About this Book

Who Should Use This Book

The z/OS summary of message changes are for all people who need to know what messages are new and changed for each release. This will usually be people who support automated systems that must recognize specific messages, and must modify their systems to the new release.

How to Use This Book

This book is divided into chapters where each z/OS element is contained separately. Within each chapter, message are grouped by new messages, changed messages and deleted messages.

Where to Find More Information

This book references information in other books, using shortened versions of the book title. For complete titles and order numbers of the books for z/OS elements, see *z/OS Information Roadmap*.

Using LookAt to look up message explanations

LookAt is an online facility that allows you to look up explanations for z/OS messages and system abends.

Using LookAt to find information is faster than a conventional search because in most cases LookAt goes directly to the message explanation.

LookAt can be accessed from the Internet at:

<http://www.ibm.com/servers/eserver/zseries/zos/bkserv/lookat/lookat.html>

or from a TSO command line.

To use LookAt as a TSO command, LookAt must be installed on your host system. You can obtain the LookAt code for TSO from a disk on your *z/OS Collection*, SK3T-4269, or from the LookAt Web site. To obtain the code from the LookAt Web site, do the following:

1. Go to <http://www.ibm.com/servers/eserver/zseries/zos/bkserv/lookat/lookat.html>.
2. Scroll to and click on the **News and Help** button.
3. Scroll to and click on the **Download LookAt from the Web** link.
4. Click on the ftp directory for the appropriate operating system and release.
5. Find the README file and follow its detailed instructions.

To find a message explanation from a TSO command line, simply enter: **lookat message-id** as in the following example:

```
lookat iec192i
```

This results in direct access to the message explanation for message IEC192I.

Note: Some messages have information in more than one book. For example, IEC192I has routing and descriptor codes listed in *z/OS MVS Routing and Descriptor Codes*. For such messages, LookAt prompts you to choose which book to open.

Accessing licensed books on the Web

z/OS licensed documentation in PDF format is available on the Internet at the IBM Resource Link Web site at:

<http://www.ibm.com/servers/resourceLink>

Licensed books are available only to customers with a z/OS license. Access to these books requires an IBM Resource Link Web userid and password, and a key code. With your z/OS order you received a memo that includes this key code.

To obtain your IBM Resource Link Web userid and password log on to:

<http://www.ibm.com/servers/resourceLink>

To register for access to the z/OS licensed books:

1. Log on to Resource Link using your Resource Link userid and password.
2. Click on **User Profiles** located on the left-hand navigation bar.
3. Click on **Access Profile**.
4. Click on **Request Access to Licensed books**.
5. Supply your key code where requested and click on the **Submit** button.

If you supplied the correct key code you will receive confirmation that your request is being processed. After your request is processed you will receive an e-mail confirmation.

Note: You cannot access the z/OS licensed books unless you have registered for access to them and received an e-mail confirmation informing you that your request has been processed.

To access the licensed books:

1. Log on to Resource Link using your Resource Link userid and password.
2. Click on **Library**.
3. Click on **zSeries**.
4. Click on **Software**.
5. Click on **z/OS**.
6. Access the licensed book by selecting the appropriate element.

Summary of Changes

Summary of Changes for SA22-7505-02 z/OS Version 1 Release 2 as updated October 2001

The book contains information previously presented in SA22-7505-01, which supports z/OS Version 1 Release 1.

New Information

- Lists of new, changed, and deleted messages for z/OS V1R2.
- Lists of new, changed, and deleted messages for the TSO/E element of z/OS V1R1.

This book contains terminology, maintenance, and editorial changes. Technical changes or additions to the text and illustrations are indicated by a vertical line to the left of the change.

You may notice changes in the style and structure of some content in this book—for example, headings that use uppercase for the first letter of initial words only, and procedures that have a different look and format. The changes are ongoing improvements to the consistency and retrievability of information in our books.

Summary of Changes for SA22-7505-01 z/OS Version 1 Release 1 as updated June 2001
