

TEOSBook

Complete room booking solution

For offices and corporate environments

Optimise the use of meeting room resources with a clear view of room bookings and scheduling information. TEOS Book is a highly cost effective solution to create a complete interactive room booking solution for boardrooms, conference rooms and office meeting rooms.

TEOS Book can be installed on Sony Android tablets displayed on a table or outside each meeting room so you can view the agenda, status and forthcoming bookings. Connected to corporate networks, the tablet interfaces directly with TEOS Manage, allowing room scheduling information to be displayed with an attractive choice of custom template options.

Used in conjunction with corporate calendars (e.g. Microsoft Exchange Server or Google Calendar), TEOS Book and TEOS Manage can help organisations avoid double bookings and manage space utilisation more effectively.

TEOS Book integrates seamlessly with TEOS Manage (available separately), the complete workspace management solution for corporate environments. TEOS Manage streamlines management of all IP devices, content and meeting rooms via an intuitive dashboard-style interface.

TEOSManage

TEOS Book runs as an Android application on a tablet/display available in a range of screen sizes from 7" to 22". TEOS Manage (TEM-SRV100) is required with a dedicated license (TEM-TA10) for tablets.

Features

Total booking control

Book a meeting quickly and directly on the screen for last minute huddles.

View and change

See what other rooms are available,* extend or end meetings to free space for colleagues.
