## Cisco anyconnect apex license ordering guide

1. Introduction 1.1 Purpose, audience, and scope of this document describe the structure of packaging and ordering information, going 1.2. Introduction 1.1 Purpose, audience, and scope of this document describe the structure of packaging and ordering information, going 1.2. Customization licenses are available under AnyConnect: • Plus subscription licenses • Apex subscription needs. It helps enable a very secure connection experience across a wide set of computers and mobile devices. By roaming mobile workers to different locations, it automatically resumes the connection experience across a wide set of computers and mobile devices. By roaming mobile workers to different locations, it automatically resumes the connection. The ever-smart VPN adapts tunneling protocol in the most efficient way, such as datagram transport layer security protocol (DTLS) for delayed-sensitive VoIP traffic or TCP-based app access. Tunneling support is also available for IP Security Internet Key Exchange Version 2 (IPsec IKEv2). The 4.x release goes well beyond traditional secure access. It offers a wide range of endpoint security services and simplified IT operations from a single agent. AnyConnect offers you the ability to achieve tighter security controls while helping to enable direct, very secure, in any app accessing corporate resources via mobile in any VPN service app. Cisco AnyConnect also provides endpoint status assessment and correction capabilities for wired, wireless, and VPN environments along with cisco identity service engine 1.3 (with Apex license for both solutions). Access can be granted based on validation of endpoint mode (antimalware, patches, disk encryption, and beyond) while off-compliance endpoints can have automated correction measures or corrective measures to monitor the use of the endpoint program on and off to explore potential behavior non-jars and make network decisions and services more consciously designed. Rich underlying data from AnyConnect Network Visibility Module can be shared with a growing number of Internet Protocol Flow Information Export (IPFIX) – capable of network analysis tools. AnyConnect can also help by deploying Cisco Advanced Malware Protection (AMP) for endpoints with its AMP Enabler. Amp activator significantly extends threat protection endpoint to active VPN endpoints or AnyConnect services (802.1X network access, dissect, etc.) are in use. This feature further reduces the attack potential of host connected to the enterprise. Cisco Amp is licensed for endpoints separately from Cisco AnyConnect. The AnyConnect services (802.1X network access, dissect, etc.) are in use. This feature further reduces the attack potential of host connected to the enterprise. defenses. You can use cisco-based location web security, or Cisco umbrella roaming offers. Along with remote access, a comprehensive and highly secure enterprise mobility solution supports web security and defends the threat of malware. Automatically blocks phishing and command and control attacks. Consistent, field-conscious security policies help ensure a protected and productive work environment. In addition to the industry-leading VPN capabilities, The AnyConnect customer supports the advanced capabilities of IEEE 802.1X. A single authentication framework manages the identity of the user and device, along with the network access protocols needed to move smoothly from wired networks to wireless networks. Compatible with your VPN performance, the client supports IEEE 802.1AE Media Access Security Control (MACsec) for data confidentiality, data integrity, and data source authentication on wired networks. Communication between trusted network components is protected. 2.1 AnyConnect servers and operating systems are used in conjunction with cisco servers, including but not limited to Cisco adaptive security appliances (physical and virtual), Cisco Firepower mext-generation firewall (physical and virtual/ASA and FTD operating systems), identity service engine, aggregation service sand cloud services, along with related service fees and support contracts, are purchased separately. 3. AnyConnect 4.x license offers a simple license to meet the needs of it's broad enterprise community as it adapts to the growth of end-user mobility demands. AnyConnect 4.x collapses the previously sophisticated AnyConnect licensing model into two simple rows. The first is AnyConnect 4.x collapses the previously sophisticated AnyConnect 4.x collapses the previously sophisticated AnyConnect Icensing model into two simple rows. The first is AnyConnect 4.x collapses the previously sophisticated AnyConnect Icensing model into two simple rows. The first is AnyConnect 4.x collapses the previously sophisticated AnyConnect 4.x collapses the previously sophisticated AnyConnect 4.x collapses the previously sophisticated AnyConnect Icensing model into two simple rows. The first is AnyConnect 4.x collapses the previously sophisticated AnyConnect Icensing model into two simple rows. network recognition, basic device field set, and federal data processing standards (FIPS) compliance. AnyConnect Plus as similar to AnyConnect Plus as simil AnyConnect Apex's second offer includes more advanced services such as endpoint dissection checks (Hostscan via ASA VPN, or ISE Posture via Cisco Identity Services Engine), Network Visibility, Next-Generation VPN Encryption (including Suite B), VPN remote access without customers as well as all the capabilities of AnyConnect Plus. Existing AnyConnect Customers should think of AnyConnect Plus. Apex as similar to previous AnyConnect Premium And Premium AnyConnect Plus and Apex license provide a set of features and deployment flexibility to meet their company's wide range of requirements. See Table 1 for details. For companies that want only AnyConnect Premium AnyConnect Plus and Apex license provide a set of features and deployment flexibility to meet their company's wide range of requirements. See Table 1 for details. For companies that want only AnyConnect Plus and Apex licenses and deployment flexibility to meet their company's wide range of requirements. details on VPN-only permissions. Table 1. AnyConnect Plus and Apex License Features Plus License Apex License Device or SYSTEM VPN (including Cisco phone VPN) All Plus features in this column Third Party IPsec IKEv2 remote access VPN clients (non-AnyCon Network Visibility Module (new in 4 2) in any VPN program united endpoint compliance and correction (dissect) (Apex engine service identity is required and licensed separately) cloud web security and web security and web security and web security and web security home appliances (browser-based) network connection network access manager ASA multi-text remote access mode Cisco AMP For activation endpoints (AMP for license endpoints is separately) SAML authentication (new in 4.4 and requires ASA 9.7.1 or later) Cisco AnyConnect Apex and plus license from Eliminates the need to purchase per headend at the same time – license connections and server licenses are assigned. AnyConnect Apex and plus license from Eliminates the need to purchase per headend at the same time – license connections and server licenses are assigned. AnyConnect Apex and plus license from Eliminates the need to purchase per headend at the same time – license connections and server licenses are assigned. license is required for each user. As such, the number of Plus licenses can be smaller or greater than the number of Apex licenses are available as 12 to 60-month subscriptions, and AnyConnect Plus licenses are also available as permanent licenses. Software software software support and software upgrades are included in AnyConnect Plus and Apex subscription or an active SWSS contract is required for all software access and technical support. Please note that support contracts for headend termination devices (ASA, ISE, etc.) must be purchased separately. AnyConnect 4.x licensed customers also have the right to previous anyConnect service. The exact number of Plus or Apex licenses must be based on all unique users may be possible to use any Cisco AnyConnect service. The exact number of Plus or Apex licenses must be based on all unique users may be possible to use any Cisco AnyConnect service. The exact number of Plus or Apex licenses must be based on all unique users may be possible to use any Cisco AnyConnect service. The exact number of Plus or Apex licenses must be based on all unique users may be possible to use any Cisco AnyConnect service. The exact number of Plus or Apex licenses must be based on all unique users may be possible to use any Cisco AnyConnect service. the total number of unique users requiring specific services associated with each license 4. Order information of all anyConnect licenses customizable in Cisco trading and are listed in the Global Price List (GPL). The contract number will be generated for all subscription licenses as well as any permanent license ordered with a support contract. If you have an existing contract number, you may request that new permissions be added to that contract. You don't have to generate a new contract number is generated, you will need to obtain this contract is linked to Cisco.com id. If the contract is not related, then you will not be able to download AnyConnect software or receive technical support. Note: Integrated service routers require security clearance (L-SL-xx-SEC-K9=) in addition to anyConnect license, start with L-AC-APX-LIC= to order an Apex subscription license, start with L-AC-APX-LIC= to order an Apex subscription license, start with L-AC-APX-LIC= to order an Apex subscription license, start with L-AC-APX-LIC= to order an Apex subscription license, start with L-AC-APX-LIC= to order an Apex subscription license, start with L-AC-APX-LIC= to order an Apex subscription license, start with L-AC-APX-LIC= to order an Apex subscription license, start with L-AC-APX-LIC= to order an Apex subscription license, start with L-AC-APX-LIC= to order an Apex subscription license, start with L-AC-APX-LIC= to order an Apex subscription license and license are subscription license. note that the minimum user license size is 25. The default duration to 36 months (3 years). It can be set up by selecting Edit Service/Subscriptions between 3 and 5 years. When using the order method above, you will be able to cooperate with shared permissions by selecting specific start or end dates. When purchasing a license from a Cisco authorized reseller, your order may need to be based on SKU band for a certain period of time and the size of your user number. Please see Section 4.1 (Table 2) for License Plus and Section 4.2 (Table 4) for Apex License for Specific SKUs. Note: You are allowed to stack AnyConnect Plus and Apex licenses and conditions. Doing so will lead to a generation of multi-product activation keys, which must be registered in your Adaptive Security Virtual Security Device (ASAV), Cisco Firepower's next-generation firewall supplies running ASA software, Cisco routers, Cisco select the counting-(s) license option based on the total number of unique (authorized) users who may use anyConnect Plus services. After your choice Number(s), with high quantity (99,999) SKU expansion in the form of L-AC-yyyy-S-xY-zzz at no cost added. This SKU delivers multi-use product key activation (PAK), which can be used to support adaptive security supplies VPN services throughout the company. Please see section 4.1 (Table 3) for specific SKUs. Each ASA is registered to clear your once per attempt using the amount 1. VPN is the only one to order any VPN connect Vpn is the only SKUs per HEADEND ASA required. They cannot be shared across multiple appliances, and they should be purchased based on the maximum number of concurrent connections you wish to support on a particular headend device. Please make sure that the purchased and maintained individually for all software access and technical support. 4.1 Plus License (12- to 60 months duration or permanent) License Plus row offers the following services: VPN functionality for pc and mobile operating systems, including per VPN app on mobile platforms, Cisco VPN phone, and third-party (non-AnyConnect) IKEv2 VPN clients Basic endpoint field set IEEE 802.1X Windows supplicant Cloud Web Security Agent for Windows OS and Mac OSX (Web Cloud Separately licensed security services.) • Cisco Umbrella Roaming Agent for Windows and Mac OS X operating system (umbrella roaming service separately licensed.) • Cisco Umbrella Roaming Agent for Windows and Mac OS X operating system (umbrella roaming services). Cisco AnyConnect Essentials and Mobile Licenses, as well as environments serviced by other AnyConnect uses including the Director of Access To network, web security, and Cisco partner. (Available for 12 to 60-month conditions. default is 36 months.) Select the license value matching your unique user number - at least 25, without a maximum. Habitual License: L-AC-PLS-P-G User License: AC-PLS-P-G User License (SWSS Contract required for software access and support) (zzzz = Number of unique users from Table 4) Table 2. Single VPN Connections - Single VPN Connections - Single VPN Connections Connections - Single VPN - Permanent License / 2,500 Con-EMCU-ACVA10K Concurrent Connections Note: For headend devices supporting more than 10,000 simultaneous connections, more than one VPN only license can be purchased to support the maximum simultaneous capacity of the platform. For example, if the device supports 20,000 connections, two L-AC-VPNO-10K= licenses can be purchased. For those devices, the PAK physical registration process does not apply. Spare permissions (L-AC-VPNO-10K= licenses can be purchased. For those devices, the PAK physical registration process does not apply. Spare permissions (L-AC-VPNO-xxxx=) are sent by eDelivery. ASA Options (AC-VPNO-xxx) will be physically printed and will be customized along with the ASA with this option. 5. Services provide software support and updates for the duration of all anyConnect-based licenses included. Plus perennial VPN and VPN only permanent licenses require additional purchases of Cisco Service Support Software (SWSS) to gain access to software and technical support. Cisco Smart Net Total Care support contracts for headend termination devices must be purchased separately. It supports the right of customers to the services listed here for the full duration of the suite. fast, specialized support • Registered access to Cisco.com please refer to the following link for more detailed information about Cisco software support services: 6. Cisco License Management portal. A valid Cisco.com and password is required to use the password. When a Cisco Adaptive Security Device (ASA) is used with AnyConnect, you must register any individual ASA supplies to any AnyConnect Plus or Apex license you purchase. The licensing process should not be completed for Cisco Adaptive Security Virtual Appliances (ASAv), Cisco Firepower, Cisco ISE, Cisco iOS, or other headends. See section 6.0.4 for instructions on sharing your AnyConnect Plus or Apex license you purchase. The licensing process should not be completed for Cisco Adaptive Security Virtual Appliances (ASAv), Cisco Firepower, Cisco ISE, Cisco IOS, or other headends. Threat Defense (FTD) 6.2.1 and later. Contract entitlement (Part 6.1) is completed regardless of headend. Otherwise you will be able to download AnyConnect software or gain technology support. The license registration process varies depending on the purchased license. Note: When registering permissions to the ASA, it is important to verify your device's serial number using the device's version or device display command Note: For all AnyConnect Plus and Apex licenses, the Adaptive Security Supplies (ASA) license emailed to you after activating your key will only display the capacity of your device's simultaneous hardware user, not the number of permissions your authorized user license emailed to you after activating your key will only display the capacity of your device's simultaneous hardware user, not the number of permissions your authorized user license emailed to you after activating your key will only display the capacity of your device's simultaneous hardware user, not the number of permissions your authorized user license emailed to you after activating your key will only display the capacity of your device's simultaneous hardware user, not the number of permissions your authorized user license emailed to you after activating your key will only display the capacity of your device's simultaneous hardware user. access your support contract through cisco service contract through cisco service contract center. 6.0.1 Plus and apex license terms (L-AC-PLS-LIC=) product activation code in the Cisco.com license portal under receiving other permissions - sharing the license process - ASA AnyConnect Term and Content. You will be asked to enter a target source and serial number scan be any serial number that currently shares this license, you will be able to select multiple permissions to share at once. If you have multiple subscriber licenses, each of them should be shared with all asa serial numbers. Your ASA key won't change when you share multiple permissions. After completing this process, you will be given an activation code and instructions to complete the email sharing process. You have to repeat the process for any additional ASA serial number you wish to share the license with. Only Cisco.com is tied to the initial license registration process can share your license with additional devices. 6.0.2 Plus perennial (L-AC-PLS-YR-G) and older plus or order ross (L-AC-APX-xYR-G) product activation submission you can have only one adaptive security appliance (ASA) on a related unit license registration. page. The same product activation key (PAK) can be applied to multiple devices by repeating this process. If you have purchased multiple rows of licenses or user numbers, register each activation key individually to all serial numbers of your home appliances. Value 1 must be used to register your ASA device, it is not used for any other Cisco headend device. This PAK can only be used once. Note: This license cannot be moved after it has been registered, so please make sure you are signing up the license for the correct ASA serial number from the demo version. 6.0.4 Defense Firepower Threat (FTD) 6.2.1 and later in order to enable your AnyConnect Plus, Apex or VPN only license(s) with Firepower Threat Defense (FTD) 6.2.1 or later, it should be shared with your smart account. To complete the sharing process, please open an item with Cisco Global Licensing@cisco.com with the following topic and the information filled in: Thread: AnyConnect Smart License Sharing Request Body Message: Please share the following AnyConnect license by providing AnyConnect license by providing AnyConnect Product Activation Key (PAK): AnyConnect License Type (Plus, Apex or VPN Only): The above information is required to complete this request 6.1 contract entitlements (support and access to the software center) support and access of the software center for the duration of the subscription license is included. Plus permanent licenses and VPN only require additional purchases of a support contract in order for you to get support or access the software. Support and access to the software center for the duration of the subscription license is included. smart active contract of total care support. To use your Cisco.com to support and access the software center, you must first find the contract number directly from your Cisco reseller. The contract number is usually generated within a week after your product activates the eDelivery key. When an order is placed with Cisco, your authorized reseller or account team can specify an existing contract number to your Cisco.com ID, you can request that the contract be completed to your Cisco.com ID directly by mailing web-help-sr@cisco.com with your contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request that the contract number to your Cisco.com ID, you can request the contract number to your Cisco.com ID, you can request the contract number to your Cisco.com ID, you can request number and id Cisco.com and short notes requesting the link to complete for full access (support and software download center). Information Cisco.com your ID details (company, address, etc.) must match the details of the order. 6.2 Cisco's assessment license offers a 4-week Apex assessment license that combines all license-plus functionality.
