

TVC-5714 TruVision IP Box Camera, 12MP, Super Low Light, PoE (802.3-af)/12 VDC/24 VAC

Overview

The TruVision Series 7 IP box cameras with smart event capabilities available in 2, 4, 8 and 12MP resolution deliver high-quality images thanks to their extreme low light sensitivity and enhanced image processing. The rich set of features make these cameras the ideal choice for demanding security, surveillance and monitoring applications.

The cameras support up to 10 configurable video streams which allow users to optimize the camera's remote live view capabilities while controlling the bandwidth usage. In addition to the compatibility with other TruVision products and 3rd party VMS software, the cameras also support NAS recording or local MicroSD card recording to protect data in the event of network disruptions.

The enhanced embedded video intelligence capabilities go above and beyond standard event detection allowing operators to receive realtime event notifications and reduce the time needed for post-incident investigation.

The box camera can be installed in the TVC-OH3-HT outdoor housing with integrated IR, controlled by the camera's RS485 connection.
