## CONSTRUCTION

- Chassis & Pedestal Construction
  - All wood pedestals are made with veneer end panels and fronts which are constructed with  $\frac{3}{4}$ " thick balanced 3-ply panels.
  - End panels are connected with an inset top, back, and bottom cross-tie which is made of  $\frac{1}{16}$ " thick 45lb particleboard. Panels are secured with cam fasteners in conjunction with pressed hardwood biscuits that are adhered with PVA (white polyvinyl acetate) glue.
  - A threaded steel glide plate is attached to the inset bottom panel on the pedestal to provide a durable connection between the glide and the bottom of the pedestal.
  - Steel glide plates are attached to single end panels with screws. End panels are pre-bored to accept the stem of the glide.
- Overhead / Storage Construction
  - All wood panels are constructed with  $\frac{3}{4}$ " thick balanced 3-ply panels.
  - Top, end, and bottom panels are secured with cam fasteners in conjunction with pressed hardwood biscuits that are adhered with PVA (white polyvinyl acetate) glue.
  - All units have inset back panels; backs are unfinished and covered gator-ply material.
  - Back panels are connected using pocket bores and wood screws.
  - Stack-on storage attaches to worksurface with double-sided adhesive tape.

- Wall mount cabinets are mounted to the wall with a spade and "z" bracket attachment method. Steel barrel nuts and spade brackets are securely mounted through the back of wall mount cabinets.
- All units ship with a "z" bracket. This bracket is mounted to the wall by field installers.
- Wall mount cabinet attachment requires individual cabinets be secured by a minimum of two wall mounting locations/studs.
- The cabinets are designed for interior and perimeter walls that are constructed with wood or metal studs. Installers are responsible for selecting and supplying appropriate fasteners for all conditions.
- The HON Company is not responsible for any liabilities resulting from wall mounted cabinets that are not properly installed per instructions.
- Hinges
  - Units with doors include 95° self-closing hinges. Hinges are adjustable.
- Filing
  - The file hanging system is an integral part of the drawer.
  - A highly durable black plastic extrusion is securely fastened into a route on the top of the drawer.
  - The extrusion, coupled with steel rails, allow side to side and front to back filing in file and lateral drawers.
  - The plastic extrusion was designed to promote optimum filing capacity within the drawer while providing a reliable and maintenance free filing system.
- Aluminum Frame Frosted Glass Doors
  - Extruded aluminum mitered frame is clear anodized silver aluminum.
  - Frame is  $\frac{7}{8}$ " thick and 1 $\frac{3}{4}$ " high. Frosted glass is inset within the frame.
  - All frosted glass should be cleaned with a soft lint free cloth and non-ammonia based cleaner only.
- Height Adjustable Worksurfaces
  - Worksurfaces are actual widths. A 1" clearance gap is required for any height adjustable top on all sides.
  - Moving worksurfaces can collide with other components. It is important to ensure free range of motion prior to operating the table.
  - Adjacent worksurfaces need to be self supporting. A wall mount bracket may be used.

## MATERIALS

- Veneer and Finish
  - Natural veneer is subject to nature's quality control. Each species will exhibit difference in grain pattern and tone. This is to be expected and, in fact, contributes to the beauty and individuality of each product. Flat Cut veneers emphasize the variations of wood by exhibiting cathedrals in the grain pattern. Worksurfaces, desktops, and table tops are protected by an advanced UV-cured finish coating in an open pore low sheen finish, applied by state-of-the-art finishing equipment. The finish meets the EPA's stringent requirements for VOC emissions and air quality. Cured in a specially designed ultra-violet oven, the finish fuses to the wood, forming a durable shield that provides a high level of scratch, stain, chemical, and heat resistance, plus a high level of clarity. Regular dusting and occasional cleaning are recommended to maintain your wood finish. To clean, dampen a soft cloth with lukewarm water and gently wipe the wood in the direction of the grain. A mild solution of Murphy's oil soap and water may also be used. Avoid cleaners with oil, waxes, or silicones as they may create a hazy look.
  - Wood owes its inherent beauty to variations in color, grain, and texture; therefore, these variations are not considered defects. There may be minor variations from one piece of furniture to the next even though they are ordered and finished at the same time. Exposure to light and the aging process will cause a darkening of natural wood products. Light finishes on wood products do not mask the natural characteristics of wood. The HON Company does not guarantee the exact matching of grain, pattern, and color. Finishes do not cover any of the natural characteristics of the wood, including nature's colorations and pitch pockets. Merchandise will not be replaced because of these natural variations.
- All exposed surfaces utilize select plain sliced Cherry, Maple, or Walnut veneers. Veneers are carefully selected and slip-matched to assure balance and consistency.
- Finish process provides exceptional depth, clarity, durability, and chemical-resistance throughout the life of the product.
- Eight rich finishes to choose from — Bourbon Cherry, Cognac, Harvest, Mahogany, Mocha, Natural Maple, Pinnacle, and Shaker Cherry.
- Tops / Worksurfaces
  - 1 $\frac{3}{16}$ " thick balanced 3-ply panels with 45lb. particleboard substrate
  - Flat edge detail
  - $\frac{3}{32}$ " thick natural solid external hardwood band on the user sides

	$\frac{3}{32}$ " Softened Edge	1mm Square Edge
Desk Tops	User & Approach	Ends
Extension Tops	User & Approach	Ends
Runoff Tops	User & Approach	Ends
Bridge Tops	User	Back and Ends
Credenza Tops	User	Back and Ends
Return Tops	User	Back and Ends

- Tops connect to the chassis with wood screws through the inset top panel of the pedestals and steel angle brackets.

## SUSTAINABILITY

- LEED EQ compliant finishes.
- Open pore low sheen water base UV finish on writable worksurfaces.
- Low-emitting, low sheen, solvent based conversion varnish finish on non-writing surfaces.
- 19.43% Post-Consumer content and 56.23% Pre-Consumer content; overall recycled content of 47.54% (based on ANSI/BIFMA M7.1-2011 standard private office freestanding casegoods workstation system configurations A2.2.5).

## PRODUCT AND PACKAGE TESTING

- Meets or exceeds ANSI/BIFMA and ISTA performance standards.

## DRAWER SPECIFICATIONS

- Drawers
  - All drawers are 5-sided construction, which allows easy drawer alignment or replacement of drawer fronts. Drawer fronts are attached with screws for easy removal.
  - Drawer fronts feature matched veneer within each pedestal set.
  - The drawers are miterfold construction and are fastened together with dowel joinery for maximum drawer strength.
  - The drawer side material is 3-ply 12mm vinyl-wrapped particleboard in a natural cherry color.
  - The bottom material is a 3-ply substrate consisting of vinyl-wrapped high-density fiberboard core.
  - Optional pencil tray is available for order.
- Drawer Slides
  - Box and file drawers feature full extension, precision steel ball bearing suspensions for a smooth, quiet range of motion; the slides are load rated for 100 lbs.
  - Fully progressive action with dampened start/stop.
  - Lateral file suspensions are load rated for 150 lbs and include an anti-tip mechanism that prevents more than one drawer from being opened at the same time.

# VENEER ORDERING/DESIGN INFORMATION

- Suspensions are silver, steel, roll-formed, zinc plated, and high-grade.
- All suspensions are warranted for the lifetime of the product.

## LEVELING GLIDES

- Glides provide 1½” of vertical leveling adjustment to compensate for uneven floors. Glide bottom is durable non-rust nylon.

## CORE REMOVABLE LOCKS

- Satin (silver) face locks are standard on desk, credenza, return, stack-on and wall mount storage with doors, mobile pedestal, bookcase hutch with door, lateral file, bookcase with lateral file, storage cabinet with lateral file, wardrobe, wardrobe/storage cabinet, storage tower, and modular pedestal models. Each pedestal is independently locked.
- Locks are factory installed. Lock is option SA.
- On individual models that have multiple locks, such as a double pedestal desk and storage tower, the locks are keyed alike.
- Models with hinged door below the worksurface do not lock. This includes: Hinged Door Full Storage Credenza, Modular Hinged Door Pedestal, and Hinged Door Cabinets.
- Glass doors do not lock.
- Hinged doors on 5 high laterals do not lock.
- Keying
  - Keying is random from the factory.
  - Locks feature a removable cylinder (core) that can be interchanged as needed; allows all furniture pieces within an individual workstation to be accessed with one key for convenience, and allows locks to be differentiated between workstations and offices for security. Makes re-keying quick and easy.
  - For field installable lock core kits, specify HF27S (satin) or HF27B (black) plus the key number.

## CORD MANAGEMENT

- Capabilities include optional worksurface grommets.
- Desks specified with worksurface grommets include cutout in kneewell side of pedestal(s) to route and hide cords.
- Under worksurface wire managers are sold separately. These units hide and route cords horizontally around a station.
- Grommet
  - 2-piece round plastic grommet. Grommet cap is inset in a plastic sleeve. Sleeve measures 3” outside dimension x 1” thick.
  - Cap has two cord access holes. Black plastic finish only.

H90056 = 68¾"W; H90055 = 62¾"W; H90054 = 56¾"W.

## MODULAR COMPONENTS

- Smart, adaptable, reconfigurable assortment to maximize office layout flexibility and optimize floor space.
- Components for all popular office layouts.
- Selection allows user to choose their own workstation shape, size, and storage.
- Sizes for large and small spaces:
  - 36"D x 72"W or 84"W
  - 30"D — six sizes up to 84"W
  - 24"D — in 6" increments, from 30"W to 96"W
- Worksurfaces supported by post legs with casters provide added layout flexibility.
- Mobile desks quickly convert an office into a small conference space; desks roll easily and can be repositioned in seconds.
- Grommet options provide cord management from the top, side, and back in appropriate models.
- Broad menu of under-surface storage to enable user to specify the solution that best meets their individual needs.
  - Non-handed units can be configured to meet individual tastes and reconfigured when preferences or floor space requirements change.
  - Applications include:
    - The ability to “build” contiguous customized/personalized storage behind the desk that looks like custom architectural millwork, but at a fraction of the price. Allows for multiple storage pedestals to be configured under a single top with clean lines and no gaps.
    - Choosing the storage solution to go under desks, credenzas, and returns.

## WORKSURFACES

- Available in a variety of shapes and sizes.
- Scratch-, stain-, and spill-resistant laminate over durable 1½" solid core high performance particleboard; resists warping.
- An external support channel, for attachment under worksurfaces, is required for all unsupported spans — a distance in which there is not a vertical support (point of contact) between the underside of the worksurface and the floor — greater than 54"W.
- For tri-oval and beaded edge options on tops with horizontal grain, there is a shaped profile on the user and approach sides, and a flat edge on the ends.
- For tri-oval and beaded edge options on tops with vertical grain, there is a shaped profile on the user side and a flat edge on the approach side and the ends.
- Grommets are an option and require specification. If grommets are selected, grommets come in a pre-determined location.

- Must be specified with support components; for pedestal, end panel, column, and leg options, see “Components — Supports” listings.

## SUPPORTS

- For use with rectangle, bow, bullet, and extended corner worksurfaces.
- Available in 28½" and 41"H.
- Adjustable hex glides allow floor-standing units to be easily leveled, without lifting, to compensate for uneven floors; glides have 1¼" adjustable range on most components; 2" on O-legs.
- Bottom of laminate end panels are edgebanded for added strength and to seal out moisture.

## FOR 29½"H WORKSURFACES

- Specify from a broad assortment of solutions, including —
  - Modular Pedestals
  - Laminate end panels (must be used in conjunction with a laminate modesty panel)
  - Laminate L-shaped end panels
  - Laminate T-shaped end panels
  - Metal O-legs — for use with worksurfaces up to 78"W (when using an 84" or wider worksurface, cannot use two O-legs; must use at least one 15¾" or wider pedestal for the other support).
  - 4½" diameter metal column
  - 2" square metal post leg

## FOR 42"H WORKSURFACES

- 42", fixed standing-height workstations give users the option of changing postures from sitting to standing throughout the day to help achieve their wellness goals.
- Specify supports from —
  - Modular Pedestals
  - Laminate end panels (must be used in conjunction with a laminate modesty panel)
  - Laminate L-shaped end panels
  - Metal O-legs
- When combined with a stool-height task chair, provides users the benefit of alternating their work between a seated or standing position.
- An external support channel, for attachment under worksurfaces, is required for all unsupported spans greater than 54"W.

- When grommets are specified for 30"D and 36"D rectangle worksurfaces, pre-drilled holes will not be included for a 4½" diameter support column.

### NOTES:

- Grain direction on all rectangle worksurfaces runs horizontal (side-to-side) except as follows: 30"W - 36"W - 42"W - 48"W - 54"W - 60"W x 24"D tops can be specified with horizontal (side-to-side) or vertical (front-to-back) grain.
- 42"W and 48"W x 20"D tops are available with vertical (front-to-back) grain only.
- 48" - 72"W x 24" - 30"D worksurfaces are compatible for use with height adjustable electric base model HHAB3S2L.
- For standing-height requirements, use worksurface with 41"H O-leg, end panel, L-shaped end panel, or pedestal supports.
- For mobile desks and tables, use post leg with casters.
- For paper organizers, see page 175.
- Attachment of above privacy screen models requires a minimum 1" clear space/overhang on the underside of worksurface.
- Attachment of above/below privacy screen models requires a minimum 2" clear space/overhang on the underside of the worksurface.
- Steel external support channel can be attached to the underside of worksurfaces that are subjected to heavier loads. Channel is recommended to provide extra support on unsupported spans of 54"W or greater or per user preference. Ordered separately from worksurface.
- If using a 54"W or 60"W floating modesty panel, it is not necessary to specify an external support channel.
- When using an external support channel under the worksurface, the depth clearance for center drawers and keyboard platforms decreases by 8".
- See "External Channel (Recommended Use)" chart on page 152.

NOTES: Can be used in a host of applications, including as a desk, credenza, return, bridge, stationary or mobile table surface, in U- or L-shaped configurations, as part of a work wall layout with an island extension, or with the height adjustable electric base. The conference overhang dimension on the approach side of worksurfaces varies depending on the supports and modesty panels specified. Top can be positioned with a cantilevered conference overhang on one end when used with select worksurface supports, including an O-leg or 9½"W modular pedestal. For return applications in which there is an unsupported span wider than 54", such as a 72"W x 24"D worksurface supported by a 15¾"W modular pedestal (= 56¼") or a 60"W x 24"D worksurface supported by a 1½" thick end panel (= 58⅞"), use internal support panel model HNL11SUPP. For bridges wider than 54", use internal support panel HNL11SUPP. When using a 30"W, 36"W, 42"W, or 48"W rectangle worksurface as a bridge, no support legs are needed. When specifying a 84"W, 90"W, or 96"W worksurface, cannot use two O-legs for the supports. In these applications, the maximum number of supports that can be an O-leg is one; must choose from a 15¾" or wider modular pedestal for use as the additional support component. For applications requiring connection to an adjoining worksurface, two flat brackets are included with 24"D and 20"D worksurfaces that are ≤48"W; one flat bracket is included with 24"D worksurfaces that are ≥54"W. Underside of worksurface includes pilot mounting holes for O-leg, 1½" thick laminate end panel, pedestals, and flat brackets. See chart on page 104 for cord management options.

ⓘ When grommets are specified for 30"D and 36"D rectangle worksurfaces, pre-drilled holes will not be included for attachment of a 4½" diameter support column.

### NOTES:

- Grain direction on all rectangle worksurfaces runs horizontal (side-to-side) except as follows: 30"W - 36"W - 42"W - 48"W - 54"W - 60"W x 24"D tops can be specified with horizontal (side-to-side) or vertical (front-to-back) grain.
- 42"W and 48"W x 20"D tops are available with vertical (front-to-back) grain only.
- 48" - 72"W x 24" - 30"D worksurfaces are compatible for use with height adjustable electric base model HHAB3S2L.
- For standing-height requirements, use worksurface with 41"H O-leg, end panel, L-shaped end panel, or pedestal supports.
- For mobile desks and tables, use post leg with casters.
- For paper organizers, see page 175.
- ⓘ Attachment of above/below privacy screen models requires a minimum 1" clear space/overhang on the underside of worksurface.
- ⓘ Attachment of above/below privacy screen models requires a minimum 2" clear space/overhang on the underside of the worksurface.
- ⓘ Steel external support channel can be attached to the underside of worksurfaces that are subjected to heavier loads. Channel is recommended to provide extra support on unsupported spans of 54"W or greater or per user preference. Ordered separately from worksurface.
- ⓘ If using a 54"W or 60"W floating modesty panel, it is not necessary to specify an external support channel.
- ⓘ When using an external support channel under the worksurface, the depth clearance for center drawers and keyboard platforms decreases by 8".
- ⓘ See "External Channel (Recommended Use)" chart on page 152.

NOTES: For use with modular worksurface and support components. Component is 3/4" thick. Full-to-floor sizes can be specified with or without grommet; see chart on page 104 for cord management options. For standing-height applications, a worksurface supported by 1 1/8" thick x 41"H laminate end panel(s) and/or 41"H support pedestal(s), the recommended modesty panel length extends 27 1/8" below the underside of the top, leaving 13" of wall access; 9 1/2" and 15 3/4" W x 13"H backs are available to enclose the balance of the pedestal back. Worksurfaces supported by a 1 1/8" thick x 41"H laminate end panel and 41"H support pedestal, or by two 41"H support pedestals, can be used with a 10" modesty panel to increase the amount of wall access, however in this application the pedestal(s) should be positioned against a wall, as there is not a 30 7/8"H panel to cover the back of the pedestal that is exposed below the modesty panel. The 10"H modesty panel is not recommended for use in a standing-height shell, where both supports are 41"H laminate end panels; for this solution use the 27 1/8"H modesty panel. For standing-height applications with the worksurface supported by 41"H O-legs or L-shaped end panels, use the appropriate floating modesty panel size.

**NOTES:**

- Provide approach-side kneespace privacy for user seated at desks, credenzas, returns, and bridges.
- Full-width laminate panel can be specified in 6" increments from 30"-96"W, and in full-length (27<sup>1</sup>/<sub>8</sub>"H) or short (10"H).
- Formal, full-length, 27<sup>1</sup>/<sub>8</sub>"H models extend from the underside of the worksurface to the floor.
- 10"H sizes allow quick and easy access to wall power outlets.
- 30"W and 36"W x 27<sup>1</sup>/<sub>8</sub>"H are sized to serve as a modesty panel, or pedestal back for respective 30"W and 36"W support storage pedestal models.

- ! The full-width panel designs are specifically for use when the worksurface supports are two 1 1/8" thick end panels, two support storage pedestals, or one 1 1/8" thick end panel and one support storage pedestal; not for use with O-legs or L-shaped end panels.

NOTES: Minimizes worksurface deflection by providing added internal support under 24”D tops with an unsupported span of 54” or wider (distance for which there is no panel, leg, or pedestal support component). Not for use as an end panel. 11”D size provides kneespace clearance. Attaches with brackets to both the underside of the worksurface top and either a conventional full-length or 10” laminate modesty panel; not for use with O-leg or L-shaped end panel supports. 1⅝” thick. Cord routing notch in brace panel. Can be specified in a woodgrain or solid laminate color only.

## SUPPORT STORAGE PEDESTALS — 28½”H

- Non-handed, interchangeable design reconfigures easily.
- For use with component top and modesty/back panels or pedestal top and back panels.
  - Pedestals are not fully enclosed and require a component top/worksurface and modesty/back panel or a pedestal back, both of which must be ordered separately.
  - Pedestal’s front and side panels are finished.
- The pedestal depth dimension is less than the like-size depth of the component top, to accommodate addition of a modesty/back panel.
  - 29½”D pedestals can be used under 30” or 36”D worksurfaces; 23½”D pedestals can be used under 24” or 30”D worksurfaces.
  - When specifying a 29½”D pedestal with ¾” modesty panel under a 36”D worksurface, or a 23½”D pedestal with a ¾” modesty panel under a 30”D worksurface, there will be a 6” approach side overhang.
- Bottom of side panels are edgebanded for added strength and to seal out moisture.
- Drawers:
  - Operate on steel ball-bearing suspensions to ensure smooth, quiet, long-lasting operation; full extension allows easy access to contents.
  - Fronts are edgebanded on all four sides.
  - Feature 5-sided construction for added strength and easy alignment or replacement of drawer fronts.

- Interchangeable core removable locks are located on front of all modular storage products, except the storage cabinet.
- Finish of lock is determined by, and aligned with, the handle finish specified.
- Locks feature a removable cylinder that can be interchanged as needed; allows users to access all furniture pieces in an office with a single key for convenience and security. Makes re-keying quick and easy. Keyed alike cores must be ordered separately by specification of the key number (removable lock core kit models available in Black [model HF23B] or Satin [model HF23S]).
- Ship fully assembled.
- Chassis and drawer front colors are specified separately; can be selected with common woodgrain or solid laminate color, or with different, complementary chassis and drawer/door colors.
- See chart on page 104 for cord management options. If the pedestal grommet option is chosen, two cutouts, one per end/side panel, each with a black plastic cap, are included.

## SUPPORT STORAGE PEDESTALS — 41”H STANDING-HEIGHT

- Same as above except — not to be used freestanding; top and back are not enclosed.
  - Rear of pedestal can be enclosed with a full, 40¾”H back panel or with a 27¾”H modesty panel combined with a lower, 13”H pedestal back component. Pedestal back and modesty panel must be ordered separately.

# VOI® SPECIFYING/DESIGN GUIDE

This Specifying Guide is designed to walk you through the steps when choosing the Voi desks elements that will meet your particular workplace needs. From private office to open plan, there are endless combinations that will fit your style and need.

Regardless of the application, Voi presents an integrated, unified aesthetic for the entire workplace.

The step-by-step instructions make it easy to specify elements that personalize workspaces and achieve the right mix of functionality and style.

### Worksurface

- A variety of sizes meet a range of footprint requirements, from private offices to open plan areas.

### Accessories

- From layering shelves to storage cubes, markerboards and the box drawer organizer, Voi accessories allow personalization to meet individual needs.

### Above the Worksurface Storage

- Voi has many above the worksurface storage options that can be used in many applications: wall mounted, panel mounted, and conventional stack-on storage options are available to make an efficient use of vertical space.
- Choose from sliding door units or overhead cabinets with four doors.
- The O-leg can be used in stack-on storage applications to create a more contemporary look.
- The storage cube accessory can be used in the storage applications listed above.

### Below the Worksurface Storage

- A wide variety of conventional storage options are available: lateral files, bookcases, support bookcases, mobile pedestals, personal wardrobes, and storage towers.
- Many contemporary storage options are available: low credenzas and floor credenza work in conjunction with the worksurfaces to create layered surfaces that optimize space, different storage, staging, and display needs.

### Support

- A combination of many supports can be used with the worksurfaces: O-leg, end panel, pedestal, slim pedestal, support bookcase, lateral/multi file.
- O-legs work in many of the Voi desks applications and provide a light-scale, contemporary look.
- O-legs can be used in a variety of heights so surfaces can be layered.
- End panels are also available and provide a more conventional look.
- A variety of modular storage options can be specified based on your storage needs: box/box/file pedestal, file/file pedestal, slim profile pedestal, lateral files and multfiles.

### Modesty Panel/Privacy Screens

- Full height, ½ height and floating modesty panel options are available to enhance privacy.
- Mixed material options are available in laminate and frosted translucent.
- Select the size that works with the supports.
- Above and above/below privacy screens are available to create an element of privacy in an open plan area.

### Tips

- When using an O-leg in open plan, panel supported, applications, you must specify an O-leg to panel attachment bracket separately (available in 28"H and 41"H).
- Bookcase Support can only be used exterior facing.
- Telescoping ball-bearing slides used on box and file drawers. Lateral drawers use a progressive ball-bearing slide.
- When specifying a 30"D support on a 36"D worksurface, there will be a 6" overhang.
- All modular pedestals have an easy attach method to the worksurface for quick assembly.
- Pass-thru openings in the sides of the Power-Ready Pedestals and Lateral Files allow hardwire conduit to run under the worksurfaces, through the case in a continuous run.
- One double-depth O-leg can replace two regular O-legs in teaming applications.
- Shared O-legs create cleaner aesthetic where two legs are used side-by-side.
- 2" adjustable glides on O-leg supports.
- Standing-Height Support Pedestals bottom two file drawers are locking.
- Standing-Height Bookcase Support contains easy-access, fixed storage shelves.

- Choose from a variety of materials to create your desired look.
- Laminate modesty panels to create a more conventional look.
- 54”W and 60”W Floating Modesty panels eliminate the need for an external channel.
- Above Privacy Screens provide a division between two worksurfaces and create a division of space in an open plan area.
- Modesty panels cannot be used as a support.
- See modesty panel chart to choose proper modesty size depending on support options.

**Tips**

- Select sliding or hinged doors.
- Specify O-leg separately for a contemporary look.
- Optional storage shelf works in conjunction with the O-leg design to provide additional storage space. Only works with 65”H O-legs.
- O-legs come in two sizes to make a 50”H or 65”H stack-on storage unit.
- Wall-mount brackets carry a \$150 upcharge and are specified in the model ordering logic.
- Use shared overhead and attachments in small footprint applications.
- Shared overhead must be ordered as left or right to determine open storage location.
- Shared overhead panel mount brackets and overhead post legs allow overhead to span over all panels systems or run down the spine wall, centered on top of the panel.
- Use the 65”H for a more conventional design. 65”H and 50”H aligns with Abound and Accelerate.
- Stack-on Storage must be placed over two full-height supports. Cannot be placed over non-supported sections such as returns using a flat bracket or tower-to-worksurface bracket.
- If the end panel conventional look is preferred, order the built-up stack-on storage models.
- There are two types of tackboards for use on Overhead Cabinet and Stack-on Storage.

5. Select the right storage.

Choose from a variety of below the worksurface, as well as traditional, storage options.

**Mobile Credenza**

30"W x 20"D x 21½"H

**Mobile Pedestal**

15¾"W x 20¼"D x 21⅙"H

**Tips**

- Small credenza models can be used in small footprint applications.
- Can use pedestal or credenza seat cushions on smaller credenza models.
- Low credenzas work in conjunction with worksurface 7" O-leg designed to create a unique layering design.
- Bookcase/laterals and other conventional storage components provide additional storage space.
- Must specify chassis and drawer front color separately.
- Low Credenzas, Laterals and Mobile Pedestals have seat cushions to create additional seating in the workspace.
- Storage and Personal Tower models offer conventional storage as well as wardrobes with a coat rod.
- Using a seat cushion with a power-ready credenza will cover one grommet.
- Specify appropriate power pack for credenza length.
- A worksurface-to-tower bracket kit allows the attachment of worksurfaces to Storage and Personal Tower models.
- Telescoping ball-bearing slides used on box and file drawers. Lateral drawers use a progressive ball-bearing slide.
- Cannot route software power through lockable storage units.

6. Select Accessories to add color, additional storage and organization to your workspace.

- Layering shelves are great for filing and piling or in conjunction with the lower credenza.
- Optimize shared overhead capabilities by adding the Markerboard for Shared Overhead.

# VOI® SPECIFYING/DESIGN GUIDE

## VOI® AND SYSTEMS INTEGRATION

### Worksurface Applications

Either Voi or Systems worksurfaces can be used with Voi in an open plan application. There are several support options:

- A. Completely panel supported.
- B. Combination of panel supported and another worksurface support such as:
  - Bookcase support
  - Pedestal (Brigade®, Flagship®, Contain®, or Voi®)
  - Systems open leg
  - Voi O-leg
  - End panel (Systems or Voi)
  - Tower to worksurface bracket
  - Support column
  - Systems round post leg
  - Voi post leg
- C. Freestanding:
  - Bookcase support
  - Two pedestals (Brigade®, Flagship®, Contain®, or Voi®)
  - Two Voi O-legs
  - One Voi O-leg and one Voi O-leg support for lower credenzas
  - Two end panels (metal or Voi)—requires metal or Voi modesty panel

### Additional application guidelines for worksurfaces:

- Systems worksurfaces are available with grommets or no grommets.
- When Voi lower credenzas are used along the spine wall and are placed adjacent to the wing wall, one electrical/data cutout on the wing wall will be blocked.
- When Voi credenzas are used along the wing wall and are placed adjacent to the spine wall, one electrical/data cutout on the spine wall will be blocked.
- When the Voi O-leg support for credenzas is used, it is recommended to also panel attach the worksurface with the worksurface anti-dislodgement bracket kit HWSA2.
- When the Voi O-leg support is used with panels, it is recommended to also panel attach the O-leg to the panel with the O-leg to panel bracket kit HLSPPBL (left) and/or HLSPBR (right). This bracket will provide additional workstation rigidity.
- When the Voi end panel support is used with panels, it is recommended to use the end panel support with panel bracket model. This model will provide additional workstation rigidity.
- The worksurface to tower bracket kit, HSTB2W1, will work with Voi towers, Voi worksurfaces, and systems worksurfaces.

### Application Guidelines—Combination of Panel Supported and Another Worksurface Support

- For applications where 1) the worksurface is perpendicular to the spine wall; 2) the worksurface is panel supported off the spine wall; and 3) there are Voi credenzas placed under the worksurface along the spine: there is not enough clearance to use standard worksurface cantilevers to attach the worksurface to the spine. Use the worksurface anti-dislodgement bracket kit HWSA2 to panel attach the worksurface in lieu of cantilevers.

### Panel Mounted Stack-on Storage Applications

- The Voi stack-on storage cabinets can be used on Abound and Accelerate as panel mounted overheads.
- The sliding door stack-on storage units are available in 36", 42", 48" widths in addition to 60", 66", 72", and 78" widths.
- The 4 door stack-on storage units are only available in 36", 42", 48", 60", 66", 72", and 78" widths.
- The storage units require a storage to panel bracket kit, model HLSPMB. This model includes one left hand, one right hand, and one center bracket. The brackets are available in all Core and Choice/Metallic paint colors.
- The storage cabinets do not have off modular capabilities.
- For proper installation and support, the storage units must follow the following specification rules:
  - There should be a storage unit of the same construction on each side of a given panel.
  - The storage units on opposite sides of a given panel should be in the same location vertically and horizontally.
  - Only one storage unit per panel, per side.
  - The wing panel adjacent to the spine wall needs to be the same height as the spine wall.

- ! Lateral file or multi-files must be used with surfaces 24"D and 60"W or greater.
- ! Depending on your support combination, an external channel may be required for extra support on unsupported spans greater than 54"W. Please see the matrix on page 259 for more details.
- ! If using a 54"W or 60"W floating modesty, it is not necessary to spec an external channel.
- ! When attaching worksurfaces to panels, one or more of the following are required: anti-dislodgement brackets, end panel, support leg and/or cantilevers. Cantilevers and anti-dislodgement brackets must be ordered separately when attaching worksurfaces to panels.
- ! A return worksurface is considered 48"W or shorter. Longer returns cannot be supported by a flat bracket only.

NOTES: Steel channel can be attached to the underside of worksurfaces that are subjected to heavier loads. Channel is recommended for unsupported spans of 54"W or greater or per user preference. When using an external support channel under the worksurface, the depth clearance for center drawers and keyboard platforms decreases by 8". See chart below for support channel compatibility information.

! Specify: Model.P (black only)

! When specifying a 54"W or 60"W Floating Modesty Panel, it is not necessary to specify an external channel.

**NOTES:**

- Easy-care, scratch-, spill- and stain-resistant laminate over 1/8" solid core high-performance particleboard.
- Grain direction on all worksurfaces runs horizontal.
- Versatile component tops combine with under-surface support options to form freestanding desks or credenzas, U- or L-shaped configurations, or work wall layouts with an island extension.
- One flat bracket ships with each worksurface for applications requiring connection to an adjoining worksurface.
- For end panels, legs, columns and bases, see the Worksurface Supports listing on pages 316-317.
- When using a floating modesty panel or an external channel under the worksurface, the depth clearance for keyboard trays and center drawers decreases by 8". See accessory matrix in accessory section of the pricer.

! Worksurfaces are subject to slight bowing. The magnitude of the deflection is dependent upon the weight, placement, and duration of the load.

! When using a worksurface as a bridge, no additional supports are needed. One support is required for returns, two supports are required for desks and credenzas.

! External channel support is recommended for extended unsupported spans or heavily loaded worksurfaces. See above and below for details.

NOTES: Ship fully assembled with mounting hardware, 1/pack. Non-handed. O-leg glides have 2" adjustability. For shared components such as modesty panels and privacy screens see pages 268-270. O-leg installation requires 6" of clearance from the worksurface end. For standing-height O-leg sizes, see page 318. Shared O-legs create a cleaner aesthetic in all applications where two legs are used side-by-side. Will have 6" overhang when using 30"D O-legs with a 36"D worksurface.

IMPORTANT: The O-leg attachment bracket interferes with placement of 10500 Series modular pedestals and 28½"H mobile pedestals, preventing them from being positioned directly next to (flush with) the O-leg. Box/file mobile pedestal (model H105106) and mobile printer/fax cart model (H105679) can be positioned along side the O-leg.
