## Data in Many Forms ...

Statistics Canada disseminates data in a variety of forms. In addition to publications, both standard and special tabulations are offered on computer print-outs, microfiche and microfilm, and magnetic tapes. Maps and other geographic reference materials are available for some types of data. Direct access to aggregated information is possible through CANSIM, Statistics Canada's machine-readable data base and retrieval system.

## How to Obtain More Information

Inquiries about this publication and related statistics or services should be directed to:

Shipments, Inventories and Orders Section,  
Industry Division,

Statistics Canada, Ottawa, K1A 0T6 (Telephone: 951-9832)  
or to the Statistics Canada reference centre in:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)

## Des données sous plusieurs formes ...

Statistique Canada diffuse les données sous diverses formes. Outre les publications, des totalisations habituelles et spéciales sont offertes sur imprimés d'ordinateur, sur microfiches et microfilms et sur bandes magnétiques. Des cartes et d'autres documents de référence géographique sont disponibles pour certaines sortes de données. L'accès direct à des données agrégées est possible par le truchement de CANSIM, la base de données ordiolingue et le système d'extraction de Statistique Canada.

## Comment obtenir d'autres renseignements

Toutes demandes de renseignements au sujet de cette publication ou de statistiques et services connexes doivent être adressées à:

Section des livraisons, des stocks et des commandes,  
Division des industries,

Statistique Canada, Ottawa, K1A 0T6 (téléphone: 951-9832) ou au centre de consultation de Statistique Canada à:

St. John's	(772-4073)	Winnipeg	(983-4020)
Halifax	(426-5331)	Regina	(780-5405)

## Symbols

The following standard symbols are used in Statistics Canada publications:

- .. figures not available.
- ... figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- p preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

## NOTICE TO USERS

Estimates in this publication are subject to revision to accommodate newly-received information. It is advisable always to use data from the most recent issue.

This publication was prepared under the direction of:

- **Basil McCormick**, Assistant Director, Industry Division
- **Henry Glouchkow**, Chief, Inventories Shipments and Orders in Manufacturing Industries

## Signes conventionnels

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- .. nombres indisponibles.
- ... n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- p nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

## AVIS AUX UTILISATEURS

Prière de toujours consulter les numéros de la plus récente publication puisque les estimations qu'elle renferme sont sujettes à révision pour tenir compte des nouveaux renseignements reçus.

Cette publication a été rédigée sous la direction de:

- **Basil McCormick**, Directeur adjoint, Division de l'industrie
- **Henry Glouchkow**, Chef, Stocks, livraisons et commandes des industries manufacturières

## January 1988

Canadian manufacturing shipments and inventories continued to hit new highs in January. New orders remained at the same level as in December, and the ratio of inventories to shipments declined to a new low.

Since shipments continued to outpace the growth in inventories, the inventory to shipments ratio dropped to a new low. Shipments have increased an average of 1% a month for the last ten months, while inventories have increased at half this rate over the same period. Unfilled orders declined in January, and new orders remained at the same level as in December.

The increase in January shipments was mainly the result of a rebound in transportation equipment industry shipments and an increase for fabricated metal products industries. These increases were partially offset by declines for chemical and chemical products industries and primary metal industries.

### HIGHLIGHTS

#### Seasonally Adjusted

- Preliminary estimates indicate that the value of **shipments** increased 1.5% in January to a level of \$23.5 billion. The January increase was the tenth consecutive increase since March 1987 and pushed monthly shipments to a new high. Most increases were concentrated in the durable goods industries, up 4.9% to \$11.9 billion. The largest gains occurred in the transportation equipment industry (+ \$465 million) and fabricated metal products industries (+ \$122 million). Shipments of non-durable goods industries were down 1.8% to \$11.6 billion.
- **Inventories** increased 0.3% to \$34.9 billion in January. Consecutive increases in the last seven months have continued to push inventories to record levels. Total inventories held were up 0.1% to \$36.4 billion for the month of January. A decrease of 0.8% in goods in process was partly offset by increases of 0.6% in finished products and 0.1% in raw materials.
- The **inventory to shipments ratio** fell to a new low of 1.49:1 in January. This ratio has declined despite an increasing trend for inventories because of an even stronger upward trend for shipments. The ratio of finished goods inventory to shipments remained at 0.52:1.
- **New orders** at \$23.3 billion remained at the same level as in December. New orders have increased at an average of about 1% a month from March 1987 to January 1988. In the durable goods industries, new orders with an estimated value of \$11.9 billion were 3.6% higher than the December value. In the non-durable goods industries, new orders were valued at \$11.5 billion, down 3.4%.

## Janvier 1988

Les livraisons manufacturières canadiennes ainsi que les stocks ont atteint de nouveaux sommets en janvier. Les nouvelles commandes sont demeurées au même niveau qu'en décembre; et le rapport des stocks aux livraisons a diminué à un niveau record.

Comme la croissance des livraisons a continué de devancer celle des stocks, le rapport des stocks aux livraisons a diminué à un niveau record. Les livraisons ont augmenté en moyenne de un pour cent par mois au cours des 10 derniers mois, tandis que le taux pour les stocks se situait à mi-chemin de celui des livraisons pour la même période. Les commandes en carnet ont diminué en janvier et les nouvelles commandes sont demeurées au même niveau qu'en décembre.

L'augmentation dans les livraisons en janvier est principalement le résultat d'un rebondissement dans les industries du matériel de transport et d'une augmentation dans les industries de la fabrication des produits métalliques. Ces augmentations ont été partiellement contrebalancées par des déclinés des industries des produits chimiques et celles de première transformation des métaux.

### FAITS SAILLANTS

#### Après désaisonnalisation

- Les estimations préliminaires indiquent que la valeur des **livraisons** a augmenté de 1.5% en janvier pour atteindre un niveau de \$23.5 milliards. L'augmentation de janvier était la dixième hausse consécutive depuis mars 1987 et a amené les livraisons mensuelles à un niveau record. Les augmentations étaient concentrées dans les industries des biens durables, en hausse de 4.9% à \$11.9 milliards. Les gains les plus élevés prenant place dans les industries du matériel de transport (+ \$465 millions) et les industries de la fabrication des produits métalliques (+ \$122 millions). Les livraisons dans les industries des biens non durables ont diminué de 1.8% à \$11.6 milliards.
- Les **stocks** ont augmenté de 0.3% pour s'inscrire à \$34.9 milliards en janvier. Des gains consécutifs au cours des sept derniers mois ont contribué à amener les stocks à des niveaux records. Les stocks détenus ont augmenté de 0.1% à \$36.4 milliards. Une baisse a été enregistrée au chapitre des produits en cours de transformation (- 0.8%) mais des augmentations au chapitre des produits finis (+ 0.6%) et des matières premières (+ 0.1%) ont été également enregistrées.
- En janvier, le **rapport des stocks aux livraisons** est descendu à son niveau le plus bas, atteignant 1.49:1. Ce rapport a diminué malgré une tendance à la hausse des stocks; étant donné que les livraisons ont connu une tendance supérieure à celle des stocks. Le rapport des stocks des produits finis aux livraisons est demeuré à 0.52:1.
- Les **nouvelles commandes**, à \$23.3 milliards, sont demeurées au même niveau qu'en décembre. Les nouvelles commandes ont augmenté en moyenne de un pour cent par mois entre mars 1987 et janvier 1988. Dans les industries des biens durables, la valeur estimative des nouvelles commandes était supérieure de 3.6% à la valeur de décembre et s'établissait à \$11.9 milliards. Les nouvelles commandes de biens non durables ont atteint \$11.5 milliards, soit une baisse de 3.4%.

- The **unfilled orders backlog** decreased 0.5% to \$24.9 billion in January. Unfilled orders had increased an average of 0.6% a month from April to December 1987, despite a decline in October. In the durable goods industries, unfilled orders were down 0.1% to \$22.1 billion while non-durable goods industries showed a decrease of 3.5% to \$2.8 billion.

### Unadjusted

- Manufacturers' shipments in January 1988 were estimated at \$21.3 billion, 8.7% higher than the January 1987 level.

**Note:** Unless otherwise specified, inventories referred to in the text above are inventories owned, which exclude inventory for which manufacturers have received payment, but which they are still holding e.g., shipbuilding. At the all industry level, inventory owned accounts for the largest part of inventory held.

- Les **commandes en carnet** ont diminué de 0.5% à \$24.9 milliards en janvier. Les commandes en carnet ont augmenté en moyenne de 0.6% par mois d'avril à décembre 1987, malgré un déclin en octobre. Les commandes en carnet des biens durables ont diminué de 0.1% à \$22.1 milliards, alors que celles des biens non durables ont chuté de 3.5% à \$2.8 milliards.

### Avant désaisonnalisation

- On a estimé à \$21.3 milliards les livraisons des manufacturiers en janvier 1988, ce qui représente une augmentation de 8.7% par rapport au niveau de janvier 1987.

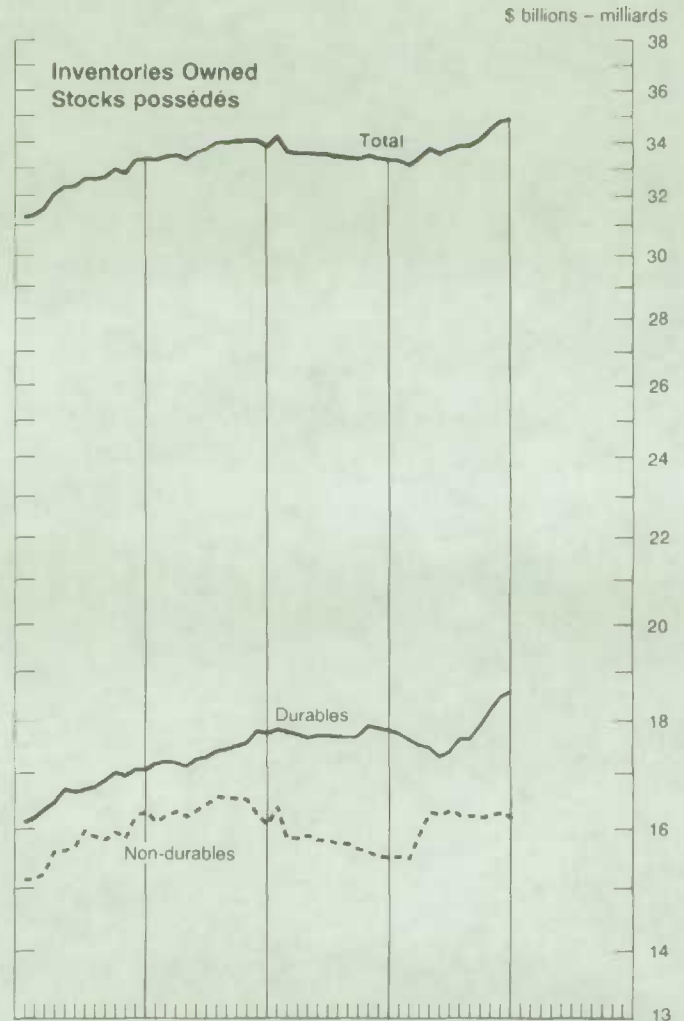

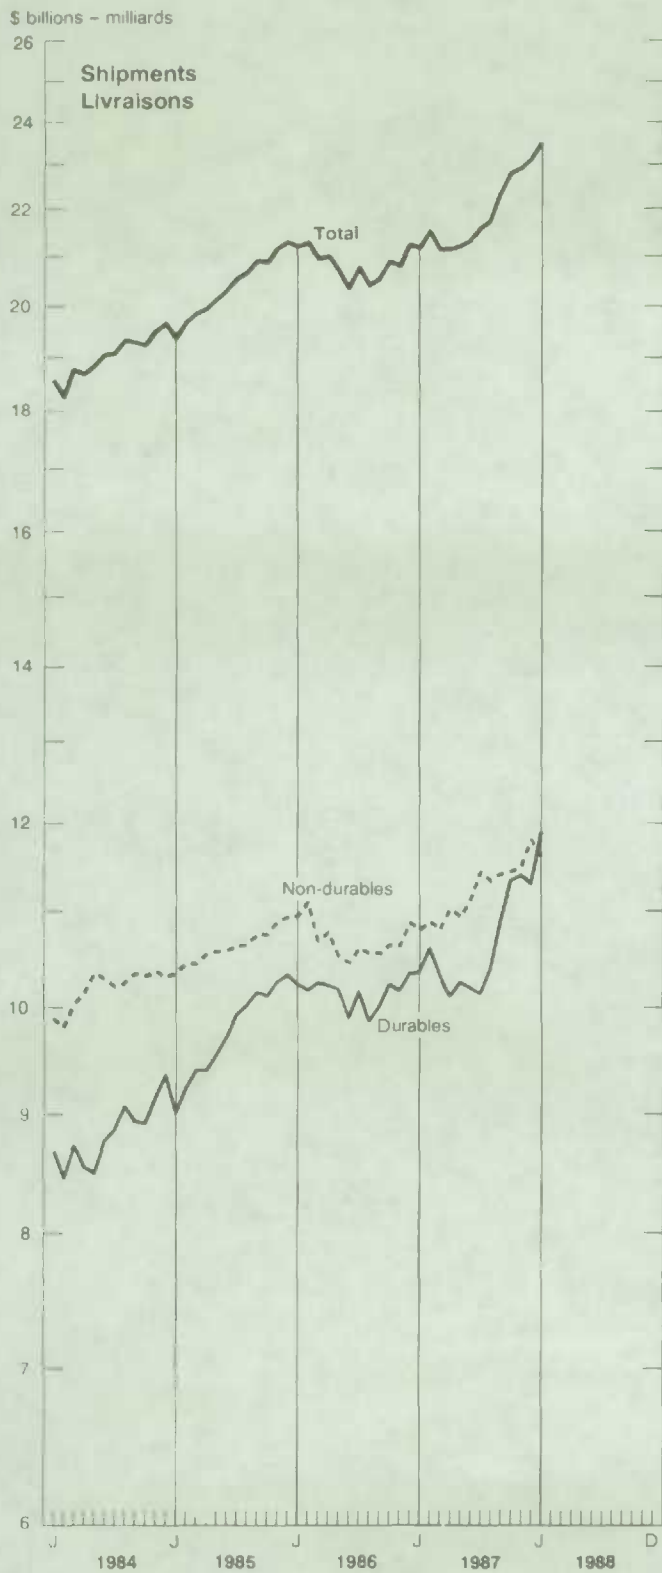

**Note:** Si non spécifié, les stocks font référence dans le texte ci-haut aux stocks possédés, ceux-ci excluent les stocks pour lesquels les manufacturiers ont reçu des paiements, mais incluent ceux qui sont encore détenus par les manufacturiers, comme par exemple, la construction navale. Pour l'ensemble des industries, les stocks possédés comptent pour la majeure partie des stocks détenus.

See footnote(s) at end of statistical tables. - Voir note(s) à la fin des tableaux statistiques.

## FOOTNOTES

### Tables 1 and 5

- (1) Although separate series for the Yukon and the Northwest Territories are not published, their values are included in the Canada total.
- (2) The value for total shipments contains four industries where "production" is used instead of shipments. Please see concepts and methods, 4th paragraph for more details.

### Tables 2 to 4

- (1) Series which contain no significant seasonality include: raw materials in the rubber products industries, primary textiles industries and refined petroleum and coal products industries; and also goods in process for tobacco products industries. Therefore, these series are repeated without adjustment in the tables of seasonally adjusted estimates and aggregates of which they are components. Small differences in the unadjusted values, when repeated, may result from rounding techniques.

### Table 6

- (1) For this industry, "production" is used instead of shipments. For explanation, please see concepts and methods, 4th paragraph.
- (2) The data for industry 3711, Industrial Inorganic Chemical Industries n.e.c., no longer includes the data for industry 3721, Chemical Fertilizer and Fertilizer Materials Industries.

**Note:** Figures may not add due to rounding.

## NOTES

### Tableaux 1 et 5

- (1) Même si les séries pour le Yukon et les Territoires du Nord-Ouest ne sont pas publiées elles sont cependant incluses dans le total pour le Canada.
- (2) La valeur des livraisons totales contient quatre industries où la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 4<sup>ème</sup> paragraphe des concepts et méthodes.

### Tableaux 2 à 4

- (1) Les séries qui sont peu sensibles aux variations saisonnières incluent: les matières premières dans les industries des produits de caoutchouc, des textiles de première transformation et des produits raffinés du pétrole et du charbon; et également les produits en cours dans les industries du tabac. Le tableau de la série désaisonnalisée répète donc les valeurs non corrigées. Les différences minimales entre les séries sont attribuables à la technique d'arrondissement utilisée.

### Tableau 6

- (1) Pour cette industrie, la "production" est utilisée au lieu des livraisons. Pour plus de détails, voir le 4<sup>ème</sup> paragraphe des concepts et méthodes.
- (2) Les données pour l'industrie 3711, industries des produits chimiques inorganiques d'usage industriel, n.c.a., ne comprennent plus les données de l'industrie 3721, industries des engrais chimiques et de matières pour engrais.

**Nota:** Les chiffres ne totaliseront peut-être pas en raison de l'arrondissement.

## CONCEPTS AND METHODS

### Estimation Method

Inventories, shipments and orders values in this publication constitute monthly projections of annual census of manufactures values based on returns from a stratified, systematic sample of manufacturing establishments. The data in the January 1985 publication are the first to be published under the 1980 Standard Industrial Classification (SIC). The data in this publication are benchmarked to the 1983 Census. Values for years prior to 1983 have been previously benchmarked to the corresponding census data and the aggregate of monthly shipments in those years should correspond with published census values. Because the monthly estimates subsequent to 1983 are projections, these totals are subject to adjustment when more recent census data become available. Inventory estimates for December published here, differ from year-end census values to the extent that census totals include individual establishment reports for fiscal years that may end on dates other than December 31. Unfilled orders are published for industries where maintenance of a continuing record of the value of an establishment's backlog of orders is a normal part of the accounting procedure.

The population of manufacturing establishments is divided into groups of large, medium and small establishments according to the value of shipments reported for the census year. Monthly values are sought for all large establishments and a sample is chosen separately for each of the other two size groups. Sample unit values are weighted according to the inverse of their probability of selection. This sample is revised annually in accordance with the census base. To facilitate timely response from company accounting departments, combined reports are accepted from companies with more than one establishment. Estimates of current values are accepted from establishments where the inventory and unfilled orders levels are not measured at the end of each accounting period. There are about 12,500 establishments in the reporting panel.

### Inventories

Isolation of component values of inventory by level of fabrication in each industry, where possible, is important for economic studies as well as for derivation of production values. To facilitate this, respondents are asked to report their book values of raw materials, goods in process, finished products and progress payments separately. The inventory levels are calculated on a Canada-wide basis, not by province.

Both inventory held and inventory owned are published. The difference between inventory held and inventory owned is the value of progress payments received by manufacturers for partially completed items such as aircraft, railroad rolling stocks, ships and structures using fabricated steel. As work proceeds on such items, total inventory values increase until the time of delivery. By deducting the balance of progress payments on manufacturers' books from total inventory, the value of manufacturers' investment in inventory is derived.

## CONCEPTS ET METHODES

### Méthode d'estimation

Les chiffres sur les stocks, les livraisons et les commandes qui figurent dans cette publication sont des projections mensuelles des résultats du recensement annuel des manufactures établies à partir des déclarations d'un échantillon stratifié et systématique d'établissements manufacturiers. Les données que contient la publication de janvier 1985 sont les premières qui soient publiées sous la Classification Type des Industries (C.T.I.) de 1980. Les données que contient la publication sont ajustées en fonction du recensement de 1983. Les chiffres pour les années jusqu'à 1983 inclusivement ont été raccordés aux recensements en cause et la somme des livraisons mensuelles de ces années doit être égale aux résultats de recensements qui ont été publiés. Comme les estimations mensuelles postérieures à 1983 sont des projections, elles pourront être rectifiées lorsqu'on disposera des données de recensement plus récentes. Les estimations sur les stocks publiées dans ce bulletin sont celles de décembre, elles diffèrent donc des chiffres du recensement se rapportant à la fin de l'année dans la mesure où les totaux du recensement comprennent les déclarations de certains établissements pour des années financières qui peuvent prendre fin à d'autres dates qu'au 31 décembre. Les commandes en carnet sont publiées pour les industries où la comptabilité normale prévoit de consigner la valeur des commandes en souffrance des établissements d'une manière suivie.

La population des établissements manufacturiers se divise en trois groupes d'établissements (grands, moyens et petits) suivant la valeur des livraisons déclarées pour l'année de recensement. On demande des déclarations mensuelles à tous les grands établissements et on tire un échantillon séparé pour chacun des deux autres groupes. Les valeurs de l'échantillon sont pondérées en relation inverse de la probabilité qu'elles soient choisies. Cet échantillon est révisé annuellement suivant les résultats du recensement. Dans le but d'aider les services de comptabilité des sociétés à envoyer leurs déclarations à temps, Statistique Canada accepte une déclaration globale pour les sociétés ayant plus d'un établissement et une estimation des chiffres courants pour les établissements dont les stocks et les commandes en carnet ne sont pas recensés à la fin de chaque exercice comptable. On compte environ 12,500 établissements dans l'échantillon.

### Les stocks

Il est important d'isoler les chiffres des éléments des stocks selon le stage de fabrication dans chaque industrie, lorsque c'est possible, afin de faire des études économiques et des extrapolations des chiffres de production. A cet effet, on demande aux enquêtés de déclarer séparément la valeur comptable de leurs matières premières, de leurs produits en cours, de leurs produits finis et de leurs acomptes à valoir. Les niveaux des stocks sont calculés pour l'ensemble du Canada et non au niveau provincial.

On publie la valeur des stocks détenus et des stocks possédés. La différence entre les deux donne la valeur des acomptes versés par les fabricants sur des produits dont la fabrication n'est qu'en partie achevée comme les avions, le matériel ferroviaire roulant, les bateaux et des constructions qui utilisent des produits semi-finis en acier. A mesure que la fabrication de ces produits avance, la valeur globale des stocks augmente jusqu'au moment de la livraison. En déduisant le solde des acomptes comptabilisés par les fabricants de l'ensemble des stocks, on obtient la somme investie dans les stocks par les fabricants.

In order to reduce the distortion in the shipments of the four above mentioned industries that would be caused when responding companies finally treat such items of relatively high value as completed sales, a "production" value is used instead of shipments. This production value is derived from adjusting monthly shipments by the monthly change in inventories held (Goods in process held + Finished products). The raw materials are not included in the calculation since production tries to measure "work done" during the month.

### Orders

Most establishments that maintain order books strike a value of unfilled orders at the end of each accounting period. The survey seeks this value which is defined as orders received but not shipped or treated as a sale whether or not work has been done on them or they can be filled from existing stocks. No estimate of this value is made for those industries where orders are customarily filled from stocks on hand and order books are, accordingly, not generally maintained.

New orders, a series of considerable economic interest, is a residual value derived from shipments and unfilled orders. All shipments within any month result from an order received either during that month or at some earlier time. New orders are calculated as the sum of total shipments within any month plus the change in the total of unfilled orders from the end of the previous month to the end of the month under review.

### Imputation

Values must be imputed for those establishments that have not reported in time for compilation of monthly estimates. This is largely done by mechanical methods which take into account the activity of similar establishments from which reports have been received. In conjunction with preliminary estimates for the current month, the estimates for the preceding month are revised to account for any late returns. When respondents report values for periods earlier than those of the revised current estimates, the responses are used to correct the trends when the series are updated to new census benchmarks.

### Revisions

Definitions, classifications and groupings are based on those used by the census of manufactures.

The January 1973 issue of this publication contains a more detailed description of the concepts and survey methods for these series.

### Historical Series

Major series published in this issue are stored in CANSIM, the computerized time series data bank of Statis-

Afin de réduire la distorsion qui surviendrait dans les quatre industries en cause au moment où les sociétés observées considèrent en fin de compte des produits d'une valeur relativement grande comme des ventes achevées, une valeur de "production" est utilisée au lieu des livraisons. Pour arriver à cette valeur de production, il s'agit d'ajuster la valeur mensuelle des livraisons par le changement mensuel dans les inventaires détenus (Produits en cours détenus + Produits finis). Les matières premières ne sont pas incluses dans ce calcul car nous essayons de calculer le "travail fait" durant le mois.

### Les commandes

La plupart des établissements qui tiennent des carnets de commandes établissent la valeur des commandes en carnet à la fin de chaque exercice comptable. Lors de l'enquête, nous demandons cette valeur, qui est considérée comme commandes reçues mais non encore expédiées, que des travaux aient été effectués ou non à leur égard, lorsque la commande peut être honorée à partir des stocks existants. Cette valeur n'est pas estimée dans le cas des entreprises qui exécutent habituellement les commandes des réceptions, à partir de leurs stocks et qui, par conséquent, ne tiennent pas de carnet de commande.

Les séries sur les nouvelles commandes, qui présentent beaucoup d'intérêt du point de vue économique, donnent la valeur résiduelle établie à partir des livraisons et des commandes en carnet. Toutes les livraisons effectuées au cours d'un mois donné résultent d'une commande reçue, soit pendant ce mois, soit avant. Les nouvelles commandes sont calculées à partir du total des livraisons au cours d'un mois donné plus la différence entre le total des commandes en carnet à la fin du mois précédent et le total des commandes en carnet à la fin du mois observé.

### Imputation

L'imputation des données se fait surtout par des moyens mécaniques qui tiennent compte de l'activité d'établissements semblables qui ont fait parvenir des déclarations. Conformément aux estimations préliminaires pour le mois courant, on révisé les estimations pour le mois précédent afin de prendre en compte toutes données déclarées en retard. Lorsque les répondants déclarent les chiffres correspondants aux périodes antérieures à celle des estimations révisées actuelles, les réponses servent à corriger les tendances lorsque les séries sont mises à jour d'après les nouvelles données repères du recensement.

### Révisions

Les définitions, les classifications et les groupes sont basés sur ceux du recensement des manufactures.

Le numéro de janvier 1973 de cette publication contient une description plus détaillée des concepts et des méthodes d'enquête de cette série.

### Séries chronologiques

Les séries importantes publiées dans cette livraison sont emmagasinées dans le CANSIM, banque électronique de données sur les

tics Canada. All or any part of these series may be purchased on magnetic tape or as computer print-outs. For further information direct inquiries to:

CANSIM,  
Application Consulting Section,  
Statistics Canada,  
Ottawa, Ontario, K1A 0Z8

### Seasonal Adjustment

The seasonal adjustment method applied to the series consists of the ratio-to-moving average method in use at Statistics Canada. The X-11 - ARIMA program is used for seasonal adjustment.

Some series containing no significant seasonality or very high irregularity have not been seasonally adjusted. In these cases, unadjusted values are repeated in the tables of seasonally adjusted data. See footnotes for series affected.

### Months for Cyclical Dominance

The MCD or months for cyclical dominance values located at the right of the Cansim databank reference number (e.g. D 315674) for seasonally adjusted series, indicate the smallest span of months for which the average change in the cyclical factor is greater than that for the irregular factor. For the smoothest series the MCD is one; for the most erratic series, it is twelve. Application of a moving average of the period of the MCD will tend to smooth irregular movements that may obscure the underlying trend-cycle.

### The Economic Use Classification (EUC)

The concept of the Economic Use Classification (EUC) consists of combining activities of individual industries at the finest level of aggregation identified by the Standard Industrial Classification (SIC) and bring together, in a general sense, industries whose outputs are directed towards the different types of markets served by industry or, in other words, groups that reflect demand on manufacturing industries by elements of the gross national expenditure.

The present EUC consists of six mutually exclusive groups and a supplementary automotive group. Although the output of an industry may serve a market that spans more than one classification, no attempt is made to subdivide that industry's output into finer detail than that identified by the SIC. Thus the distribution of specific industries to economic uses is determined by the perceived market for the greatest share of the industry's output.

séries chronologiques de Statistique Canada. On peut acheter toutes ces séries ou une partie d'entre elles sur bandes magnétiques ou sous forme d'états mécanographiques. Pour tout renseignement complémentaire, s'adresser au:

CANSIM,  
Section de consultants aux applications,  
Statistique Canada,  
Ottawa (Ontario) K1A 0Z8

### Désaisonnalisation

On désaisonnalise les séries en calculant le rapport à la moyenne mobile, suivant les méthodes utilisées à Statistique Canada. Il s'agit en l'occurrence du programme normalisé qui sert à appliquer le version X-11 - ARMMI.

Pour quelques séries particulières, il n'y a pas de saisonnalité d'importance, ou il y a trop d'irrégularité. Ces séries n'ont pas été désaisonnalisées. Pour ces cas, les valeurs, sans désaisonnalisation ont été répétées dans les tableaux des séries désaisonnalisées. Voir les notes pour les séries affectées.

### Mois de dominance cyclique

Les valeurs de M.D.C. (mois de dominance cyclique) sont situées à la droite du numéro de référence de la Banque de données de "Cansim" (ex: D 315674) pour les séries désaisonnalisées et indiquent le plus petit nombre de mois pour lequel la variation moyenne du facteur cyclique est plus grande que celle du facteur d'irrégularité. Le M.D.C. est de un pour les séries les plus régulières et de douze pour les plus fluctuantes. L'application d'une moyenne mobile de la période des M.D.C. aidera à lisser les mouvements irréguliers qui pourraient masquer la tendance cyclique implicite.

### Classification des groupes selon l'utilisation économique (CGUE)

Le concept de la classification des groupes selon l'utilisation économique (CGUE) est de combiner les activités des industries à leur plus bas niveau d'aggrégation identifié par la classification type des industries (C.T.I.) et de rassembler les industries d'après le marché desservi ou encore, en groupe d'après la demande sur les industries manufacturières par les éléments de la dépense nationale brute.

La CGUE comprend six groupes mutuellement exclusifs et une classification complémentaire des industries connexes de l'automobile. Bien que la production d'une industrie peut servir plus d'un marché, aucun effort est fait pour subdiviser la production de cette industrie dans plus de détail que fournit par la C.T.I. Donc, la distribution d'industries spécifiques à un groupe économique se fait entièrement vers le marché qui est perçu comme étant le plus important pour l'industrie en question.

# INVEST \$ IN STATISSEZ

in the most comprehensive source of corporate financial data available.

**B**ased on tax information from over 500,000 Canadian Corporations **Corporation Financial Statistics** provides tables of detailed balance sheets, income statements and retained earnings for 182 industry groups.

**An essential tool which will help you:**

- identify industry sectors with the best rates of return
- compare the financial position of competing industries
- monitor and research the Canadian economy and business world.

**Corporation Financial Statistics #61-207**, bilingual; \$50 in Canada, \$51.50 other countries.

dans une des sources d'information les plus détaillées sur les finances des sociétés.

**B**asé sur l'information fiscale de plus de 500,000 entreprises canadiennes, **Statistiques financières des sociétés** offre des tableaux explicatifs sur les bilans, les déclarations de revenus et les bénéfices non répartis de quelque 182 groupes industriels.

**C'est un outil essentiel qui vous aidera à:**

- identifier le secteur industriel ayant les meilleurs taux de revenus
- comparer la situation financière des industries en concurrence
- scruter l'économie canadienne et le monde des affaires.

**Statistiques financières des sociétés 61-207**, bilingue; \$50 au Canada, \$51.50 dans les autres pays.

## A JOURNEY OF 1000 MILES BEGINS WITH A SINGLE STEP

The *Canada Year Book* recorded Canada's first steps in 1867. It's still the only book that gives you the most complete, up-to-date facts on every aspect of Canada's growth as a nation.

Physical setting \* Demography \* Health \* Education \* Employment and incomes \* Social security \* Housing and construction \* Forests, fish and furs \* Agriculture \* Mines and minerals \* Energy \* Science and technology \* Transportation \* Communications \* Cultural activities and leisure \* Manufacturing \* Merchandising and services \* Banking, finance and insurance \* Judicial System \* External relations, trade and defence \* Government \* Government finance \* Review of the economy

Sold in Bookstores and also available by calling Statistics Canada toll-free at 1-800-267-0677 or by completing the order coupon included in this publication.

\$49.95 plus shipping and handling (\$54 inclusive in Canada, \$70 other countries); Catalogue number 93-021.

Information can also be obtained by contacting your Regional Reference Centre.

## TOUT LE PAYS, D'UNE COUVERTURE À L'AUTRE

Déjà au siècle dernier, les premiers pas de la nation étaient consignés dans l'*Annuaire du Canada*. Aujourd'hui, l'*Annuaire du Canada* témoigne toujours avec précision et exhaustivité des multiples facettes de l'évolution du pays.

Physiographie \* Démographie \* Santé \* Éducation \* Emploi et revenu \* Sécurité sociale \* Logement et construction \* Pêches et fourrures \* Agriculture \* Mines et minéraux \* Énergie \* Sciences et technologie \* Transports \* Communications \* Activités culturelles et loisirs \* Industries manufacturières \* Commerce et services \* Banques, finances et assurances \* Gouvernement \* Système judiciaire \* Relations extérieures, commerce et défense \* Finances publiques \* Revue de l'économie

Disponible en librairie, en téléphonant à Statistique Canada au numéro sans frais 1-800-267-0677 ou en remplissant le bon de commande qui figure dans la présente publication.

\$49.95 frais de port et de manutention en sus (\$54 au Canada, \$70 à l'étranger); numéro 93-021 au répertoire.

# Every week

**The numbers that make decisions**

**The data that highlight national economic trends**

*Infomat* is a digest of the most important statistics of the week. It is invaluable for business planners, policy makers and members of the media who take an interest in the Canadian economy.

Articles cite the most recent economic and social data available, describe current trends and point out significant changes. Regular features include a complete list of publications released by Statistics Canada during the reference week, a table of key economic indicators and a list of upcoming data releases. The text is concise, easy-to-read and complemented by tables and charts.

*Infomat*, Catalogue No. 11-002E (weekly), is available for \$2.00 per copy/\$100.00 annually (in Canada); \$3.00 per copy/\$150.00 annually (elsewhere).

# Toutes les semaines

**Les chiffres qui font les décisions**

**Les données illustrant les tendances de l'économie canadienne**

*Infomat* est un résumé des statistiques les plus importantes de la semaine. C'est un outil d'une valeur inestimable pour les planificateurs du monde des affaires, les responsables de l'élaboration des politiques et les médias d'information s'intéressant à l'économie canadienne.

Les articles contenus dans ce bulletin citent les plus récentes données économiques et sociales disponibles, décrivent les tendances actuelles et soulignent les changements les plus significatifs. On y retrouve des chroniques régulières, notamment une liste complète des nouvelles publications parues à Statistique Canada au cours de la semaine de référence, un tableau des principaux indicateurs économiques, ainsi qu'une liste des données à paraître. Le texte est concis, facile à lire et illustré de tableaux et de graphiques.

*Infomat*, n° 11-002F au catalogue (hebdomadaire), se vend \$2.00 l'exemplaire ou \$100.00 pour un abonnement annuel au Canada; \$3.00 l'exemplaire ou \$150.00 pour un abonnement annuel à l'étranger.

To order, complete the order form included or write to Publication Sales, Statistics Canada, Ottawa, Ontario, K1A 0T6. For faster service, using Visa or MasterCard, call toll-free.

Please make cheques or money orders payable to the Receiver General for Canada/Publications.
