Item	Description	TM1800	TM1700	TM1600	EGIL	Art. No.	
Cables							
<i>Analogue Input XLR/Banana</i>		XLR female / 4 mm safety plugs, 1 m (3.3 ft). For customized analog transducer connection				X X X X	GA-00040
<i>Cable Analogue XLR/open ends</i>		XLR female / open ends, 1 m (3.3 ft)				X X X X	GA-00041
<i>Transducer cable, XLR / IP / TS</i>		NOVOTECHNIC IP/TS, 1 m (3.3 ft)				X X X X	GA-00044
<i>Transducer cable, XLR / TLH / LWH</i>		NOVOTECHNIC TLH/LWH, 0.5 m (1.6 ft)				X X X X	GA-00049
<i>Transducer cable XLR / LWG</i>		NOVOTECHNIC LWG/M12, 0.5 m (1.6 ft)				X X X X	GA-00050
<i>Cable Current clamp</i>		For current clamp, BNC / XLR3, 0.3 m (1 ft)				X X X X	GA-00140
<i>Cable, extension EGIL Timing MAIN</i>		Extension cable for time measurement of main con- tacts, XLR5 female / XLR5 male 10 m (32.8 ft)				X	GA-00150
		5 m (16.4 ft)				X	GA-00155

Item	Description	TM1800	TM1700	TM1600	EGIL	Art. No.
Cable, EGIL Timing 	Timing 5 m (16.4 ft) XLR5 / 4 mm banana excl. clamps			X		GA-00160
Cable, EGIL Timing AUX 	AUX1&2, timing 5 m (16.4 ft) XLR5 / 4 mm banana excl. clamps			X		GA-00170
Cable, EGIL Voltage sense 	SDRM Voltage sense cable incl. clamps, 2 m (6.5 ft)			X		GA-00175
Cable set, Timing TM1800 AUX TM1700 AUX TM1600 MAIN TM1600 AUX 	The cable sets consist of 8 cables with clamps and 4 mm stackable safety plugs. For timing of CB contacts. 5 m (16.4 ft)	X	X	X		GA-00231
	10 m (32.8 ft)	X	X	X		GA-00241
	15 m (49.2 ft)	X	X	X		GA-00251
	20 m (65.6 ft)			X		GA-00261
	25 m (82 ft)			X		GA-00271
	40 m (131 ft)			X		GA-00281
SCA600/Coax. Cable 		X	X	X		GA-00750
Extension cable Analogue input 	XLR female/XLR male 1 m (3.3 ft)	X	X	X	X	GA-00760

Item	Description	TMT1800	TMT1700	TMT1600	EGIL	Art. No.
Cable reel 	20 m (65.5 ft), 4 mm stackable safety plugs					
	Black	X	X	X	X	GA-00840
	Red	X	X	X	X	GA-00842

Connecting and mounting guidance
SDRM Hook-up examples and cable designations

Timing cable is included with the TM1800 timing module. Transducer cable is selected together with the the type of transducer used.

Timing cable is included with the TM1700. Transducer cable is selected together with the the type of transducer used.

Timing cable is an optional accessory to TM1600. Transducer cable is selected together with the the type of transducer used.

Transducer cable is selected together with the the type of transducer used.

DualGround - safe testing

The best way to provide safety in circuit breaker testing is to keep both sides of the circuit breaker grounded throughout the test. This will also make the test faster and easier. Minimum time shall be spent in the substation and focus shall be on the test rather than the equipment.

One side grounded

Conventional vs. DualGround

Conventional vs. DualGround	
Site preparation (isolate work area, apply safety ground, issue permit to work)	Site preparation (isolate work area, apply safety ground, issue permit to work)
Hook up test equipment. Issue sanction for test	Hook up test equipment. Issue sanction for test
Authorised person removes the ground	Risky step left out
Perform testing	Safe testing with both sides grounded
Authorised person applies ground	Risky step left out
Cancel sanction for test. Disconnect test equipment	Cancel sanction for test. Disconnect test equipment
Site closing (cancel permit to work, disconnect ground)	Site closing (cancel permit to work, disconnect ground)

Both sides grounded

1. Magnetic base
2. Flexible arm
3. Holder angular transducer
4. BAUMER BDH 16.05A10-L0-4
5. Flex coupling
6. Bolt adapter

First trip measurement

A good and time effective way to check the condition of a circuit breaker is to document its behavior at the first open operation after it has been idle for long time. The measurement and connections to the circuit breaker are carried out while it is still in service. All of the connections are made inside the control cabinet.

Coil current measurement at First trip / First close test. The circuit breaker is in service during first trip test. Thus, it is not allowed to put the breaker in local mode or break up the circuit in order to measure the coil current. The only way to measure coil currents in a safe way is to use current clamps.

Designed to measure the circuit breaker's contact opening times when connected. You will be able to measure your circuit breaker's opening contact times without having to take them offline. It will also be possible to check the transition of the current to 0 during the opening of your circuit breaker's contacts as well as the synchronization of the opening times on the 3 phases.

Figure 1. Point for measuring coil current and control voltage
 Since the breaker is in service, the conventional way of measuring the times of the main contacts with timing leads across the interrupter cannot be used. Instead of timing leads, three current clamps are used. These current clamps are used on the secondary side of the current transformer for each phase. These show the current flowing through each phase and by looking for the instant when the current stops flowing, the breaker's trip time is revealed.

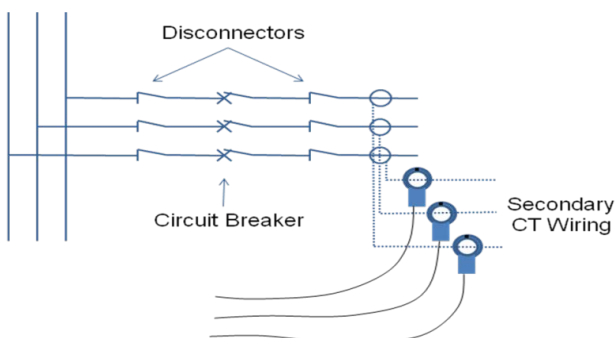

Figure 2. Point for measuring the line currents

Equipment

The equipment needed for a first trip measurement depends on the configuration of the circuit breaker. A common denominator for all measurements is the three current clamps for the line current are needed to capture the timing of the individual phases. These do not need to be able to measure DC currents, since they will only measure the alternating line currents. For the coil current, either one or three clamps are needed depending on the number of operating mechanisms. These need to be able to measure both AC and DC to cover all types of coils, however DC coils being the most common.

For ordering information, see "First trip kit" on page 9.

Megger is a world leading manufacturer and supplier of test and measurement instruments used within the electric power, building wiring and telecommunication industries.

With research, engineering and manufacturing facilities in the USA, UK, Germany and Sweden, combined with sales and technical support in most countries, Megger is uniquely placed to meet the needs of its customers worldwide.

For more information about Megger and its diversified line of test and measurement instruments:
