BUILDING ACCESSORIES

Gloves, Bags & Blades

Unmistakably bold, the Grip-Rite RED System features tools, compressors, accessories and fasteners pros demand when they are looking for quality and value from a brand they know and trust. From framing and roofing to fencing and siding the RED System has everything needed to get the job done right!

COIL FRAMING NAILER GRTCN90

The Grip-Rite® GRTCN90 coil framing nailer is durable yet lightweight, weighing in at only 6.6 pounds. The selectable trigger allows workers to choose between bump and sequential fire. A rotating belt hook and durable molded rubber grip allow for comfort and ease of use.

21° FRAMING NAILER GRTFR83

One of the most durable, yet lightweight framers on the market. Well balanced and weighing only 6.9 lbs., the GRTFR83 dramatically reduces user fatigue and easily fits between 16" OC studs. Exclusive to Grip-Rite®, it features "True Drive" Technology, which actually recycles a portion of the air after each shot and reduces the amount of air needed for the next nail.

0° Fencing & Siding Nailer GRTCS250Z

The Grip-Rite® RED System™ GRTCS250Z coil nailer is designed with the professional contractor in mind. The tool is equipped with a 360° tool-free air exhaust, rotating belt hook and a durable molded rubber comfort grip. A no-mar pad protects work surfaces from damage.

Mini Palm Nailer GRTMP16

The small but powerful GRTMP16 mini palm nailer will reach almost anywhere and drives up to most 3-1/2" 16D nails. It features a magnetic insert in the nose to hold the fastener in place and allow users a free hand while working.

1 Gallon Compressor GR100

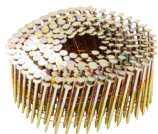

RED System Trim Compressor is the perfect oil-free air supply compressor for trim and finish tools as well as other light duty work. Don't let its size fool you, this little compressor can move enough air for your projects. At 0.6 CFM and 125 psi, your finish and trim jobs are no match for the GR100.

4 Gallon Compressor GR2540LR

GR2540LR features a low 1725 RPM motor that increases the life of the compressor and dramatically reduces the noise level compared to similar 3450 RPM units. It only draws 12-Amps at start up which means no more tripped (blown) breakers. The extending pull handle and 10" No-Flat tires add to the versatility and functionality of this unique unit.

EXTERIOR SCREWS

Structural Screws, MAX Stainless, Trim Head & Coated

Structural Screws

From the brand you know and trust, Grip-Rite Structural Screws offer versatility, speed and longevity for your load-bearing exterior wood construction projects. Grip-Rite's exclusive Dual Drive Power head brings flexibility to the jobsite with a unique, combined Hex Washer/Star Drive recess head, allowing you to choose the included hex driver or a star drive bit to fasten the screw. A 3-digit, ICC recognized code is stamped right into the head for easy spec reference and a load value chart is conveniently located on every package. As a replacement for lag screws, Grip-Rite Structural Screw type 17 tip offers both efficiency and time savings by eliminating the need to pre-drill pilot holes. Grip-Rite premium PrimeGuard Plus coating offers the assurance these screws will last throughout the lifetime of a project.

NEW — Grip-Rite Structural Screws
Peg hooked clamshells, 50 pc. boxes, 150-200 pc. boxes, and bulk packaging. Actual quantities may vary based off screw size

PrimeGuard MAX® Stainless Exterior Screws

When nothing but the best will do, Grip-Rite MAX Stainless screws are the preferred premium exterior construction fastener on jobsites – especially those located in areas with high humidity, around pool areas or near the coasts. Grip-Rite 305 and 316 grade stainless steel screws are ideal for fastening decking, siding, roofing, finish and trim and are the best choice for use in cedar and redwood construction. Deep cut threads and T15-30 star drive heads are standard on all Grip-Rite MAX Stainless Exterior Screws, increasing holding power and quick engagement for a solid connection.

PrimeGuard Plus® Exterior Coated Screws & Trim Head Screws

Grip-Rite Exterior Coated Star Drive and Trim Head screws are engineered with our exclusive PrimeGuard Plus premium coating – guaranteed against rust and corrosion to prolong the beauty and durability of decks, siding, fencing, railing, and other outdoor projects. Grip-Rite Exterior Screws feature T25-T30 star drive heads to reduce cam outs when driving into your outdoor project. Our T-20 star drive Exterior Trim Head Screws are the perfect solution for railing, siding, or anywhere a thinner shank and smaller head are desired. Type 17 point tips on both screws reduce the need to pre-drill and help to keep the material from splitting. Coarse threading pulls the substrates together for a solid, tight connection.

PrimeGuard Exterior Coated Screws

Grip-Rite exterior screws with PrimeGuard coating are a reliable choice for contractors and DIYers who want quality and value from a brand they know and trust. With a Phillip's head, coarse thread and a sharp point, all wrapped in a 10-year coating warranty, this fastener is ideal for use in treated lumber projects.

NEW — Grip-Rite PrimeGuard MAX® STAINLESS
Available in clamshells, jars, 1lb., 5lb., 25lb. and bulk packages

Grip-Rite PrimeGuard Plus® Exterior Coated and Trim Head Screws
Available in clamshells, 1lb., 5lb., 10lb., 25lb., and bulk packaging

Grip-Rite Exterior Trim Head screws feature a T20 star drive trim head suited to materials used in exterior finish work.

Grip-Rite Exterior Screws with PrimeGuard® 10 coating
Available in 1lb., 5lb., 10lb., 25lb. and bulk packages
