Mr. C. B. Feight, Executive Director State of Utah, Dept. of Natural Resources Division of Oil & Gas Conservation 1588 West North Temple Salt Lake City, Utah 84116

Attn: Mr. Paul Burchell

RE: Bitter Creek State, Well #1 SW SW SE Section 2-16S-25E, Grand County, Utah

Dear Sir:

Confirming telephone conversation of this date with Mr. Burchell, enclosed is Application for Permit to Drill and Certified Location Plat covering the captioned well. The required Drilling and Plugging Bond will be forwarded either from our Tulsa Office or this office the first part of next week.

Due to topography, an exception to Rule C-3 is hereby requested. The proposed location is estimated to require road and location costs in excess of \$10,000.00; and to locate the well within the limits of Rule C-3, would require additional expense and the well cost would be prohibitive. Sinclair is the owner of all leases within a radius of 660 feet.

We would appreciate your approval of this unorthodox location at your earliest convenience.

Very truly yours,

m. E. Brown

#### INSTRUCTIONS

General: This form is designed for submitting a complete and correct well completion report and log on all types of lands and leases to either a Federal agency or a State agency, or both, pursuant to applicable Federal and/or State laws and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office. See instructions on items 22 and 24, and 33, below regarding separate reports for separate completions.

If not filed prior to the time this summary record is submitted, copies of all currently available logs (drillers, geologists, sample and core analysis, all types electric, etc.), formation and pressure tests, and directional surveys, should be attached hereto, to the extent required by applicable Federal and/or State laws and regulations. All attachments

should be listed on this form, see item 35.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 18: Indicate which elevation is used as reference (where not otherwise shown) for depth measurements given in other spaces on this form and in any attachments.

Items 22 and 24: If this well is completed for separate production from more than one interval zone (multiple completion), so state in item 22, and in item 24 show the producing interval, or intervals, top(s), bottom(s) and name(s) (if any) for only the interval reported in item 33. Submit a separate report (page) on this form, adequately identified, for each additional interval to be separately produced, showing the additional data pertinent to such interval.

Item 29: "Sacks Cement": Attached supplemental records for this well should show the details of any multiple stage cementing and the location of the cementing tool.

Item 33: Submit a separate completion report on this form for each interval to be separately produced. (See instruction for items 22 and 24 above.)

#### BITTER CREEK #1 RECOMPLETION

#### Grand County, Utah

#### I. Well History

Bitter Creek #1 is located 395' FSL and 2530' FEL, Section 2-T16S-R25E in Grand County, Utah. This well was spudded June 18, 1968. 9-5/8" surface casing was set and cemented at 336' and 7" protection casing was set and cemented at 2512'. A total depth of 6658' was reached on July 6, 1968 and 4-1/2" production casing was set at 6654'. This well was originally perforated in the Cedar Mountain formation from 5904'-5923' and 5985-5989' at 2 SPF. This zone was then CO<sub>2</sub> fractured with 30,000# of 20-40 sand and 30,000 gallons of treated water and established an initial production rate of 1140 MCF/D. On November 13, 1971, Bitter Creek #1 was recompleted in the Entrada formation with perforations from 6504'-6518' at 4 SPF. This well has been shut in since November 1973 when the Entrada was taken off production.

#### III. Objective

The objective of this procedure is to permanently abandon the Entrada perforations at 6504'-6518' by squeezing off the perforations and plugging back the well to  $\pm$  6345' (approximately 125' above the Baker production packer). The Cedar Mountain will then be reperforated (5904'-5923', 5985'-5989' at 1 SPF) and a  $\rm CO_2$  fracture stimulation will be performed. The Bitter Creek #1 will be recompleted as a Cedar Mountain gas well.

#### IV. Procedure

1. MI/RU daylight workover rig with circulating equipment and power swivel. 4-500 bbl frac tanks will also be required.

NOTE: Have some 2-3/8" tubing available on location to replace possible damaged production tubing currently in the hole.

- 2. Check tubing and tubing/casing annulus for pressure and bleed to 0 psi. Displace tubing with 2% CaCl<sub>2</sub> water. Ensure annulus is also filled to surface.
- 3. N/D Christmas tree. N/U 2000 psi WP BOPE. Test BOPE to 2000 psi.
- 4. Unseat seal assembly from packer and POOH with 2-3/8" completion assembly. Visually inspect tubing while it is being pulled from the hole and L/D all questionable joints. (This tubing has been in the hole approximately 12 years).

#### NOTE: If tubing does not come free:

- A. R/U wireline unit and run tubing collar locator in tandem with tubing chemical cutter inside 2-3/8" tubing.
- B. Locate first collar above Baker Model "F" permanent production packer and cut 2-3/8" tubing 5' above collar. POOH with collar locator and tubing cutter. R/D wireline unit.
- C. POOH with 2-3/8" tubing assembly.
- 5. P/U 3-7/8" bit and 4-1/2", 10.5# casing scraper on 2-3/8" tubing and clean out casing to top of packer at 6470' or top of 2-3/8" tubing stub. Circulate hole clean with 2% CaCl<sub>2</sub> water. POOH.

#### IV. Procedure, continued

6. R/U and run casing inspection and caliper log to top of packer to evaluate the condition of the 4-1/2" production log.

- NOTE: Once the integrity of the 4-1/2" production casing has been established from the log, it will be determined whether the recompletion can be resumed or remedial repair must be attempted prior to continuing. If there is any question on the integrity of the 4-1/2" casing, SD, notify the office, and WO orders.
  - 7. VSet 4-1/2", 10.5# cement retainer at  $\pm$  6430' on wireline. P/U squeeze stinger on 2-3/8" production tubing and RIH to top of retainer. Hydrotest tubing to 4500 psi while running in the hole.
  - 8. Sting into retainer and weight test to 10,000#. Establish injection rate at 1-2 BPM (do not exceed 2000 psi injection pressure). Sting out of retainer and displace cement to within 2 bbls (± 500') of stinger. Sting back into retainer and squeeze Entrada perforations with ± 30 sx Class "G" cement mixed at 15.8 ppg. Displace cement leaving 2 bbls of cement in tubing (approximately 125' of cement left on top of retainer). POOH. R/D Cementing Service Company.
  - 9. WOC 6 hours. P/U Baker model A-3 Lok-set Retrievable Casing Packer on 2-3/8" tubing and RIH to ± 6000'. Set packer and pressure test squeeze to 4000\* psi. POOH.
  - 10. R/U perforating unit with wireline BOP and lubricator. RIH with 3-3/8" casing gun and reperforate the Cedar Mountain Formation from 5904'-5923' and 5985'-5989' at 1 SPF. Correlate to Schlumberger CBL dated 7/31/68. Observe fluid level and pressure after perforating. POOH with casing gun and R/D perforating unit.
  - 11. P/U completion assembly and RIH as follows:

Baker model A-3 Lok-Set Retrievable Casing Packer - 4-1/2", 9.5-10.5#, with 2-3/8" NU-Lock box and pin connections

#### IV. Procedure, continued

- 12. Set Baker A-3 Lok-set packer at ± 5875' with 15,000# compression.
- 13. R/U service company and perform fracture stimulation as per Operations Engineer's recommendation. Anticipate a  $\rm CO_2$  fracture with 70,000 pounds of  $\rm 20/40$  sand in 60,000 gallons fluid with 500 SCF of  $\rm CO_2/bbl$ .

NOTE: Do not exceed 4000 psi tubing pressure during frac job. Hold 1000 psi\* on annulus during stimulation to ensure packer is not leaking.

- 14. R/D service company. R/U sand line lubricator for possible swabbing operations. Begin blow back approximately four hours after frac job (based on Operation's recommendation). Flow and clean up well.
- 15. Kill well down tubing with 2% CaCl<sub>2</sub> water. Ensure annulus' fluid level is to surface. Release packer and circulate hole clean. POOH.
- 16. RIH with 2-3/8" tubing to 5904' (top of perforations). Reverse circulate from 5904' to PBTD to clean up excess sand. Circulate hole clean. POOH.
- 17. P/U completion assembly and RIH to 5875'. Displace annulus with packer fluid and set packer at  $\pm$  5875'. Space out and install tubing hangers. N/D BOPE. N/U Christmas tree.
- 18. R/U sand line lubricator and swab well to production. R/D workover rig and auxiliary equipment. Release well to production.

\*Note: actual pressures subject to change based on results from 4-1/2" casing inspection log.

### INSTRUCTIONS

General: This form is designed for submitting a complete and correct well completion report and log on all types of lands and leases to either a Federal agency or a State agency, or both, pursuant to applicable Federal and/or State laws and regulations. Any necessary special instructions concerning the use of this form and the number of copies to be submitted, particularly with regard to local, area, or regional procedures and practices, either are shown below or will be issued by, or may be obtained from, the local Federal and/or State office. See instructions on items 22 and 24, and 33, below regarding separate reports for separate completions.

If not filed prior to the time this summary record is submitted, copies of all currently available logs (drillers, geologists, sample and core analysis, all types electric, etc.), formation and pressure tests, and directional surveys, should be attached hereto, to the extent required by applicable Federal and/or State laws and regulations. All attachments should be listed on this form, see item 35.

Item 4: If there are no applicable State requirements, locations on Federal or Indian land should be described in accordance with Federal requirements. Consult local State or Federal office for specific instructions.

Item 18: Indicate which elevation is used as reference (where not otherwise shown) for depth measurements given in other spaces on this form and in any attachments.

Items 22 and 24: If this well is completed for separate production from more than one interval zone (multiple completion), so state in item 22, and in item 24 show the producing interval, or intervals, top(s), bottom(s) and name(s) (if any) for only the interval reported in item 33. Submit a separate report (page) on this form, adequately identified, for each additional interval to be separately produced, showing the additional data pertinent to such interval.

Item 29: "Sacks Cement": Attached supplemental records for this well should show the details of any multiple stage cementing and the location of the cementing tool.

Item 33: Submit a separate completion report on this form for each interval to be separately produced. (See instruction for items 22 and 24 above.)

For, and in consideration of Ten Dollars (\$10.00) cash and other good and valuable consideration in hand paid, the receipt and adequacy of which are hereby acknowledged, each Assignor does hereby, severally, and not jointly, Bargain, Sell, Transfer, Set Over, Grant, Assign, Convey and Deliver unto Assignee, all of such Assignor's right, title, interest and estate in and to the oil and gas properties described on Exhibit "A" (the "Oil and Gas Properties"). The Oil and Gas Properties shall include all mineral interests, working interests, overriding interests, reversionary interests, net profits interests, net revenue interests and any other interest of any kind without warranty of title either express or implied, to the extent they are owned and may be conveyed by Sellers.

The Oil and Gas Properties shall include, to the extent each Assignor may lawfully assign same, all of such Assignor's rights, title, interest and estate in and to the property and rights incident, and to the extent attributable, to the Oil and Gas Properties, the lands covered thereby or utilized therewith, including, without limitation, (i) all presently existing pooling or unitization agreements and the units created thereby, and all units formed by virtue of orders issued by applicable State regulatory agencies, (ii) all presently existing operating agreements and all other contracts, agreements and records, (iii) all personal property, easements, permits, surface leases, servitudes and rights-of-way situated upon or used in connection with the production, treating, storing or transportation of oil, gas or other hydrocarbons or minerals.

TO HAVE AND TO HOLD the Oil and Gas Properties unto Assignee and its successors and assigns forever.

NOTWITHSTANDING ANY PROVISION IN THIS ASSIGNMENT OR ANY DOCUMENT DELIVERED IN CONNECTION HEREWITH TO THE CONTRARY, THE OIL AND GAS PROPERTIES AND ANY OTHER PROPERTY OR RIGHTS CONVEYED HEREUNDER ARE CONVEYED "AS IS," "WHERE IS," "WITH ALL FAULTS," AND IN THEIR PRESENT CONDITION AND STATE OF REPAIR, AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING WARRANTY OF TITLE OR ANY WARRANTY OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR CONFORMITY TO MODELS OR SAMPLES OR AS TO ANY CLAIM BY ASSIGNEE FOR DAMAGES BECAUSE OF DEFECTS, WHETHER KNOWN OR UNKNOWN, OR ANY OTHER SORT OF WARRANTY. ASSIGNEE HAS INSPECTED, OR HAS HAD THE OPPORTUNITY TO INSPECT, THE OIL AND

GAS PROPERTIES AND PREMISES FOR ALL PURPOSES, INCLUDING WITHOUT LIMITATION FOR THE PURPOSE OF DETERMINING THE PRESENCE OF ENVIRONMENTAL CONDITIONS, OF DETECTING THE PRESENCE OF NATURALLY OCCURRING RADIOACTIVE MATERIAL "(NORM)" AND MANMADE MATERIAL FIBERS "(MMMF)" AND HAS SATISFIED ITSELF AS TO THEIR PHYSICAL AND ENVIRONMENTAL CONDITIONS, BOTH SURFACE AND SUBSURFACE. ASSIGNEE ACCEPTS ALL OF THE SAME IN THEIR "AS IS," "WHERE IS," CONDITION, AND EACH ASSIGNOR EXPRESSLY DISCLAIMS ANY LIABILITY ARISING IN CONNECTION WITH ANY PRESENCE OR ENVIRONMENTAL CONDITIONS, NORM OR MMMF ON THE OIL AND GAS PROPERTIES.

From and after the Effective Time, Assignee hereby agrees to assume, be bound by and subject to each Assignor's express and implied covenants, rights, obligations and liabilities with respect to the Oil and Gas Properties, and Assignee's interest in the Oil and Gas Properties shall bear its proportionate share of royalty interests, overriding royalty interests and other payments out of or measured by production from and after the Effective Time.

This Assignment is made expressly subject to all existing overriding royalties or other burdens affecting the Oil and Gas Properties as listed on Exhibit "A."

Assignee and its permitted successors and assigns shall preserve and maintain all lease, contract and title files, well logs, well files, division orders and related files, title documentation, correspondence and other data and records in the possession of Assignor pertaining to the Oil and Gas Properties (the "Records") for a period of two (2) years from the date of acknowledgement of this Assignment, during such period shall afford Assignor and its duly authorized representatives access at all reasonable times during normal business hours to all Records as Assignor shall request in order to defend against, oppose or otherwise investigate any claims or potential claims against Assignor arising as a result of any acts, events or operations prior to the date of acknowledgement of this Assignment or as a result of this Assignment, and shall make any conveyance or transfer of the Oil and Gas Properties specifically subject to the obligations of this paragraph.

Notwithstanding any other provision herein to the contrary, this Assignment is made with full substitution and subrogation of Assignee in and to all covenants and warranties by others heretofore given or made to Assignors in respect of the Oil and Gas Properties or any part thereof.

The provisions hereof shall be covenants running with the land and shall be binding upon and inure to the benefit of the parties hereto, their respective successors and assigns.

In the event two or more Oil and Gas Properties cover the same land (e.g., an oil and gas leasehold interest included within the Oil and Gas Properties may cover the same land as a mineral, royalty or overriding interest included within the Oil and Gas Properties), no merger of title shall occur, and each of the Oil and Gas Properties covering the same land is conveyed and shall be owned by Assignee as a separate and distinct property.

Separate assignments of certain of the Oil and Gas Properties may be executed on officially approved forms by Assignor to Assignee in sufficient counterparts to satisfy applicable statutory and regulatory requirements. Those assignments shall be deemed to contain all of the exceptions, reservations, rights, titles, power and privileges set forth herein as fully as though they were set forth in each such assignment. The interests conveyed by such separate assignments are the same, and not in addition to, the Oil and Gas Properties conveyed herein.

The parties agree to take all such further actions and execute, acknowledge and deliver all such further documents that are necessary or useful in carrying out the purposes of this Assignment. Assignor agrees to execute, acknowledge and deliver to Assignee all such other additional instruments, notices, division orders, transfer orders and other documents and to do all such other and further acts and things as may be necessary to more fully and effectively grant, convey and assign to Assignee the Oil and Gas Properties conveyed hereby or intended so to be.

This Assignment may be executed in any number of counterparts, and each counterpart hereof shall be deemed to be an original instrument, but all such counterparts shall constitute but one assignment.

References in this Assignment and in Exhibit "A," to contracts, agreements or instruments shall not be deemed to create any rights in favor of any third party.

Assignee joins in the execution hereof for the purpose of being bound by all the terms, provisions, obligations and covenants herein specified.

IN WITNESS WHEREOF, this instrument is signed and executed in multiple counterparts as of the date (s) set forth on the acknowledgements hereto, but, shall be effective for all purposes as of 7:00 o'clock A.M., local time, September 1, 1993 (the "Effective Time").
