SnapServer[®] XSR Series Configuration Guide

1 Introduction

This document is intended as a guide for configuring and ordering SnapServer NAS Systems, Optional Expansion, Software and Service. It is primarily intended as a “what should be ordered with what” guide and provides an overview of the features and functionality of each of the options available. This has been designed as an “all inclusive” guide as much as possible but should not be used as a complete substitute for Datasheets and/or administration guides.

This first part of this guide (Sections 2 through 5) is divided in to the following sections:

- SnapServer NAS Systems – providing an overview of available SnapServer NAS Systems
- SnapServer NAS Capacity Expansion – providing an overview for the SnapServer Expansion storage available for scalable SnapServer NAS Systems.
- SnapServer NAS Software Solutions – providing an overview of GuardianOS™ and available software options that work with GuardianOS based SnapServer NAS Systems.
- Overland Storage Services for SnapServer NAS Systems and Software – providing an overview of the service offerings available for existing as well as discontinued SnapServer NAS systems.

The second part of this guide (Section 6) then provides full details on configuring a solution with the logical steps to follow (including part numbers).

SnapServer[®] XSR Series Configuration Guide

2 SnapServer XSR Series NAS Systems

SnapServer NAS Systems are a complete family of platforms, software solutions and services designed to store and protect data allowing the deployment of “right-sized” storage to various locations within a small to medium business or enterprise.

Designed as NAS and iSCSI appliances to take advantage of industry standards for centralized storage and access to data, SnapServer NAS Systems are also robust servers providing enough processing power for data protection, replication and system management applications.

2.1 SnapServer XSR Series NAS Systems

SnapServer XSR Series NAS Systems are designed to manage higher workload levels and capacities and are, by design, scalable with the addition of SnapServer Expansion storage.

2.1.1 SnapServer XSR 40

The SnapServer XSR 40 is a 1U, 4-Bay rack mount Network Attached Storage server. The XSR 40 is sold as a bundle with drives. Drive 4-packs and singles can be purchased separately to add internal capacity. The unit must be purchased with a minimum of 4 hard drives. In addition to the 4 internal drive bays, up to 216TB additional capacity can be added via the optional SAS connection which supports up to 3 JBOD units. Each configuration includes 1 x 1.8GHz processor; 4GB of Memory (2 x 2GB Memory Module); Dual Gigabit Ethernet ports; One power supply; and a Rack Mount Kit. It supports Dynamic RAID with single or dual parity, or traditional RAID 0, 1, 5, 6 and 10. Tape attachment for backup is supported with an optional SAS expansion card or via USB port. Software Included: GuardianOS 7, iSCSI, Snapshot. The following table provides a summary of the SnapServer XSR 40 configuration.

	SnapServer XSR 40
Form Factor	1U
Max Raw Internal/External Capacity	24TB / 240TB
Memory	4GB
Network Standard	2 x 1GbE
Power Supply	Single Standard
Expansion Port	SAS (Optional)
Expansion Option	Up to 3 Expansion Chassis

Note: SnapServer XSR 40 units are sold without drives or as a chassis/drive bundle. Drives may be ordered in 4-packs or as singles. *Drives used in the SnapServer XSR 40 must be obtained from Overland Storage and have SnapServer XSR Series drive carriers.*

2.1.2 SnapServer XSR 120

The SnapServer XSR 120 is a 2U, 12-Bay rack mount Network Attached Storage server. The XSR 120 is sold as a bundle with either 4-drives or 12-drives included. In addition to the 12 internal drive bays, up to 504TB additional capacity can be added via the included SAS connection which supports up to 7 SnapExpansion units. Each configuration includes 1 x processor; 4GB of Memory (1 x 4GB Memory Module); Dual Gigabit Ethernet ports (expandable up to 6 ports with the addition of the quad-port Gigabit Ethernet PCIe Cards; Supports 10GbE with the optional 10GbE card); Dual power supplies; and a Slide Rail Rack Mount Kit. It supports Dynamic RAID with single or dual parity, or traditional RAID levels 0, 1, 5, 6 and 10. Tape attachment for backup is supported with the daisy chained via SAS connector or via USB port. Software Included: GuardianOS, Snap Enterprise Data Replicator, iSCSI, Snapshot. The following table provides a summary of the SnapServer XSR 120 configuration.

SnapServer[®] XSR Series Configuration Guide

	SnapServer XSR 120
Form Factor	2U
Max Raw Internal/External Capacity	72TB/576TB
Memory	4GB
Network (Standard; Optional Add-On)	Dual 1GbE (Up to 6 X 1GbE or 2 X 10GbE)
Power Supply	Dual Standard
Expansion Port	SAS (Included)
Expansion Option	Up to 7 Expansion Chassis

2.2 General Notes on SnapServer NAS Models and Configurations

2.2.1 SnapServer XSR Series Memory Configurations

The SnapServer XSR 120 includes 4GB (1 X 4GB) of memory standard with three additional memory slots, upgradeable to 16GB total with the optional 4GB memory modules. The SnapServer XSR 40 includes 4GB memory.

SnapServer[®] XSR Series Configuration Guide

2.3 SnapServer Networking Options

2.3.1 SnapServer XSR 40 Networking

The SnapServer XSR 40 includes dual 1GbE networking ports. There are no options at this time to add additional 1GbE ports or 10GbE ports.

2.3.2 SnapServer XSR 120 Networking

The SnapServer XSR 120 includes dual 1GbE networking ports. Customers can add the quad-port 1GbE PCIe card for an additional four ports. The maximum number of supported 1GbE ports is six.

If 10GbE networking is desired, customers can purchase one of two options:

OV-ACC902030 ACC - PCIe Card, DX2, Dual Port 10GbE SFP+ NIC

This option includes two 10GbE (integrated SFP modules) optical LC connectors. Customers will require two LC-LC optical cables for connections to a 10GbE optical switch. Please note that customers will also need two SFP modules at the switch end.

OV-ACC902031 ACC - PCIe Card, DX2, Dual Port 10GbE RJ-45 NIC

This option includes two 10GbE RJ-45 copper connectors. Customers will require two CAT-6 Ethernet cables for connection to their 10GbE switch.

3 SnapServer XSR Capacity Expansion

The guidelines below provide configuration and ordering information for SnapServer XSR Series NAS capacity .

3.1 SnapServer XSR Series Expansion

3.1.1 SnapServer XSR Series Expansion Overview

The SnapServer XSR Series Expansion can be utilized to provide additional expansion capacity to the SnapServer XSR 120 and XSR 40 systems.

The SnapServer Expansion can be configured with up to 12 SATA II, SAS or SSD Drives. SnapServer Expansion units include SAS I/O Controllers for both input from the SnapServer XSR 120 and XSR 40 system as well as daisy chaining to additional SnapServer Expansion units. The expansion units also include a rail-kit for each rack installation and a 1-meter external SAS cable for connecting to a XSR system or daisy chaining to another expansion unit.

Note: SnapServer Expansion units are sold without drives and contain 12 drive slot blanks. Drives may be ordered in 4-packs or as singles. Initially, a minimum of four drives must be ordered (to fill the four empty slots). *Drives used in the SnapServer Expansion must be obtained from Overland Storage and have SnapServer XSR Series drive carriers.*

SnapServer[®] XSR Series Configuration Guide

3.2 General SnapServer Expansion Configuration Notes

3.2.1 Interconnect

3.2.1.1 SnapServer XSR 120 Interconnect

Every SnapServer XSR 120 includes a single external SAS connection for expandability with SnapServer Expansion Chassis units. Only 1 SAS connector (included) is required for expansion. Subsequent SnapServer Expansions are connected to previously installed SnapExpansion units in a daisy chain.

The SAS connector included with the XSR 120 also supports the attachment of Tape drives for local backup. Up to 2 SAS Tape drives can be connected to either the SAS connection on the XSR 120 (SFF-8088). If the SnapExpansion is attached to the XSR 120 SAS connector, it is recommended that any tape devices be connected to a second PCIe SAS card in the SnapServer.

Note: The XSR 120 does not support expansion with SnapServer Expansion E2000 or legacy S50 JBOD units.

3.2.1.2 SnapServer XSR 40 Interconnect

The SnapServer XSR 40 includes a single PCIe expansion slot that can be used with the optional x4 SAS expansion card (OV-ACC902021). The SAS card includes one external SFF-8088 Connector. Only 1 SAS HBA is required for expansion. Subsequent SnapServer Expansion chassis are connected to previously installed SnapServer Expansion units in a daisy chain.

Note: The XSR 40 does not support expansion with SnapServer Expansion E2000 or legacy S50 JBOD units.

3.2.2 Expansion Drive Notes

The SnapExpansion Chassis can be configured with either SATA-II, SAS or SSD hard drives; however in a DynamicRAID configuration, an individual expansion chassis requires a single drive technology. Each SnapExpansion used in DynamicRAID will show up as separate storage pools under GuardianOS.

Drive 4-Packs and Singles are specific to the platform. Drive carriers are common to the SnapServer XSR series and the SnapServer XSR Expansion Chassis. Drive carriers for the SnapServer 600/500/S50 and the N2000/E2000 are not interchangeable between the two families.

The SnapExpansion XSR is backward compatible with the SnapServer DX1 and DX2 series.

3.2.3 Cables

A 1-meter SAS cable is included with each SnapServer Expansion unit for connection to either the SAS HBA (for initial SnapServer NAS Expansion) or to another SnapServer Expansion for daisy chaining.

4 SnapServer NAS Software Solutions

SnapServer NAS Systems support a wide range of data sharing, data protection and replication solution software designed to be compatible with today's computing environment in distributed enterprises and small businesses.

4.1 GuardianOS

Every SnapServer NAS System is delivered with GuardianOS that combines file-level (NAS) with block-level (iSCSI) data on a single device to provide a simple and flexible solution ideal for any storage infrastructure. In addition to its unified storage architecture, GuardianOS offers seamless scalability for scalable SnapServer NAS systems, centralized storage management, and a comprehensive suite of data protection tools ideal for consolidating data and simplifying management to reduce storage total cost of ownership (TCO).

4.2 Replication with Snap Enterprise Data Replicator

4.2.1 Snap Enterprise Data Replicator (Snap EDR)

Snap Enterprise Data Replicator (Snap EDR) 7.2 provides a powerful, high-performance data replication and protection solution, with a comprehensive set of data management, movement, and backup capabilities. Administrators can remotely move files between servers; replicate data from their remote offices to a central server where it can be protected with established backup and restore procedures; or automatically distribute data from a central server to multiple remote offices. With Snap EDR, the administrator can implement enterprise-wide data movement, backup, disaster recovery, and compliance operations from a single location.

Snap EDR 7.2 is an option to GuardianOS 5.0 or greater and is licensed by functionality of Snap EDR (EDR Express or EDR Standard) as well as by class of platform (Workgroup, Departmental and Non-SnapServer NAS Systems). Each system participating in Snap EDR replication or backup requires a separate Snap EDR license whether it is a SnapServer NAS, Windows, Solaris, Linux or MAC OS X (10.6 or below) system.

Snap EDR 7.2 can be used to replicate data between any GuardianOS-powered SnapServer regardless of GuardianOS release provided that Snap EDR is the same version for all SnapServers participating in the replication.

4.2.1.1 Snap EDR Standard and Snap EDR Express

4.2.1.1.1 Snap EDR Standard

Snap EDR Standard Edition includes all functionality, including remote backup, as well as one-to-one, one-to-many and many-to-one replication. Snap EDR Standard can be positioned not only for disk-based backup and disaster recovery but also for data distribution and versioned disk-based backup with the advanced backup functionality included over EDR Express.

Snap EDR Standard is licensed by class of SnapServer NAS Systems as well as by client operating system (for non-SnapServer NAS systems) as follows:

- Snap EDR Standard - Windows / Mac OS X / Linux / UNIX¹
- Snap EDR Standard - Workgroup
- Snap EDR Standard – Department (Included with the SnapServer XSR 120)

¹ Snap EDR 7.2 supports Solaris as the only UNIX platform. Refer to the data sheet for specific versions.

SnapServer[®] XSR Series Configuration Guide

4.2.1.1.2 Snap EDR Express

Snap EDR Express is a value-based replication-only suite for two-node, one-to-one replication between SnapServer NAS Systems only. It is primarily positioned for disk-based backup and disaster recovery² between two SnapServer NAS systems.

Snap EDR Express is licensed by class of SnapServer NAS Systems as follows:

- Snap EDR Express - Workgroup
- Snap EDR Express - Department

4.2.1.2 Snap EDR for Workgroup or Department

Snap EDR is licensed for SnapServer NAS Systems categorized as Workgroup or Department SnapServer NAS Systems.

4.2.1.2.1 Workgroup SnapServer NAS Systems

SnapServer NAS Systems that are categorized as Workgroup are the following:

- Current SnapServer NAS Systems
 - SnapServer XSR 40
 - SnapServer XSD 40

² GuardianOS also provides disaster recovery options to backup SnapServer settings that should be used in conjunction with Snap EDR for a full disaster recovery solution.

SnapServer® XSR Series Configuration Guide

4.2.1.2.2 Midrange and Department SnapServer NAS Systems

SnapServer NAS Systems that are categorized as Midrange or Department are both covered by the “Department” Snap EDR license and are the following models:

- Current SnapServer NAS systems
 - SnapServer XSR 120

- Discontinued SnapServer NAS Systems
 - SnapServer DX2
 - SnapServer DX1
 - SnapServer N2000
 - SnapServer NAS 18000
 - SnapServer NAS 15000
 - SnapServer NAS 14000
 - SnapServer NAS 4500
 - SnapServer NAS 4400
 - SnapServer NAS 4200
 - SnapServer NAS 650
 - SnapServer NAS 620
 - SnapServer NAS 550
 - SnapServer NAS 520
 - SnapServer NAS 510
 - SnapServer NAS 410
 - SnapServer NAS 210

4.2.1.3 Snap EDR Upgrades

Snap EDR upgrades are available for customers that initially licensed Snap EDR Express.

4.2.1.3.1 Snap EDR Express to Snap EDR Standard upgrades

The following upgrades are available from Snap EDR Express to Snap EDR Standard:

- Snap EDR Exp/Snap EDR Std Upg-Workgroup
- Snap EDR Exp/Snap EDR Std Upg-Department

5 OverlandCare™ Services for SnapServer Systems and Software

OverlandCare is Overland’s premier service and support program. This program provides enhanced services for customers who require either longer coverage periods or options that provide for higher system availability. We offer support upgrades at the time of system sale and support extensions for up to five years after the initial system purchase. If your SnapServer solution includes multiple products each item must be covered to the same entitlement. As a special incentive to keep your SnapServer product covered for a longer period of time we offer a discount on multiple years of support coverage when purchased at the time of sale.

5.1 OverlandCare Levels

There are four levels of OverlandCare, each offering a different range of services. As mentioned above, every SnapServer carries one of these levels as its “standard warranty”, and customers can purchase upgrades and extensions for up to 5 years after the initial system purchase. The four OverlandCare Levels are summarized in the table below.

	OverlandCare Bronze-Level 2-business day Parts Replacement	OverlandCare Silver-Level 5x9xNBD Onsite Support	OverlandCare Gold-Level 5x9x4-Hour Onsite Support	OverlandCare Platinum-Level 24x7x4-Hour Onsite Support

5.2 Standard Warranty, Uplifts and Extensions For SnapServer Products

5.2.1 Standard Warranty

SnapServer XSR products are covered by a three-year Overland Care Bronze-Level warranty which covers all aspects of the product. The Bronze-Level warranty for SnapServer XSR includes the following:

- 24x7 Telephone support
- Advanced parts replacement, 2 business day delivery excluding recognized public and company holidays
- Software support for GuardianOS with updates and patches as available

For full details of current service programs, please refer <http://support.overlandstorage.com/support/service-coverage.html>

SnapServer® XSR Series Configuration Guide

5.2.2 Uplifts and Extensions

All SnapServer systems are eligible for service uplifts and extensions to augment and/or extend the standard OverlandCare warranty.

- Specially priced 3-year uplifts for OverlandCare Silver, Gold and Platinum-Levels are available at the time of purchase
- 1-year extensions for all 4 OverlandCare Levels are available to extend the SnapServer warranty to 5-years of total coverage

5.3 Supplemental Software Support

Supplemental Software Support can be purchased for each optional software product. This service is offered as an annual contract for Snap Enterprise Data Replicator (Snap EDR). To purchase Supplemental Software Service, the SnapServer system on which the software product will be run must be covered by OverlandCare service or Software maintenance.

Supplemental Software Support includes the following:

- Support offering 24x7 access to web based self-support
- Technical support access for the Software product in line with the service level of the SnapServer system on which it runs

5.4 Summary of Support Offerings for SnapServer Systems and Software

5.4.1 SnapServer XSR 120 Support Offering Summary

The following table provides a summary of the support offerings available for SnapServer XSR 120 systems.

Service Offering	Year 1	Year 2	Year 3	Year 4	Year 5

Support Options for SnapServer NAS Systems, Expansion and Software

Support options are available for all SnapServer NAS Systems, SnapServer Expansion Systems and associated SnapServer NAS software. Support, if ordered for SnapServer NAS Systems, must all be at the same level.

Note: Support options described below are for current SnapServer NAS Systems only. Support options are available for discontinued SnapServer NAS Systems and expansion. For these options, please contact Overland Storage Sales.

6.2.3 Supplemental Software Support Options

Supplemental Software support is offered for Snap EDR. Supplemental Software support requires the system on which they are licensed to also be supported by Standard Warranty, Software Maintenance, or Overland CARE.

SnapServer Manager, GuardianOS iSCSI Target – Workgroup, GuardianOS Snapshot – Workgroup – Workgroup licenses are supported as part of the Standard Warranty, Software Maintenance, or OverlandCare for the SnapServer NAS System on which they are licensed.

Supplemental Software Support for EDR is provided as a single support option regardless of the level of license (Express or Standard³). If Supplemental Software support is selected for Snap EDR, all licenses of Snap EDR must be covered by Supplemental Software support.

Step 1	Choose support for Snap EDR as appropriate.																
Step 1a	<p>Choose appropriate Supplemental Software Support option for Snap EDR Supplemental Software Support for Snap EDR is offered by system platform.
