ESTIMATED VALUES OF SHIPMENTS, INVENTORY OWNED, AND ORDERS
IN ALL MANUFACTURING INDUSTRIES

TREND SUMMARY

SHIPMENTS: Manufacturers' shipments in September of \$2,090.9 million were 0.3 percent above August shipments of \$2,084.3 million and 1.4 percent above September 1960 shipments of \$2,061.5 million. Shipments for the nine months of 1961 of \$17,651.5 million were 0.6 percent above the like 1960 total of \$17,538.5 million.

Although the shipments increase this month appears quite nominal and although the shipments data adjusted for seasonal variation show a decrease these points should not obscure the fact that shipments this month are still at a very high level. While the increase is not unexpected, some of the changes of the industry groups need comment. The decline of \$13 million in the foods and beverage industries is somewhat unusual and reflects chiefly the declines of the beverages industries from the high shipments values recorded last month. A decline of \$10 million in iron and steel products is quite unusual for this group in September; more usually an increase is shown averaging \$16 million. A decrease of \$8 million in paper products reflects more the very high value last month than any weakness this month and, indeed the September value is high, barely below the September 1960 value. The pulp and paper industry was chiefly responsible for the decline in this group and was also chiefly responsible for the decline in the economic use group of industries producing largely for export. Countering these declines was a \$39 million increase in the transportation group of the S.I.C. which reflects the substantial increases in the motor vehicle and related industries. While this increase is very large it compares with \$25 million in 1960, \$13 million in 1959 and \$33 million in 1958.

Shipments to date have shown a strong recovery from the weak first quarter which was three percent below the first quarter of 1960. The rising trend of shipments in the second and third quarters which continued through the current month has brought 1961 shipment nearly one percent above the like 1960 total. Generalizing from the seasonal patterns of previous years a shipments peak would be expected this month with shipments falling progressively lower for the remainder of the year. At present it appears that the recent ebullience in shipments will continue through the remaining months of the year.

INVENTORIES: Inventories owned by manufacturers at the end of September of \$4,240.2 million were up 0.1 percent from \$4,236.5 million in August and up 0.4 percent from \$4,224.4 million in September 1960. Inventories held at the end of September of \$4,442.5 million were up 0.1 percent from \$4,437.6 million in August and down 1.2 per cent from \$4,497.1 million in September 1960. Inventories held but not owned (progress payments) of 202.3 million at the end of September were 0.6 percent above \$201.1 million in August and 25.8 percent below \$272.7 million in September 1960.

Changes in the components from August to September were: raw materials down 0.5 percent, goods in process up 1.1 percent, finished products up 0.2 percent and goods in process less progress payments up 1.2 percent. Changes from September 1960 to September 1961 were mostly downwards: raw materials 0.5 percent, goods in process 3.6 percent, finished products 0.3 percent but goods in process less progress payments were up 3.6 percent.

The ratio of total inventory owned to shipments was 2.03 in September unchanged from August and 2.05 in September 1960. The ratio of finished products to shipments was 0.66 in September also unchanged from August and 0.67 in September 1960.

The recent liquidation of inventories seems conclusively ended. From the peak in March of \$4,308.4 million inventories owned moved downward \$117 million to a low of \$4,191 million in July. Accumulation started in August, a month earlier than was anticipated and hinged as it seemed then somewhat uncertainly on a large non-seasonal increase in the motor vehicles and related industries. Revised data for August show a substantial upward change from preliminary data in foods and beverages (\$14 million) and non ferrous metal products (\$17 million) as well as considerably smaller increases in other groups. Thus it appears the accumulation started more firmly in August than the preliminary data indicated.

The October issue of this publication will contain data which has been revised to incorporate the latest available benchmarks in accord with well established policy.

ORDERS: The level of unfilled orders at the end of September of \$1,946.4 million was down 1.3 percent from \$1,971.7 million at the end of August and down 1.1 percent from 1,967.8 million at the end of September 1960. New orders received in September of \$2,065.6 million was 0.8 percent below the \$2,081.5 million received in August and 2.3 percent above \$2,018.5 million received in September 1960. New orders received during 1961 to date of \$17,697.2 million are 1.8 percent ahead of the similar 1960 total of \$17,390.0 million. The increase this year in part reflects the increase in shipments but the backlog of unfilled orders while not showing positive signs of strengthening is showing greater stability in 1961 than during the run-off which occurred during 1960.

TRADING OUTLETS: Sales through manufacturers' trading outlets in September were estimated at a preliminary \$251.5 million up 2.5 percent from the revised \$245.2 million in August.

Inventories held at manufacturers' trading outlets at the end of September were estimated at a preliminary \$309.1 million up 1.6 percent from the revised \$304.4 million at the end of August.

(1) Includes Pig Iron, Steel Ingots and Castings, Rolled Iron and Steel Products and Ferro-Alloys. (2) The value of Inventory held but not owned in this industry is very small, and sample coverage is not adequate to provide separate data. Estimates of this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned as well.

INDUSTRIAL GROUPINGS

The industries shown in the Standard Industrial Classification Groups and the Economic Use Groups are listed below.

A single asterisk (*) preceding the individual industry title indicates that the industry is shown separately in Table 5 - Statistics for Selected Individual Industries.

A double asterisk (**) preceding the individual industry title indicates that the industry is shown in Table 5 combined with one or more other industries. The industries grouped are listed in footnotes to the table.

The bracketed letters following the individual industry titles indicate the statistical series - shipments, inventories and orders-in which the industry is included monthly: (s) means the industry is included in the shipments series; (i) in the inventory series; and (o) in the orders series. Industries for which monthly coverage is not indicated are included in the all-industry and group totals estimates as described in the December 1960 report, page 81.

CONCEPTS AND SOURCES

For further detail, and for description of methods used, see December, 1960 report, page 81.

CONCEPTS

Shipments - (Tables 1 to 5) - represent an estimated projection, on a monthly basis, of the latest available Census of Industry values.

New Orders - (Tables 2 to 5) - This series is designed to indicate the rate at which new business is being received. It is defined as all New Orders Received during the period, at estimated selling values. Thus it covers total new orders, net of cancellations, regardless of whether the orders will be filled from stock or as a result of activity during the same month (and, therefore, will also be reported as shipments in the month received) or whether they will be added to existing backlogs.

Unfilled Orders - (Tables 2 to 5) - are defined at estimated selling value, at the end of the period stated, of orders received but not yet shipped (or treated as a sale), irrespective of work done on them or of stocks from which they can be filled.

Total Inventory Owned - (Tables 2 to 5) - represents the estimated book value of inventory owned by manufacturers in connection with manufacturing operations, whether held at plant or not, at the end of the period stated. It is made up of: raw materials, goods in process, finished goods of own manufacture at plant and warehouse, less value of inventory held but not owned which cannot be assigned to specific components. Since the series relates to manufacturing inventory only, value of goods purchased for re-sale is not included.

Inventory Held but Not Owned - (Tables 2 to 5) - represents, as far as possible, the portion of manufacturers' total inventory holdings which are no longer owned by the reporting manufacturers because of payments made on long-term contracts as work on these progresses. This item is applicable only to the relatively few industries where long-term contracts are common although, because of the nature of the item, the value per industry is high.

Because of variations in accounting methods there are a few cases where it is not possible to obtain values for this type of inventory. The estimated value shown for this item must therefore be considered to some extent incomplete.

Total Inventory Held - (Tables 2 to 5) - represents the estimated total value of manufacturers' inventory holdings in connection with manufacturing operations, regardless of ownership; it differs from inventory owned by the inclusion of amounts held under progress payments arrangements.

Inventory Components - (Tables 2 to 5) - (Raw Materials, Goods in Process, and Finished Products) are reported and compiled as on the books of each manufacturer, i.e. there has been no attempt to define the components specifically for each industry.

The inventory components are always a breakdown of total inventory held, not of total inventory owned. In industries where these two items differ, due to the inclusion of inventory held but not owned (see above), it is not possible to obtain value of inventory owned by components since, where separate progress accounts are maintained, firms concerned can only state that, of total holdings, a certain amount is no longer owned by them. It is fairly obvious that the bulk of such payments apply to goods in process holdings but due to time lags in shipments and to prepayments some of the total value of inventory held but not owned would be applicable to finished products or raw materials.

Any comparisons of shipments/inventory ratios should be made using total inventory owned, not total inventory held, since the latter includes values which have already been written off to sales. If shipments inventory ratios are desired using inventory components, rather than total inventory, a reasonable approximation to total inventory owned by components would be obtained by assuming that all inventory held but not owned had been included with goods in process.

Trading Outlets - (Table 7) - are defined as any establishments (other than retail stores) operated by manufacturers, apart from their plants or plant-warehouses, which carry stocks and make sales direct to customers. Sales offices which merely arrange sales but do not carry stock, or which carry small quantities only for demonstration purposes, are not included. Sales for this series represent direct sales from the outlet of goods manufactured by the owning or associated manufacturing company, with sales arranged by outlets but shipped direct from plant excluded wherever possible; goods purchased for re-sale from sources other than the owning or associated manufacturing company are also excluded except for the Petroleum Products industry group where a separation of purchased products is not feasible. Inventories for this series represents owned inventories held at Trading Outlets or in warehouses serving the trading outlets; again, goods purchased for re-sale are excluded except for the Petroleum Products industry.

Industries and Groupings - All individual industries (Table 5) and the Standard Industrial Classification groupings of industries used in Tables 3, 6 and 7, are defined according to the Standard Industrial Classification Manual. A list of the industries included in the Standard Industrial Classification groups and in the Economic-Use groupings of industries (Tables 4, and 6) will be found on page 53 of the bulletin.

SOURCES

Monthly (or, in a few cases, quarterly) reports covering value of inventories and shipments are now submitted on a voluntary basis by 3,000 plants in 120 industries; in addition, 3,000 small plants in 100 of these industries report monthly shipments only. Of the first group, 1,025 plants in 83 industries also report new and unfilled orders. Four industries are included in the total shipments estimates by using data available from other Bureau series, and two of these are also included in the total inventory estimates.

FOOTNOTES TO TABLES

TABLE 1. - (1) Prince Edward Island and Nova Scotia combined for monthly estimates.

(2) Yukon and the Northwest Territories combined with British Columbia.

TABLE 2. - (1) Annual shipments values differ slightly from published Census of Industry totals due to inventory adjustments for certain industries where Census of Industry data represent production rather than shipments values.

(2) Part of the change in values from December 1958 to January 1959, is the result of the discontinuing of Trading Outlet operations for goods of own manufacture by some of the establishments reporting in the Electrical Apparatus Industries groups. The sales and inventories previously shown in Trading Outlets are now included in the relevant manufacturing industries and industrial groups.

TABLE 3. - (1) See footnote (1), table 2.

(2) The value of Unfilled Orders and therefore, of New Orders for industries in S.I.C. groups - 1, 2, 3, 7, 8, 12, 14, 15, 16 and 17 is small, and sample coverage is not adequate to provide separate estimates for them.

(3) See footnote (2), table 2.

(4) The value of inventory held but not owned in this group is very small, and sample coverage is not adequate to provide separate data. Estimates for this type of inventory are included with Total Inventory Held; for all practical purposes this can be considered the equivalent of Inventory Owned.

TABLE 4. - (1) See footnote (2), table 2.

(2) This grouping does not include the consumer portion of Motor Vehicles, nor of Heating and Cooking Apparatus; it does include the electronic equipment portion of Radios and Parts, (Telecommunication Equipment), and the office and store portion of Furniture. The bulk of Inventory Held but not Owned in this group is applicable to the electronic equipment portion of Radios and Parts.

(3) This grouping does not include trucks and buses.

(4) This group comprises only the 6 industries which cannot be fitted into any of the other groups because of the high proportion of total production exported. Shipments are not to be taken as total exports.

TABLE 7. - (1) Ratios for this group were calculated using values of Total Inventory Held instead of values of Total Inventory Owned. See footnote (4), table 3.

TABLE 8. - (1) Includes sales and inventories of purchased goods for the Petroleum Refining Industry.

(2) See footnote (2), table 2.

(3) This grouping includes industries from the Textile group, the Clothing group, the Transportation Equipment group, the Non-Ferrous Metal Products group, the Non-Metallic Mineral Products group, and the Miscellaneous Industries group. The Leather Products group and the Printing, Publishing and Allied Industries group are not included since no firms in these industries reported Trading Outlets. The Tobacco Products group is not included because Trading Outlet values cannot be separated from plant values.
