Foreword

Road transport is the dominant mode of transport in India both in terms of share in goods and passenger traffic and in terms of contribution to the national economy. Transportation by roads has scored over other modes of transport because of easy accessibility, flexibility of operations, door-to-door service and reliability.

Sustained economic growth, improved road infrastructure and increased disposable income of households have led to the rising demand for road transport. The number of total registered vehicles has recorded a trend growth rate of 9.8 percent during the last ten years (2005 to 2015) and as on 31st March, 2015 there were 210.0 million registered vehicles India. Personalized mode of transport (cars and two wheelers) constitute about 87 percent of total vehicle population.

The present issue of 'Road Transport Year Book' combines the 2013-14 and 2014-15 issues in a single document. It contains wide range of information pertaining to important matters like the number of registered motor vehicles over time and across state/UTs and major cities, composition of registered motor vehicles, taxes on road transport and motor vehicles, production and sale of motor vehicles, drivers' and conductors' licenses issued.

I hope the publication would be useful to administrators, policy makers and the academia especially those interested in road transport sector. I gratefully acknowledge the cooperation of different agencies involve in motor vehicle and road transport regulation and administration. Contribution of the officers and staff of the Transport Research Wing involved in the work related to this publication is deeply appreciated.

PREFACE

Road transport is the primary mode of transport which plays an important role in the movement of goods and passengers. This segment of transportation system is very significant for economic development and social integration of the country.

Transport Research Wing (TRW) of the Ministry of Road Transport & Highways brings out every year a publication on Road Transport, Year Book. The present issue of Road Transport Year Book contains information for two years 2013-14 and 2014-15. It has the coverage of information on the registered motor vehicle population, motor vehicle taxation structure, licenses and permits and revenue realized from road transport in various States/UTs and in million-plus cities of the country as on 31st March, 2014 and 31st March, 2015.

I am especially thankful to the concerned authorities of all States/UTs for furnishing the requisite data/ information to TRW. I also congratulate officers and staff of the TRW for putting considerable efforts in bringing out this useful publication for the year 2013-14 and 2014-15. I hope, this document will be a good reference book for academicians, planners, automobile manufactures and other devout readers.

Constructive suggestions from the users of this publication are always welcome.

Road Transport Year Book

Executive Summary

Road transport is the dominant mode of transport in India, both in terms of traffic share and in terms of contribution to the national economy. Apart from facilitating the movement of goods and passengers, road transport plays a key role in promoting equitable socio-economic development across regions of the country. It also plays vital role in social and economic integration and development of the country. Easy accessibility, flexibility of operations, door-to-door service and reliability have earned road transport a greater significance in both passenger and freight traffic vis-à-vis other modes of transport.

2. Sustained economic development and expanding road network have led to rapidly increasing motorized vehicles in India. The total number of registered motor vehicles has increased from about 0.3 million in 1951 to 210.0 million in 2015. The total registered motor vehicles in the country grew at a Compound Annual Growth Rate of 9.8 percent between 2005 and 2015. While the number of different types of motor vehicles were growing over the years there has, however, been significant variations in the growth rates and hence substantial change in the composition of registered vehicles during the period. Two-wheelers which constituted 8.8 percent in 1951 has come to dominate the scene on account of relatively faster growth and by 2015 they accounted for 73.5% of the total registered vehicles. The combined share of vehicles in the categories of cars, jeeps & taxis; goods vehicles; and buses in the total registered vehicles had declined from the 89.9 percent in 1951 to 19 percent in 2015. The share of motor vehicles categorized as 'Others' which include tractors, trailers and three-wheelers has increased from 1.3 percent 1951 to 7.5 percent in 2015.

3. The long-run trend in vehicular composition has revealed the preference of road users for personalized means of transport over the public road transport.

4. Wide inter-State/UT variations in the growth rates of registered motor vehicles were also observed. The annual growth rate of registered motor vehicles for the decade 2005 to 2015 was highest in Tripura (14.5%), followed by Himachal Pradesh (13.6%) and Bihar (13.5%). The lowest annual growth rates for the same period were recorded by Chandigarh (0.9%), Jharkhand (4.3%) and

Nagaland (6.8%). Amongst the million plus cities Kochi (13.8%) recorded the highest annual growth rate which was followed by Surat (13.5%) and Kanpur (13.1%).

5. Out of the total 210.03 million registered motor vehicles up to 31st March, 2015 in India, the State of Maharashtra accounted for the largest share (12.2%) followed by Tamil Nadu (10.7%), Uttar Pradesh (10.3%), Gujarat (8.9%) and Karnataka (7.0%). These five States together accounted for 49.1 percent of the total vehicles registered upto 31st March, 2015. Small States/UTs, (both in terms of geographical area and population) namely, Sikkim and Lakshadweep have lowest share in the number of registered motor vehicles.

6. Information on the number of registered vehicles has been presented separately for 48 reporting million-plus cities. These 48 reporting million-plus cities have reported 662.44 lakh registered motor vehicles during the period up to 31st March, 2015. Out of these, Delhi (88.51 lakhs) had the highest number of registered motor vehicles, followed by Bengaluru (55.60 lakh), Chennai (49.34 lakh), Ahmedabad (34.20 lakh), Greater Mumbai (25.71 lakh) and Surat (24.59 lakh). These six cities accounted for 41.96 percent of the total registered vehicles among the reporting million-plus cities.

7. International comparison of vehicular penetration reveals that developed countries tend to have higher car penetration whereas in developing countries tend to have higher two-wheelers penetration.

8. Both Central and State Governments impose taxes on vehicles and related items such as petrol, diesel, tyres and tubes and accessories. In addition, the Central Government levies taxes on certain road transport services whereas the State Governments levies tax on passengers and goods and toll tax. The existing structure of taxes characterized by the problem of multiplicity and wide inter-State variations is expected to be alleviated by the Goods and Service Tax (GST) which is set to soon come into operation. This would imply that taxes on motor vehicle and passengers & goods which are significant revenue sources for the States, accounting for over 10 percent of own tax revenue for several States and about 7.5 percent of all the States together would come to be subsumed into the GST.

Section - I

Importance of Road Transport Sector in Indian Economy

1.1 The major modes of transport in India are roads, railways, airways, shipping and inland waterways. The sector is dominated by road transport, both in terms of share in passenger and freight carried and in terms of contribution to the national economy. Between the two main modes of transport, viz., road and railways, road transport carries about 90 percent of the total passenger traffic and 67 percent freight traffic. In terms of contribution to the economy, road transport contributes about 3.3 percent of Gross Value Addition (GVA)* against the total transport sector contribution of 5 percent in the GVA. Apart from facilitating the movement of goods and passengers, road transport also plays a key role in promoting equitable socio-economic development across regions of the country. Road transport facilitates universal access to public services and promotes development of backward regions by opening them to trade and investment. Easy accessibility, flexibility of operations, door-to-door service and reliability have earned road transport a greater significance in both passenger and freight traffic vis-à-vis other modes of transport.

1.2 Sustained economic growth has brought about expansion of the transport sector in India. The share of transport sector in Gross Value Added (GVA) increased from 4.9 percent in 2011-12 to 5.0 percent in 2014-15. The contribution of road transport sector in GVA has remained more or less stable at 3.3 percent during the same period. The share of road transport in the transport sector value addition has also remained stable at about 66 percent. Table 1.1 below gives the share of various sub-sectors of the transport sector in GVA since 2011-12.

Registered Motor Vehicles in India

2.1 There has been a continuous increase in the number of registered motor vehicles in India since 1951. The total number of registered motor vehicles increased from about 0.3 million in March, 1951 to 190.7 million up to the period 31st March, 2014 and 210.0 million up to 31st March, 2015. The total registered vehicles in the country grew at a Compound Annual Growth Rate (CAGR) of 10.1% between 2004 and 2014 and 9.8% between 2005 and 2015. **Annexure 2.1** indicates the total number of all registered motor vehicles in India since 1951 to 2015.

2.2 **Composition of Registered Motor Vehicles:** The share of two wheelers in total registered motor vehicles in India stood at 73.1% during 2014 and 73.5% during 2015 as compared to 8.8% during 1951 (Table 2.1). Concomitantly, the share of cars, jeeps and taxis in the total number of registered vehicles was 13.6% in both period up to 31st March, 2014 and 2015, marking a steep decline from 52% during the period 31st March, 1951. The share of buses in total registered vehicles

declined from 11.1% during the period 31st March 1951 to 1.0 % for the both period up to 31st March 2014 and 2015. Omni buses were also included in the fleet of buses from 2001. The number of registered goods vehicles, which had accounted for 26.8% during the period 31st March, 1951 decreased to 4.6% of the total vehicles in the country during the period up to 31st March, 2014 and 4.4% up to 31st March, 2015. The share of 'Other vehicles' which include tractors, trailers, three wheelers (passenger)/Light Motor Vehicles (LMVs) and other miscellaneous vehicles, increased from 1.3% in 1951 to 7.7% during 2013-14 and 7.5% during 2014-15.

2.3 Graphic representation of the vehicular composition is at Chart 2.2 below shows the linear movement of each category of vehicles share in the total registered vehicle over the period from 1951 to 2015.

2.4 Apart from the sheer dominance of the total vehicular population in India by two-wheelers, this category of vehicle has seen steady growth, though at a lower rate in recent years, whereas the share of buses has declined over the years. This preference of road users for personalised means of transport over public transport could be dictated, apart from convenience and economic considerations, by the failure of public transport system in keeping up with the demand.

2.5 Growth of Vehicles vis-a-vis Roads: The CAGR of the total registered motor vehicles in India were 10.1% and 9.8% during the period 2004 to 2014 and 2005 to 2015 respectively (Table 2.2). Amongst the various categories of vehicles, the highest CAGR during the period 2004 to 2014 were recorded by cars, jeeps and taxis (10.6%), followed by two-wheelers (10.4%), buses 9.4% goods vehicles (8.8%) and other vehicles 8.0%. During the period 2005 to 2015, also the highest CAGR were recorded by cars, jeeps and taxis (10.7%), followed by two-wheelers (10.1%), goods vehicles

(8.8%), buses 8.2% and others vehicles 7.8%. Between 2004 to 2014 and 2005 to 2015, the total vehicle population grew at a CAGR of 10.1% & 9.8% respectively vis-à-vis the CAGR of 4% and 3.6% in the total road length.

Goods Vehicles: Goods Vehicles includes multi-axled/articulated, trucks & lorries and light motor vehicles (Goods). The number of registered goods vehicles recorded a growth rate of 4.7% during 2013-14 and 7.4 % during 2014-15. There were about 87.0 lakh goods vehicles up to 31st March 2014 and 93.4 lakh up to 31st March 2015.

Other Vehicles: Other vehicles include tractors, trailers, three-wheelers (passenger vehicles/LMVs) and other miscellaneous vehicles which are not classified separately. The combined growth of these vehicles together during 2013-14 was 4.8% and 7.4% during 2014-15. There were 147.1 lakh and 158.0 lakh of other vehicles up to 31st March 2014 and up to 31st March 2015 respectively.

State-wise Distribution of Registered Motor Vehicle Population in India

3.1 Out of total 190.7 million registered motor vehicles up to 31st March, 2014 and 210.02 million up to 31st March, 2015, the State of Maharashtra accounted for the largest share (12.3% up to 31st March, 2014 and 12.2% up to 31st March, 2015) in total registered motor vehicles in the country followed by Tamil Nadu (10.9% up to 31st March, 2014 and 10.7% up to 31st March, 2015), Uttar Pradesh (10.0% up to 31st March, 2014 and 10.3% up to 31st March, 2015), Gujarat (9.0% up to 31st March, 2014 and 8.9% up to 31st March, 2015) and Karnataka (7.0% for both period up to 31st March, 2014 and 31st March, 2015). These five States together accounted for 49.2% of the total vehicles registered up to 31st March, 2014 and 49.1% up to 31st March, 2015. The lowest number of motor vehicles (0.13 lakh up to 31st March, 2014 and 0.14 lakh up to 31st March, 2015) were registered in the UT of Lakshadweep with a share of 0.01% in the total registered motor vehicles in the country (details at [Annexure 3.1](#)). Among the States, Sikkim reported the lowest number of the total registered vehicles (0.40 lakh up to 31st March, 2014 and 0.43 lakh up to 31st March, 2015) with a share of 0.02 % in the total registered motor vehicles in the country. International Comparison on Vehicular Penetration

5.1 Vehicular penetration in India, measured by the number of vehicles per 1000 persons, has seen substantial increase from 1980s. Vehicular penetration in India has increased 8 in 1981 to 167 by 2015. However, as compared to developed countries the total motor vehicle penetration in India is low. Table 5.1 gives international comparison of vehicular penetration which shows that car penetration in developed countries is much higher than in the developing countries. In contrast, the penetration of two wheelers in developing countries is higher than the developed countries. Developed countries like Germany and USA have car penetration rates (car/1000 persons) higher by factors of about 7 and 5 to that of China and by factors of 29 and 19 to that of India respectively. However, in India and few other developing countries the penetration level of two-wheelers (two wheelers/1000 persons) is much higher compared to developed countries. [Annexure 5.1 & 5.2](#) indicates the details of Vehicle Fleet Ratios and Two-wheeler per 1000 persons of Select Developed & Developing Countries.

Section – 6

Road Transport and Motor Vehicle Taxation in India

6.1 Under the federal set up in India, the centre, states and local authorities have well defined powers of taxation and management of road transport, as earmarked in the Seventh Schedule of the Constitution. The Union Government of India levies import duties on the import of diesel, motor spirit, tyres and tubes and vehicle and spare parts/accessories; and excise duties on diesel, motor spirit, tyres and tubes, and vehicle and spare parts/accessories, produced or manufactured in India. The Union Government also levies service tax on certain road transport services. The State Governments levy different types of taxes on road transport. These taxes include sales tax/VAT on motor spirit and lubricants and specific taxes like motor vehicle taxes, fees, tax on passengers and goods. Motor Vehicle Taxes (MVT) is levied in all States and Union Territories (UTs) except UT of Lakshadweep. The existing tax structure of motor vehicles in India is characterized by variations in tax structures, incidence, tax rates and bases of levies.

6.2 **Central Government Levies:** The import duties and excise duties on motor vehicles & accessories, tyres and tubes, high speed diesel oils & motor spirit collected by central government from Road Transport Sector is shown in chart 6.1 and also indicated at [Annexure 6.1](#).

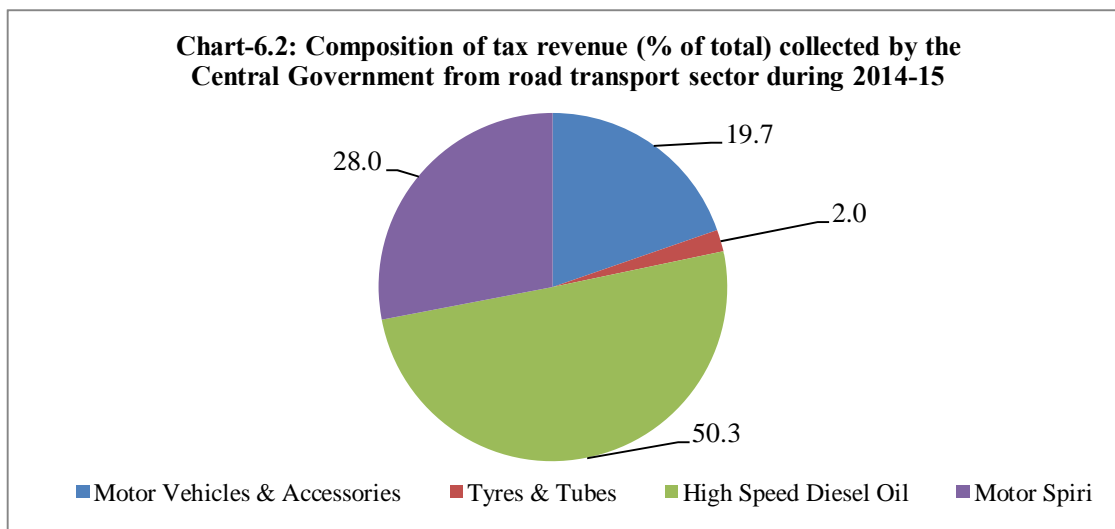

Source: Directorate of Data Management, Central Excise and Custom.

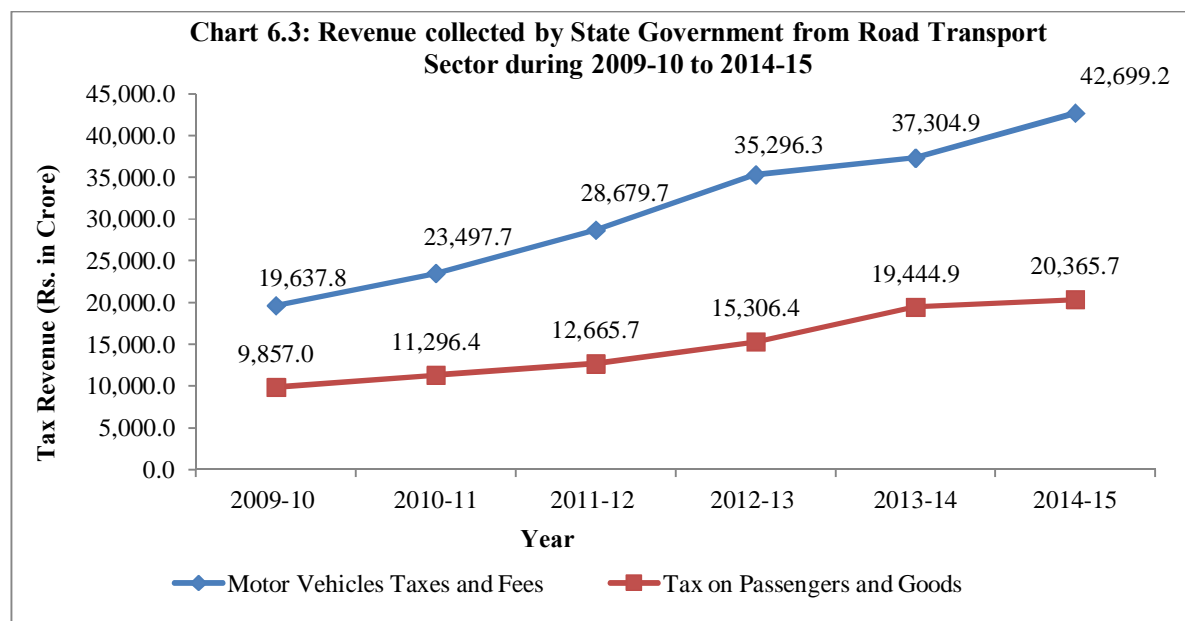

6.3 Chart-6.1 depicts that revenue collected by central government from motor vehicles & accessories increased from Rs. 10415.9 in 2009-10 to Rs. 21,776.1 crore in 2013-14 and Rs.21676.7 crore in 2014-15. Revenue collected by central government from tyres & tubes increased from Rs. 2067.7 crore in 2009-10 to Rs.1985.9 crore in 2013-14 and Rs. 2113.1crore in 2014-15. Revenue collected by central government from high speed diesel oil increased from Rs. 7715.7 crore to Rs. 42898.1 crore in 2013-14 and Rs. 55325.3 crore in Rs. 2014-15 and revenue collected by central government from motor spirit increased from 28187.7 crore in 2009-10 to Rs. 22424 crore in 2013-14 and Rs.30,825.9 crore in 2014-15.

6.4 However, in the case of Motor Vehicles & Accessories, though, there was a continuous increase in collection of revenue from 2009-10 (Rs. 10,415.9 crore) to 2013-14 (Rs. 21,776.1crores), the tax collected slightly declined to Rs. 21,676.7 crore during 2014-15. There was a continuous increased in collection of tax revenue from tyres & tubes since 2009-10 (Rs. 2,067.7 crore) to 2012-13 (Rs. 4,872.4 crore), the tax collected declined to Rs. 1,985.9 crore during 2013-14 and again increased to Rs. 2,113.1 crore in 2014-15. In respect of High speed diesel oil, there was a steep increase from Rs. 7,715.7 crore in 2009-10 to Rs. 21,278.1 crore in 2010-11 but decreased in 2011-12 to Rs. 20,003.1 crore after that again increased Rs. 37,187.5 crore in 2012-13 to Rs. 55,325.3 crore in 2014-15. The revenue collected from motor spirit increased from Rs. 28,187.7 crore in 2009-10 to Rs. 35,506.5 crore in 2010-11 and thereafter witnessed a declining trend since the year 2011-12 to Rs. 34,034.9 crore in 2011-12, Rs. 27,465.0 crore in 2012-13 and Rs. 22,424.0 crore in 2013-14 and increased in 2014-15 to Rs. 30,825.9 crore.

6.5 The percentage share of revenue collected by central government from high speed diesel oil was highest 48.2% in the year 2013-14 and 50.3% in the 2014-15 followed by motor spirit 25.2% and 28.0% during the year 2013-14 and 2014-15 respectively, motor vehicles & accessories 24.4% in the 2013-14 and 19.7% during the year 2014-15 and tyres & tubes 2.2% in the year 2013-14 and 2.0% during 2013-14. The composition of tax revenue collected by central government from road transport sector as on 31st March, 2015 is shown in chart-6.2.

6.6 State Government Levies: The motor vehicle taxes and fees, sales tax/VAT on motor spirit and lubricants and passengers and goods tax collected by state governments from road transport sector during the period 2009-10 to 2014-15 are shown in chart-6.3 below. The combined amount of revenues realised by State Government from road transport from 1950-51 to 2014-15 is given at [Annex 6.2](#).

Note: Reserve Bank of India have not reported the data for Sales Tax/ VAT on Motor Spirit and Lubricants from 2012-13 to 2014-15

6.7 Chart 6.3- depicts that the revenue collected by state governments from motor vehicle taxes & fees increased from Rs. 19,637.8 crore in 2009-10 to Rs 37,304.9 crore in the year 2013-14 and Rs. 42,699.2 crore in 2014-15. The revenue collected from Tax on passengers and goods has also shown an increasing trend from Rs. 9,857.0 crore during 2009-10 to Rs. 19,444.9 crore and Rs. 20,365.7 crore during the year 2013-14 and 2014-15 respectively.

6.8 Chart-6.4 depicts the percentage share in the total tax revenue collected by state governments during 2014-15. The motor vehicle taxes and fees accounted for share of 67.7% and tax on passengers and goods accounted for share of 32.3%.

6.9 The revenue generated by States and UTs with legislatures from tax on motor vehicles and taxes on goods and passengers constitutes, on an average, 7.5 percent of their combined own tax revenue in 2014-15 ([Annexure 6.5](#)). The magnitude of the revenue significance of these taxes differs widely across States; from as low as 2.9 percent of its own tax revenue in case of Tripura to 50.2 percent of own tax revenue for Arunachal Pradesh. Among major States, the revenue from motor vehicle and goods & passenger taxes constitute significantly higher proportion of own tax revenue for Bihar (19.9%), Orissa (14.1%), Madhya Pradesh (12.5%), Chattisgarh (11.8%) and Karnataka (10.8%).

6.10 The existing regime of taxation on road transport and motor vehicles is characterised by multiplicity and wide inter-State variations. This problem is expected to be alleviated when Goods and Services Tax (GST) comes into operation. It would also imply that States would be losing their discretionary power over potentially buoyant source of revenue such as the motor vehicle tax.

6.11 Structure of Motor Vehicle Taxation in India: States have the exclusive powers to levy passenger and goods tax but their power to tax motor vehicles is subject to the general regulatory

provisions of Central laws on the subject. At present, the tax rate across the States/Union Territories (UTs) on motor vehicles varies from 2% to 21%. The existing structure of tax on motor vehicles with respect to two-wheelers, cars, passenger vehicles and goods is given below:

6.12 Most of the States have switched over to life time tax (LTT) except for a few like Mizoram, Odisha, Sikkim, Tripura, Andaman & Nicobar, Dadra & Nagar Haveli and Daman & Diu in respect of two-wheelers. In some States, tax slabs for LTT for two-wheelers are based on engine capacity (Himachal, Manipur, Rajasthan, Tripura, West Bengal and Puducherry); in some states it is the unladen weight (Assam, Meghalaya and Odisha) and in some states (Arunachal Pradesh, Jammu & Kashmir and Jharkhand) it is on lump sum basis. Other States/UTs follow life time tax based on purely the value/cost of the vehicle (Andhra Pradesh, Bihar, Chhattisgarh, Goa, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Nagaland, Punjab, Tamil Nadu, Telengana, Uttrakhand, Uttar Pradesh, Chandigarh and Delhi).

6.13 In the case of cars, some of the States/UTs which follow engine capacities are Sikkim, West Bengal while Puducherry follow unladen weight as the basis. In Himachal Pradesh the basis of MVT is engine capacity in conjunction with the percentage of cost of vehicle. States like Jharkhand follow the basis of seating capacity. However, most of the States/UTs now follow life time tax based on the value/cost of the vehicle (Andhra Pradesh, Assam, Bihar, Chhattisgarh, Goa, Gujarat, Haryana, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Meghalaya, Nagaland, Odisha, Punjab, Rajasthan, Telengana, Tamil Nadu, Tripura, Uttarakhand, Uttar Pradesh, Chandigarh, Dadra & Nagar Haveli, Daman & Diu and Delhi). The taxes are annually in the state of Mizoram.

6.14 In the case of passenger transport vehicles like stage or contract carriages, the seating capacity forms the basis for levying tax. Motor vehicle taxation of passenger buses is mainly on the basis of an upper seating capacity limit (per seat per quarter/annum) and treated differently from motor cars and jeeps. In many States differentiation in tax treatment of passenger buses is also accorded on the basis of type of service (Ordinary/Luxury/Express etc). Some States, for example, Andhra Pradesh, Chhattisgarh, Madhya Pradesh and Odisha also include the distance that the vehicle is permitted to ply as an additional element for determining the quantum of tax. In some States routes are divided into different categories in terms of region with a different rate of tax for each, e.g. in Andhra Pradesh (based on moffusil versus town) and Maharashtra (based on city versus rural areas). Another distinction particular to the taxation of commercial passenger vehicles is that between stage carriages and contract carriages.

6.15 Goods vehicles are almost always taxed on the basis of the registered laden weight (RLW) or gross vehicle weight (GVW) or unladen weight (ULW). For goods vehicles, in most of the States, the basis for taxation is registered laden weight (RLW)/gross vehicle weight (GVW). As far as tax on goods vehicle is concerned, the de facto tax rate everywhere is a specific rate calculated on the basis of ULW, GVW/RLW or payload.
