Re: Farmers Rural Electric Cooperative Corporation – 2019 DSM Program Changes

Dear Ms. Pinson:

Please find enclosed for filing with the Commission the above-referenced Farmers Rural Electric Cooperative Corporation's ("Farmers RECC") revised tariffs for the following Demand Side Management ("DSM") Programs:

- Touchstone Energy Home
- Direct Load Control Program – Residential
- Direct Load Control Program – Commercial
- Button-up Weatherization Program
- Heat Pump Retrofit Program
- HVAC Duct Sealing Program
- Commercial & Industrial Advanced Lighting Program
- Industrial Compressed Air Program
- ENERGY STAR® Manufactured Home Program
- Appliance Recycling Program
- ENERGY STAR® Appliances Program

Over the last year, Farmers RECC has worked diligently with East Kentucky Power Cooperative, Inc. ("EKPC") and its DSM Steering Committee ("the Committee"), a committee of EKPC and Owner-Member cooperative ("Owner-Member") staff and consultants, to re-evaluate the cost-effectiveness and need for all existing DSM programs. Farmers RECC relied upon the work of EKPC's consultants and Staff throughout this effort. The conclusions of the re-evaluation were shared with EKPC's executive leadership and the Owner-Members' Chief Executive Officers ("CEOs") and a consensus was achieved to recommend substantial changes to EKPC's portfolio of DSM programs. Farmers RECC is in agreement with the proposed changes to EKPC's DSM portfolio of programs and desires to make appropriate changes to its own DSM tariffs so that they continue to be consistent with EKPC's tariffs. Accordingly, please find attached the following materials related to the proposed DSM tariffs to be implemented:

Farmers RECC is an equal opportunity employer.

www.farmersrecc.com

1. Exhibit A – Proposed DSM Tariffs

Copies of the proposed DSM tariffs are collectively filed herewith as Exhibit A. In instances where it is proposed for a tariff to be withdrawn, a tariff sheet will be designated as being reserved for future use, taking the place of the existing tariff provisions is being tendered. The exception to this is found on Tariff Sheets 97.001, 97.002, 97.003, 97.004, 97.005 and 97.006. As these pages are inconsistently numbered with Farmers RECC's most-recently updated tariff, there is no need to reserve these pages for future use and therefore these pages will be eliminated.

2. Exhibit B – Supporting Documents: Marked-Up Copies of Proposed DSM Tariffs

Also included are copies of the modified DSM Program tariffs for each of the DSM programs listed above. The tariffs are tendered in a format showing the strike-throughs of the existing tariffs for convenience.

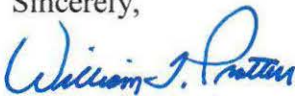

3. Exhibit C – Supporting Documents: Customer Notice and Effective Date

Pursuant to KRS 278.180(1), a utility must give at least 30-days' advance notice to the Commission before implementing a new tariff. Therefore, the proposed effective date of these tariff revisions will be March 1, 2019. Pursuant to 807 KAR 5:011, Farmers RECC has posted the requisite notice at its office located at 504 South Broadway, Glasgow, Kentucky and will post the requisite notice on its website, no later than five (5) business days from today's date, which will include a hyperlink to the Commission's website where the tariff can be found. Written notice has also been given to members by delivering a copy of the Customer Notice through publication in the February edition of *Kentucky Living* magazine. A copy of the Customer Notice is attached.

While Farmers RECC requests that these tariffs become effective on March 1, 2019, it recognizes that several of its members are still making economic decisions based upon the tariffs currently in effect. To minimize disruption and surprise to such customers, Farmers RECC intends to honor all requests for rebates, appliance pick-ups or other existing program benefits that were initiated by members prior to the effective date of these proposed tariffs. Thus, Farmers RECC anticipates that even when the revised DSM portfolio is approved and in effect, some legacy obligations will remain to be satisfied to fairly and reasonably wind-down the existing tariffed programs.

Please contact me if you have any questions.

Sincerely,

William T. Prather
President & CEO

Enclosures

CUSTOMER NOTICE

Proposed Changes to Demand Side Management (DSM) Programs

Notice is hereby given to the members of: **Big Sandy RECC**, 504 Eleventh Street, Paintsville, KY 41240; **Blue Grass Energy Coop. Corp.**, 1201 Lexington Road, Nicholasville, KY40356; **Clark Energy Coop., Inc.**, 2640 Iron Works Road, Winchester, KY40391; **Cumberland Valley Electric, Inc.**, 6219 North U.S. Highway 25E, Gray, KY 40734; **Farmers RECC**, 504 South Broadway, Glasgow, KY 42141; **Fleming-Mason Energy Coop. Corp.**, 1449 Elizaville Road, Flemingsburg, KY 41041; **Grayson RECC**, 109 Bagby Park, Grayson, KY 41143; **Inter-County Energy Coop. Corp.**, 1009 Hustonville Road, Danville, KY 40422; **Licking Valley RECC**, 271 Main Street, West Liberty, KY 41472; **Nolin RECC**, 411 Ring Rd., Elizabethtown, KY 42701; **Owen Electric Coop., Inc.**, 8205 Highway 127 N, Owenton, KY 40359; **Salt River Electric Coop., Inc.**, 111 West Brashear Avenue, Bardstown, KY 40004; **Shelby Energy Coop., Inc.**, 620 Old Finchville Road, Shelbyville, KY 40065; **South Kentucky RECC**, 200 Electric Avenue, Somerset, KY 42502; **Taylor County RECC**, 625 West Main Street, Campbellsville, KY 42718.

On or about January 30, 2019, the Cooperatives will file proposed tariffs that revise or eliminate certain DSM programs that are currently in effect. The proposed effective date for the tariff changes is March 1, 2019. Each of the DSM tariffs are voluntary in nature. None of the Cooperatives have a DSM Rider in effect, so there will be no change in the rates charged for electric service to any customer class. However, if the proposed tariffs are approved:

- The Heat Pump Retrofit Program will add ductless mini-splits as an eligible primary heat source. Other eligibility criteria will change and incentives will no longer be tied to AHRI ratings.
- The Button-Up Weatherization Program will no longer apply to installing higher efficiency windows and doors and program levels will be abolished in favor of a single incentive. A new standard for measuring attic insulations will be adopted.
- The Touchstone Energy Home Program will increase the minimum efficiency eligibility standard while retaining only two eligibility paths (Blue Grass Energy also retains the option to provide additional services).
- The Residential Direct Load Control Program will no longer apply to new water heaters or any pool pumps and gives greater flexibility in providing the incentive to members.
- The Commercial Direct Load Control Program will now apply to heat pumps, but will no longer apply to new water heaters. Additional device communication requirements will apply.
- The ENERGY STAR® Manufactured Home Program will have a lower incentive payment now given directly to a qualifying member.

The Cooperatives also propose to eliminate the: (1) ENERGY STAR Appliance Program; (2) Appliance Recycling Program; (3) Commercial and Industrial Advance Lighting Program; (4) Industrial Compressed Air Program; and (5) HVAC Duct Seal Program, where applicable.

A person may examine this tariff filing at any of the Cooperatives' respective offices at the addresses listed above. A person may also examine this tariff filing at the Public Service Commission's offices, which are located at 211 Sower Boulevard, Frankfort, Kentucky, Monday through Friday, 8:00 a.m. to 4:30 p.m., or through the Commission's website at <http://psc.ky.gov>. Any comments regarding this tariff filing may be submitted to the Commission through its website or by mail to Kentucky Public Service Commission, Post Office Box 615, Frankfort, Kentucky 40602. The rates contained in this notice are the rates proposed by the Cooperatives, however, the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice. A person may submit a timely written request for intervention to the Public Service Commission, at the address listed above, establishing the grounds for the request including the status and interest of the party. If the commission does not receive a written request for intervention within thirty (30) days of the initial publication of this notice, the Commission may take final action on the tariff filing.

Section DSM -Touchstone Energy Home

Purpose

In an effort to improve new residential home energy performance, Farmers Rural Electric Cooperative Corporation ("Farmers RECC") has designed the Touchstone Energy Home Program. This program provides guidance during the building process to guarantee a home that is ~~≥15-20~~ 25-30% more efficient than the Kentucky standard built home. The standard built new home in rural Kentucky typically receives a ~~100~~ 105 on the Home Energy Rating System ("HERS") Index. ~~A HERS Index Score of 100 means the home is built to only moderate levels of efficiency - generally the 2004 International Energy Conservation Code ("IECC").~~

Availability

This program is available to residential members served by Farmers RECC.

Eligibility

To qualify as a Touchstone Energy Home under Farmers RECC's program, the participating single-family home must be located in the service territory of Farmers RECC and must meet the program guidelines following one of the ~~three~~ two available paths of approval. Multi-family dwellings pre-approved by Farmers may be eligible.

Prescriptive Path:

- Home must meet each efficiency value as prescribed by Farmers RECC.
- Home must receive pre-drywall inspection and complete Farmers RECC's pre-drywall checklist (contact the Energy Advisor at Farmers RECC for a copy of the checklist)
- Home must receive a final inspection, pass a whole house air leakage test (~~<7 air changes per hour @50 pascals~~), and duct leakage test (~~<10% of the fan's rated capacity~~).
- Primary source of heat must be an Air Source Heat Pump ~~≥ current ENERGY STAR specification for Seasonal Energy Efficiency Ratio "SEER" and Heating Season Performance Factor "HSPF" or Geothermal. 14~~ Seasonal Energy Efficiency Ratio ("SEER")/8.2 Heating Season Performance Factor ("HSPF") or Geothermal
- Water Heater must be an electric storage tank water heater that is ~~≥ current Energy and Water conservation standards established by the Federal Department of Energy "DOE". .90 Energy Factor (EF)~~

Performance Path Level #1:

- Home must receive a HERS Index score of ~~≤ 75 (At least 30% between 80-85~~ (15-20% more efficient than the KY standard built home)
- Home must receive pre-drywall inspection and complete Farmers RECC's pre-drywall checklist (contact the Energy Advisor at Farmers RECC for a copy of the checklist)

DATE OF ISSUE: ~~01-30-2019~~ 05-15-2013

DATE EFFECTIVE: ~~03-01-2019~~ 06-15-2013

Section DSM (continued)
Touchstone Energy Home

- Home must receive a final inspection, pass a whole house air leakage test (<7 air changes per hour @50 pascals), and duct leakage test (<10% of the fan's rated capacity).
- Primary source of heat must be an Air Source Heat Pump > current Energy and Water conservation standard established by the Federal DOE ≥ 13 SEER/7.5 HSPF or Geothermal
- Home must pass current energy code requirements established in the KY Residential Code 2009 IECC performance path.
- Water Heater must be an electric storage tank water heater that is > current Energy and Water conservation standard established by the Federal DOE .90 (EF)

Performance Path Level #2:

- ~~Home must receive a HERS Index score of ≤ 79 (At least 21% more efficient than the KY standard built home)~~
- ~~Home must receive pre-drywall inspection and complete Farmers' pre-drywall checklist. (contact the Energy Advisor at Farmers for a copy of the checklist)~~
- ~~Home must receive a final inspection, pass a whole house air leakage test (<7 air changes per hour @50 pascals), and duct leakage test (<10% of the fan's rated capacity).~~
- ~~Primary source of heat must be an Air Source Heat Pump ≥ 13 SEER/7.5 HSPF or Geothermal~~
- ~~Home must pass 2009 IECC performance path.~~
- ~~Water Heater must be an electric storage tank water heater that is $\geq .90$ (EF)~~

Prescriptive Path Incentive

Farmers RECC will provide an incentive of \$750 to residential members that build their new home to meet the requirements of either the Prescriptive or Performance Paths as listed above.

Performance Path Level #1 Incentive

~~Farmers will provide an incentive of \$250 to residential members that build their new home to meet the requirements of the Performance Path Level #1 as listed above.~~

Performance Path Level #2 Incentive

~~Farmers will provide an incentive of \$750 to residential members that build their new home to meet the requirements of the Performance Path Level #2 as listed above.~~

Term: The program is an ongoing program..

DSM - Button-Up Weatherization Program

Purpose

The Button-Up Weatherization Program offers an incentive for reducing the heat loss of a home. The retail member/owner may qualify for this incentive by improving *attic* insulation, ~~installing higher efficiency windows and doors, or by~~ and reducing the air leakage of their home.

Availability

This program is available to residential members/owners served by Farmers Rural Electric Cooperative Corporation ("Farmers RECC").

Eligibility

This program is targeted to older single-family, multi-family or manufactured dwellings. Eligibility requirements are:

- Home must be 2 years old or older to qualify for the incentive.
- Primary source of heat must be electricity.
- ~~Eligible dwellings may qualify for one of four levels:~~ _____

Button-Up Level I

~~The insulation portion of the Button-Up incentive will promote the reduction of energy usage on the part of the retail member/owner by providing an incentive of \$40 per one thousand British thermal unit per hour (Btuh) reduced, up to \$520 resulting from improved insulation or installing higher efficiency windows or doors. Heat loss calculation of Btuh reduced will be made by Farmers Rural Electric using the Button-Up Reference Guide or other Farmers' approved energy efficiency software. Heat loss calculations in Btuh are based on the winter design temperature.~~

DSM - Button-Up Weatherization Program (Continued)

Button Up Level I w/Air Sealing

The air sealing portion of the Button Up incentive will promote the reduction of energy usage through air sealing on the part of retail members. Typical air sealing could include caulking, improved weather stripping, sealing attic accesses, etc. To receive this incentive either an EKPC Farmers RECC approved contractor or Farmers RECC representative must perform a "pre" and "post" blower door test to measure actual Btuh reduced. This portion of the Button Up incentive will also pay \$40 per thousand Btuh's reduced and increases the Button Up Level I maximum incentive to \$750.

The attic insulation portion of the Button Up incentive will promote the reduction of energy usage on the part of the retail members. Heat loss calculation of Btuh reduced will be made by using either the Manual J 8th Edition or through other methods approved by EKPC. Heat loss calculations in Btuh are based on the winter design temperature. In order to receive an incentive for attic insulation, an air seal must be completed.

Incentives

The Button Up incentive will pay a total payment of \$40 per thousand Btuh reduced to the retail member up to the maximum rebate incentive of \$750.

Button Up Level II

The Button Up Level II portion of this incentive will promote energy conservation through a whole house approach. This level of incentive is targeted at retail members experiencing high energy bills as a result of excessive heat loss from multiple causes. The incentive promotes the member to address all of the problems in their home at one time. Retail member/owner(s) who reduce their home's energy needs by 26,500 Btuh are eligible for the full Button up Level I Air Seal incentive plus an additional \$310 for a total of \$1,060. To receive this incentive either a Farmers Rural Electric contractor or Farmers Rural Electric representative must perform a "pre" and "post" inspection/blower door and duct leakage test of the home to measure actual Btuh reduced. Each home must meet minimum requirements as determined by Farmers Rural Electric.

Button Up Level III

The Button Up Level III portion of this incentive will promote energy conservation through a whole house approach. This level of incentive is targeted at retail members experiencing extremely high energy bills as a result of excessive heat loss from multiple causes. The incentive promotes the member to address all of the problems in their home at one time. Retail member/owner(s) who reduce their home's energy needs by 34,250 Btuh are eligible for the full Button Up Level I Air Seal incentive plus an additional \$620 for a total of \$1,370. To receive this incentive either a Farmers' approved contractor or Farmers Rural Electric representative must perform a "pre" and "post" inspection/blower door and duct leakage test of the home to measure actual Btuh reduced. Each home must meet minimum requirements as determined by Farmers Rural Electric.

DSM - Button-Up Weatherization Program (Continued)

Button-Up Level I Incentive

Farmers Rural Electric will provide an incentive to residential members of \$40 per one thousand Btuh reduced, up to \$520. A blower door test is not required to receive this incentive up to the maximum incentive of \$520.

Button-Up Level I with Air Sealing Incentive

Farmers Rural Electric will provide an incentive to residential member/owner(s) of \$40 per one thousand Btuh reduced, up to \$750. To qualify for the increased maximum incentive of \$750 as noted herein, a blower door test is required.

Button-Up Level II Incentive

Farmers Rural Electric will provide an incentive of \$1060 to residential member/owner(s) who reduce their home's energy needs by 26,500 Btuh. To qualify for the increased maximum incentive as noted herein, the home must pass a blower door test, duct leakage test, and meet the minimum program requirements.

Button-Up Level III Incentive

Farmers Rural Electric will provide an incentive of \$1370 to residential member/owner(s) who reduce their home's energy needs by 34,250 Btuh. To qualify for the increased maximum incentive as noted herein, the home must pass a blower door test, duct leakage test, and meet the minimum program requirements.

Term

The program is an ongoing program.

Heat Pump Retrofit Program**

Purpose

The Heat Pump Retrofit Program provides incentives for residential ~~members~~ ~~customers~~ to replace their existing resistance heat source with a high efficiency heat pump.

Availability

This program is available to residential members served by Farmers Rural Electric Cooperative Corporation ("Farmers RECC").

Eligibility

This program is targeted to ~~retail~~ members who currently heat their home with a resistance heat source; this program is targeted to site built homes, manufactured homes, and multi-family dwellings. Eligibility requirements are

- Incentive only applies when homeowner's primary source of heat is an electric resistance heat furnace, ceiling cable heat, or baseboard heat, *electric thermal storage*.
- Existing heat source must be at least 2 years old.
- New manufactured homes are eligible for the incentive.
- *Two (2) maximum incentive payments per location, per lifetime for centrally ducted systems.*
- *Ducted and Ductless mini-splits applying for the incentive will be incentivized at a rate of \$250 per indoor head unit up to a maximum of three head units per location, per lifetime.*
- *Participants in the Heat Pump Retrofit Program are not eligible for participation in the ENERGY STAR Manufactured Home Program.*
- ~~Air Conditioning, Heating, and Refrigeration Institute ("AHRI") ratings may range as follows: Seasonal Energy Efficiency Ratio ("SEER") minimum 13; Heating Seasonal Performance Factor ("HSPF") minimum 7.5.~~

Incentives

Homeowners replacing their existing resistance heat source with a heat pump will qualify for the following incentive based on the ~~AHRI~~ ~~Rating~~ equipment type:

<u>AHRI RATING</u>	<u>INCENTIVE TO MEMBER</u>
13 SEER	
7.5 HSPF	\$500
14 SEER	
8.0 HSPF	\$750
≥15 SEER	
>8.5 HSPF	\$1,000

Equipment Type

Rebate

Centrally Ducted Systems:

Current Energy Conservation Standard established by the Federal Department of Energy "DOE"	\$500
Current ENERGY STAR level equipment or greater	\$750

Mini Split Systems:

Ducted or Ductless Mini-Splits ENERGY STAR Level equipment or greater	\$250
---	-------

Term - The program is an ongoing program.

DSM – HVAC Duct Sealing Program

Purpose

~~The HVAC Duct Sealing Program offers blower door tests to evaluate and identify costly duct leaks and an incentive to seal leaking ductwork either with traditional mastic sealers or with the *Aeroseal* duct sealing program. Duct losses are to be reduced to 10% or less, and duct loss measurement requires the use of a blower door test and the blower door subtraction method.~~

Availability

~~This program is available to residential members in all service territory served by Farmers Rural Electric Cooperative Corporation (“Farmers”).~~

Eligibility

~~This program is targeted to single family or multi family homes using electric furnaces or electric heat pumps.
–Eligibility requirements are:~~

- ~~• Limited to homes that have centrally ducted heating systems in unconditioned areas, using only electricity as a fuel source.~~
- ~~• Duct system must be 2 years old or older.~~
- ~~• Initial duct leakage must test greater than 10% of the fan’s rated capacity.~~
- ~~• HVAC Contractor is required to conduct a “pre” and “post” blower door test to verify reductions. Only HVAC contractors trained or approved by Farmers may be used.~~
- ~~• Duct leakage per system must be reduced to below 10% of the fan’s rated capacity (assuming 400cfm per ton, ex. 2 ton system= 800 cfm, thus duct leakage must be reduced to 80cfm or less). If duct system cannot be reduced to 10% of fan’s rated capacity, contractor is expected to provide a detailed justification.~~
- ~~• All joints in the duct system must be sealed with foil tape and mastic. Foil tape alone does not qualify as properly sealing the duct system.~~
- ~~• For homes that have two separately ducted heat systems, each system will qualify independently for the incentive.~~

ENERGY STAR® Appliances Program

PURPOSE

The Farmers Rural Electric ENERGY STAR® Appliances Program offers an incentive for reducing the energy consumed by household appliances. The end-use cooperative member ("end-use member") may qualify for this incentive (rebate) by purchasing an ENERGY STAR®-qualifying appliance type listed in this tariff.

AVAILABILITY

This program is available in all territories served by Farmers Rural Electric.

ELIGIBILITY

This program is targeted to new single or multi-family homes, existing single or multi-family homes or manufactured homes purchasing ENERGY STAR® appliances. Eligibility requirements are detailed below and are available at Farmers Rural Electric and on the Farmers Rural Electric's website.

- ~~Product must be certified by EPA as an ENERGY STAR® Appliance. Eligible models can be found on ENERGESTAR.GOV.~~
- ~~Product must be purchased after December 15, 2014~~
- ~~Product must be fully installed and operational.~~
- ~~Rebate application must be completed and original receipt or copy must be provided for verification.~~

● ~~Receipt must include the following information:~~

- ~~○ Retailer's Name~~
- ~~○ Itemized listing of product(s), including description(s), manufacturer(s), model number(s) or other identifying information. The receipt information must match the product information from the rebate application.~~
- ~~○ Purchase price and proof that full payment was made~~
- ~~○ Purchase date and date of delivery or installment (if installed by a contractor)~~
- ~~○ For new construction, a Farmers Rural Electric energy advisor ("energy advisor") may enter the rebate application on behalf of the end use member. For an application entered by the energy advisor, the application must be accompanied by a picture of the appliance model number and serial number. Rebate applications for new constructions, without a receipt, will only be accepted through an energy advisor.~~

Refrigerators & Freezers

- ~~● Refrigerators must be greater than 7.75 cubic feet in capacity.~~
- ~~● End use members may apply for one ENERGY STAR® certified refrigerator and one ENERGY STAR® certified freezer rebate per calendar year per member metered account. A maximum of two rebates within this appliance category (Refrigerators and Freezers) will be allowed per metered account.~~

Dishwashers

- ~~● End use members may apply for one ENERGY STAR® certified dishwasher rebate per premise/location per calendar year. A maximum of two rebates within this appliance category (Dishwashers) will be allowed per premise/location.~~

ENERGY STAR® Appliances Program (Cont.)

Clothes Washers

- ~~End use members may apply for one ENERGY STAR® certified clothes washer rebate per calendar year per metered account. A maximum of two rebates within this appliance category (Clothes Washers) will be allowed per metered account.~~

Heat Pump Water Heaters

- ~~End use members may apply for two ENERGY STAR® certified heat pump water heater rebates per calendar year per premise/location. A maximum of four rebates within this appliance category (Heat Pump Water Heaters) will be allowed per premise/location.~~

Air Conditioners and Heat Pumps

- ~~Rebate application must be completed, signed and returned with an original or copy of the receipt and the AHRI certificate obtained from the HVAC installer.
 - ~~AHRI certificate must list model numbers for the condenser unit (outside unit) and evaporator coil (indoor unit).~~~~
- ~~End use members may apply for up to three ENERGY STAR® certified heat pump or air conditioner rebates per calendar year per premise/location. A maximum of six (6) rebates within this appliance category (Air Conditioners and Heat Pumps) will be allowed per premise/location.~~

LANDLORD/TENANT RELATIONSHIPS:

~~Notwithstanding the forgoing, a landlord who rents to a tenant who is an end use member of Farmers Rural Electric shall also be eligible to participate in the ESAP program regardless of whether said landlord is also an end use member of Farmers Rural Electric. A landlord may be eligible for the same number of incentives per calendar year as a metered tenant end use member.~~

Appliance Recycling Program

PURPOSE

The Appliance Recycling Program ("ARP") offers an incentive for the removal and recycling of old energy inefficient refrigerators and freezers resulting in lower energy consumption at the participating residences.

AVAILABILITY

This program is available in all territories served by Farmers Rural Electric.

ELIGIBILITY

This program is targeted to existing single family, multi family, and manufactured homes that currently have old energy inefficient refrigerators or freezers. The residential end use cooperative member ("end use member") may be eligible for this incentive by offering an existing refrigerator or freezer, subject to detailed eligibility requirements, to be picked up and recycled. Detailed eligibility requirements are available at Farmers Rural Electric and on Farmers Rural Electric's website. General eligibility requirements are:

- ~~Must be a residential end use member of Farmers Rural Electric~~
- ~~End use member must own the appliance(s) being turned in for recycling.~~
- ~~End use member must be eligible for the incentive — maximum 2 per metered account per calendar year~~
- ~~Appliance must be between 7.75 and 30 cubic feet~~
- ~~Appliance must be plugged in, operational, working and cooling when collection team arrives~~
- ~~Appliance must be empty and have a clear path for removal~~
- ~~Appliance must be picked up from the service address on the end use member's billing account~~

Direct Load Control Program – Residential

Purpose

The Direct Load Control Program will encourage the reduction in growth of peak demand, enabling the Company to utilize its system more efficiently, manage market purchases, and defer the construction of new generation.

Availability

The Direct Load Control Program is available to residential ~~members~~ *customers* in the service territory of Farmers Rural Electric Cooperative Corporation (“Farmers RECC”) and will include the control of *existing* water heaters, *existing and new* air conditioners and heat pumps, ~~and pool pumps~~.

Availability may be denied where, in the judgment of Farmers RECC, installation of the load control equipment is impractical.

Eligibility

To qualify for this Program, the *new* participant must be located in the service territory of Farmers RECC, and have:

- ~~• 40-gallon (minimum) electric water heating units, and/or~~
- Central air conditioning or heat pump units *with single-stage compressors*, ~~and/or~~
- ~~• Pool pumps.~~

The above appliances may be electrically cycled or interrupted in accordance with the rules of this Tariff.

The participant may either own or rent the residence where the qualifying appliances are located. The residence may be either a single-family structure or a multi-family apartment facility.

The participant is responsible for obtaining the permission of the owner of the rented residence to participate in the load control program. Farmers RECC may require that a rental property agreement be executed between Farmers RECC and the owner of the rented residence.

Direct Load Control Program – Residential

Program Incentives

Farmers RECC will provide an incentive to the participants in this program for the following appliances.

Water Heaters. Farmers RECC will ~~provide credit~~ the existing participating residential member ~~power bill~~ \$10.00 per water heater annually ~~or provide the incentive via other payment means including, but not limited to, a check.~~ The existing participant will receive this credit regardless of whether the water heater is actually controlled.

Air Conditioners and Heat Pumps. Farmers RECC will provide an incentive to the participants in this program. The participant may select one of ~~three two~~ alternatives. The participant will receive one of these incentives regardless of whether the air conditioner or heat pump is actually controlled during any program month.

Alternative One. For each direct load control switch, Farmers RECC will ~~provide-reimburse~~ the participating residential member \$20.00 ~~bill credit~~ annually ~~or provide the incentive via other payment means including, but not limited to, a check per air conditioner or heat pump (\$5 per summer months, June, July, August, and September).~~

Alternative Two. When technically feasible, Farmers RECC may ~~will~~ provide and install at no cost one or more ~~digital~~ Wi-Fi enabled thermostats as needed for control purposes ~~or Farmers RECC may provide a Wi-Fi enabled thermostat and a rebate up to \$100 to offset the member's cost to have the thermostat installed by the member's own heating and air-conditioning contractor.~~ The member must sign-up each Farmers RECC provided thermostat within 60 days or return it to Farmers RECC or be invoiced by Farmers RECC for the cost of the thermostat. Wi-Fi enabled means any thermostat utilizing the Wi-Fi communication protocol or similar local networking communication protocols. The member must have a fixed location, reliable internet for communication. Farmers RECC will reimburse the participating member \$20 per qualifying Wi-Fi enabled thermostat annually. ~~After the initial selection of one of the alternatives, the participant may change to the other alternative subject to the following conditions:~~

- ~~From bill credits to digital thermostats—The change in alternative will be permitted in any month except for the summer months of June through September. In addition, the participant will pay 50 percent of the installed cost of each digital thermostat.~~
- ~~From digital thermostats to bill credits—The change in alternative will be permitted in any month except for the summer months of June through September. In addition, the participant will either reimburse EKPC, through Farmers RECC, an amount equal to 50 percent of the original installed cost of each digital thermostat that was initially installed if the participant keeps the thermostat or pay 50 percent of the cost to remove each digital thermostat that was initially installed.~~
- ~~Only one change in incentive alternatives will be permitted during a 12-month period.~~

Direct Load Control Program – Residential

~~Alternative Three Pool Pumps.~~ Farmers RECC will ~~reimburse~~ provide the participating residential member \$20.00 bill credit per ~~pool pump~~ per qualifying Wi-Fi enabled thermostat provided by the retail member that controls an air conditioner or heat pump annually or provide the incentive via other payment means including, but not limited to, a check. Farmers RECC will provide a rebate up to \$100 to offset the member's cost to have the thermostat installed by the member's own heating and air-conditioning contractor. The member must have a fixed location, reliable internet for communication. (\$5.00 per summer month, June, July, August and September). ~~The participant will receive this credit regardless of whether the pool pump is actually controlled.~~

When the qualifying appliances are located in rental residences, program incentives will be paid to the participant, regardless of whether the participant owns or rents the residence where the qualifying appliances are located. Nothing contained in this Tariff will prohibit a further disposition of the program incentive between the participant and the owner of a rented residence.

Program Special Incentives

Farmers RECC will provide a special incentive up to \$25.00 for new participants that install a load control switch on qualifying ~~electric water heaters~~, air conditioners and heat pumps, ~~and or pool pumps-utility supplied Wi-Fi enabled thermostat or retail member supplied Wi-Fi enabled thermostat.~~ The one-time incentive will be in the form of a bill credit on the electric bill following the switch installation or provided via other payment means including, but not limited to, a check.

Time Periods for Direct Load Control Program

~~Water Heaters.~~ A load control switch will be placed on the water heater Existing load control switches and may be electrically interrupted for a maximum time period of six (6) hours per event during the May through September months indicated below and for a maximum time period of four (4) hours per event during the October through April months indicated below.

EKPC will cycle the water heaters only during the hours listed below:

<u>Months</u>	<u>Hours Applicable for Demand Billing - EPT</u>
October through April	6:00 a.m. to 12:00 noon 4:00 p.m. to 10:00 p.m.
May through September	10:00 a.m. to 10:00 p.m.

Direct Load Control Program – Residential

1. Prior to the installation of load control devices, Farmers RECC may inspect the participant's electrical equipment to insure good repair and working condition, but Farmers RECC shall not be responsible for the repair or maintenance of the electrical equipment.
2. EKPC, on behalf of Farmers RECC, will install, *in some cases*, own, and maintain the load management devices controlling the participant's air conditioner, heat pump, ~~or water heater for Alternatives One and Two as noted in the tariff.~~ The participant must allow Farmers RECC, or their representative, reasonable access to install, maintain, inspect, test and remove load control devices. Inability of Farmers RECC to gain access to the load management device to perform any of the above activities for a period exceeding 30 days may, at Farmers RECC's option, result in discontinuance of credits under this tariff until such time as Farmers RECC is able to gain the required access.
3. Participants may join the program at any time during the year. ~~Participants with water heaters and/or pool pumps will receive the first annual incentive within 12 months after the installation of the load control device.~~ Participants with air conditioning or heat pump units who join during the months of June through September can select an incentive alternative as described in this Tariff. If the ~~bill credit~~ incentive is selected, *incentives will be provided annually.* ~~bill credits will not begin until after the installation of the load control device and continue for the months remaining in the June to September time period for that year.~~
4. If a participant decides to withdraw from the program or change incentive alternatives, Farmers RECC will endeavor to implement the change as soon as possible.
5. If a participant decides to withdraw from the program, the participant may not apply to rejoin the program for a period of six (6) months. Returning participants for air conditioning and heat pump units will be required to initially select the bill credit alternative, but may change alternatives later as described in this Tariff.

Commercial/Industrial Advanced Lighting Program

Purpose

~~The Commercial & Industrial Advanced Lighting Program is an energy efficiency program to encourage commercial and industrial members of Farmers Rural Electric Cooperative Corporation ("Farmers RECC") to replace existing lighting within their facilities with high efficient fluorescent lamps and ballast.~~

Availability

~~This program is available to commercial and industrial facilities located in all service territory served by Farmers RECC.~~

Eligibility

~~To qualify for the Commercial & Industrial Advanced Lighting Program the customer must be on a retail commercial or industrial rate. The business must have been in operations for at least two years prior to January 1, 2011, and be current on its power bill payment to the Farmers RECC. No empty buildings, inactive warehouses, or inactive storage areas shall qualify. The business must be open or have its normal lighting load on for at least 50 hours per week. Retrofits of parking lot lighting, provided on photocell control, are eligible.~~

Rebate

~~Farmers RECC will provide an incentive to the member of \$213 for each kW of lighting load reduction for businesses open 50 hours a week or more. For commercial customers, rebates are limited to \$6,000 per upgrade for any facility. For industrial customers, rebates are limited to \$12,000 per upgrade for any facility.~~

Commercial/Industrial Compressed Air Program

Audit Criteria

1. ~~The criteria for reporting leaks shall be at the discretion of the auditor. At a minimum the report must detail the leak location, decibels measured, CFM of air leakage, and kW leakage load for each leak and summed for the facility.~~
2. ~~The basic rule is that leaks that do not exceed 30 decibels in ultrasonic noise will not be reported or counted in the leakage kW load.~~
3. ~~Exceptions to the 30 decibels rule are as follows:~~
 - a. ~~In a quiet environment with a minimal amount of compressed air, the minimum will drop to between 15 to 20 decibels.~~
 - b. ~~In a high noise environment, especially with robotic welding, the minimum will be raised to 40 to 50 decibels.~~
 - c. ~~Distance is also a factor. A 25 decibel leak in a trunk pipe in a 20-foot ceiling, in a noisy environment, will be documented and added to the leakage kW according to the distance.~~

Term

~~The Industrial Compressed Air Program is an ongoing program contingent upon our wholesale power supplier East Kentucky Power Cooperative being an active participant in the program.~~

Verification Procedures

~~Determination of the amount of leakage reduction:~~

1. ~~The leakage reduction will be determined by the measured reduction in compressed air leakage.~~

Commercial/Industrial Compressed Air Program

- ~~2. The leakage reduction will be determined by the measured reduction in compressed air leakage.~~
- ~~3. An ultrasonic compressed air leakage audit shall be performed and the results of this audit provided to the customer and EKPC. The report will contain an estimate of the amount of excess load in kW that the leaks are causing. The report will include a detail of leaks detected. The detail of leaks and the excess kW load will be based on the criteria for leak reporting.~~
- ~~4. Upon completion of repairs to the system, a follow-up ultrasonic compressed air leakage audit will be conducted for the documented leaks to measure the difference in the kW leakage load. The follow-up audit report will show the net kW leakage saved and results provided to the customer and Farmers RECC.~~
- ~~5. The criteria for reporting leaks shall be at the discretion of the auditor. At a minimum the report must detail the leak location, decibels measured, CFM of air leakage, and kW leakage load for each leak and summed for the facility.~~
- ~~6. The basic rule is that leaks that do not exceed 30 decibels in ultrasonic noise will not be reported or counted in the leakage kW load.~~
- ~~7. Exceptions to the 30 decibels rule are as follows:~~

DSM –Touchstone Energy Home

Purpose

In an effort to improve new residential home energy performance, Farmers Rural Electric Cooperative Corporation (“Farmers RECC”) has designed the Touchstone Energy Home Program. This program provides guidance during the building process to guarantee a home that is 25-30% more efficient than the Kentucky standard built home. The standard built new home in rural Kentucky typically receives a 105 on the Home Energy Rating System (“HERS”) Index.

T
T

Availability

This program is available to residential members served by Farmers RECC.

Eligibility

To qualify as a Touchstone Energy Home under Farmers RECC’s program, the participating single-family home must be located in the service territory of Farmers RECC and must meet the program guidelines following one of the two available paths of approval. Multi-family dwellings pre-approved by East Kentucky Power Cooperative, Inc. may be eligible.

T

Prescriptive Path:

- Home must meet each efficiency value as prescribed by Farmers RECC.
- Home must receive pre-drywall inspection and complete Farmers RECC’s pre-drywall checklist (contact the Energy Advisor at Farmers RECC for a copy of the checklist)
- Home must receive a final inspection, pass a whole house air leakage test and duct leakage test.
- Primary source of heat must be an Air Source Heat Pump \geq current ENERGY STAR specification for Seasonal Energy Efficiency Ratio “SEER” and Heating Season Performance Factor “HSPF” or Geothermal.
- Water Heater must be an electric storage tank water heater that is \geq current Energy and Water conservation standards established by the Federal Department of Energy “DOE”.

DSM (continued)
Touchstone Energy Home

Performance Path:

- Home must receive a HERS Index score of ≤ 75 (At least 30% more efficient than the KY standard built home)
- Home must receive pre-drywall inspection and complete Farmers RECC's pre-drywall checklist (contact the Energy Advisor at Farmers RECC for a copy of the checklist)
- Home must receive a final inspection, pass a whole house air leakage test and duct leakage test.
- Primary source of heat must be an Air Source Heat Pump $>$ current Energy and Water conservation standard established by the Federal DOE or Geothermal
- Home must pass current energy code requirements established in the KY Residential Code.
- Water Heater must be an electric storage tank water heater that is \geq current Energy and Water conservation standard established by the Federal DOE.

Incentive

Farmers RECC will provide an incentive of \$750 to residential members that build their new home to meet the requirements of either the Prescriptive or Performance Paths as listed above.

Term

The program is an ongoing program.

DSM - ENERGY STAR® Manufactured Home Program

N

Purpose

Farmers Rural Electric Cooperative Corporation's ("Farmers RECC") ENERGY STAR® Manufactured Home Program ("ESMH") is designed to ensure that members of Farmers RECC purchase an energy efficient manufactured home. Farmers RECC will accomplish this by providing the purchaser of a manufactured home with an incentive to purchase and install a new ENERGY STAR® certified manufactured home.

Availability

This program is available to residential members served by Farmers RECC.

Eligibility

To be eligible for this ESMH incentive, new manufactured homes must meet the following criteria:

- United States Environmental Protection Agency ("EPA") and Systems Building Research Alliance ("SBRA") guidelines as an ENERGY STAR® Manufactured Home.
- Primary source of heat must be a heat pump.
- Home must be all electric.
- Home must be installed by the member on lines served by Farmers RECC.
- Participants in the ENERGY STAR Manufactured Home Program are not eligible for participation in the Heat Pump Retrofit Program.

Payments

After new home installation and after receiving certification as an ENERGY STAR® manufactured home, Farmers RECC will tender a \$1,150 incentive payment to their member. The incentive is intended to help cover the cost of upgrading the home from the standard United States Department of Housing and Urban Development (HUD) construction requirements to the SBRA and EPA ENERGY STAR® manufactured home construction requirements.

Term

This program is an ongoing program.

DSM - Button-Up Weatherization Program

Purpose

The Button-Up Weatherization Program offers an incentive for reducing the heat loss of a home. The retail member may qualify for this incentive by improving attic insulation, and reducing the air leakage of their home.

T

Availability

This program is available to residential members served by Farmers Rural Electric Cooperative Corporation ("Farmers RECC").

T

Eligibility

This program is targeted to older single-family, multi-family or manufactured dwellings. Eligibility requirements are:

- Home must be 2 years old or older to qualify for the incentive.
- Primary source of heat must be electricity.

The Button Up incentive will promote the reduction of energy usage through air sealing on the part of retail members. Typical air sealing could include caulking, improved weather stripping, sealing attic accesses, etc. To receive this incentive either an EKPC approved contractor or Farmers RECC representative must perform a "pre" and "post" blower door test to measure actual Btuh reduced.

T

The attic insulation portion of the Button Up incentive will promote the reduction of energy usage on the part of the retail members. Heat loss calculation of Btuh reduced will be made by using either the Manual J 8th Edition or through other methods approved by EKPC. Heat loss calculations in Btuh are based on the winter design temperature. In order to receive an incentive for attic insulation, an air seal must be completed.

Incentives

The Button Up incentive will pay a total payment of \$40 per thousand Btuh reduced to the retail member up to the maximum rebate incentive of \$750.

Term

The program is an ongoing program.

DSM - Heat Pump Retrofit Program

Purpose

The Heat Pump Retrofit Program provides incentives for residential members to replace their existing resistance heat source with a heat pump.

T
T

Availability

This program is available to residential members served by Farmers Rural Electric Cooperative Corporation ("Farmers RECC").

Eligibility

This program is targeted to members who currently heat their home with a resistance heat source; this program is targeted to site built homes, manufactured homes, and multi-family dwellings. Eligibility requirements are

- Incentive only applies when homeowner's primary source of heat is an electric resistance heat furnace, ceiling cable heat, baseboard heat, electric thermal storage.
- Existing heat source must be at least 2 years old.
- New manufactured homes are eligible for the incentive.
- Two (2) maximum incentive payments per location, per lifetime for centrally ducted systems.
- Ducted and Ductless mini-splits applying for the incentive will be incentivized at a rate of \$250 per indoor head unit up to a maximum of three head units per location, per lifetime.
- Participants in the Heat Pump Retrofit Program are not eligible for participation in the ENERGY STAR Manufactured Home Program.

T

T

Incentives

Homeowners replacing their existing resistance heat source with a heat pump will qualify for the following incentive based on the equipment type:

T

Equipment Type

Rebate

Centrally Ducted Systems:

Current Energy Conservation Standard established by the Federal Department of Energy "DOE"	\$500
Current ENERGY STAR level equipment or greater	\$750

Mini Split Systems:

Ducted or Ductless Mini-Splits ENERGY STAR Level equipment or greater	\$250

Direct Load Control Program – Residential

Purpose

The Direct Load Control Program will encourage the reduction in growth of peak demand, enabling the Company to utilize its system more efficiently, manage market purchases, and defer the construction of new generation.

Availability

The Direct Load Control Program is available to residential members in the service territory of Farmers Rural Electric Cooperative Corporation ("Farmers RECC") and will include the control of existing water heaters, existing and new air conditioners and heat pumps.

Availability may be denied where, in the judgment of Farmers RECC, installation of the load control equipment is impractical.

Eligibility

To qualify for this Program, the new participant must be located in the service territory of Farmers RECC and have:

- Central air conditioning or heat pump units with single stage compressors

The above appliances may be electrically cycled or interrupted in accordance with the rules of this Tariff.

The participant may either own or rent the residence where the qualifying appliances are located. The residence may be either a single-family structure or a multi-family apartment facility.

The participant is responsible for obtaining the permission of the owner of the rented residence to participate in the load control program. Farmers RECC may require that a rental property agreement be executed between Farmers RECC and the owner of the rented residence.

Direct Load Control Program – Residential

Program Incentives

Farmers RECC will provide an incentive to the participants in this program for the following appliances.

Water Heaters. Farmers RECC will provide the existing participating residential member \$10.00 per water heater annually or provide the incentive via other payment means including, but not limited to, a check. The existing participant will receive this credit regardless of whether the water heater is actually controlled.

Air Conditioners and Heat Pumps. Farmers RECC will provide an incentive to the participants in this program. The participant may select one of three alternatives. The participant will receive one of these incentives regardless of whether the air conditioner or heat pump is actually controlled during any program month.

Alternative One. For each direct load control switch Farmers RECC will provide the participating residential member \$20.00 bill credit annually or provide the incentive via other payment means including, but not limited to, a check per air conditioner or heat pump.

Alternative Two. When technically feasible, Farmers RECC may provide and install at no cost one or more Wi-Fi enabled thermostats as needed for control purposes or Farmers RECC may provide a Wi-Fi enabled thermostat and a rebate up to \$100 to offset the member's cost to have the thermostat installed by the member's own heating and air-conditioning contractor. The member must sign-up each Farmers RECC provided thermostat within 60 days or return it to Farmers RECC or be invoiced by Farmers RECC for the cost of the thermostat. Wi-Fi enabled means any thermostat utilizing the Wi-Fi communication protocol or similar local networking communication protocols. The member must have a fixed location, reliable internet for communication. Farmers RECC will reimburse the participating member \$20 per qualifying Wi-Fi enabled thermostat annually.

Direct Load Control Program – Residential

Alternative Three. Farmers RECC will provide the participating residential member \$20.00 bill credit per qualifying Wi-Fi enabled thermostat provided by the retail member that controls an air conditioner or heat pump annually or provide the incentive via other payment means including, but not limited to, a check. Farmers RECC will provide a rebate up to \$100 to offset the member's cost to have the thermostat installed by the member's own heating and air-conditioning contractor. The member must have a fixed location, reliable internet for communication.

When the qualifying appliances are located in rental residences, program incentives will be paid to the participant, regardless of whether the participant owns or rents the residence where the qualifying appliances are located. Nothing contained in this Tariff will prohibit a further disposition of the program incentive between the participant and the owner of a rented residence.

Program Special Incentives

Farmers RECC will provide a special incentive up to \$25.00 for new participants that install a load control switch on qualifying air conditioners and heat pumps, utility supplied Wi-Fi enabled thermostat or retail member supplied Wi-Fi enabled thermostat. This one-time incentive will be in the form of a bill credit on the electric bill following the switch installation or provided via other payment means including, but not limited to, a check.

Time Periods for Direct Load Control Program

Water Heaters. Existing load control switches may be electrically interrupted for a maximum time period of six (6) hours per event during the May through September months indicated below and for a maximum time period of four (4) hours per event during the October through April months indicated below.

EKPC will cycle the water heaters only during the hours listed below:

<u>Months</u>	<u>Hours Applicable for Demand Billing - EPT</u>
October through April	6:00 a.m. to 12:00 noon 4:00 p.m. to 10:00 p.m.
May through September	10:00 a.m. to 10:00 p.m.

TERMS AND CONDITIONS

DSM - (continued)

Direct Load Control Program – Residential

1. Prior to the installation of load control devices, Farmers RECC may inspect the participant's electrical equipment to insure good repair and working condition, but Farmers RECC shall not be responsible for the repair or maintenance of the electrical equipment.
2. EKPC, on behalf of Farmers RECC, will install, in some cases, own, and maintain the load management devices controlling the participant's air conditioner, heat pump for Alternatives One and Two as noted in this tariff. The participant must allow Farmers RECC, or their representative, reasonable access to install, maintain, inspect, test and remove load control devices. Inability of Farmers RECC to gain access to the load management device to perform any of the above activities for a period exceeding thirty (30) days may, at Farmers RECC's option, result in discontinuance of credits under this tariff until such time as Farmers RECC is able to gain the required access.
3. Participants may join the program at any time during the year. Participants with air conditioning or heat pump units who join during the months of June through September can select an incentive alternative as described in this Tariff. If the incentive is selected, incentives will be provided annually.
4. If a participant decides to withdraw from the program or change incentive alternatives, Farmers RECC will endeavor to implement the change as soon as possible.
5. If a participant decides to withdraw from the program, the participant may not apply to rejoin the program for a period of six (6) months. Returning participants for air conditioning and heat pump units will be required to initially select the bill credit alternative, but may change alternatives later as described in this Tariff.

Direct Load Control Program – Commercial

Purpose

The Direct Load Control Program will encourage the reduction in growth of peak demand, enabling Farmers Rural Electric Cooperative Corporation (“Farmers RECC”) to utilize its system more efficiently, manage market purchases, and defer the construction of new generation.

T

Availability

The Direct Load Control Program is available to commercial members in the service territories of Farmers RECC and will include the control of air conditioners and existing water heaters.

T

T

Availability may be denied where, in the judgment of Farmers RECC, installation of the load control equipment is impractical.

Eligibility

To qualify for this Program, the new participant must be located in the service territory of Farmers RECC and have a central air conditioning or heat pump units. The appliance may be electrically cycled or interrupted in accordance with the rules of this Tariff.

T

The participant is responsible for obtaining the permission of the commercial property owner to participate in the load control program. Farmers RECC may require that a rental property agreement be executed between the Member System and the owner of the rented commercial property.

Direct Load Control Program – Commercial

Program Incentives

Farmers RECC will provide an incentive to the participants in this program for the following appliances.

Air Conditioners and Heat Pumps. The incentive will be based on the tonnage of the air conditioning unit. Units up to and including five (5) tons will receive \$20.00 per unit. Units over five tons will receive an additional annual credit of \$4.00 per ton per unit. Farmers RECC will reimburse the participating commercial member at the applicable incentive credit or provide the incentive via other payment means including, but not limited to, a check. The participant will receive the incentive regardless of whether the air conditioner is actually controlled during any program month.

Water Heaters. Farmers RECC will provide the existing participating commercial member \$10.00 per water heater annually or provide the incentive via other payment means including, but not limited to, a check. The participant will receive this credit regardless of whether the water heater is actually controlled.

Time Period for Direct Load Control Program

Air Conditioners and Heat Pumps. A load control device will be placed on each central air conditioning unit or heat pump that will allow the operating characteristics of the unit to be modified to reduce demand on the system. The member must have internet for communication. Utility of member supplied Wi-Fi enabled thermostat programs may also be available. Communication to the load control device or thermostat will be accomplished via AMR, AMI, Wi-Fi or similar communication technologies.

EKPC will control the air conditioning units only during its summer on-peak billing hours listed below and up to four (4) hours per event:

<u>Months</u>	<u>Hours Applicable for Demand Billing - EPT</u>
May through September	10:00 a.m. to 10:00 p.m.

Direct Load Control Program – Commercial

Water Heaters. Existing load control switches may be electrically interrupted for a maximum time period of six (6) hours per event during the May thru September months indicated below and for a maximum time period of four (4) hours per event during the October through April months indicated below. T

EKPC will cycle the water heaters only during the hours listed below.

<u>Months</u>	<u>Hours Applicable for Demand Billing – EPT</u>
October through April	6:00 a.m. to 12:00 noon
May through September	4:00 p.m. to 10:00 p.m. 10:00 a.m. to 10:00 p.m.

Terms and Conditions

1. Prior to the installation of load control devices, Farmers RECC may inspect the participant's electrical equipment to ensure good repair and working condition, but Farmers RECC shall not be responsible for the repair or maintenance of the electrical equipment.
2. EKPC, on behalf of Farmers RECC, will install, in some cases, own, and maintain the load management devices controlling the participant's air conditioner or heat pump. The participant must allow Farmers RECC, or their representative, reasonable access to install, maintain, inspect, test and remove load control devices. Inability of Farmers RECC to gain access to the load management device to perform any of the above activities for a period exceeding thirty (30) days may, at Farmers RECC's option, result in discontinuance of credits under this tariff until such time as Farmers RECC is able to gain the required access. T
3. Participants may join the program at any time during the year. Participants with air conditioning or heat pumps who join during the months of June through September will receive the bill credits annually. T
4. If a participant decides to withdraw from the program, Farmers RECC will endeavor to implement the withdrawal as soon as possible. If a participant decides to withdraw from the program, the participant may not apply to rejoin the program for a period of six (6) months.
