SYMBOLS

The following standard symbols are used in Statistics Canada publications:

- . . figures not available.
- . . . figures not appropriate or not applicable.
- nil or zero.
- amount too small to be expressed.
- P preliminary figures.
- r revised figures.
- x confidential to meet secrecy requirements of the Statistics Act.

SIGNES CONVENTIONNELS

Les signes conventionnels suivants sont employés uniformément dans les publications de Statistique Canada:

- . . nombres indisponibles.
- . . . n'ayant pas lieu de figurer.
- néant ou zéro.
- nombres infimes.
- P nombres provisoires.
- r nombres rectifiés.
- x confidentiel en vertu des dispositions de la Loi sur la statistique relatives au secret.

INTRODUCTION

In 1972 Statistics Canada released a report, *Household Facilities by Income and Other Characteristics, 1968*, Catalogue 13-540 that related the 1968 household facilities and equipment data to the level of household income received in the preceding year (1967). This was the first attempt at producing statistics of this nature from sources other than the decennial censuses. The current report presents more recent data, based on surveys conducted in the spring of 1972.¹ In this report, facilities and equipment of Canadian homes observed in May 1972 are related to incomes reported by respective households for the year 1971. Estimates which represent virtually all private households in Canada,² are based on observations collected from a sample of approximately 18,700 households.

Substantial changes have been made in the content of the report. The most significant change involves the inclusion of data on rents, dwelling values and mortgages in relation to income. Details on refrigerators, radios and source of water supply have been excluded from tabulations, and categories used in the item "Number of persons per room" have been modified to conform to 1971 Census categories. A special table containing the information on these items is available on request. Income size groups have also been modified.

A large number of tables in the 1968 report, providing distributions by various socio-economic characteristics of households or their heads, have been dropped and the majority of the retained tabulations give distributions *within* rather than *by* income size groups. This change was made in the belief that such method of presentation would enhance analytical usefulness of the data.

The tabulations in this report have been arranged in four sections. Section I consists of eight tables which cover all households. Section II, Tables 1 to 7, provides details on households consisting of only one economic family of two or more persons. Section III, Tables 1 to 7, contains miscellaneous tables which include, *inter alia*, one person households or those containing more than one family unit. Tables 1 to 7 of Section IV are limited in coverage to non-farm dwellings only. They provide data pertaining to mortgages and rent payments.

¹ For a detailed discussion of the methodology adopted see Sources and Methods, page 161.

² See Coverage, page 161.

En 1972, Statistique Canada publiait le bulletin *Household Facilities by Income and Other Characteristics, 1968*, n° 13-540 au catalogue qui établissait un rapport entre le revenu des ménages en 1967 et leur équipement ménager en 1968. C'était la première fois qu'on tentait de produire des statistiques de cette nature d'après des sources autres que les recensements décennaux. La présente publication renferme des données plus récentes provenant d'enquêtes qui ont été réalisées au printemps de 1972¹. Dans ce document, on compare l'équipement ménager des ménages canadiens qui ont été visés par l'enquête de mai 1972 avec le revenu qu'ils ont déclaré pour 1971. Les estimations qui représentent pratiquement tous les ménages privés au Canada² sont fondées sur des observations provenant d'un échantillon de quelque 18,700 ménages.

Des modifications considérables ont été apportées au contenu de la publication. La plus importante a été d'incorporer des données sur le loyer, la valeur du logement et les hypothèques en fonction du revenu. Les données sur les réfrigérateurs, les radios et l'alimentation en eau n'ont pas été comprises dans les totalisations, et les catégories utilisées au poste "Nombre de personnes par pièce" ont été modifiées pour correspondre à celles du recensement de 1971. Un tableau spécial renfermant les données sur ces postes est disponible sur demande. Les tranches de revenu ont également été modifiées.

Un grand nombre de tableaux de la publication de 1968 qui présentaient des répartitions selon diverses caractéristiques socio-économiques des ménages ou de leur chef ont été supprimés et la majorité des tableaux qu'on a conservés donnent des répartitions *dans* une tranche de revenu plutôt que *par* tranche de revenu. Ce changement a été fait dans l'espoir qu'une telle méthode de présentation favoriserait l'analyse des données.

Les totalisations dans la présente publication ont été groupées en quatre sections. La Section I se compose de huit tableaux qui portent sur tous les ménages. La Section II (tableaux 1 à 7) donne des détails sur les ménages constitués d'une seule famille économique de deux ou plusieurs personnes. La Section III (tableaux 1 à 7) renferme divers tableaux qui portent entre autres sur les ménages d'une personne et les ménages multiples. Les tableaux 1 à 7 de la Section IV ne s'appliquent qu'aux ménages non agricoles. Ils renferment des données relatives aux hypothèques et aux loyers.

¹ Pour un exposé détaillé de la méthodologie utilisée, voir Sources et méthodes, page 161.

² Voir page 161, Champ de l'enquête.

Each of the tables in Sections I and II and Tables 2 and 6 of Section IV have been divided into two parts, A and B. The two parts of a table cover the same universe but household and dwelling characteristics e.g., number of persons in the household or number of rooms in the dwelling, etc., are included in Part A while data on household facilities and equipment e.g., washing machines, automobiles, etc., are included in Part B. Uniform class intervals for income have been used in most tables except in the case of single unit (unattached individual) households and multi-unit households where it was found necessary to modify some income groups.

All published reports can be ordered by catalogue number directly from Information Canada, Ottawa, Ontario. The data used in this report are also available in a microdata file form. All inquiries should be forwarded to the Data Dissemination Unit, Consumer Income and Expenditure Division, Statistics Canada, Tunney's Pasture, Ottawa, Ontario, K1A 0T6.

Chacun des tableaux des Sections I et II et les tableaux 2 et 6 de la Section IV comportent une partie A et une partie B. Les deux parties ont le même champ d'observation mais les caractéristiques des ménages et des logements, par exemple le nombre de personnes dans le ménage ou le nombre de pièces dans le logement, etc. sont comprises dans la partie A alors que les données sur l'équipement ménager tel que les machines à laver, les automobiles, etc., figurent dans la partie B. Des tranches uniformes de revenu ont été utilisées dans la plupart des tableaux sauf dans le cas des ménages individuels (personne seule) et des ménages multiples où il a fallu modifier certaines tranches de revenu.

Toutes les publications peuvent être commandées directement, en indiquant le numéro de catalogue, à Information Canada, Ottawa (Ontario). Toutes les données figurant dans ce document sont également disponibles sous forme de fichier de microdonnées. Adresser toute demande de renseignements au Service de la diffusion des données, Division du revenu et des dépenses des consommateurs, Statistique Canada, Tunney's Pasture, Ottawa (Ontario) K1A 0T6.

SUMMARY

Household Facilities by Income and Other Characteristics

Certain household items are found in almost every home. Included in this group are telephones, televisions, radios and refrigerators. The possession of other household facilities and equipment items appears however to be tied to the income of the household. Generally, the average income of households lacking a certain facility is significantly lower than the average income of households which have it. In the case of television sets, not only does the rate of absence of a television set decline quickly but, as income increases, there is a strong tendency to procure a colour set as an addition to, or as a replacement of, the existing black and white set. A similar situation is found in the number of automobiles a household has.

When discussing such aspects of households it is sometimes helpful to comment separately on each of the following three household categories:

- (i) single unit (family) households – households consisting of only one family,
- (ii) single unit (unattached individual) households – one-person households, and
- (iii) multi-unit households – all remaining households.

Chart 1 summarizes the interrelationship between household incomes and facilities and equipment for single unit (family) households. Approximately 80% of households belong to this category. Except for a car and a television set, possession of most household facilities by a household requires a slightly above average income. While only households with well above average income enjoy colour television sets and two or more cars, the lack of certain other facilities like bath and flush toilets is an indication that the income of the household is much below the average household income.

Between 1967 and 1971, the average household income increased by 35%, from \$7,150 to \$9,646. It increased by at least 32% in each region of Canada with British Columbia showing the largest growth of 41%. For single unit (family) households the average household income moved up to \$10,405 by 1971, from \$7,626 in 1967. Corresponding to this increase in incomes there was a growing tendency for more households to acquire new or additional equipment and facilities. For example, in the spring of 1968 the percentage of all households with colour T.V.'s was only about 4%. In four years this figure increased to 24%. Similarly during this time the incidence of automatic washing machines has gone up from 30% to more than 40% and of clothes dryers from 34% to an estimated 42%. There was also an increase in the percentage of households having two or more cars, from 14% to about 18%.

RÉSUMÉ

Équipement ménager selon le revenu et d'autres caractéristiques

Certains articles ménagers se trouvent dans presque tous les ménages. Sont compris dans ce groupe le téléphone, le téléviseur, la radio et le réfrigérateur. La possession d'autres articles d'équipement ménager semble toutefois être fonction du revenu du ménage. En règle générale, le revenu moyen des ménages dépourvus de certains éléments de confort est sensiblement inférieur à celui des ménages qui en sont pourvus. Prenons le cas des téléviseurs: non seulement la proportion des ménages qui en sont dépourvus diminue rapidement, mais encore plus le revenu augmente plus on a tendance à se procurer un télécouleur en remplacement ou en plus du téléviseur actuel en noir et blanc. Il en est de même pour le nombre d'automobiles possédées par le ménage.

Lorsqu'on examine de tels aspects des ménages, il est parfois utile d'aborder séparément chacune des trois catégories suivantes de ménages:

- (i) ménages unifamiliaux: ménages composés d'une seule famille,
- (ii) ménages individuels (personne seule): ménages comprenant une seule personne, et
- (iii) ménages multiples: tous les autres ménages.

Le graphique 1 résume la corrélation qui existe entre le revenu des ménages unifamiliaux et leur équipement ménager. Environ 80 % des ménages appartiennent à cette catégorie. Exception faite de l'automobile et du téléviseur, la possession de la plupart des articles d'équipement ménager par un ménage commande un revenu légèrement supérieur à la moyenne. Alors que seuls les ménages dont le revenu se situe bien au-dessus de la moyenne possèdent un télécouleur et plus d'une voiture, l'absence de certains autres éléments de confort tels que la baignoire et la toilette avec chasse d'eau est une indication que le revenu du ménage est très inférieur à la moyenne.

Entre 1967 et 1971, le revenu moyen du ménage s'est accru de 35 %, passant de \$7,150 à \$9,646. Il a augmenté d'au moins 32 % dans toutes les régions du Canada et de 41 % en Colombie-Britannique. Chez les ménages unifamiliaux le revenu moyen a atteint \$10,405 en 1971, contre \$7,626 en 1967. Cette augmentation du revenu a été accompagnée d'une tendance de plus en plus marquée à acquérir de nouveaux ou de plus nombreux articles d'équipement ménager. Par exemple, au printemps de 1968, la proportion de tous les ménages possédant un télécouleur n'était que de 4 %. En quatre ans, ce chiffre est monté à 24 %. Pendant la même période, la proportion des ménages munis d'une machine à laver automatique est montée de 30 % à plus de 40 % et celle des ménages possédant une sécheuse est passée de 34 % à 42 %. Le pourcentage des ménages possédant deux voitures ou plus a également augmenté, passant de 14 % à environ 18 %.

Average Income of Single Unit (Family) Households with/without Household Facilities and Equipment as a Percentage of Average Income of All Single Unit (Family) Households
Revenu moyen des ménages unifamiliaux avec/sans équipement ménager en pourcentage du revenu moyen de tous les ménages unifamiliaux

In four years the average size of household declined from 3.59 to 3.33 reflecting a sharp reduction in the number of larger households, those containing six or more members. While in 1968 large households accounted for 16.2% of all households, by 1972 their percentage dropped to 12.5%. At the same time the percentage of one-person households expanded from 14.1% to 15.2%. Households consisting of two or three persons accounted for 44% in 1972, up from 40% in 1968. Compared with the national 1972 average, the Atlantic Provinces had the highest average of 3.81 persons per household while British Columbia had an average of only 3.04. The average size of single unit (family) households has shown a corresponding decline from 4.02 in 1968 to 3.77 in 1972.

With the average number of rooms per occupied dwelling remaining at practically the same level 5.30, there was a general decline in the level of crowding as measured by the number of persons per room, from 0.68 in 1968 to 0.63 in 1972. For single unit (family) households the figures were 0.72 and 0.68 respectively.

Generally, in the case of all households and of single unit (family) households the greater the household size the higher was the household income. In 1971, for example, for single unit (family) households, the average household income for a two-person household was \$8,722 whereas for a household with six or more persons it was \$11,792.

In 1972 about 61% of all households lived in owner-occupied dwellings, compared to 63% in 1968. Households living in their own homes enjoyed on the average, a higher income than households which did not own their own homes. This trend was specially true of households in metropolitan areas where owner-households had an average income of \$12,676 while for non-owners the average income was \$8,375. In the case of single unit (family) households, home ownership was slightly higher than it was for all households although the relationship between income and ownership was the same.

About 61% of all households lived in single detached dwellings in 1972, a somewhat lower proportion than the 63% estimated for 1968. In Quebec and Ontario the proportion of single detached dwellings was 41% and 63% respectively while in each of the other three regions at least 71% of all households occupied single dwellings. In metropolitan areas, where land limitations and large populations result in a pattern towards multi-unit dwellings, the ratio of households living in single dwellings was less than that for households in other dwelling types. This may partially explain the smaller proportion of single detached dwellings in Quebec and Ontario, as com-

En quatre ans, la taille moyenne du ménage est tombée de 3.59 à 3.33, en raison d'une réduction considérable du nombre de ménages de six personnes ou plus. En 1968, les grands ménages intervenaient pour 16.2 % de tous les ménages alors qu'en 1972, ce pourcentage n'était que de 12.5 %. Au cours de la même période, la proportion des ménages d'une personne est montée de 14.1 % à 15.2 %. La proportion des ménages composés de deux ou trois personnes était de 44 % en 1972, comparativement à 40 % en 1968. Par rapport à la moyenne nationale de 1972, la moyenne la plus élevée a été enregistrée dans les provinces de l'Atlantique avec 3.81 personnes par ménage, tandis qu'en Colombie-Britannique elle n'était que de 3.04. La taille moyenne des ménages unifamiliaux a suivi une courbe semblable, passant de 4.02 en 1968 à 3.77 en 1972.

Bien que le nombre moyen de pièces par logement occupé soit demeuré pratiquement le même, soit 5.30, il y a eu une diminution générale du niveau de peuplement si l'on en juge par le nombre de personnes par pièce, qui est passé de 0.68 en 1968 à 0.63 en 1972. Quant aux ménages unifamiliaux, les chiffres ont été de 0.72 et 0.68 respectivement.

De façon générale, chez tous les ménages et les ménages unifamiliaux, plus le ménage était grand, plus son revenu était élevé. Par exemple en 1971, dans le cas des ménages unifamiliaux, le revenu moyen d'un ménage de deux personnes se chiffrait à \$8,722 tandis que celui d'un ménage de six personnes ou plus était de \$11,792.

En 1972, environ 61 % de tous les ménages demeuraient dans des logements leur appartenant, comparativement à 63 % en 1968. Les ménages qui possédaient leur propre maison touchaient en général un revenu plus élevé que ceux qui ne la possédaient pas. Cette tendance est particulièrement manifeste dans les régions métropolitaines où les ménages propriétaires avaient un revenu moyen de \$12,676 alors que chez les non-propriétaires le revenu moyen était de \$8,375. Parmi les ménages unifamiliaux, les propriétaires étaient légèrement plus nombreux que dans l'ensemble des ménages bien que le rapport entre le revenu et le nombre de propriétaires fût le même.

Environ 61 % de tous les ménages habitaient en 1972 dans des logements individuels non attenants, soit une proportion légèrement inférieure à celle de 1968 (63%). Au Québec et en Ontario, la proportion des logements individuels non attenants était respectivement de 41 % et 63 % alors que dans chacune des trois autres régions au moins 71 % de tous les ménages occupaient des logements individuels. Dans les régions métropolitaines, où l'on favorise les logements multiples en raison du manque d'espace et de la densité de la population, le ratio des ménages demeurant dans des logements individuels était inférieur à celui des ménages habitant dans d'autres genres de logement. Cela peut expliquer en partie la

pared to the other regions, since both these regions have a high concentration of population in the metropolitan centres. Since ownership or rental of single detached dwellings is relatively more expensive, the higher the income of the household the more likely it is to occupy such a dwelling.

About 67% of all single unit (family) households in 1972 lived in single detached dwellings. The average income of these households in 1971 was about 15% higher than that of households living in other types of dwellings. This difference in income becomes much more pronounced (about 33%) if single unit (family) households in metropolitan areas alone are considered.

Owners tend to occupy larger dwellings. Approximately 87% of all single detached dwellings, which have comparatively more accommodation than other types of dwellings, were owner-occupied in 1972. Compared to about 40% in the case of renters and others, about 85% of all owner-occupied dwellings had at least five rooms. However, owner households also contained, on the average, a larger number of persons per household.

About 36% of all occupied dwellings were built before 1940, 31% during the 1940 to 1959 period and the remaining 34% were constructed in or after 1960. In the Atlantic Provinces slightly less than 46% of all households in 1972 lived in dwellings built prior to 1940 and only 28% lived in dwellings built after 1959. The other regions had relatively larger proportions of newer dwellings specially British Columbia where only 27% of the households lived in pre-1940 dwellings while about 40% lived in dwellings constructed in or after 1960. Also, as can be expected, there was a higher proportion of newer dwellings, built in 1960 or after, in metropolitan areas (about 36%) than in non-metropolitan areas (about 30%).

A close correlation seems to exist between the household income and the age of dwelling. The majority of the older dwellings were occupied by low income households. This was true of owners as well as of non-owners and indicates that both groups tend to move to newer dwellings with rising income.

Single Unit (Unattached Individual) Households

Of all households in Canada in 1972, about 15% were one-person households. This type of household was relatively more common in the Prairies and British Columbia than in other regions. The income of single

proportion moindre de logements individuels non attenants au Québec et en Ontario parce que dans ces deux régions la population des centres métropolitains est très dense. Puisqu'il est relativement peu dispendieux de posséder ou de louer un logement individuel non attenant, plus le ménage aura un revenu élevé, plus il aura tendance à occuper un tel logement.

Environ 67 % de tous les ménages unifamiliaux demeuraient en 1972 dans des logements individuels non attenants. En 1971, le revenu moyen de ces ménages était supérieur d'environ 15 % à celui des ménages occupant d'autres genres de logement. Cette différence de revenu est beaucoup plus marquée (environ 33 %) quand on ne considère que les ménages unifamiliaux des régions métropolitaines.

Les propriétaires ont tendance à occuper des logements plus spacieux. Environ 87 % de tous les logements individuels non attenants, dont la superficie est relativement plus grande que celle des autres genres de logements, étaient occupés par leur propriétaire en 1972. Environ 85 % de tous les logements occupés par leur propriétaire comprenaient au moins cinq pièces, comparativement à quelque 40 % des logements occupés par des locataires ou autres occupants. Toutefois, les ménages propriétaires se composaient en moyenne d'un plus grand nombre de personnes.

Environ 36 % de tous les logements occupés ont été construits avant 1940, 31 % entre 1940 et 1959 et le reste, soit 34 %, depuis 1960. Dans les provinces de l'Atlantique, un peu moins de 46 % de tous les ménages occupaient en 1972 des logements construits avant 1940 et 28 % seulement vivaient dans des logements construits après 1959. Dans les autres régions, la proportion des logements plus récents était relativement plus élevée, surtout en Colombie-Britannique où seulement 27 % des ménages habitaient des logements d'avant 1940 alors que 40 % environ occupaient des logements construits en 1960 ou après. Comme on pouvait s'y attendre, la proportion des logements de construction plus récente, c'est-à-dire construits depuis 1960, a été plus élevée dans les régions métropolitaines (environ 36 %) que dans les régions non métropolitaines (environ 30 %).

Il semble exister une étroite corrélation entre le revenu du ménage et l'âge du logement. La majorité des logements plus anciens sont occupés par des ménages à faible revenu. Cette constatation se vérifie aussi bien chez les propriétaires que les non-propriétaires et indique que les deux groupes ont tendance à s'installer dans des logements plus récents lorsque leur revenu augmente.

Ménages individuels (personne seule)

En 1972, environ 15 % de tous les ménages du Canada étaient des ménages d'une personne. Ce genre de ménage était relativement plus courant dans les provinces des Prairies et la Colombie-Britannique que dans les autres

unit (unattached individual) households differs markedly from that of single unit (family) households. A large majority of single unit (unattached individual) households is concentrated in the lower income groups. The average income of these households in 1971 was \$4,781, which is about 10% higher than the average income of all unattached individuals.³ This again indicates that unattached individuals with very low incomes are more likely to share, out of preference or need, accommodation with other family units.

Perhaps the most important factor which should be taken into account, when considering single unit (unattached individual) households, is the age of the occupant of the dwelling. Of the unattached individuals who maintained independent households, about 64% were aged less than 65 years and the remaining 36% were 65 or more years of age. The two groups differ substantially in respect of their incomes. The average income of the latter group was almost half of that of the former. Another significant difference among the two groups is in respect of the incidence of home-ownership among them. Unlike other types of households, the incidence of home-ownership among single unit (unattached individual) households drops as income increases. In fact, within all single unit (unattached individual) households, the average income of owners was much below that of non-owners.

The household facilities and equipment available to single unit (unattached individual) households were, on the average, less than those enjoyed by other types of households. To some extent, this may be due to the lesser needs of one-person households. However, lack of certain facilities, e.g., 7% of single unit (unattached individual) households compared to 4% in the case of single unit (family) households, were without flush toilets, can only be ascribed to their generally low incomes.

Multi-unit Households

About 5% of all households in 1972 were multi-unit households. In spite of their multiple nature, however, the average size of these households was smaller than that of single unit (family) households. About 64% of multi-unit households were established by two or more unattached individuals.

A meaningful analysis of the interrelationship of income and household facilities and equipment in multi-unit households is extremely difficult from the data compiled for this report. The number of these households in the sample is too small to allow production of reliable distributions by different characteristics. Accordingly this publication contains only 3 tables on these households (Tables 4 to 6, Section III).

³ See *Income Distributions by Size in Canada, 1971*, Catalogue 13-207, Table 27.

régions. Le revenu des ménages individuels (personne seule) est sensiblement différent de celui des ménages unifamiliaux. La grande majorité des ménages individuels (personne seule) appartiennent à des tranches de revenu inférieures. En 1971, le revenu moyen de ces ménages était de \$4,781, soit 10 % environ de plus que celui de l'ensemble des personnes seules³. Ce qui indique à son tour que les personnes seules dont le revenu est très bas auront tendance à partager, soit par goût soit par nécessité, leur logement avec d'autres unités familiales.

Le facteur le plus important qu'il faudrait prendre en considération en examinant la question des ménages individuels (personne seule), c'est peut-être l'âge de l'occupant du logement. Parmi les personnes seules qui formaient des ménages indépendants, environ 64 % avaient moins de 65 ans et le reste, soit 36 %, avaient 65 ans ou plus. Les deux groupes diffèrent considérablement en ce qui concerne leur revenu. Le revenu moyen du deuxième groupe équivalait à près de la moitié de celui du premier. Une autre différence importante entre les deux groupes concerne le pourcentage de propriétaires. Contrairement aux autres genres de ménages, le pourcentage de propriétaires chez les ménages individuels (personne seule) diminue à mesure que le revenu augmente. En fait, parmi tous les ménages individuels (personne seule), le revenu moyen des propriétaires était bien inférieur à celui des non-propriétaires.

L'équipement ménager à la disposition des ménages individuels (personne seule), était en moyenne moins élaboré que chez les autres genres de ménages. Cela peut s'expliquer dans une certaine mesure par le fait que les ménages d'une personne ont des besoins moindres. Toutefois, l'absence de certains éléments de confort, par exemple le fait que 7 % des ménages individuels (personne seule), contre 4 % des ménages unifamiliaux, n'avaient pas de toilettes avec chasse d'eau, ne peut s'expliquer que par des revenus généralement peu élevés.

Ménages multiples

Environ 5 % de tous les ménages étaient en 1972 des ménages multiples. Toutefois, malgré leur caractère multiple, ces ménages étaient en moyenne de plus petite taille que les ménages unifamiliaux. Environ 64 % des ménages multiples étaient constitués de deux ou plusieurs personnes non apparentées.

Il est extrêmement difficile, à partir des données qui sous-tendent la présente étude, d'analyser en profondeur les corrélations qui existent entre le revenu et l'équipement ménager des ménages multiples. Le nombre de ménages de ce genre est trop petit dans l'échantillon pour permettre d'établir de façon fiable des répartitions selon diverses caractéristiques. C'est la raison pour laquelle la publication ne renferme que trois tableaux sur ces

³ Voir tableau 27 dans *Répartition du revenu au Canada selon la taille du revenu, 1971* (n° 13-207 au catalogue).

Besides the restriction of a small sample, there is also a conceptual problem relating to income. It is possible to distribute these households either by total income of the household or by total income of the primary economic family unit. The two resulting distributions will be different in shape and, unless analyzed by detailed composition of these households (which is not possible with the existing sample), can point to misleading conclusions. For example, when distributed by household income, a large number of these households may fall in higher income brackets presenting a somewhat distorted picture in that the high average household income may in fact be the result of summation of relatively low incomes of several units. On the other hand, a distribution by primary economic family income may show a high concentration of these households in low income brackets. This would not necessarily indicate the existence of poor household facilities in these households since either high income of a secondary family or the pooled incomes of several units may enable these households to enjoy better than average household facilities and equipment.

Value of Dwelling, Mortgages and Rents

Data on the value of dwellings, the amount of outstanding mortgages and the monthly rent payments of tenants are presented in relation to income groups and household characteristics. In the case of both owner-occupied dwellings and tenant-occupied dwellings only non-farm units are considered. Of all non-farm dwellings in 1972 about 55% were owner-occupied single dwellings compared to about 41% which were rented accommodations.

There appears to be a close correlation between the value of a dwelling and the income of the household. In general the higher the income group of the household the greater the tendency for the household to own a higher-valued dwelling. For the "under \$4,000" income group the median dwelling value was \$15,000 compared to a median value of \$28,000 for the \$15,000 to \$24,999 income group and \$39,000 for households with income of at least \$25,000. Yet, in the case of the most expensive homes, valued at \$53,000 and more, one sixth of owners belonged to the "under \$4,000" income group. These owners are liable to be retired and living in older but larger and more expensive dwellings. A parallel situation exists between the monthly cash rent paid by a tenant and the income group of that household. The "under \$4,000" income group paid an average monthly cash rent of \$84. However, the \$15,000 to \$24,999 group paid an average rent of \$153 per month.

ménages (tableaux 4 à 6, Section III). Outre le désavantage que représente un échantillon trop restreint, il existe un autre problème d'ordre conceptuel celui-là, concernant le revenu. Il est possible de répartir les ménages multiples soit selon le revenu total du ménage soit selon le revenu total de l'unité familiale économique principale. Les deux répartitions obtenues seront différentes du point de vue de la forme, et, à moins d'une analyse selon les éléments constitutifs de ces ménages (tâche impossible avec le présent échantillon) risquent d'être à l'origine de conclusions erronées. Par exemple, lorsque les ménages sont répartis selon leur revenu, un grand nombre de ménages multiples risquent d'être compris dans des tranches de revenu plus élevées et de présenter une image déformée de la réalité en ce sens que le revenu moyen élevé du ménage peut en fait être la somme de revenus relativement modestes de plusieurs unités. Par ailleurs, une répartition selon le revenu de la famille économique principale peut indiquer une forte concentration de ces ménages dans la catégorie des ménages à faible revenu. Cela ne voudrait pas nécessairement dire qu'il existe dans ces ménages peu d'équipement ménager. En effet, un revenu élevé d'une famille secondaire ou la somme des revenus de plusieurs unités permettent souvent à ces ménages de posséder plus d'équipement ménager que la moyenne.

Valeur du logement, des hypothèques et des loyers

Les données sur la valeur des logements, le montant des hypothèques en cours et les loyers mensuels versés par les locataires sont présentés par tranche de revenu et selon les caractéristiques des ménages. Dans le cas des logements occupés par leur propriétaire comme de ceux occupés par des locataires, seules les unités non agricoles sont prises en compte. En 1972, de tous les logements non agricoles, 55 % environ étaient des logements individuels occupés par leur propriétaire et 41 % environ étaient des logements loués.

Il semble exister un rapport étroit entre la valeur d'un logement et le revenu du ménage. En général, plus le revenu du ménage est élevé, plus il y a de chances que celui-ci possède un logement de grande valeur. Pour les ménages dont le revenu est inférieur à \$4,000, la valeur médiane du logement se situait à \$15,000 comparativement à \$28,000 pour les ménages dans la tranche de revenu de \$15,000 à \$24,999, et de \$39,000 pour les ménages dont le revenu dépassait \$25,000. Cependant, dans le cas des maisons les plus chères c'est-à-dire, celles dont la valeur dépassait \$53,000, un sixième des propriétaires avaient un revenu inférieur à \$4,000. Ces propriétaires avaient généralement atteint l'âge de la retraite et vivaient dans des logements plus anciens mais plus spacieux et plus chers. Une situation parallèle existe entre le loyer mensuel en espèces versé par un locataire et la tranche de revenu du ménage auquel il appartient. Le ménage dont le revenu se situe en deçà de \$4,000 paie en moyenne \$84 pour son loyer. Toutefois, les ménages dont le revenu se situe entre \$15,000 et \$24,999 paient en moyenne \$153 de loyer par mois.

An overall relationship also emerged between the value of the dwelling, or between the monthly cash rent in the case of tenants, and the facilities possessed by the household. Generally, households which did possess a certain item had a higher dwelling value or paid a higher monthly rent, than did those households which lacked the facility suggesting perhaps that the contents of the dwelling are indicative of its value. Generally as the value of single dwellings increased, a greater percentage of the households possessed various facilities. This pattern was somewhat less evident in the case of tenant-occupied dwellings due possibly to the landlord supplied "communal" laundry and parking facilities which were not covered by the survey. Also, incomes of tenants tended to be lower than incomes of owners.

Of all owner-occupied single dwellings, about 51% had no outstanding mortgage. This group consisted largely of those dwellings whose value was less than \$12,000. Higher income groups tended to have larger mortgages and generally the greater the dwelling value the larger the mortgage. For higher income groups and higher valued dwellings, larger average outstanding mortgage debts generally existed.

On peut également établir une comparaison entre la valeur du logement ou le loyer mensuel en espèces payé par les locataires et l'équipement que possède le ménage. En règle générale, les ménages qui possédaient un certain article avaient un logement de plus grande valeur ou payaient plus cher de loyer mensuel que les ménages qui en étaient dépourvus, ce qui laisserait supposer que le contenu du logement est représentatif de sa valeur. En général, plus la valeur des logements individuels est élevée, plus grand est le pourcentage des ménages qui possèdent divers articles d'équipement. Cette tendance était un peu moins évidente dans le cas des logements occupés par des locataires en raison probablement des services de stationnement et de blanchisserie fournis par le propriétaire, services qui n'étaient pas pris en compte dans l'enquête. En outre, les revenus des locataires avaient tendance à être inférieurs à ceux des propriétaires.

Environ 51 % des propriétaires de logements individuels qu'ils occupaient eux-mêmes n'avaient pas d'hypothèques en cours. Ce groupe se composait en majeure partie de propriétaires de logements dont la valeur était inférieure à \$12,000. Les ménages appartenant à des tranches de revenu supérieures avaient tendance à avoir des hypothèques plus élevées; en général plus la valeur du logement était élevée plus l'hypothèque était élevée. Chez les ménages appartenant à des tranches de revenu supérieures et dont le logement avait une plus grande valeur, le montant moyen des dettes hypothécaires en cours était en général plus élevé.

NOTES AND DEFINITIONS

Dwelling and Dwelling Characteristics

Dwelling

A dwelling is defined as a structurally separate set of living premises with private entrance from outside the building, or from a common hallway or stairway inside.

Single Dwelling

Includes single detached and single attached (double and row or terrace).

Single Detached Dwelling

This type of dwelling is commonly called a single house, i.e., a house containing one dwelling unit and completely separated on all sides from any other building or structure. As opposed to single detached dwellings, there are other types of dwellings such as double, duplex, row, terrace, apartment, flat, etc.

Period of Construction

The period of construction indicates the date of original construction without taking into consideration any minor or major modifications carried out subsequently.

Garage

The garage is located on the premises and used by household members or rented to others. Carports or communal parking spaces in the basement of apartment blocks or elsewhere are excluded.

Rooms

In determining the number of rooms in a dwelling, only those rooms used or suitable for living purposes, including rooms occupied by servants, lodgers, or members of lodging families, are counted. The following are not counted as rooms: bathrooms, pantries, halls, clothes closets, and rooms used solely for business purposes. Summer kitchens, sunrooms, rooms in basements or attics are not counted unless they are finished off and suitable for living quarters throughout the year. "Kitchenettes" are counted if the normal kitchen functions are carried out therein and if they contain, as a minimum, cooking facilities (such as a stove or range) and a sink or tub.

NOTES ET DÉFINITIONS

Logements et caractéristiques des logements

Logement

Ensemble distinct de pièces d'habitation ayant une entrée privée donnant sur l'extérieur ou sur un corridor ou un escalier commun à l'intérieur.

Logement individuel

Comprend le logement individuel non attenant et le logement individuel attenant (maison jumelée, en rangée ou de terrasse).

Logement individuel non attenant

C'est ce qu'on appelle communément une maison individuelle, c.-à-d. une maison ne comprenant qu'un logement et ne touchant pas par une de ses parties à un autre immeuble ou à une autre construction. Par opposition au logement individuel non attenant, il existe d'autres genres de logements comme les maisons à deux logements ou maisons doubles, les duplex, les maisons en rangée, les maisons en terrasse, les appartements (de plain-pied ou non), etc.

Période de construction

Par période de construction, on entend la date à laquelle la construction initiale du logement a été achevée, sans tenir compte d'aucune modification ultérieure, même ou d'importance.

Le garage

Le garage se trouve sur les lieux et sert aux membres du ménage ou est donné en location. Les abris d'autos ou les espaces de stationnement communs, dans les sous-sols des immeubles d'habitation ou ailleurs, ne sont pas compris.

Pièces

Pour calculer le nombre de pièces d'un logement, on ne compte que les pièces servant ou pouvant servir à l'habitation, y compris les pièces occupées par les serviteurs, les pensionnaires ou les membres de familles en pension. Ne sont pas comptées comme pièces: les salles de bains, les garde-manger, les corridors, les placards et les pièces uniquement utilisées à des fins commerciales. Les cuisines d'été, les solariums, les pièces au sous-sol ou au grenier ne sont comptées que si elles sont complètement aménagées et peuvent servir à l'habitation pendant toute l'année. Les "cuisinettes" sont comptées si l'on y fait normalement la cuisine et si elles contiennent, à tout le moins, des installations de cuisine (comme une cuisinière) et un évier ou une cuvette.

Number of Persons per Room

The classification of number of persons per room, employed in this report, differs from the one used in the previous publication. In this report the categories employed are "one or less" and "more than one" while the 1968 publication showed "under one" and "one or more". To provide greater comparability, tables using the 1968 breakdown are being calculated and will be available on request in the near future.

Household and Household Characteristics

Household

A person or a group of persons occupying one dwelling unit is defined as a "household". The number of households will therefore be equal to the number of occupied dwellings.

Type of Household⁴

For purposes of this report, households have been divided into the following three categories:

A single unit (unattached individual) household consists of one person aged 14 or over.

A single unit (family) household consists of two or more persons who are related to each other by blood, marriage or adoption.

A multi-unit household contains at least two unrelated family units e.g., two or more unattached individuals living together, two or more families sharing one dwelling or any other combination.

Family

The family in this publication is defined as a group of individuals sharing a common dwelling unit and related by blood, marriage or adoption. Thus, all relatives living together were considered to comprise one family whatever the degree of family relationship.⁵

⁴ The classification of households by type, employed in this report, differs from that used in various census publications where households are classified as family or non-family. "The term family household refers to a household containing at least one census family . . . the term non-family household refers to one person living alone in a dwelling or a group of persons, occupying one dwelling, who do not constitute a census family". See *1971 Census of Canada, Households, Households by Type, April 1973*, Catalogue 93-703.

⁵ See also *Income Distributions by Size in Canada, 1972*, Catalogue 13-207.

Nombre de personnes par pièce

Le classement utilisé dans la présente publication pour la répartition du nombre de personnes par pièce n'est pas celui que nous avons employé dans la publication précédente. Ici, nous utilisons les catégories "une ou moins" et "plus d'une", alors que la publication de 1968 faisait appel à "moins d'une" et "une ou plus". Pour assurer une meilleure comparabilité, on établit actuellement des tableaux fondés sur la ventilation de 1968 et l'on pourra obtenir ces derniers sur demande prochainement.

Ménages et caractéristiques des ménages

Ménage

Personne ou groupe de personnes occupant un logement. Le nombre de ménages est par conséquent égal au nombre de logements occupés.

Genres de ménage⁴

Pour les besoins de la présente publication, on a réparti les ménages selon les trois catégories suivantes:

Un ménage individuel (personne seule) comprend une personne âgée de 14 ans ou plus.

Un ménage unifamilial comprend deux personnes ou plus ayant des liens de parenté, des liens contractés par alliance ou par adoption.

Un ménage multiple contient au moins deux unités familiales non apparentées, par ex. au moins deux personnes seules vivant ensemble, deux familles ou plus partageant un logement ou n'importe quelle autre combinaison.

Famille

On définit ici la famille comme un groupe de personnes qui partagent le même logement et qui sont unies par filiation, mariage, ou adoption. Ainsi, tous les parents qui vivent ensemble forment une seule unité familiale, quel que soit leur lien de parenté⁵.

⁴ La classification des ménages selon le genre utilisée dans la présente publication diffère de celle adoptée dans les diverses publications du recensement, où l'on emploie les expressions "ménage familial" et "ménage non familial". "Un ménage familial comprend au moins une famille de recensement; le ménage non familial est constitué d'une personne vivant seule dans un logement ou d'un groupe de personnes partageant le même logement sans toutefois constituer une famille de recensement." Voir *Recensement du Canada 1971, Ménages selon le genre, avril 1973*, no 93-703 au catalogue.

⁵ Voir aussi *Répartition du revenu au Canada selon la taille du revenu, 1972*, no 13-207 au catalogue.

Unattached Individual

An unattached individual is a person living by himself or rooming in a household where he is not related to other household members. In the former case, the household is called a "single unit (unattached individual) household" and in the latter case it is called a "multi-unit household". An unattached individual is treated as an economic family unit by himself.

Family Unit

The term "family unit" is sometimes used in the text of this report to designate, collectively, unattached individuals and families with two or more members.

Primary Economic Family

The family unit which contains the head of household is designated as the "primary economic family". In the case of single unit households which consist of either one unattached individual or one family, the question of primary economic family does not arise. Only in the cases of multi-unit households or all households considered together does the distinction between primary and secondary family units become significant. Secondary family units are, of course, those units whose members are not related to the head of a multi-unit household.

Household Head

For the purposes of this report the head of household is determined as follows:

In single unit (family) households:

- (i) in families consisting of married couples with or without children, the husband is considered the head,
- (ii) in single-parent families with unmarried children, the parent is the head,
- (iii) in single-parent families with married children, the member who is mainly responsible for the maintenance of the family becomes the head, and
- (iv) in families where relationships are other than husband-wife or parent-child, normally the eldest in the family is considered the head.

In single unit (unattached individual) households:

a person living by himself and occupying a dwelling alone is always reported as the head.

In multi-unit households:

the head of household, is the head of the "primary economic family" and may either be an unattached individual or a family member.

Personne seule

Une personne seule est une personne qui vit seule ou qui occupe une chambre dans un ménage avec lequel elle n'a aucun lien de parenté. Dans le premier cas, il s'agit d'un "ménage individuel (personne seule)" et dans le second il s'agit d'un "ménage multiple". Une personne seule est considérée comme une unité familiale économique.

Unité familiale

Le terme "unité familiale" est utilisé dans ce bulletin pour désigner collectivement les personnes seules et les familles de deux membres ou plus.

Principale famille économique

L'unité familiale comprenant le chef de ménage constitue la "principale famille économique". Dans le cas des ménages individuels qui sont constitués d'une personne seule ou d'une famille, la question de l'identité de la principale famille économique ne se pose pas. Il n'y a que dans les cas de ménages multiples où lorsqu'on traite de l'ensemble des ménages que la distinction entre familles principales et familles secondaires est significative. Les unités familiales secondaires sont, bien entendu, celles dont les membres ne sont pas apparentés au chef du ménage multiple.

Chef de ménage

Pour les besoins de la présente publication, le titre de chef de ménage est attribué de la façon suivante:

Dans les ménages unifamiliaux:

- (i) dans les familles constituées d'un couple marié avec ou sans enfants, à l'époux,
- (ii) dans les familles monoparentales avec enfants non mariés, au père ou à la mère présents,
- (iii) dans les familles monoparentales avec enfants mariés, au membre qui assume au premier chef la responsabilité de l'entretien de la famille, et
- (iv) dans les familles où les liens ne sont ni d'époux-épouse ni de père (mère)-enfant, normalement au membre le plus âgé.

Dans les ménages individuels (personne seule):

à la personne vivant seule et occupant un logement seule.

Dans les ménages multiples:

au chef de la "principale famille économique", qui peut être soit une personne seule soit un membre d'une famille.

Family Characteristics

Classification by family characteristics indicates the composition of a family. The groupings used are:

- (i) married couples only,
- (ii) married couples with single children of any age,
- (iii) married couples with or without single children but with married children and their families or with other relatives, and
- (iv) all other families which include single parent families and families consisting of two or more related adults such as brothers and sisters.

Household Size

The household size refers to the total number of persons in the household, as constituted at the time of the Survey of Consumer Finances, and includes both adults and children.

Area of Residence

The classification by area of residence is based on the population size of the place where the unit resided at the time of the survey. Centres with a population of 30,000 or over are classified as "metropolitan areas" and the rest of the country as "non-metropolitan". The latter is further divided into other cities (with a population between 15,000 and 30,000), small urban areas (under 15,000), and rural areas. This classification is based on the 1966 Census classification of areas. The area boundaries and populations have changed but the Labour Force Survey sample has not yet been completely redesigned to reflect the changes.

Household Head's Characteristics

Some of the tables are classified by certain characteristics (e.g., age, education) of the head of household. These refer to the head's status at the time of survey — Spring 1972. This is not necessarily the same as his status during the year 1971 for which the income data were collected.

Household Income

Total Income

The total income of a household is the sum of incomes received by all members of the household from any or all of the following sources:

1. *Wages and salaries* — Gross wages and salaries before deduction for such items as income taxes,

Caractéristiques des familles

La classification selon les caractéristiques des familles indique la composition d'une famille. Les groupements utilisés sont les suivants:

- (i) couple marié sans enfants,
- (ii) couple marié avec des enfants célibataires quel que soit l'âge de ceux-ci,
- (iii) couple marié avec ou sans enfants célibataires mais avec des enfants mariés et leur famille ou des parents autres que des enfants, et
- (iv) toutes les autres familles composées de deux adultes ou plus apparentés (frères et soeurs, etc.).

Taille des ménages

Par taille des ménages, on entend le nombre total de personnes constituant le ménage comme il se présentait au moment de l'enquête sur les finances des consommateurs, ce qui comprend les adultes et les enfants.

Catégorie d'habitat

La classification par catégorie d'habitat est établie d'après le degré de concentration de la population dans la région où vivait l'unité participante lors de l'enquête. Les centres urbains de 30,000 habitants et plus sont classés dans la catégorie "régions métropolitaines" et le reste du pays dans la catégorie "régions non métropolitaines". Cette dernière catégorie est ventilée de la façon suivante: autres villes (dont la population se chiffre entre 15,000 et 30,000 habitants), petites régions urbaines (moins de 15,000) et régions rurales. Cette classification est fondée sur la classification des régions du recensement de 1966. Les limites géographiques et les populations ont changé mais l'échantillon de l'enquête sur la population active n'a pas encore été entièrement repensé pour tenir compte de ces variations.

Caractéristiques du chef de ménage

Quelques-uns des tableaux sont présentés selon certaines caractéristiques (par ex., l'âge, l'instruction) du chef de ménage. Il s'agit de la situation du chef au moment de l'enquête, soit au printemps 1972. Cette situation ne correspond pas nécessairement à celle que l'on pouvait observer en 1971, année sur laquelle portent les données recueillies sur le revenu.

Revenu du ménage

Revenu total

Le revenu total d'un ménage est la somme des revenus touchés par tous les membres du ménage et provenant des sources suivantes:

1. *Salaires et traitements* — Montant brut des salaires et traitements, avant toute retenue pour l'impôt sur le

unemployment insurance and pension funds. Commission income received by salesmen as well as occasional earnings of baby sitters, paperboys, char-women, etc. are also included in this category. All income in kind such as meals or living accommodation is excluded.

2. Military pay and allowances⁶

3. Net income from self-employment — Net income (gross income minus expenses) earned from self-employment either on own account or in partnership in an unincorporated business or in independent professional practice. Included here is net income from operating a farm as well as that earned from roomers and boarders.

Net income from farming was to be reported by individuals who operated their own or a rented farm either on own account or in partnership. Field instructions specified that net income was to be calculated by subtracting farm operating expenses and depreciation of farm assets from farm cash receipts. The latter were to include all money receipts from the sale of farm products including supplementary and assistance payments from governments. Income in kind is excluded.

Data were collected on gross rather than net receipts from roomers and boarders since the estimation of net income in this instance is difficult; during editing, net income from this source was assumed to be one-third of gross receipts. Payments for room and board received from relatives were not included in income of the person receiving such payments.

4. Investment income — Bond interest, dividends, mortgage interest, net rents, estate income, bank interest and other investment income.

5. Government transfer payments — All social welfare payments from federal, provincial and municipal governments such as Old Age Security, Guaranteed Income Supplement, pensions under Canada and Quebec Pension Plans, unemployment insurance benefits, workmen's compensation, training allowances, veterans' pensions and allowances, mothers' allowances, pensions to the blind and the disabled.

⁶ Family units whose major source of income is military pay and allowances are excluded from income distributions in published reports. However, the considerations which necessitate this exclusion are not applicable in this report. Accordingly, these family units are included in the estimates.

revenu, l'assurance-chômage et les régimes de retraite. Les commissions des vendeurs ainsi que les revenus occasionnels des gardiennes d'enfants, des vendeurs de journaux, des femmes de ménage, etc. sont également compris dans cette catégorie. Tous les revenus en nature, comme les repas ou le logement, sont exclus.

2. Solde et indemnités militaires⁶

3. Revenu net provenant d'un emploi autonome — Revenu net (revenu brut moins les dépenses) gagné soit à titre de travailleur indépendant établi à son propre compte ou d'associé dans une entreprise non constituée en société, soit par l'exercice privé d'une profession. Est également compris le revenu net provenant de l'exploitation d'une ferme ou de la location de chambres.

Les particuliers qui exploitent leur propre ferme ou une ferme louée, que ce soit pour leur propre compte ou à titre d'associés, devaient déclarer le revenu net provenant de cette activité. Les instructions de l'enquête précisait qu'il fallait calculer le revenu net en soustrayant du revenu agricole en espèces les dépenses d'exploitation ainsi que l'amortissement du matériel agricole et des bâtiments. Le revenu pécuniaire devait comprendre tous les revenus en espèces provenant de la vente de produits agricoles, y compris les indemnités supplémentaires et les crédits accordés par l'État. Les revenus en nature étaient exclus.

En ce qui concerne les revenus provenant de l'hébergement de chambrières et de pensionnaires, les données recueillies portaient sur le revenu brut plutôt que sur le revenu net car il est difficile d'établir une estimation du revenu net dans de tels cas; on a établi, au cours de la préparation du bulletin, que le revenu net provenant de cette source s'élevait à un tiers du revenu brut. Les paiements versés pour chambre et pension par des personnes vivant chez des parents n'ont pas été compris dans le revenu de la personne qui recevait ces paiements.

4. Revenu de placements — Intérêts d'obligations, dividendes, intérêts hypothécaires, loyer net, revenu foncier, intérêts bancaires et autres revenus de placements.

5. Transferts du gouvernement — Les indemnités de bien-être versées par les gouvernements fédéral et provinciaux et les municipalités, telles que les pensions de vieillesse, le supplément du revenu garanti, les pensions versées par le Régime de pensions du Canada et le Régime des rentes du Québec, les prestations d'assurance-chômage, l'indemnisation des accidentés du travail, les allocations d'apprentissage, les allocations et pensions d'anciens combattants, les allocations aux mères nécessiteuses, les pensions d'aveugles et d'invalides.

⁶ Les unités familiales dont la principale source de revenu est la solde et les indemnités militaires sont exclues des répartitions du revenu dans les publications. Toutefois, les facteurs qui ont entraîné cette exclusion n'interviennent pas dans la présente publication. Ces unités familiales ont donc été prises en compte dans les estimations.

6. Miscellaneous income – Retirement pensions, annuities, scholarships, alimony and other items not specified or included in the above categories.

Earned Income

The sum of wages and salaries and net income from self-employment is defined as earned income or earnings.

Major Source of Income

Major source of income identifies the largest component of total income. The groups used are wages and salaries (Item 1 above), net income from self-employment (Item 3 above) and other money income (any of Items 4, 5 or 6 above).

Receipts not Counted as Income

Receipts of gifts, lump-sum settlements from insurance policies, income tax or pension plan refunds, capital gains and losses, receipts from the sale of assets, and inheritances or bequests were excluded as was all income in kind such as meals, living accommodation, or food and fuel produced on own farm.

Household Facilities and Equipment

The household facilities and equipment mentioned in this report are self-explanatory. However, a note should be taken of the following remarks.

Bath Facilities

Refers to installed bath or shower facilities connected to a drain using piped running water and controlled by a tap.

Flush Toilets

Refers to a toilet connected to a drainage system and operated by means of water piped into it. Chemical toilets are excluded.

Cooking Fuel

Included in the distribution of households with "other" type of fuel for cooking equipment are those with no cooking equipment. Those account for a total of approximately 6,000 households (2,000 in single unit family households and 4,000 in single unit unattached households).

Clothes Dryer

For the purposes of this report, "clothes dryer" refers to an individual piece of equipment with automatic electric controls, heating unit and rotating

6. Revenus divers – Pensions de retraite, rentes, bourses d'études, pensions alimentaires et autres revenus non précisés ou compris dans les catégories ci-dessus.

Revenu gagné

Le revenu gagné (ou gains) équivaut à la somme des salaires et traitements et du revenu net provenant d'un emploi autonome.

Principale source de revenu

On a subdivisé les familles et les particuliers suivant leur principale source de revenu; les groupes utilisés sont: salaires et traitements (catégorie 1 ci-dessus), le revenu net provenant d'un emploi autonome (catégorie 3 ci-dessus) et les autres sources de revenu (catégories 4, 5 et 6 ci-dessus).

Gains non comptés comme revenus

Sont exclus du revenu: les dons, les règlements forfaitaires en matière d'assurance, les remboursements d'impôt sur le revenu ou de cotisations à des régimes de pension, les gains ou les pertes de capital, le produit de la vente de biens, les héritages et les donations ainsi que les avantages en nature comme les repas et le logement ou encore la nourriture et le combustible produits et consommés sur place.

L'équipement ménager

L'équipement ménager mentionné dans la présente publication n'exige aucune explication. On devrait cependant prêter attention aux observations suivantes.

Baignoires

Se rapporte à une baignoire ou une douche installée, raccordée à un tuyau d'eau courante et munie d'un robinet et d'un tuyau d'écoulement.

Toilette avec chasse d'eau

Se rapporte à une toilette raccordée à un système d'écoulement et qui est actionnée par de l'eau courante. Les toilettes chimiques ne sont pas comprises.

Combustible utilisé pour la cuisson

Dans la répartition des ménages ayant d'autres genres de combustible destiné aux installations de cuisson, on inclut les ménages n'ayant pas d'appareils de cuisson. On en compte approximativement 6,000 au total (2,000 ménages individuels familiaux et 4,000 ménages individuels (personne seule)).

Sécheuse

Pour les besoins de la présente publication, "sécheuse" désigne un article d'équipement ménager ayant des commandes électriques automatiques, un élément

drum. However, if a household possessed a machine which combined in itself both washing and drying functions, the household will be categorized as with an automatic washing machine and with an electric dryer.

Television Sets

Households shown with colour television sets may also possess, in addition, one or more black and white television sets. Households indicated as having black and white television sets do not possess another type of television set.

Automobiles

The number of cars in a household indicates privately-owned passenger automobiles. Cars used solely for business purposes are excluded and so are panel or other trucks even though they may sometimes be used for passenger transportation. Station wagons are treated as passenger automobiles.

Housing Characteristics

Value of Dwelling

Refers to the amount expected by the owner if the dwelling were to be sold to a willing buyer. Figures for "value of dwelling" relate to non-farm owner-occupied **single** dwellings.

Mortgage

Refers to non-farm owner-occupied single dwellings on which there are debts. A dwelling is considered mortgaged until it is fully paid for. The term **mortgage outstanding** refers to the principal or amount still owing on all mortgages attached to a dwelling.

Monthly Cash Rent

Refers to the dollar amount required to secure occupancy, but not the ownership of a dwelling during the current month of the survey (April 1972). Figures for monthly cash rent relate to all non-farm tenant-occupied dwellings.

Subsidized Rent

The rent directly or indirectly subsidized by (a) the Canadian, provincial or municipal government by providing financial assistance to special housing projects; (b) employers by supplying living quarters to employees at nominal or less than going rents; (c) landlords who are relatives and give a tenant preferred treatment.

chauffant et un tambour rotatif. Toutefois, si un ménage possédait une machine pouvant à la fois laver et sécher, on compterait le ménage au nombre de ceux possédant une machine à laver automatique et une sécheuse (électrique).

Téléviseurs

Les ménages qui sont dotés d'un télécouleur peuvent également posséder un ou plusieurs téléviseurs en noir et blanc. Les ménages représentés comme ayant un téléviseur en noir et blanc ne possèdent pas d'autre genre de téléviseur.

Automobiles

Le nombre d'automobiles dans un ménage se rapporte au nombre de voitures particulières ou de tourisme appartenant à des particuliers. Les voitures ne servant qu'aux affaires ne sont pas comprises, ni les camionnettes ou autres camions, même s'ils servent parfois au transport de passagers. Les familiales font partie des voitures particulières ou de tourisme.

Caractéristiques du logement

Valeur du logement

Il s'agit du montant que le propriétaire s'attendrait à recevoir s'il vendait le logement à un acheteur libre. Les chiffres présentés sur la valeur du logement se rapportent aux logements **individuels** non agricoles occupés par leur propriétaire.

Hypothèques

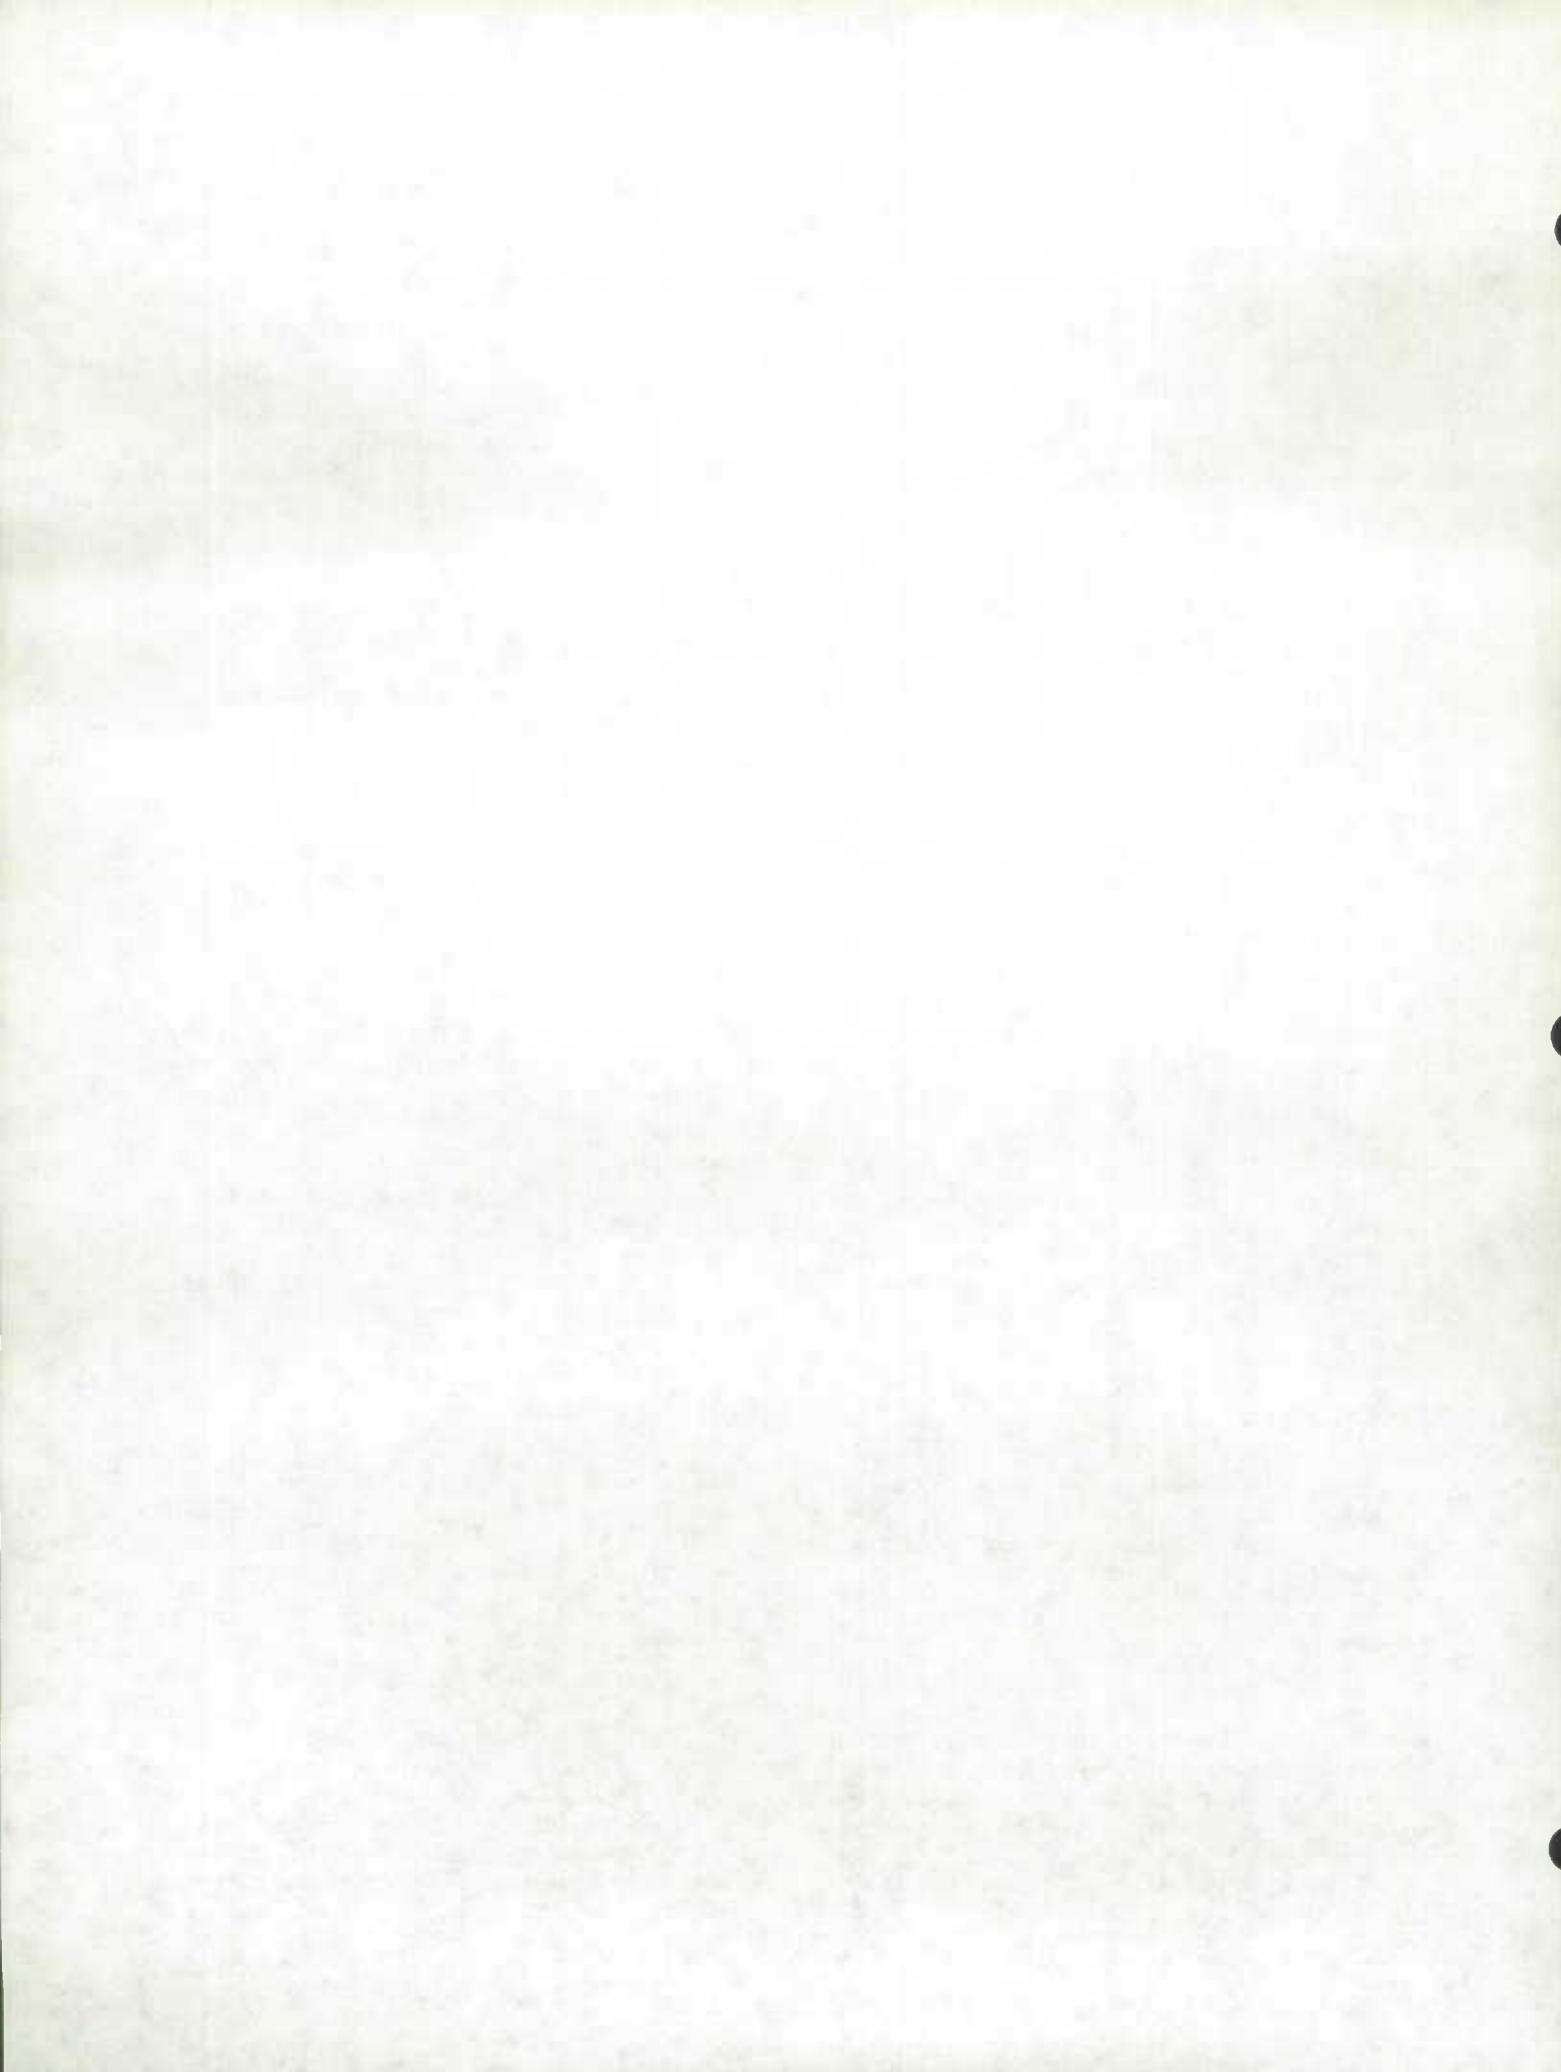

Cet élément vise les logements individuels non agricoles occupés par leur propriétaire et grevés de dettes. Un logement est considéré comme hypothéqué jusqu'à ce qu'il soit payé en entier. L'expression **hypothèque en cours** désigne le principal ou le montant encore impayé de toutes les hypothèques d'un logement.

Loyer mensuel en espèces

Se rapporte à la somme versée pour avoir le droit d'occuper un logement sans en être le propriétaire pendant le mois de l'enquête (avril 1972). Les chiffres portant sur les loyers mensuels en espèces visent tous les logements non agricoles occupés par un locataire.

Logements subventionnés

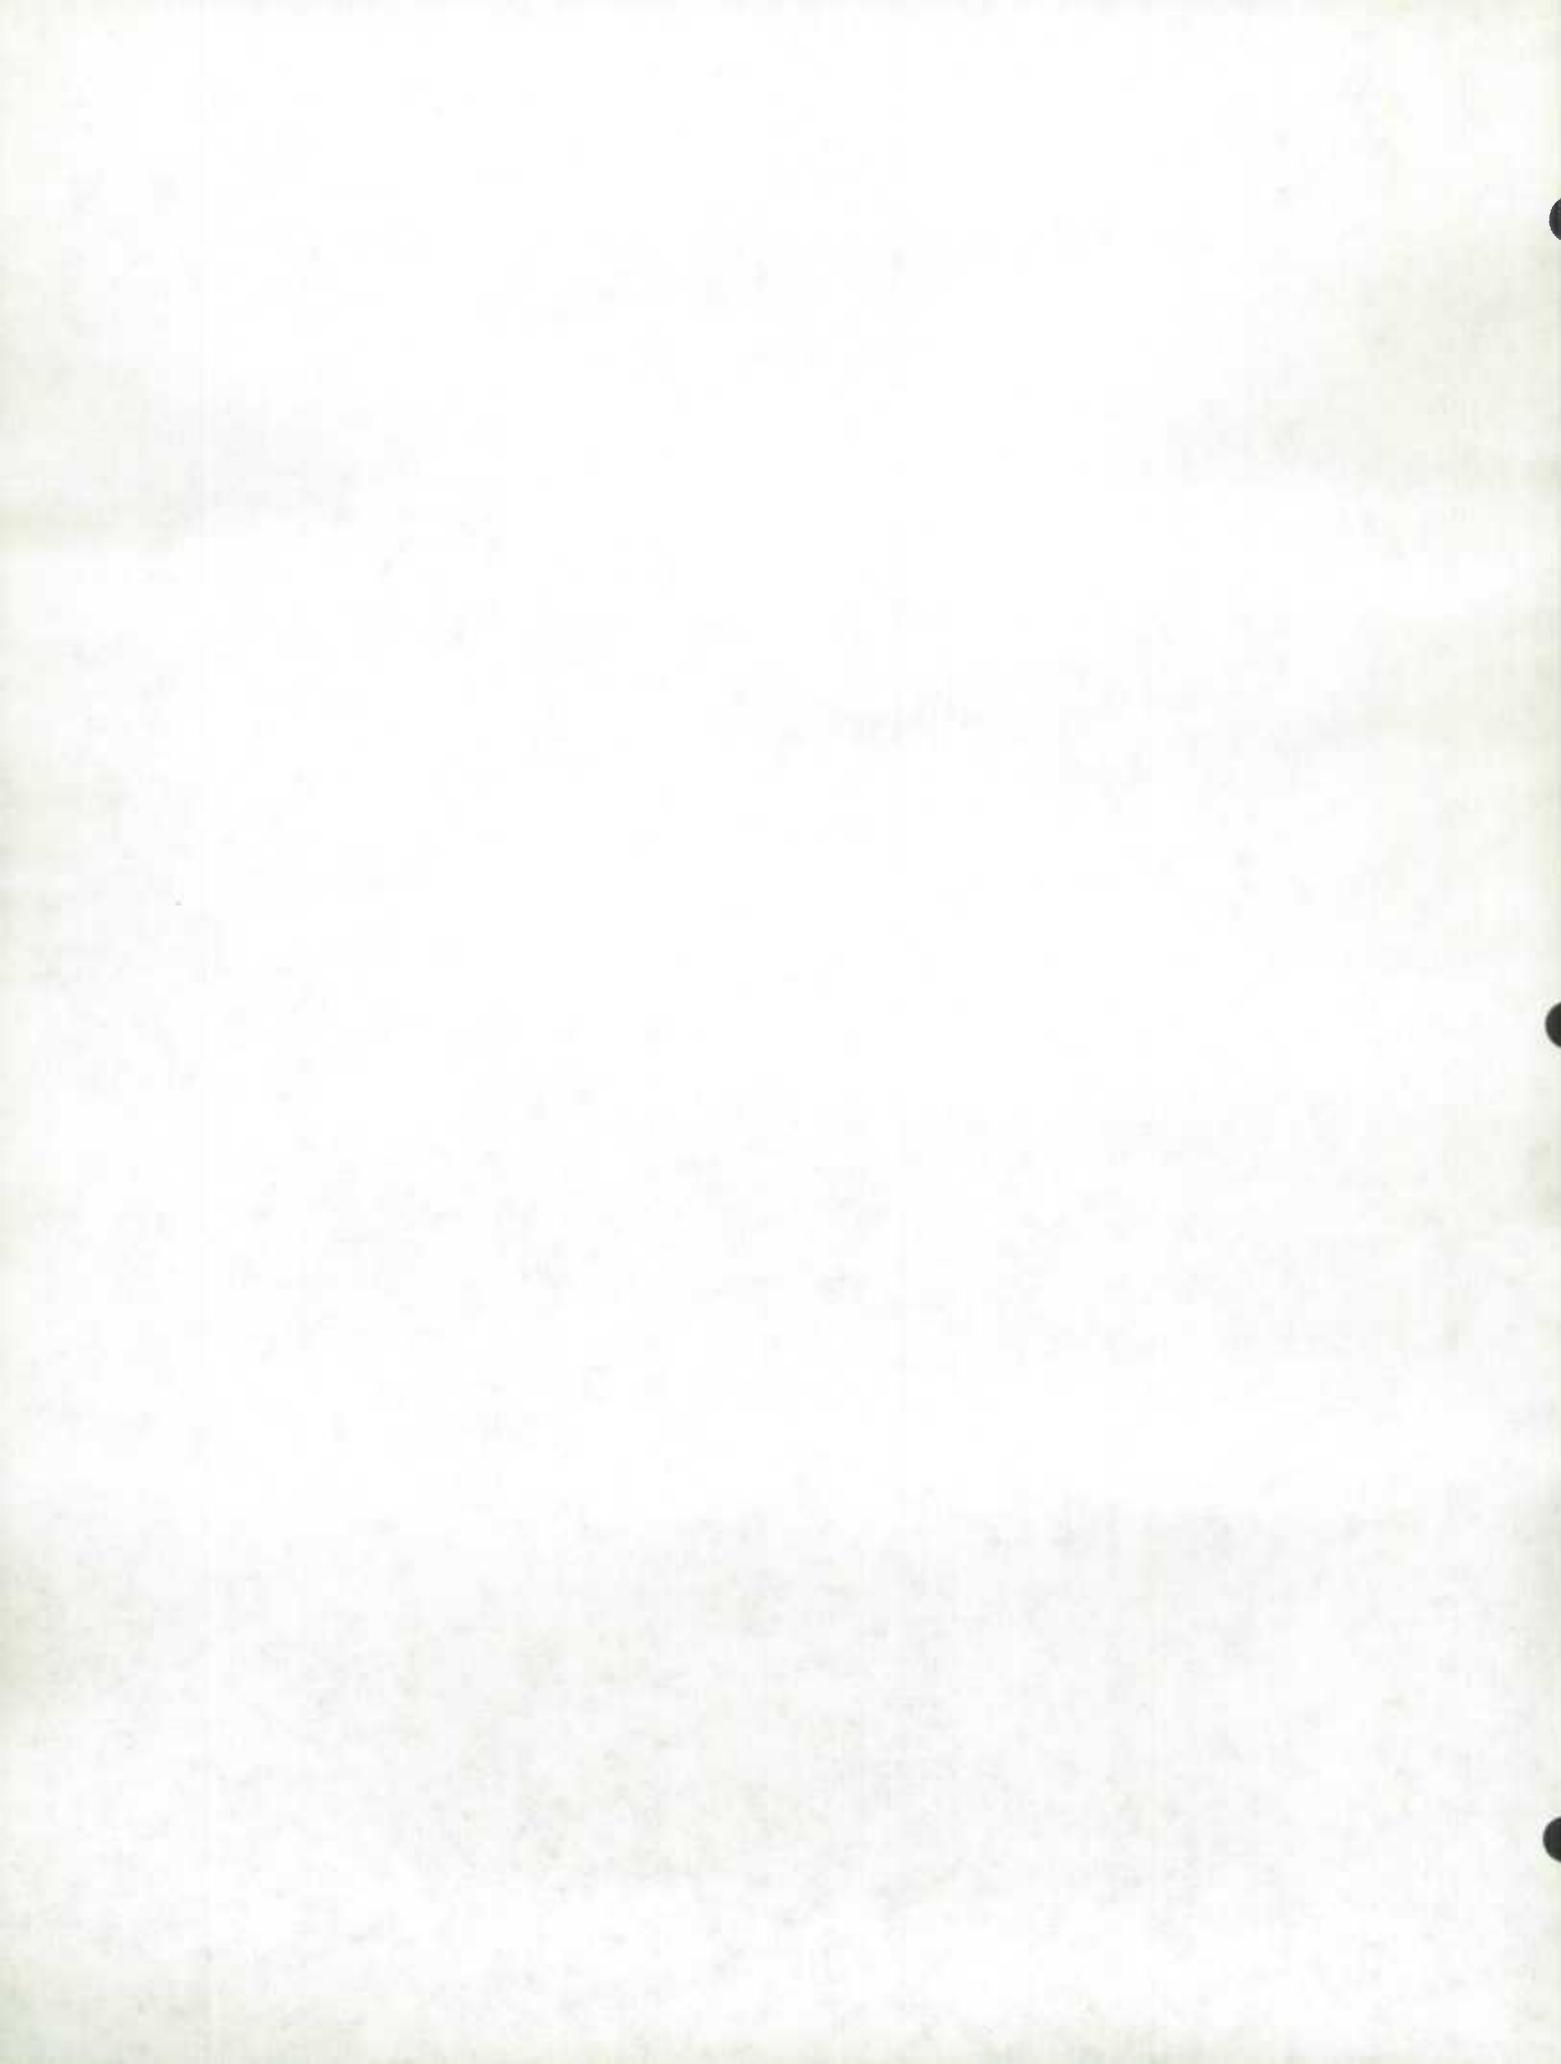

Il s'agit des logements directement ou indirectement subventionnés par a) les administrations publiques fédérale, provinciales ou municipales sous la forme d'une aide financière accordée à des projets de logement spéciaux; par b) les employeurs qui mettent des pièces d'habitation à la disposition de leurs employés moyennant un loyer symbolique ou un loyer réduit; par c) les propriétaires apparentés au locataire et qui lui accordent un traitement de faveur.

SECTION I

ALL HOUSEHOLDS SUMMARY TABLES

TABLEAUX SUR L'ENSEMBLE DES MÉNAGES

PART A. HOUSEHOLD AND DWELLING CHARACTERISTICS

Table

1. Percentage Distribution of All Households by Household Income Groups, by Region and by Household and Dwelling Characteristics, 1972.
2. Percentage Distribution of All Households Within Household Income Groups, by Region and by Household and Dwelling Characteristics, 1972.
3. Percentage Distribution of All Households by Household Income Groups, by Area of Residence and by Household and Dwelling Characteristics, 1972.
4. Percentage Distribution of All Households Within Household Income Groups, by Area of Residence and by Household and Dwelling Characteristics, 1972.
5. Percentage Distribution of All Households Within Household Income Groups, by Number of Persons Per Room and by Household and Dwelling Characteristics, 1972.
6. Percentage Distribution of All Households by Household Income Groups, by Tenure and by Household and Dwelling Characteristics, 1972.
7. Percentage Distribution of All Households Within Household Income Groups, by Tenure and by Household and Dwelling Characteristics, 1972.
8. Percentage Distribution of All Households Within Household Income Groups, by Type of Dwelling and by Household and Dwelling Characteristics, 1972.

PARTIE A. CARACTÉRISTIQUES DES MÉNAGES ET DES LOGEMENTS

Tableau

1. Répartition en pourcentage de tous les ménages selon la tranche de revenu du ménage, selon la région et les caractéristiques des ménages et des logements, 1972.
2. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon la région et les caractéristiques des ménages et des logements, 1972.
3. Répartition en pourcentage de tous les ménages selon la tranche de revenu du ménage, selon la région de résidence et les caractéristiques des ménages et des logements, 1972.
4. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon la région de résidence et les caractéristiques des ménages et des logements, 1972.
5. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon le nombre de personnes par pièce et selon les caractéristiques des ménages et des logements, 1972.
6. Répartition en pourcentage de tous les ménages selon la tranche de revenu du ménage, selon le mode d'occupation et les caractéristiques des ménages et des logements, 1972.
7. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon le mode d'occupation et selon les caractéristiques des ménages et des logements, 1972.
8. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon le genre de logement et selon les caractéristiques des ménages et des logements, 1972.

PART B. HOUSEHOLD FACILITIES
AND EQUIPMENT

Table

1. Percentage Distribution of All Households by Household Income Groups, by Region and by Household Facilities and Equipment, 1972.
2. Percentage Distribution of All Households Within Household Income Groups, by Region and by Household Facilities and Equipment, 1972.
3. Percentage Distribution of All Households by Household Income Groups, by Area of Residence and by Household Facilities and Equipment, 1972.
4. Percentage Distribution of All Households Within Household Income Groups, by Area of Residence and by Household Facilities and Equipment, 1972.
5. Percentage Distribution of All Households Within Household Income Groups, by Number of Persons Per Room and by Household Facilities and Equipment, 1972.
6. Percentage Distribution of All Households by Household Income Groups, by Tenure and by Household Facilities and Equipment, 1972.
7. Percentage Distribution of All Households Within Household Income Groups, by Tenure and by Household Facilities and Equipment, 1972.
8. Percentage Distribution of All Households Within Household Income Groups, by Type of Dwelling and by Household Facilities and Equipment, 1972.

PARTIE B. ÉQUIPEMENT MÉNAGER.

Tableau

1. Répartition en pourcentage de tous les ménages selon la tranche de revenu du ménage, selon la région et l'équipement ménager, 1972.
2. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon la région et l'équipement ménager, 1972.
3. Répartition en pourcentage de tous les ménages selon la tranche de revenu du ménage, selon la région de résidence et l'équipement ménager, 1972.
4. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon la région de résidence et l'équipement ménager, 1972.
5. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon le nombre de personnes par pièce et l'équipement ménager, 1972.
6. Répartition en pourcentage de tous les ménages selon la tranche de revenu du ménage, le mode d'occupation et l'équipement ménager, 1972.
7. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon le mode d'occupation et l'équipement ménager, 1972.
8. Répartition en pourcentage de tous les ménages compris dans chaque tranche de revenu du ménage, selon le genre de logement et l'équipement ménager, 1972.

SECTION II

SINGLE UNIT (FAMILY) HOUSEHOLDS TABLES

TABLEAUX SUR LES MÉNAGES UNIFAMILIAUX

PART A. HOUSEHOLD AND DWELLING CHARACTERISTICS

Table

1. Percentage Distribution of Single Unit (Family) Households by Household Income Groups, by Area of Residence and by Household and Dwelling Characteristics, 1972.
2. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Area of Residence and by Household and Dwelling Characteristics, 1972.
3. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Age of Head and by Household and Dwelling Characteristics, 1972.
4. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Education of Head and by Household and Dwelling Characteristics, 1972.
5. Percentage Distribution of Single Unit (Family) Households by Household Income Groups, by Number of Earners and by Household and Dwelling Characteristics, 1972.
6. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Family Characteristics and by Household and Dwelling Characteristics, 1972.
7. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Wife's Earnings Status and by Household and Dwelling Characteristics, 1972.

PARTIE A. CARACTÉRISTIQUES DES MÉNAGES ET DES LOGEMENTS

Tableau

1. Répartition en pourcentage des ménages unifamiliaux selon la tranche de revenu du ménage, la région de résidence et les caractéristiques des ménages et des logements, 1972.
2. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon la région de résidence et les caractéristiques des ménages et des logements, 1972.
3. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon l'âge du chef et les caractéristiques des ménages et des logements, 1972.
4. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon l'instruction du chef et les caractéristiques des ménages et des logements, 1972.
5. Répartition en pourcentage des ménages unifamiliaux selon la tranche de revenu du ménage, le nombre de salariés et les caractéristiques des ménages et des logements, 1972.
6. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon les caractéristiques des familles et les caractéristiques des ménages et des logements, 1972.
7. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon le statut de rémunération de l'épouse et les caractéristiques des ménages et des logements, 1972.

PART B. HOUSEHOLD FACILITIES
AND EQUIPMENT

Table

1. Percentage Distribution of Single Unit (Family) Households by Household Income Groups, by Area of Residence and by Household Facilities and Equipment, 1972.
2. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Area of Residence and by Household Facilities and Equipment, 1972.
3. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Age of Head and by Household Facilities and Equipment, 1972.
4. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Education of Head and by Household Facilities and Equipment, 1972.
5. Percentage Distribution of Single Unit (Family) Households by Household Income Groups, by Number of Earners and by Household Facilities and Equipment, 1972.
6. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Family Characteristics and by Household Facilities and Equipment, 1972.
7. Percentage Distribution of Single Unit (Family) Households Within Household Income Groups, by Wife's Earnings Status and by Household Facilities and Equipment, 1972.

PARTIE B. ÉQUIPEMENT MÉNAGER

Tableau

1. Répartition en pourcentage des ménages unifamiliaux selon la tranche de revenu du ménage, la région de résidence et l'équipement ménager, 1972.
2. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon la région de résidence et l'équipement ménager, 1972.
3. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon l'âge du chef et l'équipement ménager, 1972.
4. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon l'instruction du chef et l'équipement ménager, 1972.
5. Répartition en pourcentage des ménages unifamiliaux selon la tranche de revenu du ménage, le nombre de salariés et l'équipement ménager, 1972.
6. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon les caractéristiques des familles et l'équipement ménager, 1972.
7. Répartition en pourcentage des ménages unifamiliaux compris dans chaque tranche de revenu du ménage, selon le statut de rémunération de l'épouse et l'équipement ménager, 1972.

SECTION III

SINGLE UNIT (UNATTACHED INDIVIDUAL) AND
MULTI-UNIT HOUSEHOLDS TABLES

TABLEAUX SUR LES MÉNAGES INDIVIDUELS
(PERSONNE SEULE) ET SUR LES MÉNAGES MULTIPLES

**SINGLE UNIT (UNATTACHED INDIVIDUAL)
AND MULTI-UNIT HOUSEHOLDS TABLES**

Table

1. Percentage Distribution of Single Unit (Unattached Individual) Households Within Household Income Groups, by Tenure and by Household Facilities and Equipment, 1972.
2. Percentage Distribution of Single Unit (Unattached Individual) Households Within Household Income Groups, by Sex and by Household Facilities and Equipment, 1972.
3. Percentage Distribution of Single Unit (Unattached Individual) Households Within Household Income Groups, by Age and by Household Facilities and Equipment, 1972.
4. Percentage Distribution of All Multi-unit Households Within Household Income Groups, by Household and Dwelling Characteristics, 1972.
5. Percentage Distribution of All Multi-unit Households Within Household Income Groups, by Household Facilities and Equipment, 1972.
6. Selected Statistics on Multi-unit Households by Selected Characteristics of Household and Primary Economic Family, 1972.
7. Household and Dwelling Characteristics and Household Facilities and Equipment of All Single Unit Households by Income Status (1971) of Families and Unattached Individuals Who Maintained Independent Households, 1972.

**TABLEAUX SUR LES MÉNAGES
INDIVIDUELS (PERSONNE SEULE) ET
SUR LES MÉNAGES MULTIPLES**

Tableau

1. Répartition en pourcentage des ménages individuels (personne seule) compris dans chaque tranche de revenu du ménage, selon le mode d'occupation et l'équipement ménager, 1972.
2. Répartition en pourcentage des ménages individuels (personne seule) compris dans chaque tranche de revenu du ménage, selon le sexe et l'équipement ménager, 1972.
3. Répartition en pourcentage des ménages individuels (personne seule) compris dans chaque tranche de revenu du ménage, selon l'âge et l'équipement ménager, 1972.
4. Répartition en pourcentage de tous les ménages multiples compris dans chaque tranche de revenu du ménage, selon les caractéristiques des ménages et des logements, 1972.
5. Répartition en pourcentage de tous les ménages multiples compris dans chaque tranche de revenu du ménage, selon l'équipement ménager, 1972.
6. Certaines statistiques sur les ménages multiples, selon certaines caractéristiques des ménages et de la famille économique principale, 1972.
7. Caractéristiques des ménages et des logements et l'équipement ménager de tous les ménages individuels, selon la catégorie de revenu de 1971, des familles et des personnes seules qui ont occupé des ménages distincts, 1972.

SOURCES AND METHODS

Sources of Data

This report combines information from several surveys conducted by Statistics Canada in the spring of 1972. Demographic characteristics and information on income and mortgages originate with the 1972 Survey of Consumer Finances. Labour force-related characteristics of population come from the April 1972 Labour Force Survey. These two surveys were conducted simultaneously and covered the same sample of households.

The Survey of Household Facilities and Equipment was taken a month later, jointly with the May 1972 Labour Force Survey. The latter survey, through its regular supplement, provided data on rents.

For detailed description of methodology and other technical aspects related to individual surveys, please consult corresponding regular survey reports.¹ The questionnaires used in the above surveys are appended to this report with the exception of the regular Survey of Consumer Finances questionnaires which can be found in the main report.²

Coverage

The sample used for this project represents all households in Canada with certain exceptions. Excluded are: households in the Yukon and Northwest Territories; households on Indian reserves; institutional households; military camps; other collective-type households such as those living in hotels, large lodging houses, clubs, logging and construction camps.

Sample

Statistics given in this report are based on observations collected from 18,663 households. Due to the rotational feature of the Labour Force Survey sample, five-sixths of 35,000 dwellings selected for the April survey, remained in the sample for enumeration in May 1972. However, after vacant dwellings, non-resident and collective-type households were eliminated, there remained only the above-mentioned 18,663 households in the sample.

² See *Income Distributions by Size in Canada, 1971* (Catalogue 13-207).

SOURCES ET MÉTHODES

Provenance des données

La présente publication regroupe des données provenant de plusieurs enquêtes effectuées par Statistique Canada au printemps 1972. Les caractéristiques démographiques et les renseignements portant sur les revenus et les hypothèques sont tirés de l'Enquête sur les finances des consommateurs de 1972. Les caractéristiques de la population active proviennent de l'enquête sur la population active d'avril 1972. Ces deux enquêtes ont été menées simultanément et auprès du même échantillon de ménages.

L'enquête sur l'équipement ménager a eu lieu un mois plus tard, à l'occasion de l'enquête sur la population active de mai 1972. Cette dernière nous a fourni des données sur les loyers dans son supplément régulier.

Pour une description détaillée de la méthodologie et des autres aspects techniques de chacune des enquêtes, prière de consulter les rapports d'enquête réguliers correspondants¹. Vous trouverez en annexe à la présente publication les questionnaires utilisés dans les enquêtes précitées, à l'exception des questionnaires de l'Enquête sur les finances des consommateurs qui figurent dans la publication principale².

Champ de l'enquête

L'échantillon utilisé dans ce projet est représentatif de tous les ménages du Canada à quelques exceptions près. Sont exclus les ménages demeurant au Yukon et dans les Territoires du Nord-Ouest ou dans une réserve indienne, les institutions, les camps militaires ainsi que d'autres logements collectifs comme les hôtels, les grandes pensions, les clubs, les camps de bûcherons et les baraquements de travailleurs.

Échantillon

Les statistiques présentées dans cette publication sont fondées sur des données d'observation recueillies auprès de 18,663 ménages. À cause du renouvellement de l'échantillon de l'enquête sur la population active, les cinq sixièmes des 35,000 logements échantillonés en vue de l'enquête d'avril sont demeurés dans l'échantillon observé en mai 1972. Cependant, après élimination des logements inoccupés, des cas de non-réponse et des ménages collectifs, il ne restait que les 18,663 ménages susmentionnés dans l'échantillon.

² Voir *Répartition du revenu au Canada selon la taille du revenu, 1971* (n° 13-207 au catalogue).

Processing Methods

Conditions for the inclusion of a household in the sample for this study were as follows:

- (i) the household had to provide complete information for both surveys conducted in April 1972 (Labour Force and Consumer Finances),
- (ii) the household had to remain in the sample for at least another month (to be available for May 1972 Labour Force and Household Facilities and Equipment interviews).

The first of these conditions was somewhat relaxed in a few cases where in multi-unit households the primary economic family supplied complete details but the secondary family yielded some non-response in terms of income. Such households were retained in the sample after the missing income information had been assigned on the basis of the non-respondent's available demographic characteristics (such as, sex, age and relationship to head) and labour force characteristics (such as, labour force status, occupation and number of weeks worked). The procedure was to locate the nearest record on the survey file belonging to a respondent with similar characteristics and to assign the missing block of data from his record.

The second condition was also somewhat relaxed in cases where there was a change in the occupancy of a dwelling, or where, due to an error in household identification or due to the dwelling remaining vacant following the departure of previous occupants, corresponding household facilities and equipment details could not be located or otherwise obtained. In the first instance, it was assumed that the facilities and equipment reported by new occupants were identical to those that were available to previous occupants of the dwelling. In the second instance, the complete set of data was assigned from the nearest similar record, similar with regard to the type of dwelling, household size and the type of water supply.

The mortgage information which was collected only for non-farm owner-occupied dwellings required, due to its complexity, an extensive audit and frequent assignments. In many cases the missing details could be inferred from what was reported, but where the respondent was unable to supply the key data or any details at all other than stating that the dwelling was mortgaged, the entire set of data was assigned, again from the nearest similar record. Criteria used for assignment were the similarity of the following characteristics: area of residence, type of dwelling, age of head and primary economic family income.

Méthodes de traitement

Les conditions exigées pour qu'un ménage fasse partie de l'échantillon de la présente enquête étaient les suivantes:

- (i) le ménage devait fournir des renseignements complets aux fins des deux enquêtes effectuées en avril 1972 (Population active et Finances des consommateurs),
- (ii) le ménage devait continuer à faire partie de l'échantillon pour au moins un mois de plus (de manière à pouvoir se prêter en mai 1972 aux interviews relatives aux enquêtes sur la population active et sur l'équipement ménager).

Nous avons légèrement atténué la première de ces conditions dans quelques cas où, dans les ménages multiples, la principale famille économique fournissait des données complètes alors que la famille secondaire ne répondait pas complètement aux questions portant sur le revenu. On a conservé ces ménages dans l'échantillon après attribution des renseignements manquants sur la base des caractéristiques démographiques connues des non-répondants (le sexe, l'âge et le lien avec le chef) ainsi que de leurs caractéristiques sur le plan de l'activité, le statut d'activité, la profession et le nombre de semaines travaillées. Il s'agissait de repérer le dossier le plus proche du fichier d'enquête appartenant à un déclarant aux caractéristiques semblables et d'imputer les renseignements manquants d'après ce dossier.

On a aussi quelque peu adouci la seconde condition lorsqu'il y avait changement d'occupation d'un logement ou lorsqu'à cause d'une erreur d'identification du ménage ou à cause de l'inoccupation du logement à la suite du départ des occupants précédents, il était impossible de repérer ou d'obtenir les données voulues sur l'équipement ménager. Dans le premier cas, on a supposé que l'équipement décrit par les nouveaux occupants était identique à celui dont disposaient les occupants précédents du logement. Dans le second cas, toutes ces données ont été attribuées par déduction d'après le dossier qui semblait le mieux convenir, les points de ressemblance devant être le genre de logement, la taille du ménage et le genre d'alimentation en eau.

Les données sur les hypothèques, qui ont été recueillies seulement dans le cas des logements non agricoles occupés par leur propriétaire, ont dû en raison de leur complexité être vérifiées de façon poussée et, très souvent, être obtenues par déduction. Dans bon nombre de cas, il était possible de déduire les détails manquants à partir des renseignements fournis, mais lorsque le répondant était incapable d'indiquer les données essentielles ou aucun détail en dehors du fait que le logement était hypothqué, toute la série des données a été obtenue par déduction, là encore à partir du dossier qui contenait le cas le plus comparable. Les critères sur lesquels s'est fondé le choix du dossier pour servir de base à la déduction étaient la similitude des caractéristiques suivantes: la catégorie d'habitat, le genre de logement, l'âge du chef et le revenu de la principale famille économique.

Information on rents (also limited to non-farm dwellings) was first merged with the Household Facilities and Equipment Survey data file. Since both sets of data were collected simultaneously and neither survey presented any difficulties in terms of eliciting appropriate replies, there were no real problems in achieving successful integration of both files.

Following the consistency edit of the merged file (containing details from all used sources), the sample records were weighted to the estimated household totals.

The weighting process was carried out in two steps. First the sub-sample of family units selected for the project from the Survey of Consumer Finances was blown up to pre-determined totals of family units in accordance with the weighting procedure used in that survey. Then the weighting factors assigned to primary economic family units in households were adjusted to yield for each area of residence within a province a count of households that agreed with the corresponding total from the Survey of Household Facilities and Equipment.

Discrepancies between estimates contained in this report and those appearing in the Household Facilities and Equipment report are due mostly to the fact that both samples are not identical. There is also a minor difference in coverage (for example, certain private households, such as those residing in trailers or summer cottages, are represented in this publication but not in the Household Facilities and Equipment report).

Reliability of Estimates

The estimates in this report are based on a sample of households and are likely to differ from results obtained on the basis of enumeration of the entire population. The sampling variability and errors caused by faulty response and bias introduced by non-response are discussed in the primary reports³ for which the data were collected. The estimates in this report have inherited these elements.

The samples for the two surveys, which form the data source for the present report, were selected from within the monthly labour force sampling framework which uses a stratified clustered sampling scheme. Sampling errors from such a complex sampling scheme are difficult to derive and are generally higher than the sampling errors of simple random samples of the same

³ See Catalogue 13-207, 1971, pp. 121 to 125, and Catalogue 64-202, 1972, pp. 7-8.

Les renseignements concernant les loyers (limités, là aussi, aux logements non agricoles) ont d'abord été incorporés à ceux des dossiers de l'enquête sur l'équipement des ménages. Étant donné que les deux séries de données ont été recueillies en même temps et qu'il n'y a pas eu de difficultés à obtenir les réponses appropriées dans les deux enquêtes, l'intégration des deux dossiers s'est effectuée pratiquement sans problèmes.

Après vérification de l'uniformité des dossiers fusionnés (contenant des données provenant de toutes les sources), on a pondéré les chiffres des dossiers de l'échantillon en fonction du total estimatif des ménages.

Le travail de pondération a été effectué en deux étapes. En premier lieu, le sous-échantillon des unités familiales choisies pour le projet à partir de l'Enquête sur les finances des consommateurs a été gonflé au niveau du nombre pré-établi des unités familiales conformément à la méthode de pondération utilisée dans cette enquête. Les facteurs de pondération affectés aux unités familiales économiques principales dans les ménages ont été ajustés de façon à produire pour chaque lieu de résidence dans une province un nombre de ménages conforme au total correspondant de l'enquête sur l'équipement ménager.

Toute discordance entre les estimations présentées dans le présent document et celles figurant dans la publication "L'équipement ménager" est attribuable en majeure partie au fait que les deux échantillons ne sont pas identiques. Il y a également une différence mineure en ce qui concerne le champ de l'enquête (par exemple, certains ménages privés, tels que ceux demeurant dans des roulettes ou des chalets d'été, sont pris en compte dans la présente publication mais non dans celle intitulée "L'équipement ménager").

Fiabilité des estimations

Les estimations contenues dans le présent rapport sont fondées sur un échantillon de ménages et de ce fait, peuvent être différentes des résultats obtenus à partir du dénombrement de toute la population. La variabilité et les erreurs d'échantillonnage causées par des réponses fausses et, les biais causés par la non-réponse sont examinés dans les rapports provisoires³ qui portent sur les données primaires. Les estimations figurant dans le présent rapport ont hérité de ces éléments.

Les échantillons des deux enquêtes, qui constituent la source des données du présent rapport, ont été choisis à l'intérieur de l'échantillon mensuel de la population active, qui s'établit à partir d'un plan de sondage stratifié en grappes. Il est difficile de déceler les erreurs d'échantillonnage dues à un plan de sondage aussi complexe; de plus, leur nombre est généralement supérieur à celui des

³ Voir au catalogue le n° 13-207, 1971, p. 121 à 125 et le n° 64-202, 1972, p. 7-8.

size. Statement A gives approximate estimates of errors of percentages for different sample sizes. Thus, referring to Table 1A, the "under \$2,000" income class contains 5.0% of all households in Ontario having a garage. This estimate was determined from a sample of 1,961 cases (also from Table 1A). From Statement A, an estimate of 5.0% based on a sample size of 2,000 has an approximate standard error of 1.0%. Consequently, the 95% confidence interval for the percentage of households in Ontario with a garage in the "under \$2,000" income class is 3.0% to 7.0% ($5.0\% \pm 2.0\%$).

To assist in calculating confidence intervals for percentages, some tables have the sample sizes provided. However, it was found inconvenient to insert sample sizes by income classes; these are provided in this section in Statements B, C and D.

erreurs d'échantillonnage rencontrées dans des échantillons aléatoires simples de même taille. L'état A donne des estimations approximatives des erreurs de pourcentages pour différentes tailles d'échantillon. Ainsi, en ce qui concerne le tableau 1A, 5.0 % de l'ensemble des ménages de l'Ontario ayant un garage se trouvent dans la tranche de revenu "moins de \$2,000". Cette estimation a été faite d'après un échantillon de 1,961 cas (toujours d'après le tableau 1A). L'état A indique qu'une estimation de 5.0 % basée sur un échantillon de 2,000 cas présente une erreur type d'environ 1.0 %. Il en résulte que l'intervalle de confiance de 95 % pour le pourcentage des ménages de l'Ontario ayant un garage et qui se trouvent dans la tranche de revenu "moins de \$2,000" varient entre 3.0 % et 7.0 % ($5.0\% \pm 2.0\%$) de l'ensemble des ménages ayant un garage.

Pour faciliter le calcul des intervalles de confiance des pourcentages, la taille de l'échantillon est indiquée dans certains tableaux. On a cependant jugé peu pratique d'indiquer la taille de l'échantillon dans les tableaux qui contiennent une répartition par tranche de revenu; on trouvera ces indications dans les états B, C et D de la présente section.

STATEMENT A. Approximate Standard Errors of Percentages¹

ÉTAT A. Estimation des erreurs types de pourcentages¹

Sample size ² n	Percentage of units having a characteristic Pourcentage d'unités présentant une caractéristique									
	Taille de l'échantillon ² n		1 or - ou 99	2 or - ou 98	5 or - ou 95	10 or - ou 90	15 or - ou 85	25 or - ou 75	40 or - ou 60	50

1,500		0.5	0.8	1.1	1.5	1.9	2.2	2.6	2.6	2.6
2,000		0.4	0.6	1.0	1.3	1.6	1.9	2.2	2.2	2.2
2,500		0.4	0.6	0.9	1.2	1.4	1.7	2.0	2.0	2.0
3,000		0.4	0.5	0.8	1.1	1.3	1.6	1.8	1.8	1.8
5,000		0.3	0.4	0.6	0.8	1.0	1.2	1.4	1.4	1.4
7,500		0.2	0.3	0.5	0.7	0.8	1.0	1.1	1.1	1.1
10,000		0.2	0.3	0.4	0.6	0.7	0.9	1.0	1.0	1.0
15,000		0.2	0.2	0.4	0.5	0.6	0.7	0.8	0.8	0.8
20,000		0.1	0.2	0.3	0.4	0.5	0.6	0.7	0.7	0.7

¹ This table is derived from the formula $\sqrt{\frac{PQ}{n}}$ where P = the percentage of the population with a given characteristic, Q = 100 - $\sqrt{\frac{PQ}{n}}$

P and n is the sample size. Thus on the assumption that standard errors for the estimates in this publication are twice as large as those in simple random sampling from a binomial population then each entry in this table would equal approximately the standard error of the estimate. — Ce tableau a été établi d'après la formule $\sqrt{\frac{PQ}{n}}$ où P représente le pourcentage de la population présentant une caractéristique déterminée, Q est égal à 100 - P, et n représente la taille de l'échantillon. Si l'on admet donc que les estimations de la présente publication sont affectées d'écart types deux fois plus grands que s'il s'agissait d'un échantillonnage stochastique simple parmi une population binomiale chacun des chiffres de cette table devrait être à peu près égal à l'écart type d'estimation.

² For sample sizes greater than 20,000, if n is multiplied by 100 the sampling error is divided by 10. Generally, if n is multiplied by "a", then the sampling error is divided by \sqrt{a} . — Pour les tailles d'échantillon supérieures à 20,000, si on multiplie par 100, l'erreur d'échantillonnage est divisée par 10. En règle générale, si on multiplie n par "a", l'erreur d'échantillonnage est divisée par \sqrt{a} .
