**PROGRAM SUPPORT COMMUNICATIONS NETWORK
NASA FACSIMILE SYSTEM DIRECTORY**

LIST OF EFFECTIVE PAGES

This directory provides a system description, a station listing, and operating procedures for the Program Support Communications Network (PSCN) NASA Facsimile System. This directory will be updated every six months either by a complete revision or by issuing a change packet. When the directory or change packet is reissued, discard the old directory or pages and replace with the current issue.

Original	8-15-85
Reissue	8-15-92

Any changes or corrections noted in this directory by the user may be submitted to Configuration Management, by calling Shirley Norris at 205/544-6072. Information may also be sent through NASAmail, to the Configuration Management mailbox "ENDUSERS."

The designated Point-of-Contact for each facsimile machine is responsible for promptly notifying Configuration Management of any move/change associated with the facsimile machine. The reporting of this data directly affects the accuracy of the Geographic Station Listing in this directory. A Facsimile Change Form has been attached in Appendix D for convenience in submitting changes.

The information contained in this directory is provided for official Government business only. Non-official or personal use of this information is prohibited by law (see NMB 1900.1c dated June 1987).

PROGRAM SUPPORT COMMUNICATIONS NETWORK NASA FACSIMILE SYSTEM DIRECTORY

INTRODUCTION

The NASA Facsimile System is a convenient and efficient means of spanning the distance, time, and cost of transmitting documents from one person to another. In the spectrum of communication techniques, facsimile bridges the gap between mail and data transmission. Facsimile can transmit in a matter of minutes or seconds what would take a day or more by mail delivery. The NASA Facsimile System excels from the standpoint of error rate, and user assistance.

The NASA Facsimile System is composed of several makes and models of facsimile machines at various NASA and contractor locations as listed below:

<u>Vendor</u>	<u>Model</u>	<u>Description</u>
Fujitsu	dexExpress	Thermal Paper Portable Group 3
Lanier	2500	Thermal Paper Group 3
Pitney Bowes	8050	Thermal, Rolled Paper
Pitney Bowes	8230	Thermal, Rolled Paper
Pitney Bowes	9200	Two Piece (Separate Printer)
Pitney Bowes	9300	Plain Paper Group 3
Pitney Bowes	9500	Plain Paper Group 3
Pitney Bowes	9550	Plain Paper Group 3
Richo	7000D	Plain Paper Group 3/4

User training and an Operating Guide are provided with each facsimile machine upon installation. Should you require assistance, please contact the Customer Support Center at 204/544-1771.

The system also supports the 3M FaxXchange network controllers located at Marshall Space Flight Center (MSFC). The Geographical Station Listing for the facsimile machines is found in appendix A.

The PB 8100 is the original facsimile service for the PSCN. To meet user needs and requirements, the MSFC Information Systems Office is replacing the PB 8100 facsimile machine with a newer model. These transceivers operate over standard voice-grade telephone lines and are capable of being interconnected through the Program Support Communications Network (PSCN). End-user services are provided through local telecommunications facilities at each NASA center where users access the PSCN for intercenter transmissions. (See Figure 1). The PSCN provides backbone trunking and switching for the NASA Facsimile System, with access to the Federal Telecommunications System (FTS) and with commercial direct distance dialing (DDD) for off-net users.

NETWORK MANAGEMENT AND CONTROL

Network management and control are provided through the Network Management Control System (NMCS) located at the MSFC Network Processing Center (NPC). This system enables NPC to monitor network status, often leading to problem correction before a major interruption is experienced. All network switching nodes and trunk lines are monitored by the Customer Support Center, thereby providing rapid analysis and correction should any communication problems arise.

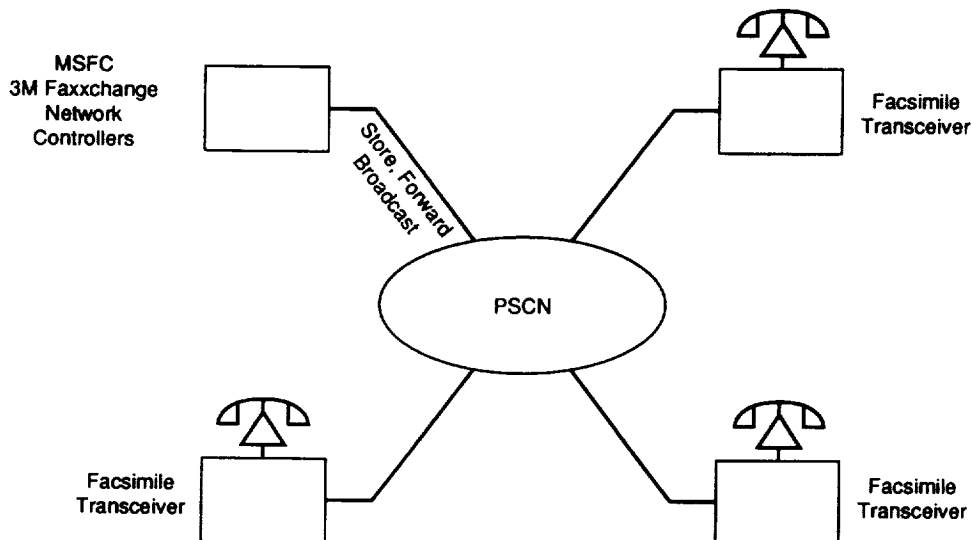

Figure 1. NASA Facsimile System

OBTAINING NEW SERVICE

The following steps are taken to process new requests or changes to existing requirements for facsimile service:

1. The user submits the Request For Service (RFS), along with a statement of justification, to the appropriate organizational manager at the user's installation.
2. The Communications Coordinator or the NASA PSCN Representative validates and approves the request, based upon the user's justification, and forwards it to the local Program Support Communications (PSC) Site Representative. (Refer to appendix E.)
3. The PSC Site Representative provides the appropriate coordination.
4. After implementation of the requirement or service, the user is provided necessary service information by the PSC Site Representative

3M FAXXCHANGE - FEATURES AND OPERATION

3M FaxXchange, a traffic control center for the NASA Facsimile System, has been established to allow users to use several enhanced features of the facsimile network. The microcomputer-controlled FaxXchange receives and retransmits documents from facsimile machines over the telephone to one or multiple facsimile machines. It also has the capability of either sending a document immediately or delaying the transmission. The FaxXchange converts the signals of every users facsimile machine into a format that is compatible with other CCITT Group 2 and 3 facsimile machines.

The users of facsimile machines often desire to send the same facsimile messages to multiple locations. These multiple messages, called **BROADCASTING**, are coordinated through the FaxXchange. Users requiring assistance should call the FaxXchange by dialing 205/544-6182. If the FaxXchange cannot be reached, a request for assistance may be submitted through the Network Management Center (NMC) by dialing 205/961-4400.

The following steps must first be taken in order to use the features that FaxXchange offers:

1. An account must be established through the FaxXchange by dialing 205/544-6182. Upon receiving a request for an account, the FaxXchange will forward a copy of a form much like the one shown in Figure 3: Facsimile Broadcast.

2. After receiving the form from FaxXchange, the user lists the numbers in each individual account needing to be established. A user may have up to 99 lists. Each list is limited to 99 telephone numbers.
3. After returning the completed form, FaxXchange will set up an account for users and designate an ID number and a three-digit access code. After the account is set up by the FaxXchange, a copy of the broadcast list will be forwarded to the originator containing the numbers as they were entered into the accounts and an instruction sheet for sending the messages.
4. The three-digit access code is combined with two other numbers to designate which service(s) the user wishes to utilize. An example code may look like this 393*1*01**. The code is defined below for further clarification:

(393)	*	(1)	*	(01)
ACCESS CODE		OPERATION CODE		DESTINATION CODE

393--The Access Code that was issued to new users by FaxXchange. (Discussed in point number 3 above)

1---The operation code designates which service(s) of the FaxXchange the user wishes to use. The "1" in this example tells the FaxXchange to transmit the message immediately. **A list of these Operation Code numbers begin on page 5.**

01---The destination code designates which broadcast list of number(s) the user desires to be used to deliver this message. On the form that is initially filled out by the user, each series of numbers constitutes a separate list. Each list may contain 99 numbers. In this example "01" tells the FaxXchange to transmit the message to broadcast list number one.

Up to 10 destination codes may be entered into the destination field as long as an asterisk (*) separates each entry and double asterisks (**) follow the last entry. **Destination codes are discussed in further detail on page 6.**

5. After deciding on the service the user desires the FaxXchange to activate, and which Broadcast list of numbers to use, the user is ready to transmit the document. The following steps must be implemented to begin transmission:
 - a. Dial the FaxXchange at 205/544-9568.
 - b. Wait for a three (3) second tone.
 - c. After the tone ends, enter the access code.

- d. Key in an asterisk (*)
- e. Key in an operation code (1,2,3,4,5, or 6).
Note: Operation codes are discussed in further detail below.
- f. Key in an asterisk (*)
- g. Key in the destination code. **Destination codes are discussed in further detail on page 6.**
- h. Key in **. A two-frequency tone will be heard after entering the **. At this point, depress the send button on the facsimile machine and hang up the phone. The completed numbers should be reflected in the following manner: 393*1*01**
- i. For each series of lists, the same procedure is followed except to change the last two digits. For example, to send list number two the code is changed to look like the following series: 393*1*02**.
- j. Upon completion of the transmission to all sites, the FaxXchange will send a confirmation sheet, which is similar to a journal, to the sender's facsimile machine showing the status of the broadcast. The FaxXchange will make three attempts (one every five minutes) to send the document to each destination number. If the destination number is unreachable after three attempts, the document is stored in a mailbox for 12 hours and will show up on the confirmation sheet as an undeliverable document. If the message cannot be delivered in twelve hours, the message is automatically deleted for that number.

OPERATION CODES

Operation Codes

Code 1 - Transmit Immediately

Code 2 - System-Wide Dispatch

Transmitting can be delayed until scheduled system-wide dispatch time (determined by the FaxXchange).

Code 3 - After Hours Forwarding

The FaxXchange can store one or more documents and forward them at a predetermined time (set by the FaxXchange) to take advantage of lower telephone rates, or at a time when the destination facsimile machines are not busy. Key in the number of hours of delay by following the code 3 with a two-digit number (ex: 01) through the maximum number of hours determined by the FaxXchange.

NOTE: Follow the above sequence for any receiving operation. If the user enters an invalid code, it will be indicated by several beeps in the handset. If this happens begin again at step 3. If you realize you have made an entry error, press the pound key on your phone twice (##). When you hear the beeps, begin again at step C.

Broadcasting

The operation code is optional based on when and how the user desires the message to be transmitted.

Destination Codes

Up to 10 destination codes may be entered into the destination field as long as an asterisk (*) separates each entry and double asterisks (**) follow the last entry. Destination codes may broadcast list numbers, telephone numbers, mini-codes, or mailbox numbers.

CODE

DESCRIPTION

Telephone Number	If you used any operation code other than 4 or 5 and are not sending to a broadcast list, you may enter the receiving location telephone number.
Mini-codes	Mini-codes may be used in place of destination telephone numbers. The FaxXchange assigns a mini-code to each user's facsimile machine. Contact the FaxXchange for further information.
Broadcast List	To send to multiple locations on a broadcast list, you must key in the broadcast list number(s) provided by the FaxXchange. To do this, first key in 0 followed by a broadcast list number.

ADDITIONAL FEATURES

Automatic Redialing

When the receiving machine is busy, the FaxXchange will automatically call back a specified number of times. (This number will be set by the FaxXchange.)

Automatic Receiving

If you have an auto-receive facsimile machine, the FaxXchange will automatically send documents to your location. If you have a manual-receive facsimile machine, you can call the FaxXchange to receive documents that are being stored for you in the electronic mailbox. The sender must have placed these documents into the mailbox for retrieval.

Copy Delivery Confirmation

A confirmation report will be sent to the location transmitting the document(s). The confirmation sheet reports whether or not the documents were delivered.

New International Service

The Direct International Facsimile (FAX) service permits users at NASA sites to directly send documents to European Space Agency (ESA) sites. This service eliminates the need for the sender to contact a local operator to place the international call. Using the store and forward 3M FaxXchanges, users can receive facsimile documents and simultaneously send them to multiple destinations.

The NASA and ESA FaxXchanges are networked together through an X.25/X.75 gateway. The FaxXchange for NASA is located at Marshall Space Flight Center (MSFC), Alabama, and the FaxXchange for ESA is located at ESOC in Germany. The following block diagram shows the existing service configuration:

Figure 2. European Space Agency Connectivity

There are two ways to use the direct international facsimile service. Users can send documents to a site (where the site is responsible for forwarding the FAX to the designated individual) or directly to a specific ESOC FAX number.

Sending a FAX to an ESA Site

1. Obtain a three-digit FaxXchange access code.

To obtain an access code, contact Ms. Len Martin PSCN Gateway at 205/544-6182.

2. Include on the FAX cover sheet the site name, telephone number, and the first and last name of the user who is to receive the FAX.
3. Using the following table, determine the FAX distribution list number for the site receiving the FAX. The ESA site forwards the FAX to the designated individual at that site through a central facility.

ESA Site	Distribution List FAX Number
ESOC, Germany	101
ESTEC, Netherlands	102
ESA-HQ, France	103
ESRIN, Italy	104
VILSPA, Spain	105
ESA Brussels, Belgium	106
ESA Toulouse, France	107
ESA Fucino Ground Station, Italy	108
Maspalomas Ground Station, Spain	109
ESA Redu Ground Station, Belgium	110
EAC Cologne, Germany	111

4. Insert the document into the FAX-machine feeder.
5. Place the FAX machine in an off-hook state:

Some FAX machines has a VOICE button, others may require the handset to be lifted.

6. Dial the telephone number of the NASA FaxXchange and wait for the tone to end. (205)544-5684.

7. To begin sending the documents, enter the following code:

ACCESS CODE*OPSCODE*0095FAXNUMBER**

NOTE: Use OPSCODE 1 for immediate delivery.

EXAMPLE: To send a FAX to any ESTEC number use:

ACCESS CODE*1*0095102**

8. After **, you should hear a tone, then press SEND. (If you hear three short beeps, an incorrect sequence was entered. Please reenter or call the Customer Support Center.)

9. To send a FAX to more than one FAX machine (at one or combination of sites), enter:

ACCESS CODE*1*0095FAXNUMBER*0095FAXNUMBER**

EXAMPLE: To send a FAX to ESOC, ESA HQ, and ESA Fucino Station, the command is:

ACCESS CODE*1*0095101*0095103*0095108**

NOTE: End the string of FAX numbers with two asterisks.

A confirmation that successful delivery to the destination ESA FAX machine is sent to the local FAX machine.

Sending a Direct FAX to a Known ESOC Number

1. Obtain a three-digit FaxXchange user code.
2. Complete the FAX cover sheet.
3. Obtain the users ESOC telephone number
4. Insert the document into the FAX-machine feeder
5. Place the FAX machine in an off-hook state.
6. Dial the telephone number of the NASA FaxXchange and wait for the tone to end.

7. Use the last four digits of the user's ESOC telephone number for the FAX NUMBER. To begin sending documents, enter the following sequence:

ACCESS CODE*OPSCODE*0095FAXNUMBER#2**

EXAMPLE: To send a FAX to a user at ESOC number 49-6151-90-2651, the command is:

ACCESS CODE*1*00952651#2**

NOTE: Terminate the ESOC FAX numbers with a #2.

8. After **, you will hear a tone, then press **SEND**. (If you hear three short beeps, an incorrect sequence was entered. Please reenter or call the Customer Support Center.)
9. To send a FAX to more than one FAX machine (at ESOC and/or combination of other ESA sites), enter the following sequence:

ACCESS CODE*1*0095FAXNUMBER*0095FAXNUMBER*...**

EXAMPLE: To send a FAX to ESOC numbers 2651 and 2908, ESA HQ and ESA Fucino Station, the command is:

ACCESS CODE*1*00952651#2*00952908#2*0095103*0095108

NOTE: End the string of FAX numbers with two asterisks.

A confirmation that successful delivery to the destination ESA FAX machine is sent to the local FAX machine.

Problems and Solutions

If you encounter problems when using the FaxXchange, check to ensure that the telephone line is operational, verify that power is being supplied to your facsimile machine, then repeat your procedures. If trouble persists, contact the NMC through the Customer Support Center at 205/544-1771.

TROUBLE REPORTING PROCEDURES

Before notifying the Customer Support Center at MSFC of communications problems, the user should verify, if possible, that the equipment is properly working by checking the following conditions:

- a. The telephone circuit is operational and equipment is connected properly.
- b. Power is being supplied to the facsimile machine.
- c. All cabling and plugs are firmly seated.

All communications troubles (data/voice/video/message) will be reported to the Customer Support Center at MSFC by calling 205/544-1771. The Customer Support Center is operated 24 hours a day. Reports should contain the following information:

- a. Serial number of facsimile machine
- b. Facsimile phone number
- c. The location of the facsimile machine
- d. The name and telephone number of the person reporting the trouble
- e. Complete details of the trouble experienced, including any error messages received

The Customer Support Center will initiate a trouble report, perform diagnostics and take expeditious action to clear the problem, using all available facilities.

When the problem has been resolved, the Customer Support Center will contact the user and the user will then test the circuit to verify that the trouble has been cleared. If the trouble has not been resolved, the Customer Support Center will take further action to clear the trouble. When the user advises that the trouble has been cleared, the Customer Support Center will close the trouble ticket.

Customer satisfaction confirmation is required prior to the closure of any trouble ticket. Unsatisfactory Customer Support Center service should be reported to AI43/Mr. Bradford, at 205/544-0141.

APPENDIX A

**NASA FACSIMILE SYSTEM
GEOGRAPHIC STATION LISTING**

**PROGRAM SUPPORT COMMUNICATIONS NETWORK
NASA FACSIMILE SYSTEM DIRECTORY**

APPENDIX A

GEOGRAPHIC STATION LISTING

The Geographic Station Listing which follows contains the following information:

- o Location, Room and Organization - Each location is listed alphabetically by state, then by city or NASA Center. After the city or NASA Center designation, the facsimile machine locations are listed alphabetically according to organization name. The room number is listed for each organization along with the organization code.
- o Contact and Contact Number - The name and the telephone number of the person monitoring facsimile operation.
- o Facsimile Numbers - The telephone number to be dialed for document transmission to the corresponding location.

A listing for the facsimile numbers for each NASA Communications Center is included as the first listing for each NASA Center. Users may use these facsimile numbers to fax information to the Communication Centers for forwarding to designated parties whose fax number is unknown.

APPENDIX D

FACSIMILE CHANGE FORM

The designated Point-of-Contact for each facsimile machine is responsible for promptly notifying Configuration Management of any move/change associated with the facsimile machine. The reporting of this data directly affects the accuracy of the Geographic Station Listing in this directory. A Facsimile Change Form has been attached at the back of this directory for convenience in submitting changes.

**PROGRAM SUPPORT COMMUNICATION NETWORK
FACSIMILE CHANGE FORM**

Please complete this form and fax to Configuration Management at 205/544-6063, or you may call in changes to Shirley Norris at 205/544-6072, or mail to:

BAMSI, Inc
P.O. Box 9019
MSFC, Al 35812
ATTN: Directories and Publications

If you have questions, you may dial 205/544-6072 for assistance.

If your facsimile machine is located off-site, which NASA site are you affiliated or funded by:

_____.

If your facsimile machine is located on a NASA site, please provide the following:
