaillant à un endroit habituel. La variable «Statut de lieu de travail» peut être utilisée pour sélectionner une population cible lorsque l'on effectue la totalisation du nombre de travailleurs dans une région géographique spécifique. Le fait d'inclure les personnes ayant travaillé à un lieu de travail habituel et celles ayant travaillé à la maison effectuera le dénombrement de toutes les personnes qui travaillent dans la région. Dans certains cas, il se peut que les clients veuillent exclure des totalisations les personnes ayant travaillé à la maison.

JTW : Mode of transportation to work

Refers to the mode of transportation to work of non-institutional residents 15 years of age and over who have worked since January 1, 2000. Persons who indicated in the place of work question that they either had no fixed workplace address, or specified a usual place of work address, were asked to identify the mode of transportation they most frequently used to commute between home and work. The variable usually relates to the individual's job in the week prior to enumeration. However, if the person had not worked during that week but had worked at some time since January 1, 2000, the information relates to the job held longest during that period. Persons who use more than one mode of transportation were asked to identify the single mode they used for most of the travel distance. As a result, the question provides data on the primary mode of transportation to work. It does not measure multiple modes of transportation, nor does it measure seasonal variation in mode of transportation or trips made for purposes other than the commute between home and work.

DDT : Mode de transport au travail

Mode de transport utilisé pour se rendre au travail par les personnes âgées de 15 ans et plus, à l'exclusion des pensionnaires d'un établissement institutionnel, qui ont travaillé depuis le 1er janvier 2000. Les personnes qui ont indiqué qu'elles n'avaient pas d'adresse de travail fixe, ou ont précisé l'adresse d'un lieu de travail habituel, devaient inscrire le moyen de transport utilisé le plus souvent pour faire la navette entre le domicile et le travail. La variable se rapporte habituellement à l'emploi occupé par les recensés au cours de la semaine ayant précédé le recensement. Toutefois, dans le cas des personnes qui n'ont pas travaillé cette semaine-là, mais qui avaient travaillé à un moment quelconque depuis le 1er janvier 2000, les données portent sur l'emploi occupé le plus longtemps au cours de cette période. Les personnes qui utilisaient plus d'un moyen de transport devaient indiquer seulement celui qu'elles utilisaient pour faire la plus grande partie du trajet. En conséquence, la question a permis de recueillir des données sur le principal mode de transport utilisé pour se rendre au travail. Elle ne permet toutefois pas d'obtenir des données sur l'utilisation de plusieurs modes de transport, la variation saisonnière dans le choix du mode de transport, ni sur les déplacements faits à d'autres fins que pour faire la navette entre le domicile et le travail.

Mobility 1 : Refers to the relationship between a person's usual place of residence on census day and his/her usual place of residence one year earlier. A person is classified as a non-mover if no difference exists; otherwise, a person is classified as a mover and this categorization is called Mobility Status (1 Year Ago). Within the category movers, a further distinction is made between non-migrants and migrants; this difference is called Migration Status.

Mobilité 1 : Mobilité - Lieu de résidence 1 an auparavant (2000)

Mobilité 1 : La mobilité est déterminée d'après le lien entre le domicile habituel d'une personne le jour du recensement et son domicile habituel un an auparavant. Number of Children - Refers to the number of children in private households

This variable is calculated for persons 15 years and over in census families. This variable classifies the population into those with no children and those with children at home. Those persons with children at home are further classified by the total number of children at home. Children refer to blood, step- or adopted sons and daughters (regardless of age or marital status) who are living in the same dwelling as their parent(s), as well as grandchildren in households where there are no parents present. Sons and daughters who are living with their spouse or common-law partner, or with one or more of their own children, are not considered to be members of the census family of their parent(s), even if they are living in the same dwelling. In addition, those sons and daughters who do not live in the same dwelling as their parent(s) are not considered members of the census family of their parent(s). The category of children can be further distinguished as follows: Never-married sons and/or daughters in a census family, as used in censuses prior to 2001. Other sons and/or daughters in a census family who would not have been included in the census family of their parents according to the previous concept. Grandchildren living in the same household as their grandparent(s), with no parents present.

Nombre d'enfants - S'entend du nombre d'enfants dans les ménages privés

Cette variable ne concerne que les personnes de 15 ans et plus dans les familles de recensement. Cette variable classifie la population selon les personnes n'ayant pas d'enfants à la maison et celles ayant des enfants à la maison. De plus, les personnes ayant des enfants à la maison sont classées selon le nombre total d'enfants à la maison. Enfants - Fils ou filles apparentés par le sang, par alliance ou par adoption, peu importe leur âge ou leur état matrimonial, qui vivent dans le même logement que leur(s) parent(s), ainsi que les petits-enfants des ménages où les parents sont absents. Les fils et les filles qui vivent avec leur conjoint(e), ou avec un(e) partenaire en union libre ou avec un ou plusieurs de leurs propres enfants, ne sont pas considérés comme des membres de la famille de recensement de leur(s) parent(s), même s'ils vivent dans le même logement. En outre, les fils et les filles qui n'habitent pas dans le même logement que leur(s) parent(s) ne sont pas considérés comme des membres de la famille de ce(s) dernier(s). Les personnes suivantes font donc partie de la catégorie « enfants » : Fils et/ou filles jamais mariés faisant partie d'une famille de recensement, comme dans le cas des recensements précédant celui de 2001. Autres fils et/ou filles faisant partie d'une famille de recensement qui n'auraient pas été inclus dans la famille de recensement de leurs parents selon le concept précédent. Petits-enfants vivant dans le même ménage que leurs grands-parents, en l'absence des parents.

Presence of Children - Refers to the number of children in private households by age groups

Presence of Children, derived variable - This variable classifies the population 15 years of age and over in census families into those with no children at home and those with children at home. Those persons with children at home are further classified on the basis of the age groups of all their children. This variable is based on census family concepts. It is derived specifically for the purposes of analysis and dissemination of census labour force activity data. In the 1981, 1986 and 1991 Censuses, this variable was derived only for females 15 years and over in census families. In the 1996 and 2001 Censuses, this variable was derived for both females and males 15 years and over in census families.

Présence d'enfants - S'entend du nombre d'enfants dans les ménages privés selon les groupes d'âge

Présence d'enfants, variable dérivée - Cette variable ne concerne que les personnes de 15 ans et plus dans les familles de recensement. Cette variable classe la population selon les personnes n'ayant pas d'enfants à la maison et celles ayant des enfants à la maison. De plus, les personnes ayant des enfants à la maison sont classées selon le groupe d'âge de tous les enfants. Cette variable est fondée sur les concepts du recensement ayant trait à la famille. Elle a été dérivée spécialement pour l'analyse et la diffusion des données du recensement sur la population active. Aux recensements de 1981, 1986 et 1991, cette variable a été dérivée uniquement pour les femmes de 15 ans et plus dans les familles de recensement. Aux recensements de 1996 et de 2001, cette variable a été dérivée pour les femmes et pour les hommes de 15 ans et plus dans les familles de recensement.

Census family status

Refers to the classification of the population according to whether or not they are members of a census family. Family persons refer to household members who belong to a census family. They, in turn, are further classified as follows: spouses, common-law partners, lone parents, children, and non-family persons related or unrelated. A person living alone is always a non-family person. NOTE: Data on same-sex couples should not be available under any circumstances for geographic areas with population in private households under 5,000.

Situation des particuliers dans la famille de recensement

Classement des personnes selon qu'elles appartiennent ou non à une famille de recensement. Ces personnes se répartissent dans les catégories suivantes: Époux et épouses, partenaires en union libre, parents seuls, enfants et personnes hors famille de recensement apparentés ou non apparentés. Les personnes qui vivent seules sont toujours considérées comme des personnes hors famille de recensement. NOTA: Les données sur les couples formés de partenaires de même sexe ne devraient en aucun cas être disponibles pour des régions géographiques dont la population dans les ménages privés est inférieure à 5 000 habitants.

Income : Low income status (Person)

The code values for this variable indicate the position of each member of an economic family and each unattached individual in relation to Statistics Canada's Low Income Cutoffs (LICO's). The incidence of low income is the proportion or percentage of economic families or unattached individuals 15 years of age and over (or population in private households) in a given classification below the low income cut-offs. These incidence rates are calculated from unrounded estimates of economic families and unattached individuals 15 years of age and over (or population in private households). Researchers should note that all Census income measures and the LOINC are provided for unattached individuals and Census families, including immigrants. The reference year for the income measures in the 2001 Census is 2000. SPECIAL NOTE: The income data is not applicable to immigrants who came to Canada in 2001. Immigrants who came to Canada in 2000, may not have received all of the income in Canada. Such individuals and, in most circumstances those entire Census families, should be excluded from analysis employing the LOINC and all the household income measures.

Revenu : État du faible revenu (Personne)

Les valeurs codifiées pour cette variable montrent la position pour chaque membre de la famille économique et des personnes hors famille économique en relation avec les seuils de faible revenu (SFR) de Statistique Canada. Proportion ou pourcentage de familles économiques ou de personnes hors famille économique (ou population dans les ménages privés) dans une catégorie donnée dont le revenu est inférieur aux seuils de faible revenu. Ces taux de fréquence sont calculés d'après des estimations non arrondies des familles économiques et des personnes hors famille économique âgées de 15 ans ou plus (ou population dans les ménages privés). REMARQUE: Les chercheurs devront être avisés que toutes les variables de revenu ainsi que la variable LOINC portent sur les particuliers et les membres de familles du recensement (y compris les immigrants). Pour ces variables de revenu, l'année de référence est l'an 2000. Les données du revenu des personnes qui ont immigré au Canada en 2001 ne devraient donc pas être considérées. Aussi les immigrants arrivés au Canada en 2000 peuvent ne pas avoir perçu la totalité de leur revenu. Tous les particuliers et les familles de recensement appartenant à cette catégorie devraient être exclues de toute analyse concernant la variable LOINC et celles du revenu.

Population Group : Q.19 Visible minority derived - Historical

This variable is derived for employment equity purposes. DVMHist is a historical variable and should be used when comparing with previous censu. Precaution should be used when comparing data before and after 1996 as the collection tool for Visible minority data has changed. Groupe de population : Q.19 Population des minorités visibles - Historique

Cette variable a été dérivée pour les besoins de l'équité en matière d'emploi. DVMHist est une variable historique qui devrait être utilisée dans des tableaux de comparaison avec les données des recensements antérieurs. L'utilisateur doit faire preuve de prudence lorsqu'il ou elle compare les données entre les recensements antérieurs à 1996 et ultérieurs à 1996. Avant 1996, les données sur les minorités visibles ont été obtenues par dérivation en utilisant l'information sur le Lieu de naissance, l'origine ethnique, la langue maternelle et la religion lorsque cette question était posée. En 1996 et 2001, une question directe a été utilisée pour obtenir les données.
