Quality Discount sells the following to the narrow web label & tag printing industry:

Anilox Cleaning Solutions	Nip Rollers (new and recovered)
Anilox/Print Cylinder Service Carts	Plant Industrial Supplies & Equipment
Anilox Roll Cleaning Brushes (Brass/Stainless)	Plate Cutters
Arpeco Parts and Accessories	Plate Mounters-Many Styles
Chrome Anilox Rollers	Roll handling Equipment
Corecutters Manual & Semi-Automatic	Servo Slitter Rewinders
Core Holders (new and repair)	Slitter Knives (new and resharpened)
Corona Treaters	Slitter Knives - Circular & Horizontal
Counters	Splicing Tape
Cushion Mount Tape	Stackers / Conveyor Top & Bottom
Delam / Relam Units	Static Eliminator Systems & Tinsel
Die Hoists (Press Mount & Mobile)	Strobes (new, repairs bulbs)
Digital Equipment	Table Top Rewinders
Dr. Blades (all types)	Teflon Heat Shrink Idler Cover
Dr. Blade Assemblies	Teflon & Knubby Tape
Fiber & Nylon Die Washers	Tint Sleeves/Mandrels
Fountain Wipers	Trim & Waste Removal Systems
Gallus Parts - Wash-Up Blades	Turn Bars
Hot & Cold Foil Stamping Units	Turret Rewinders
Impreglon & Praxair Ceramic Anilox Rolls	Ultrasonic Cleaners
Inline/Off-line Fan Folders	U.V. Curing Systems & Bulbs
Ink Pumps & Accessories/Tubing	Video Inspection Systems/Web Inspection
Mark Andy Parts & Accessories	Web Guides/Web Cleaners
Meter Rollers (New and Recovered)	Webtron 650/750 Parts

tesa Softprint Foam

Tesa offers flexo printers the opportunity to choose between different adhesive systems to guarantee optimal process efficiency during the mounting, printing and de-mounting processes.

The Tesa Softprint plate mounting tape assortment offers several proven process benefits for today's flexo printers around the world. The wide and balanced range of different hardnesses allows printers to select exactly the right impression that fits the requirements for each specific job and design.

From the softest foam for the finest screens while reducing press bouncing stripes, up to the hardest foam for solids while avoiding pin holing and delivering a perfect solid area density

Tesa Softprint Steel Master Tape (15 mil, 27.5 yards)

52015: Foam plate mounting tape (medium-hard) for printing combinations and solids, Superior recovery behavior for excellent print quality

52017: Foam plate mounting tape (Soft) for printing combinations and screens. Long lasting recovery characteristic for extended and high speed print runs

52018: Foam plate mounting tape (Extra Soft) for printing screens. The ideal plate mounting solution in combination with harder, digital plates (for finest screens)

Tesa Softprint Steel Master TP Tape (15 mil, 27.5 yards)

52115: Foam plate mounting tape (Medium Hard) for printing combinations and solids. Optimized for the use of thin plates and short runs with quick change over

52117: Foam plate mounting tape (soft) for printing combinations and screens. Optimized for the use of thin plates and short runs with quick change over

52118: Foam plate mounting tape (extra soft) for printing screens. Optimized for the use of thin plates and short runs with quick change over

NEW Tesa Softprint Secure with Snap-on Adhesive (15 mil, 27.5 yards)

52815: Medium hard for combinations/solids and mounting of flexographic printing plates onto steel/aluminum and glassine cylinders and sleeves

52817: Medium soft for combinations/screens and mounting of flexographic printing plates onto steel/aluminum and glassine cylinders and sleeves

52818: Soft for screens/halftones and mounting of flexographic printing plates onto steel/aluminum and glassine cylinders and sleeves

Part #	Description	Part #	Description
50658	Provides the utmost in security and reliability when it comes to the standard splicing applications	52325	Pink high-adhesion tape for the mounting of photopolymer plates in flexographic printing
52020	The industry's most advanced 20 mil foam tape for combination printing.	52338	Eliminates pin-holing, and with an embossed pp liner, minimizes air entrapment when positioning plate and tape
52021	Designed for mounting thicker photopolymer plates in paper flexographic and wide web film printing.	52350	Engineered to hold both rubber and photopolymer printing plates, product of choice for solid printing applications
52060	The 60 mil closed cell foam tape is designed to reduce plate vibration and foam fatigue during long print runs.	52380	This 15 mil, low density closed cell pe foam tape, perfect for the highest precision in printing screen work.
52230	A strong bonding, highly flexible 15 mil cloth tape for bonding rubber plates for solid print jobs.	52382	High performance 15 mil closed cell pe foam plate mounting tape, engineered to excel in combination print work.
52310	4 Mil transparent film tape for mounting photopolymer plates on printing cylinders or on mylar sheets	52500	High quality double-coated 20 mil closed cell pe foam tape for both rubber and photopolymer printing plates.
52315	Yellow high-adhesion tape for the mounting of photopolymer plates in flexographic printing	52506	Combination of closed cell foam and stabilizing film promotes the release of air bubbles

IDLER ROLL WRAP

SPLICING TAPE

A colored upvc film with a rubber adhesive system that provides excellent adhesion and ensures the highest performance. It is resistant to moisture, solvent and alkalis. This product is an excellent choice for color coding, splicing, edging and general purpose packaging. Available in red, clear, yellow, green blue , black, orange or any other color!
1" - 72 Rolls per case / 1.5" - 48 Rolls Per case / 2" - 36 Rolls per case

KNUBBY TAPE

Sometimes called "basketball tape", this tape consists of a specially treated fabric covered with a silicone rubber coating. This embossed surface is light gray and color and is highly resistant to "sticky" substances yet provides a reliable "non-slip" effect on smooth substrates. Non-slip properties are maximized and prolonged by the embossed surface. Standard size 2" x 27.5 yards, many other widths available.

HIGH FRICTION TAPE

This tape consists of a specially treated fabric covered with a silicone rubber coating, light gray in color with a liner. This surface is highly resistant to "sticky" substances yet provides a reliable "non-slip" effect on smooth substrates. Non-slip properties are maximized by the smooth surface.

Standard size 2" x 27.5 yards, many other widths available.

CORK (ADHESIVE BACKED) TAPE

Durable, silastic coated woven tape that eliminates mess on idler rollers. Standard sizes 1" or 2" wide x 27.5 yards Also available in other sizes!

TEFLON IDLER TAPE

An idler roll covering tape that allows your web glide without a grab. Standard sizes 1" or 2" wide x 36 yards per roll. Also available up to 18" rolls.

ADHESIVE BACKED GRIT TAPE

Standard sizes 2" wide x 50 foot Available grits 120 and 220

CT ROLLER WRAP

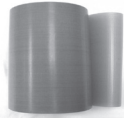

Durable, silastic coated woven tape that eliminates mess on idler rollers. Standard sizes 2" Wide x 27.5 Yards

IDLER ROLL WRAP

TEFLON / FIBERGLASS TAPE WITH LINER

5480-WL Roll covering tape with brown liner (yellow knobby liner) teflon/fiberglass.
1" or 2" wide x 3
6 yards per roll. Also
available up to 18" rolls.

DIMPLED TAPE (4568) 2" wide x 27 yards. *Similar to knobby tape 4863.* Printers roller wrap embossed, black in color.

TRACTION TAPE (3M5401) 2" wide x 36 yard roll *Terrific substitute for Knobby tape!* Silicone surface enhances friction, and provides non-stick properties that resist build-up

LOOP & HOOK TAPE An excellent low cost adhesive backed hook & loop tape.

V-3527 loop = soft;
v-3527-h-blk hook = hard

2" wide x 75 foot

PRAXAIR ANILOX ROLLS

FOR EVERY PRINTING PRESS

**Free Anilox
Roll Cover with
Every Roll!!**

Art and Rev Rolls

Innovative and Unique

Ink Metering Technology

Praxair Surface Technologies outstanding Proline Series of engravings is now available with two of Praxair's most exceptional and innovative developments: ART (Anilox Reverse Technology) and REV (Revolutionary Engraving).

Proline Anilox engravings have revolutionized the pressroom and ink metering technology with their low porosity, extended wear, superior densities and customized solutions for your printing challenges. When you combine the many features of ART and REV engravings, you now have the best of both worlds.

Smooth Coverage,

Yet Unbelievable Volumes

Proline-Art engravings feature a distinctive appearance due to their unusual cell configuration. The raised position between the cells supports your doctor blade while the smooth finished engraved surface provides a superior surface for ink or coating lay down. These two features provide exceptional uniformity of coverage virtually eliminating pinholing and possibly the need for a double bump. Compatible with conventional laser engraving technology, Anilox volumes can nearly be doubled, exceeding over 90 BCM/ Do you need to produce thick, yet smooth lay downs of adhesives, varnishes, metallic, or high solids content coatings? An ART engraving can help improve and optimize your printed or coating product.

Clean Up is a Snap.

As an added benefit, both ART and REV engravings offer improved clean-up processes as there are no deep cell bottoms to trap inks, coatings and adhesives. Their unique cell structure and smooth engraving surface provides fast and simple clean-up.

IMPREGLON ANILOX ROLLS

Lowest Prices!

Impreglon Anilox Rolls use HQP Fiber Optic Engraving, a laser engraving technology that has the ability to produce high line screen / high volume engravings with smooth, glass like cell linings.

High line count rolls with unmatched quality and consistency

10%-15% better ink release than YAG

Easier and quicker cleaning and maintenance

Reduced plugging on press during long runs

Comes with an excellent 2 Year Warranty

Anilox Roll Reconditioning also available at low prices

Maximum anilox roll dimensions are:

- * Journal to Journal: 118 inches
- * Face Length: 96 inches
- * Diameter: 14 inches

SUPERCCELL ANILOX STORAGE CARTS

- Up to 4" outside diameter, 1/4 thick
- Holds up to an 18.5" Face Length Safety Hooks
- Holds up to maximum weight of 1000 lbs
- Steel Structure with/ heavy-duty 5" swivel wheels
- Easy to move from one location to another with handle
- Dimension: Width 25", Height 42", Length 30"
- This is an "A" Frame design
- Optional SuperCell Anilox roll covers available
- Wheels can be removed for permanent positioning

P/N SUPER-ANILOX
Up to 12 Roll Capacity

Other Custom Sizes Available At Low Costs!!

P/N SUPER-ANILOX-24
24 Roll Capacity
Up to 16" Face Length

P/N SUPER-ANILOX-24
Up to 24 Roll capacity

EZ—Clean Anilox Roll Cleaner

Part # CARE PADS 10 -
Sold in Packs of 10

Part # CARE PADS 20 -
Sold in Packs of 20

The EZ-Clean is designed to use the Pamarco CARE™ Pad that offers more contact surface area and finer bristles to get into your cells resulting in a better scrub for your anilox roll. The EZ-Clean is air powered. Its orbital action and pad provide the mechanical agitation necessary for your cleaner to work without hand scrubbing. Look at the results from an actual case. In just a couple of minutes with Deep Clean Ultra and the EZ-Clean an increase from 42% to 90% in Effective Cell Volume.

HAND CLEANERS

HAND SANITIZER

- Kills 99.9% of Germs
- Contains 62% Ethyl Alcohol
- Safely sanitizes and reduces the presence of bacteria on skin
- No Sticky Residue
- Moisturizes and Softens Skin
- Fragrance Free
- Leaves hands feeling clean & refreshed
- No water or towels needed
- Environmentally Safe
- Available in 1 gallon, 5 gallon, drums & totes
- **Part # 801-C**

QD HAND CLEANER

- Heavy Duty Citrus Cleaner
- Water Soluble
- Use With or Without Water
- Grit for Extra Cleaning
- Available in Individual 16oz bottles, cases of 6 or 1 Gallon Containers
- Part Number: QDHC

BORAXO HEAVY DUTY HAND SOAP

- Recognized for over 100 years for the ability to gently scrub away the deepest grime.
- Contains no phosphates.
- 100% soluble.
- Won't clog drains or harm fixtures.
- Heavy-duty formula contains larger granules for quicker cleaning and extra scrubbing action.

GOJO® NATURAL* ORANGE™ PUMICE HAND CLEANER

Quick-acting lotion formula with pumice scrubbing particles for cleaning a broad range of industrial soils, medium dirts and grease. Orange citrus scent. (*Natural citrus ingredient)

UV HAND CLEANER

To protect lab and packing department personnel against harmful ink exposure, ink manufacturers rely on our specially formulated, waterless SAF-T-CURE® UV HAND CLEANER.

Ideal for removing UV/EB curable inks, coatings and adhesives from the skin, our UV Hand Cleaner contains a proprietary neutralizing ingredient consisting of microfine, grit-free particles that provide extra abrasion cleaning agents.

And, unlike other commercial hand cleaners, SAF-T-CURE® UV HAND CLEANER does not contain any harmful organic solvents. Instead, a unique additive is included to counteract the irritation effect of UV/EB materials while softening and protecting the skin.

After use, a thin layer continues providing additional protection from water-insoluble irritants. Available in pint, quart, and gallon sizes. Also available with pumice in the gallon size.

CLEANERS, SPRAYS, & ANILOX CLEANERS

QDPP&E now offers Yellow Magic™, a non-HazMat, environmentally safe cleaner. This water-based cleaner can safely clean virtually everything on a press. Yellow Magic is terrific when used in an Ultrasonic cleaning machine or in a parts washer. It can even clean cement floors.

Just spray and wipe!

Features:

- Non-toxic
- Manufactured in America
- Non-flammable – Can be disposed of as ordinary garbage (not a HazMat like other cleaners) ... just filter Yellow Magic through 50 micron screen to take out contaminants before disposing
- Zero swelling – The Graphic Arts Technical Foundation (GATF) testing on rubber surfaces found that Yellow Magic caused 0% swelling.

The CR-1 Cleaning Solution comes in a 6 or a 55 gallon pail and is concentrated to be mixed with water up to a 5:1 Ratio.

This solution works over and over again

The most powerful, corrosive ink eating agent specially formulated to clean water based inks. The special anti-rust additive will prevent rusting and corrosion of any metal. Clean the most difficult water-based inks from the dirtiest anilox rolls using our strongest ink removing blend yet.

- Specially formulated for extremely problematic water based ink cleaning.
- Performs best as a daily or periodic cleaner, on-press or off press, in a soak tank, recirculation or ultrasonic anilox cleaning systems.
- Save time and money with this highly dilutable formula that will last you longer and be more cost effective.
- Essential for those tough clean-ups or for removing older set-in inks anywhere in your pressroom.
- No-residue formula leaves all anilox's clean and ready-to-use

QD-1 ANILOX CLEANING SOLUTION

The most powerful corrosive ink removing agent in the market today, QD-1 is specifically formulated for the quick removal of films and camouflage. It is an extra strength, fast-acting cleaner for use in the printing industry, and restores anilox rolls to original specifications

- Eliminates the cost of returning Anilox rolls for recoating due to plugged cells
- Significantly improves colors and density
- Non-Flammable, Non-fuming & Non- Combustible

Available in
6 Gallon,
30 Gallon and
55 Gallon Drums

- Money Back Guarantee -

QD PASTE

A revolutionary cleaner for hand cleaning anilox rollers in and out of press.

Available in cases of
16 oz bottles.

Part # QDP-GRIT

ULTRA 101 & 102

This is a general purpose cleaner that can clean virtually anything in a press, even the cement floor! Ultra 101 & 102 is a virgin grade blend of the highest quality ingredients and maximum concentration of liquid detergent and ink solvers. This solvent free formula can take the place of highly corrosive materials that can damage or pit equipment

Features:

- No VOC
- Non-Corrosive
- Perfect for Soft Metals (No Pitting)

The Secret is the
Re-Wet-O-Matic Technology

Available in
Spray Bottles,
5 Gallon, 30 Gallon &
55 Gallon Containers

CT10 AUTO - SERVO CORE CUTTER

Delivers value, speed, versatility and longevity. The CT10 has been the industry standard core cutter for over 20 years. Built with heavy-duty components to exacting specifications, the CT10 will continue to produce perfectly cut cores fast and accurate every time for years.

CT10 is an automatic core cutter with a fully automated cutting cycle. It is well known for its versatility and high throughput. It is also user friendly making it sustain its leadership position for the last 10 years in the industry.

To load a parent core, the operator switches the load/run selector switch to "Load" and slides the core onto the mandrel. He or she then sets the end stop to the proper designated length and sets the target in position of the core. He or she then presses the motor start push button and switches the load/run selector switch to run. The machine will advance the core until the core makes contact with the end stop. The end stop will start the cutting cycle on the machine. The core will get cut and drop, then the machine will advance the core for the next cut.

Features:

- 60", 90" or 120" parent core length capability (Custom sizes are available)
- 1" – 12" internal diameter capability
- .625" maximum wall thickness
- .250" minimum cut core width
- .010" cut core width tolerance for the CT10 Automatic (.005" for the Servo Machine)
- 5 minute core size conversion process
- One minute core width change
- Clean, square burr-free cuts
- Built-in reference scale
- Micrometer end stop adjustment
- Parent core support with loading ram (optional)

SUPERCELL MANUAL CORECUTTER

Replacement
Knives also
available.
*Call us for a
brochure today!!*
Part # 707

*These units are
sweeping the
market!!!*

- 60" raw tube handling capacities
- Standard 3" mandrel and anvil
- Includes end stop
- 1" through 6" working I.D. range
- Smooth and efficient operation
- Virtually maintenance free

ROLL SAVERS

MARK 1 AND 2 ROLL SAVER

Save your crushed cores with Mark 1 and 2 Roll Savers. These roll savers are designed to re-open crushed cores, allowing for shaft insertion on rolls that would otherwise be considered scrap material. The Roll Saver provides a return on your investment with its first use as the cost is comparable to that of a damaged roll, creating a positive impact on the profit margins and warehouse space. Air shafts cannot be inserted into rolls with even the slightest deformation, leaving damaged roll useless.

Key Features

- Easy to use
- Fully transportable - lightweight design can be used virtually anywhere
- Trouble-free operation - easy to operate hydraulics provide up to 4 tons of thrust, giving you fast results
- Cost effective - return on your investment can occur with your first salvaged roll!

	Mark I Roll Saver	Mark II Roll Saver
Core ID:	2-3/4 inches to 3 inches	2-3/4 inches to 3 inches
Penetration:	*36 inches	10 inches
Weight (body only):	37 lbs	N/A
Weight (with pump):	57 lbs	19 lbs
Hydraulic Pressure:	10,150 psi	9,000 psi
For Roll Diameters up to:	70 inches	45 inch diameter, 36 inch width
Expansion	Approximately 1/4 inch above nominal core	

COREHOLDERS/PROTECTORS

CORE HOLDERS

Expanding Shafts, Chucks, Adapters and Accessories for all presses.
Call For Details On Repairing Core Holders

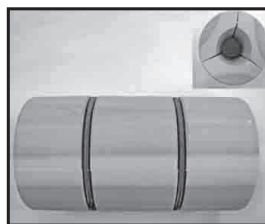

Trapper Leaf Shaft

Lightweight Aluminum

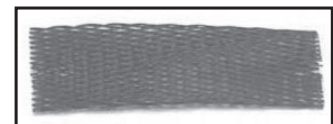

WOODEN CORE ADAPTERS

Sturdy, economical design includes metal high tension springs and durable hardwood 3" id and up to 6" od any length up to 18"

Q-GUARD

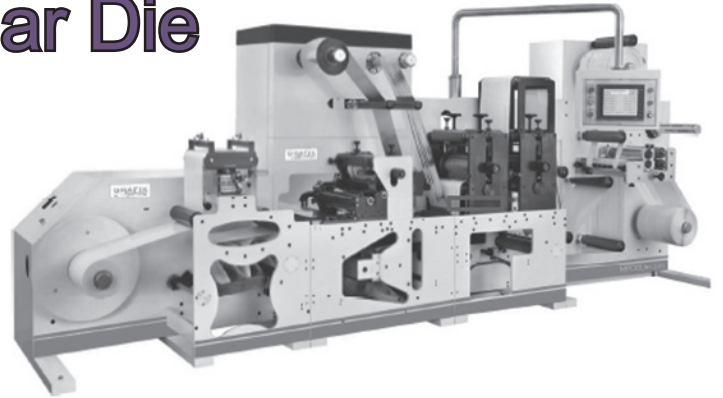

This low-density polyethylene netting is highly elastic, and has a soft, cushioned feel. Q-Guard stretches up to twice its diameter and is our most economical tubular sleeve for the protection of coreholders.

**Available to fit
2" - 3" or 4" - 5.5"
or 6" - 7"

DIE CUTTING EQUIPMENT

MDCS-336 13" Modular Die Cutting System

System Specifications: 13" wide

Maximum Stock Width -----	13.750" (350mm)
Maximum Die cutting Width -----	13" (330mm)
Print Repeat -----	8"-25" (203~635mm)
Maximum Unwind Diameter -----	30" (762mm)
Maximum Rewind Single -----	30" (760mm)
Maximum Rewind Single -----	30" (760mm)
Gearing -----	1/8"cp
Die station -----	3/4" steel side frames
Modular units -----	open frame

REMOTEDIESTATION

Finally, a cost effective way to add die station capability between print stations!

- Adds the capability to print or varnish over your hot stamping process
- Easily add other die station capabilities such as die cutting, laminating, heat sealing or slitting
- Designed to accept your existing presses hot stamping units, tooling and blocks
- Eliminates the need to modify or split your press to add a die station in your print station area
- Does not require expensive drives or controllers
- Easy setup and web routing

Applicatons & Benefits:

- Available for many narrow web presses from 6 inches to 24 inches in width
- Mounts above or between any 2 print stations on your press
- The unit is directly driven from a print station using gear or belt drive
- The system is designed to be durable but relatively light weight for portability
- Uses the presses existing print station controls for registration adjustment

ENDSEALS

A Common problem with chambered blade systems is end seal leaking. Improper seal material, bad seal design, inadequate pumping systems, no dead bands on end of engraved rolls and other various factors can cause end seal leaking. These end seals reduce downtime, save money on ink, doctor blades and printing rolls. The felt is presoaked and ready to use; foam seals require minimal preparation.

ELECTRONICS

HANDHELD TACHOMETERS

Incorporating the precise laser technology and user-friendly functions as our DT-205L/207L tachometers, the DT-205L-S12 and DT-207L-S12 provide exceptional accuracy in measuring speed and length via a 12" wheel; the larger wheel rotates more slowly than a standard 6" wheel, enabling reliable and safe registration of high speeds. These superior instruments also feature a contact adapter, conveniently allowing both non-contact and contact measurement.

Simultaneous storage of data in three different measuring modes (USB, Standard, and Average) both the DT-209X and DT-209X-S12 offer incredible value and ease of use in Contact and Non-contact applications. Enhanced download features and online controls, showing trending and real time data via USB communication; you can easily access your data by the free software included in each DT-209X package. USB and Analog output included.

1/4 x 20 mounting hole
Sophisticated laser beam detection up to 14'
Exceptional accuracy: $\pm 0.006\%$ of reading
Length and rate functions
Multi-mode speed selection
Length/sec available
Hardy aluminum construction
Large 5 digit display
Expansive memory capacity
Extended battery life
N.I.S.T. certificate Included

Features	Benefits
Advanced laser beam detection	Enables safe RPM measurement from 14 feet
Extremely accurate	Fully meets the strictest tolerances
Length and rate functions	Increases value/versatility via added applications
Multi-mode speed selection	Provides versatility via 9 selections
Extensive speed range (up to 99,999 RPM)	Maximizes usage in almost limitless applications
All-metal construction	Exceptional durability; withstands harsh use
Large 5 digit display	Permits easy reading
Expansive 10 test memory capacity	Allows thorough equipment/process inspection

DENSITOMETERS

500 Series

504 SpectroDensitometer

- Large display shows choice of single, 3-color or 4-color density values
- Density references to store shop or customer specs & see if density changes are needed

508 SpectroDensitometer

- Keep proofing and press runs consistent by impartially evaluating print quality
- Critical density and dot area evaluation of ink levels and ink-water balance on press
- Document density data to quantify press approvals and ensure multi-part jobs or customer reprints are up to color
- Set references for dot gain and density to ensure customer and internal color requirements are met

518 SpectroDensitometer

- Trap feature helps quickly determine whether on-press color shifts may be due to ink rotation.
- Check for ink consistency through the run with hue-error and grayness features—evaluate the extent of color contamination or dirtiness
- Establish optimum density levels and objectively assess shadow detail with industry-standard print contrast feature
- Quickly and easily measure any color bar—the built-in EFS function selects the proper feature (density, dot, trap, print contrast) based on the patch you measure

528 SpectroDensitometer

- Now comes pre-loaded with G7/ISO 12647-2 data sets and the digital PANTONE® FORMULA GUIDE, coated.
- Evaluate whether your special colors, densities, dot gains and other critical measures meet pre-established targets
- Get pre-set ink formulas for stored color libraries, or create and download your own using the included ColorMail Express software (for Windows)
- Establish or verify color management profiles using the color features; supported by many CMS packages

530 SpectroDensitometer

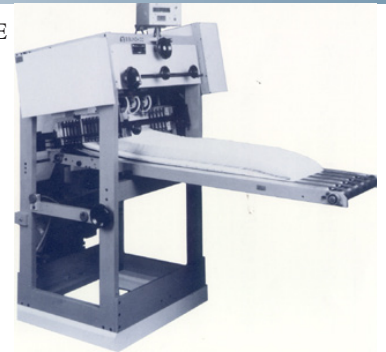

- With optional microspot, this hand-held measures color targets as narrow as 1.6mm while most spectrophotometers measure a 4.0mm spot size
- Provides precise color and paper analysis on a large graphic display
- Has all 500-Series functions, including density, dot area, trap, print contrast, hue error grayness, color, match, paper functions and compare

B. BUNCH 590 & 515 SERIES

The Bunch 590 and 515 Series Folder is used worldwide to fold narrow webs of labels, tickets, and tags. The unit may be used in-line with most types of narrow web presses or off-line with its optional unwind stand. A loop control device is available to fold pinfed product from a host device.

590 Specifications:

- Speeds up to 590 plus feet per min.
- Max. web width 10"
- Min. web width 3½"
- Max. fold length 14"
- Min. fold length 7"
- Delivery Table
- Clamps to your Rewind Shaft

515 Specifications:

- Speeds up to 515 plus feet per min.
- Max. web width 15"
- Min. web width 3½"
- Max. fold length 14"
- Min. fold length 7"
- Delivery Table
- Clamps to your Rewind Shaft

Optional:

- Electric Counter with Motorized Delivery Table
- Extra Spirals for folding up to 17" Kit for folding down to 5" or 4"
- Roll Stand and Independant Drive for off-line use.
- Pack Assist
- Loop Control for pinfed products

INK PUMPS - GRAYMILLS

GRAYMILLS HV SERIES CENTRIFUGAL INK PUMPS

HV series ink pumps are the most popular of the Graymills ink pump for the narrow web printing industry. These ink pumps include a wide variety of motor and tank options to fit almost any application. Ideal for use with water, solvent or UV based inks/coatings, the HV series ink pump can be provided with pneumatic or electric pumping sources. Feature: High strength thermoplastic pump body Stainless steel shaft Ball valve & 1/2" slip-on barb discharge tube Agitor jet for in-tank agitation 1 or 2 gallon flanged lid container with 3/4" return hole

GRAYMILLS DOUBLE DIAPHRAGM INK PUMPS

These air driven pumps operate by the movement of two flexible diaphragms that move back- and-forth, alternately filling and emptying two chambers. As each chamber is emptied, the ink is pushed toward the print deck. A variety of applications are possible, because the inlets and outlets can be configured in different ways. Good for corrugated bottom printers. Pump function produces a pulsating flow, so Graymills surge suppressor filters are strongly recommended.

GRAYMILLS QUICK CHANGE PERISTALTIC INK PUMP

Also known as a "tube" pump, the peristaltic pump utilizes a flexible tube which passes through a head and is squeezed by two rollers that push the ink to the print deck. These pumps are excellent for low to high viscosities, UV and EB. A variable speed motor controls the flow (no valves or by-passes required). Graymills peristaltic ink pumps are reversible so that ink can be drawn back from the print deck at the end of a run, reducing turn-around time. Additionally, they are easy to clean: pump cleaning fluid through the whole ink system, wipe the outside of the hose that was in the bucket, and the system is clean – or use the "Quick Change" Removable Head option and change over the entire system in seconds.

INK PUMPS - GRAYMILLS

Standard Graymills ink tanks are round to promote circulation and eliminate “dead spots” in corners where heavier materials can drop out and stagnate, causing viscosity and color issues. Round tanks of 10, 20 or 30 gallon capacity feature a built-in sump for low pump-down to reduce ink waste. A rolled rim at the top of each tank provides reinforcement while eliminating sharp edges. Removable sparkless casters are also featured for added safety. Tanks are available in either 14 gauge epoxy coated mild steel or stainless steel. Lids are available in nickel plated or stainless steel. Lids have overlapping rims to reduce evaporation and add strength. A hinged portion allows easy refilling or taking of manual viscosity readings. Holes are provided for return hose and/or bypass. Large handles make lifting easy.

Optional reusable or throw-away tank liners are another way to speed up changeovers.

In specifying a tank size, select a capacity which will eliminate the need to pay constant attention to your ink level. Consider the amount of ink consumed on the press, the length of press run, the chamber or pan capacity, and the amount of ink which will drain back into the tank from the print deck, hoses, and filter when pump is stopped.

INK PUMPS - MASTERFLEX

L/S EASY-LOAD PUMP HEAD

Features:

- Ideal for fast tubing changes and reduced maintenance
- Patented design and adjustable tubing retention allow for multiple tubing sizes—change tubing without removing head from drive.
- Polysulfone (PSF) housing with either stainless steel (SS) or cold-rolled steel (CRS) rotor—choose CRS for economy or SS for greater durability and chemical resistance.
- Polyphenylene sulfide (PPS) housing and SS rotor offers enhanced chemical resistance.
- Each pump head for precision pump tubing accepts tubing sizes L/S ® 13, L/S ® 14, L/S ® 16, L/S ® 25, L/S ® 17, and L/S ® 18. Achieve flow rates of 0.06 to 2300 mL/min (1 to 600 rpm)

L/S EASY-LOAD PUMP HEAD II

Features:

- Automatic retention holds tubing securely in place with no manual adjustment—just load the tubing and start the pump
- Four-roller rotor improves pressure performance and mechanical stability while reducing pulsation.
- Improved occlusion bed geometry lengthens tubing life.
- Polyphenylene sulfide (PPS) housing with either stainless steel (SS) or cold-rolled steel (CRS) rotor—choose CRS for economy or SS for greater durability and chemical resistance.
- Model 77201-62 with adjustable occlusion gives you the option of loosening occlusion for longer tubing life or increasing occlusion for higher pressure.
- Each pump head for high-performance precision pump tubing accepts tubing sizes L/S 15, L/S 24, L/S 35, and L/S 36. Achieve flow rates of 1.7 to 2900 mL/min (1 to 600 rpm).

ECONOMY VARIABLE-SPEED CONSOLE DRIVES

Features:

- An economical and versatile variable-speed drive with a wide flow range
- Separate single-turn speed control and on/off switch with green power indicator—maintain speed setting while turning pump on/off.
- The 1/20-hp unidirectional motor has soft start and back EMF for $\pm 5\%$ speed control.
- Stackable painted steel housing is IP22 rated for protection from vertically falling water.
- 115 VAC models are UL and cUL listed; 230 VAC models are CE marked in compliance with European Community standards.
- 6-ft (1.8-m) line cord; 115 VAC: U.S. standard plug; 230 VAC: IEC 320/CE 22 socket—pumps are shipped with cord/plug set specific to destination country.

INK PUMPS & ACCESSORIES

1/4" DOUBLE DIAPHRAGM PUMP

Regulator, Filter, and Hose kit available, as an option.

The CON-TROL-CURE® Double Diaphragm 1/4" Pump features 5 GPM capacity and 20+ foot suction power to deliver ink and other materials from bucket to delivery tray. Ideal for extended production use. The pump can be mounted in any position: upsidedown, sideways, right side affecting performance. Intallable air shut off at any interval or lanch of ity, the CON-TROL-CURE® Doube plumped in any of 4 fluid inlet/

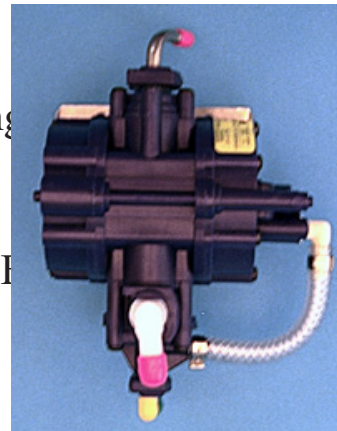

can be mounted in any posi- up - 360° on three axis without moter design will start up or time. With a 1/4" piping capacle Diaphragm 1/4" Pump can outlet configurations regulator.

TRANSFER PUMP III

Includes

- Air Regulator
- 2 - 6FT Length of U.V. Grade Tubing
- 304 Stainless Steel
- EPDM
- Polypropylene 1/4" Air Inlet Nylon I
- Overall Dimension -
- 7" L X 6" W X 4" H
- Suction Lift 25" HG/MIN.

LAMINATING SILENCERS & TOWERS

LAMINATING SILENCER

Features

- Heavy aluminum frame
- Heavy duty roller bearings
- Release coated roller
- Easy loading of laminated roll
- Easy installation

Benefits

- Reduces noise
- Decrease pulsation
- Improves registration
- Increased productivity
- Prevents wrinkles
- Stops label knurl
- Improves overall quality

Custom Units Available

M1 & MM SERIES UNWIND/REWIND TOWER

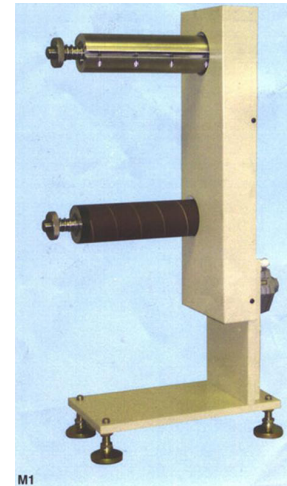

The M1 and MM Rewind/Unwind are designed for any narrow web application. They can be used to wind label matrix, liner, trim, finished product and even as an unwinder. These units are completely air-driven and require no connections other than an air line. They are capable of winding up to 500 ft/min from the stop position, without a single adjustment to the regulator. Not only can they perform at high speeds, they are extremely sensitive and will not break anything needing to be wound. The M1 is available with or without a capstan. It can easily be mounted to the side of any press or sit on a flat surface with the use of a floor plate, which is also available. The MM or "Miesna-Matic" has all the same qualities as it's big brother in a smaller package. It comes equipped with a magnetic base and counter weighted rear to keep it on the press (no bolts needed). It's size allows the operator to relocate it anywhere and have it running in minutes.

Part # MM - Rewind

Part # M1 - Rewind w/o Capstan
Part # M1 - Rewind w/ Capstan
Part # M1 - Floor Plate

Both the M1 and MM were designed by an operator for operators So you know they won't let you down.

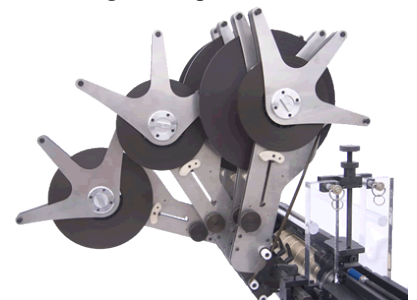

NARROW FOIL AND MAGNETIC TAPE UNWIND SYSTEMS

FoilStream Unwind Specifications

- Designed for .75" to 3" wide rolls of foil or tapes narrow foil unwind
- Allows independent control and close spacing of multiple unwind streams
- Unique pivot arm design allows roll changes without losing stream positions
- Features adjustable, non-contact magnetic brake technology for super smooth operation
- Mechanical core holder for standard 3" cores
- Easy setup, adjustment and roll changeover
- Does not require air or electrical power
- Many mounting positions are possible with our universal hex bar mounting system
- No loose parts to fall into press

TapeStream™ Unwind Specifications

- Designed for .25" to .625" wide rolls of magnetic tapes or scratch off tape or similar products magnetic tape unwind
- Allows independent control and close spacing of multiple unwind streams
- Unique pivot arm design allows roll changes without losing stream positions
- Accepts industry standard plastic cores
- Easy setup, adjustment and roll changeover
- Magnetic roll latch and integral side guide
- Does not require air or electrical power
- Many mounting positions are possible with our universal hex bar mounting system
- No loose parts to fall into press

MARK ANDY 4120 QUICK CHANGE SYSTEM

- If you want to reduce your labor up to \$1,500.00 a month.
- Make up to an additional \$10,000.00 a month by increasing productivity.
- Decrease your print station changeover up to 100x the current rate.
- 2 seconds to slide out & 3 seconds to return

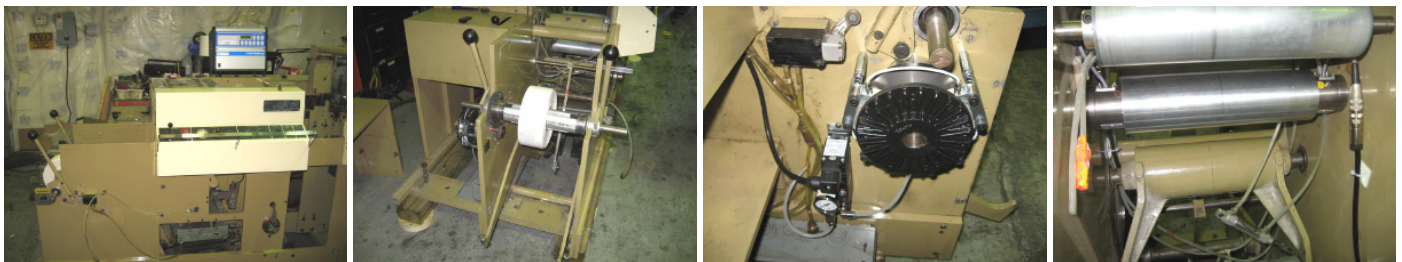

****Every Mark Andy 4120 Should have them!!****

SUPERCELL™ QUICK CHANGE SYSTEM (PATENT PENDING #: AMC-195-4914-0)

Have quality discount convert your mark andy 4120 press into a quick change slide out print station!

Patent Pending

MARK ANDY 4120 UNWIND TENSION CONTROL SYSTEM

Do you have tension problems on your existing Mark Andy 4120 Press?? Then call
Quality Discount Press Parts
today to discuss the benefits of the new unwind and rewind tension control upgrade!

- Question: Can't I just buy a replacement board from the OEM??
- Answer: Yes, but changing the board is only masking the problem.
- Question: Is this tension upgrade good for my unwind tension only?
- Answer: No, the upgrade is for the Unwind, Lamination, and Rewind area.

SUPERCELL PLATECUTTERS

The superior features of this plate cutter alleviates lost time searching for razor blades to accurately cut your flexo plates. Flexible work lamp provides intense lighting where needed to assure accurate cuts. Photopolymer plates with polyester backing can be cleanly cut. Work table grid allows for easy alignment with see-thru photo-polymer plates registration marks. Produces straight and square cuts. Beveled cuts are made simple by the design of the blade for butt joints on reverse printing plates, so if you don't even have to tilt the table! The knife blade contacts a cutting stick at a slight angle thus providing 7-9 new cutting surfaces.

Additional blades, blade resharpen and cutting sticks can be obtained by simply contacting us at (609) 646-2212/(800) 646-2212.

- Increase Productivity
- Eliminate Ruined Plates
- Produce Beveled Edges
- Trim Plate to Final Size
- Hardened Tool Steele Blade
- Grid Lines
- Work Lamp
- 11.5" & 18" Models Available

Plate Cutter Assemblies are available in:
 11.5" P/N PCA-11.5"
 18" P/N PCA-18"

PAPER JOGGERS

Jog-O-Matic Paper Jogger

- Helps eliminate static electricity and paper sticking for easier processing
- Great companion for high speed copiers, folding machines, printing presses, cutters and binding systems
- Takes up little space at your work station
- Jogs 1 ream of 8 1/2" X 11" or 1/2 ream of 8-1/2" X 14" paper

AJ-700 Portable Jogger with Air Blast

- Press sheets and digital copies can be air dried immediately to prevent offset
- Air-only and vibrate-only functions significantly reduces misfeeds and double feeds in printers, folders, and collators
- V-shaped, adjustable-angle table with a 4 inch tray pile capacity
- Foot pedal operation or continuous automatic timer
- All-metal construction
- Mounted on casters for easy mobility

SYSTEM 90

Because of the angle of the jogger and the fact that it is fully adjustable in height, the jogger can be wheeled up to various machines to act as a jogging catch tray making the delivery of sheets much easier.

Key Product Features:

- Height & angle adjustable
- Adjustable rotation
- Mobile for use with many machines
- Robust Motor provides variable jogging power
- Up to 27.5" x 20" sheet size

The System 90 jogger is an essential piece of equipment for printers who need to 'knock up' paper or carbonless sets in sizes up to 27.5" x 20".

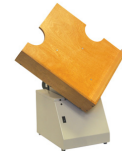

Lassco Table Top Joggers

LJ-8 Large 20" x 14" table allows for easy handling of bulky materials

LJ-6 Four bins for faster sorting and collating.

LJ-4 Jogs a full ream of up to 11" x 17" paper

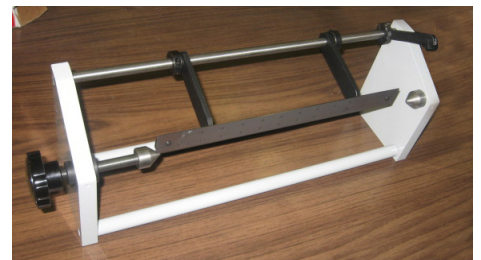

LJ-2 Jogs a full ream of standard copy paper

EASY ECONOMY PLATE MOUNTER

- Accurately mounts from 1 to 6 plates around cylinder
- Swing down scale allows easy positioning across the cylinder
- Slotted index wheel on the right side of the mounter is a fast, easy, convenient way to index plates around the cylinder
- Bench Mountable
- Specify Press and ID of bearing

Part #	EPM-7	Economy Platemounter 7"
Part #	EPM-10	Economy Platemounter 10"

FLEXICO V5 PLATE MOUNTER

The FLEXICO V5 plate mounting system was developed to meet the following requirements:

- To mount polymer plates quickly and accurately
- To reduce waste
- To reduce setting-up time
- To be suitable for a wide variety of presses
- To accommodate a variety of different size sleeves and cylinders

The patented design uses a rugged mechanical construction together with high technology cameras and monitoring to provide a "hands-free" operation so that perfect registration can be achieved each time.

Specification

- Unique "rise and fall" flat plate bed
- Pneumatically operated plate clamp
- High resolution colour cameras and lenses
- Dual LED super-bright lighting
- Two TFT (flat screen) monitors
- Locking Key mechanism (to ensure identical plate mounting across multiple sleeves)

Part # FLEXICO V5-10

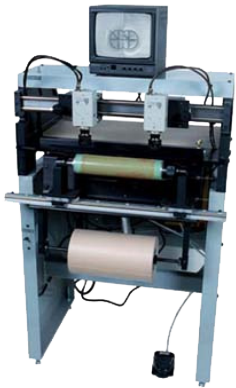

Part # FLEXICO V5-13

Part # FLEXICO V5-16

Part # FLEXICO V5-22

VIDEO PLATE MOUNTER

Improve your print quality and avoid down time with the video plate mouter. Tight register plates can be mounted in minutes with an accuracy of .003”.

Two cameras magnify your plates register marks to 20X actual size and display them on a split video display. By lining up the images on the screen plates can be perfectly aligned, secured and mounted.

Standard Features

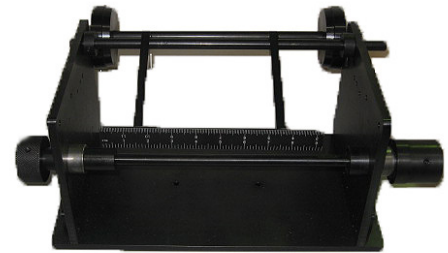

- Plate widths from 4 to 20 inches
- Plate repeats from 6 to 24 inches
- AC motorized drive raises and lowers print cylinder under the cameras. Allows fast movement for large repeat changes and also fine adjust to bring into clear focus.
- By spinning the mounted plate under the cameras and checking other targets you can visually detect mis-mounted plates.
- Vacuum plate with foot pedal control holds the plate during fine alignment adjustment.
- Soft pneumatic clamp bar secures the plate in position during mounting, yet cannot damage or deform the plate.

VARI-MOUNT PLATE MOUNTER

Features

- Quick-change, spring-loaded type wheel (No Pins)
- Needle Bearing Construction
- Accurate Alignment Bar, -Capacity Up to 24" Repeat
- Sticky back mounting attachment for securing the sticky back parallel to the plate-roll,
 - This feature also allows the operator to apply tension to the roll of sticky back enabling the material to adhere securely to the cylinder. The alignment bar and a razor blade can be used to cut the sticky back one exact revolution or any length needed.
- Economically Priced- Use One At Each Press & increase your production
- Available for ALL makes & models, 4" – 20" presses.

PUNCH AND SLITTER UNITS

- Ball plunger assembly provides for instant blade removal. (Simply pull out to remove)
- “Accu-Slit” not only performs your standard slitting jobs, but also allows you to top score.
- “Accu-Slit” Adjustable Bearing Blocks provides for ½” side-to-side Adjustment.
- “Accu-Slit” reduces wear on blades and expensive anvils.
- “Accu-Slit” eliminates airlines, valves and regulators.
- “Accu-Slit” increases productivity and reduces set up time.
- Spring-loaded system ensures accurate and easy adjustment.

“Increase Productivity – Decrease Set-up Time.”

Made to fit ANY Press

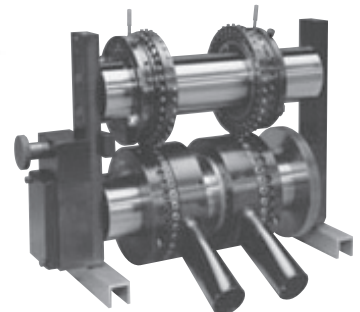

DROP-IN UNITS

When an accessory module is not available, it is sometimes possible to “drop” a punch unit into the die station of a label press. Accessibility is not as easy as the platform model, but this type of unit can offer an economical alternative if required.

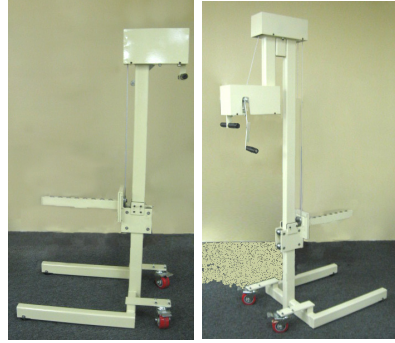

PLATFORM UNIT

Designed to fit the accessory module of most narrow web label presses. Provides the most accessibility and is heavy duty.

SUPERCCELL ROLL LIFT CART

*Custom Units
Available At
Low Costs!!*

FEATURES

Max Roll weight 600 lb.

SUPER-MOVER-A Max lift height is 48"

SUPER-MOVER-B Max lift height is 63"

SUPER-MOVER-C Max lift height is 94"

Custom Heights available for additional cost

Roller Boom attachment (P/N: SUPER-BOOM): Allows the operator to easily slide the roll along the bearings across the boom for easy installation and removal. 17", 27", Custom Lengths Available.

Also Available at Additional Cost:

Swivel Cradle Attachment (P/N: SUPER-SWIVEL): The swivel cradle supports the roll from the bottom; the cradle may be rotated to help in positioning the roll for the installation or removal.

Easy Tilt (P/N: SUPER-TILT): Allows the operator to lift the roll from a flat upright position with a cam lock style core holder and a hand crank that tightens the core before picking it up.

Part #: SUPER-MOVER-A

Lift is 48 inches from the center of the roller core attachment

Part #: SUPER-MOVER-B

Lift is 63 inches from the center of the roller core attachment

Part #: SUPER-MOVER-C

Lift is 94 inches from the center of the roller core attachment

SUPERCCELL MOBILE DIE HOIST PLATFORM CART

NEW!

- 500 Lb Maximum Lift Capacity
- Smooth and Easy Operation with Locking Wheels
- Assists in Eliminating Expensive Die Damage
- Reduce Workplace Injuries
- Rail System for Easy & Safe Positioning, and for Loading & Unloading Dies
- Adjustable Cradle for Different Die Widths
- Can Be Converted Into a Lift for your Substrates

We Can Customize Carts To Your Needs!!!

E-Z TILT 600 / UNWIND & REWIND STATIONS

E-Z TILT 600

The E-Z Tilt 60 Large Roll Tilt System, is a simple, inexpensive and effortless solution for lifting, tilting, and transporting large and heavy roll products weighing up to 600 pounds. Simply lower the 3 inch Diameter Core boom into the rollcore, lock into place, lift and tilt. Conversely, rolls are just as easily stored in horizontal position by reversing the procedure. The E-Z Tilt with its robust all-steel construction and fully mechanical design is an invaluable product that will provide your company years of safe and dependable service.

Standard Features:

- 600Lbs Max Capacity
- Approx. 80" lift height with ore boom horizontal
- Approx. 71" clearance with core boom vertical
- 40" max roll outside diameter
- 26" max roll width
- Designed with 3" core boom attachment or use with standard 3" cores
- EZ tilt tilting attachment with 90 degree roll maneuverability
- Hard stops at core horizontal and core vertical
- Rotating hand wheel for quick mechanical engaged disengaged of core boom
- Side shift lever for precise, user friendly core boom movement
- 44" wide leg clearance to straddle most standard pallets
- Industrial grade high capacity winch with ,automatic braking components
- Additional automatic safety brake
- Standard hand crank designed for low maintenance and with easy cranking ratio for ease of operation
- Heavy-duty non-marking rear swivel casters with high quality toe brakes
- Heavy-duty non-marking rigid front wheels for stable maneuverability
- Heavy-duty industrial power coat finish

Optional Features

- Electric Operation-Choice of 12V Battery, 120v AC plug, of 220AC plug
- Custom designed modifications (i.e. capacity, size wheels)

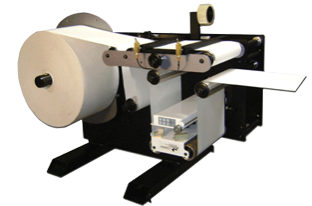

UNWIND & REWIND STATIONS

The UDB Series of modular large-roll unwind stations allows you to process large diameter rolls into your existing equipment for less downtime and increased profitability. Available in widths up to 20" with maximum roll diameter of 40", the unwinder requires no tension adjustments and may be equipped with an optional ultrasonic web guide and splice table for precise web control.

Standard Equipment:

- Left to Right or Right to left Operation (specify when ordering)
- Models available up to 20" web width
- Cantilevered or cradled unwind
- Smooth acceleration and deceleration
- Pneumatically inflatable 3"diameter unwind spindle
- "Set and Forget" Constant Tension Control
- Heavy duty dancer activated brake system
- Max. roll diameter up to 40" Left to Right or Right to left Operation (specify when ordering)
- Models available up to 20" web width
- Cantilevered or cradled unwind
- Smooth acceleration and deceleration
- Pneumatically inflatable 3" diameter unwind spindle
- "Set and Forget" Constant Tension Control
- Heavy duty dancer activated brake system
- Max. roll diameter up to 40"

Optional Equipment:

- Ultrasonic web guide
- Splicing table

**Also available the RW Series Unwind*

ECONOMY DIE HOIST

The Economy Die Hoist, with 360-degree rotation and lift capacity of 300 lbs. allows you to safely load and unload dies and rollers eliminating expensive damage and avoiding personal injury. Utilizing the precision press mounts anywhere on your equipment, the Economy Die Hoist can be easily removed and re-located for ease of use.

- Reduces workplace back injuries and material damage
- Eliminates expensive die and roller damage
- Smooth and easy up and down movement
- Manual Lift
- Easy to install and remove
- Custom design and fabrication available

SHRINK SLEEVE SEAMING GLUE SYSTEM

This machine is special designed for gluing and seaming single layer PVC/ PET roll to produce various shrink sleeve label such as beverage label, battery sleeve, pens sleeve, etc. Simple construction. Easy to operate and maintain.

Main Technical Specifications

Forming Width	2 - 9.5in.	Max. Seaming Speed	984 FPM
Unwinding Diameter	19.5in.	Core Inner Diameter	76 / 3"
Rewinding Diameter	27.5in.	Power Consumption	3.5kw
Mechanical Speed	1082 FPM	Machine Weight	1T

SPRAY MARKING SYSTEM

2 Gallon tank sub assembly. Spray marking system can use visible or U.V. dye to mark bad products or batch special runs. System includes pressure tank with fittings. Can receive output signal from operator controlled switch or automatic signal from a display counter with an output function, such as our Batch Counters. Tank assembly comes with connections for air and fluid lines out. Order WW050 and WW310 for complete spray marking system. Dyes and ink available for marking.

WW-050

Air Atomized Spray Head required pressure regulated air for atomizing and pressure regulated fluid. The air to fluid pressure ratio should be in the range from 1:1 to 2:1, this adjustment changes the atomizing effect. Fluid pressure will adjust quantity (the flow rate). The fluid and air is brought in with 1/4" poly tubing. The head mounts on a 1/2" rod. Use with WW050 2-gallon spray tank sub assembly. Spray marking system can use visible or by U.V. dye to mark bad products or batch special runs.

WW-310

STACKER/CONVEYORS / STATIC ELIMINATOR BARS

SUPERCELL™ STACKER / CONVEYORS

Part # SC-700
Part # SC-1000
Part # SC-1300
Part # SC-1600

*Optional roll cart at additional cost.

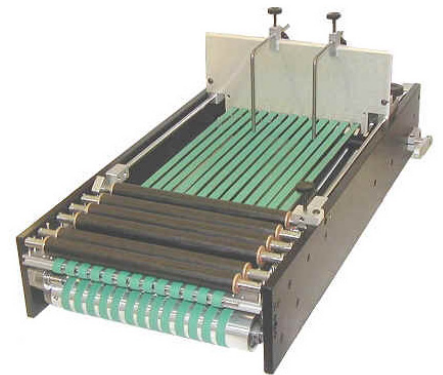

Features:

- Individual Label Count
- Predetermining counter
- Count stop-resume switch
- Adjustable label guide wheels
- DC drive motor for conveyor bed
- Long life habisat belts
- Adjustable back stacking plate
- Label air flow line
- Label air flow control regulator
- Adjustable roll away cart
- Photo optic sensor for count input
- Upper and Lower belt tension adjuster
- Adjustable free floating in-feed roller deck assembly
- Lower conveyor bed 48"
- Overall length 60"

BOTTOMSTACKERS

Large 2" Diameter Rollers- with 1.574" Bearings with hub are mounted in the roller and then locked onto the roller shafts, this eliminates the wearing of journals normally found on all other conveyors.

- Adjustable free floating in-feed rollers, eliminates O'ring replacement and marking on products
- Adjustable Back Stacking Plate - Runs on Hardened Steel Shafting, Eliminates Galling.
- Adjustable Label Guide Bars.
- Long Lasting Belts.

Available for all 7", 10", 13" & 16" Mark Andy Presses

STATIC ELIMINATORS

ANTISTATIC STRING

Anti Static String
- Flexcord -

32.5 ft long, stretches to 65 ft.
Part # SS2000-1

Constructed of highly conductive fibers, Anti-Static Flexcord utilizes thousands of conductive micro points to create an ionizing field that eliminates static charges from moving surfaces. and will stretch to 100% its length .

ANTISTATIC TINSEL

Anti Static Tinsel

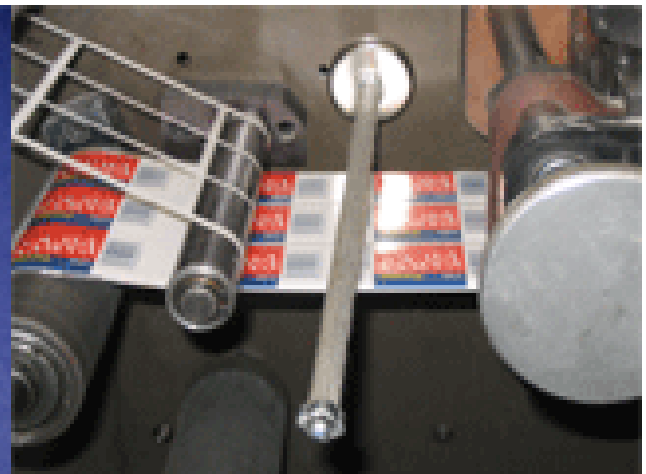

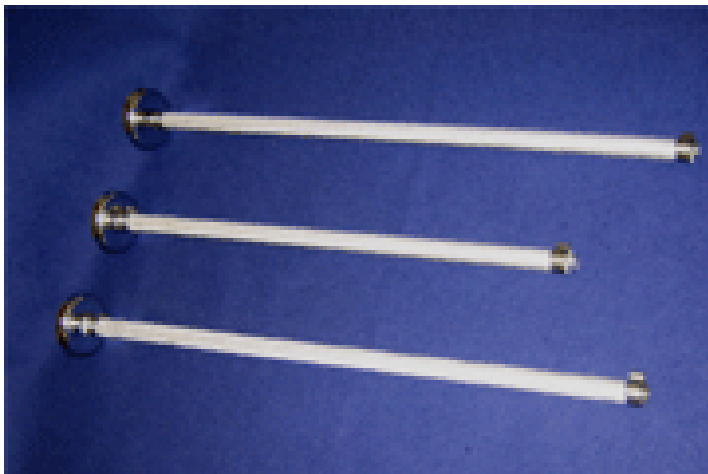

72 ft per box
Part # 0001

100% copper construction.
The core is made of copper wire to ensure positive grounding and strength. Fine, sharply pointed copper strands provide greater static elimination, and resists breakage, matting and shedding.

STATIC ELIMINATOR BARS ION360F IONIZING RODS

Ion360F rods provide a full 360-degree field of static elimination--making all sides of the rod effective. Lightweight and flexible, ion360F rods can fit under charged sheets and webs as they travel through a machine or onto a stack. Ion360F rods are available in standard and cut lengths, as well as 36 foot (11 meter) reels. Cut rods up to 24 in. include a mounting magnet at one end for single-side mounting. Longer rods include a mounting lug at each end. (Please call to order custom cut lengths.)

EXCELLENT RESULTS!!!

STATIC ELIMINATOR BARS

Model 200 AC Static Eliminator Bar

Model 200 is the industry's most popular medium range ionization static elimination bar. This high performance, rugged, low cost, shockless unit is available in four styles: single-scan (single row of emitters), wide-scan (two rows of emitters - like having two bars in one), dual-scan (two rows of emitters set 180° apart) and air-bar (combining two rows of emitters with compressed air emitting tubes). The units perform effectively within 3" of static charged surfaces and on materials traveling up to 2000 feet/per minute. The air-bar unit provides an ionization range of 8 inches, enveloping the target surface in a wide field of negative and positive ions.

Model 200 bars may be ordered in effective lengths from 3" to 120", and up to 100 feet of serially installed units. Model 200 bars may be operated from a single power supply. Input voltage is 115 volts, 50/60 Hz. Optional 220 volt available. Output voltage is 6000 volts, shockless AC current. Multiple bars can be mounted in series from a single power supply.

Contact and separation between two surfaces creates static electricity, which can often cause materials like paper, plastic, textiles and other non-conductive materials to randomly attract to or repel from themselves or their surroundings. In a manufacturing environment this causes process problems which include jams, clogs, mis-feeds, poor stacking, reduced transport speeds, shocks to operators, fires, explosions, and a variety of contamination related problems.

BR1200 ROUND STATIC BAR

The BR1200 is a "shockless" static neutralizing bar designed to help you control these troublesome and costly problems by neutralizing the static electricity that causes them.

Round body design enables user to "aim" the emitter points as needed. Improves mounting flexibility, too.

- Ion condition alarm output
- Ion balance alarm output
- Pulse discharge alarm output
- Over-current alarm output

- Auto ion balance adjustment
- Normal operating display
- Communication status display
- Setting of ID's for individual recognition

BR4200 EXTENDED RANGE DOUBLE STATIC BAR

The BR4200 is a high output extended range "shockless" static neutralizing bar designed to help control these troublesome and costly problems by neutralizing static electricity. Used in especially tough applications like high-speed webs (converting), bag making or RFID label printing that require extended range ionizers, the rugged construction of the BR4200 consists of twin BR2100 static bars in a parallel configuration and a single 72" shielded high voltage cable with a power supply connector installed, standard from the factory. Ten foot unshielded and custom cable lengths are available upon request. Designed to withstand the harsh conditions of tough application environments, it effectively neutralizes static on surfaces 6" or more from the bar. Threaded back-studs for mounting are located at each end of the bar with extra supports and back-studs for longer bars spanning wide webs or surfaces.

FEATURES INCLUDE:

- Extended Range of 6" or more
- High Output Ionization
- Designed for use in tough manufacturing environments
- 72" Standard shielded high voltage cable with power supply connector
- Rear Mounting Stud System
- Shockless for Safe Operation

Model 400T Ion Edge AC Static Eliminator Bar

Model 400T Ion-Edge is a shockless superior performing medium range ionization static elimination bar with a market-leading compact and durable design. Quality engineered with replacement static bar users and original equipment manufacturers in mind, it delivers high positive and negative ion output in cramped quarters. The bar can be operated by most all power units with output voltage ranging from 4,000 volts to 8,000 volts.

Model 400T is available in lengths 2 to 120 inches in one inch increments. It is constructed of industrial grade extruded plastic, epoxy overlay and resistively coupled emitter pins for performance, safety, low maintenance and years of service. The range of ionization is 7 inches (effective 7 inches from target surface).

STROBES & STROBE REPAIRS

DT-311 / DT-315A

The DT-311 Digital Stroboscope is a dual function stroboscope that provides the illusion of "stopped motion". By adjusting the strobe's flash rate, equipment and printing, objects appear to be standing still or in slow motion. Our strobes also measure rotational (RPM) or reciprocating (strokes per minute) speeds with the same precision as an electronic digital tachometer.

Features:

- Highest accuracy and most stable flash rate(± 0.01% of reading)
- Easy-to-read LED display Easy-to-operate controls
- Detachable pistol-grip handle
- Provides 12 V DC power for external sensors
- Accepts external trigger input and provides synchronizing pulse output
- Phase shift for best view and flash photography (timing, advance or delay in degrees or mSec)
- Instant double and half-rate flash selection for error-free reading

DIGITAL TACHOMETER STROBOSCOPES

DT-725 KIT

The DT-725 is packed with many of the same features as our famous DT-300 series but are lighter in weight. Constructed of strengthened high impact plastic, these rugged units are exceptionally reliable and withstand the same harsh conditions as more expensive units. This unit is sold separately or as a convenient kit. The DT-725 KIT contains a strobe, extra flash bulb, charger and rugged carrying case.

Features	Benefits
Strobe KIT	All components are protected and kept together in one convenient carrying case
Plastic housing with strength members	Shock and impact resistant for exceptional durability
Lightweight design	Portable; easy to carry and operate
Phase shift (in degrees of delay time)	Enables observer to focus on one particular area of rotating and/or reciprocating machinery
Continuous duty flash bulb	Eliminates down time for flash tube cooling
External trigger	Allows synchronization of the flash rate with the motion of the rotating machinery
Slave functions	Can control (or be controlled by) other strobes
Bright LED display	Easy to read in low light conditions
Unique rotary pulse indicator	Permits strobe to be set at the exact flash rate without drift
Manual flash controller knob	Allows easy/accurate flash rate adjustments

ST-320BL BLACKLIGHT LED STROBE

The ST-320BL is a portable or permanent mount stroboscope. Utilizing super bright highpowered black light LED lamps, these stroboscopes are perfect for UV ink printing applications. The unit can work off user adjusted flash frequency or from a remote sensor's signal which will automatically adjust to corresponding process fluctuations

- Simple Operation
- 8 Button Keypad & Quick Rate Adjustment Dial
- Backlit LCD Display
- Adjustable Flash Pulse Duration
- 60-120,000 Flashes/min.
- Includes Metal Carrying Case

SCOUT STROBE

Power Input

- 12 to 16 Volts DC; 13 watts max

Trigger

- Trigger Supply
- 12 to 16 Volts DC internally connected to power input
- Internal
- 10-turn high resolution control
- External (Optoisolated)
- Pulse[Source] Input +2.5V min to 15V max, zero based 100usec to 1msec pulse width, 470 ohm input impedance
- External (Non-isolated)
- Contact closure or open collector[sink] signal: 12VDC@30mA; 100usec to 1msec width

Physical Dimensions

- 7.00"[lg] x 4.75"[w] x 8.62"[h], 2.0lb

STROBES

HEAVY DUTY STROBE LIGHT

The HEAVY-DUTY STROBE LIGHT provides a stop-motion image that is brighter, clearer and more accurate than a conventional strobe light. Since it provides up to 3 times more light, it can be used in areas with high ambient light levels. This eliminates the need to reduce ambient lighting. The Heavy-Duty Strobe Light can be used in all types of stop-motion rotary or linear applications.

Standard Features

- Up to 2000 Flashes Per Minute (*Part # 98-8550*)
- Internal Trigger—Continuously Adjustable by Operator
- 1/4" — 20 Mounting Plate
- Rugged Extruded Aluminum Housing
- Plug-In Strobe Lamp Is Easily Replaced

Optional Features

- Up to 6000 Flashes Per Minute (*Part # 90-8551*)
- Selectable External Trigger
- Various Trigger Sensors
- Universal Mounting Base and Heavy Duty Strobe Arm
- Timing Device with Magnetic Gear Sensor

Part # 90-8550

SUPERCCELL "PRIVATELINE" LINEAR STROBES

The new CHECK-LINE Series LS Linear Stroboscope is offered in a 10 and 15 inch width. They are designed to provide an extremely bright, uniform light source that is typically required to perform visual inspection of narrow and wide web-type products such as; labels, printed material, textile fabrics, metals, non-wovens and more. Two or more units can be combined for continuous inspection of wider webs.

Flash frequency can be automatically synchronized to varying web speeds using an external sensor or user-controlled using a precision adjustment knob located on the rear control panel. Flash intensity (brightness) can also be manually adjusted via an adjustment knob or controlled externally using a 0-6 Vdc input.

Features

- Super-bright Xenon Tube and highly-polished hammertone reflector combines to generate industry-leading light intensity and uniformity
- Models are offered in 10 inch (250 mm) and 15 inch (380 mm) widths
- Internal and External control of flash rate and flash intensity (brightness)
- Steel enclosure is specifically-designed to efficiently dissipate heat eliminating the need for bulky heat sinks
- 2 or more LS models can be connected to each other for wider web coverage

STROBES

DIGITAL TACHOMETER STROBOSCOPES

DT-329

The DT-329 is ideal for wide and narrow web printing, motion vibration analysis, audio (speaker) research, pulp and paper and a wide range of rolling mill applications. Easy to mount and DT-329 's design provides for daisy chain and external trigger-Phase shifting (flash advance/delay in degrees and mSec), external flash control, and a back-lit LCD display provides the operause visual inspection tool to monitor production quality under all

and machine manufacturing set up, the ing methods. nal and inter- tor an easy to line speeds.

We can repair your current strobe!! Call for Details!!

Features	Benefits
High Flash Rate:	60 - 120,000 FPM (1-2000Hz)
High Brightness:	1,950 lux at 120,000FPM @ 7.87in (20cm) to target
Large "Illuminated" Area:	23.62 in x 15.75 in (600mm x 400mm)
Silence:	No noise, No flash tubes
Simple Flash Setting:	Fast control by dial, push button or external trigger

1XF STROBOSCOPE

with AC POWER SUPPLY

The LED 1XF allows flash rates up to 50,000 flashes per second, far beyond what an ordinary Xenon strobe can do. And while a Xenon strobe typically has a very short flash (10-100 microseconds), the LED 1X allows adjustment of the flash duration from 10 though 250 microseconds. Shorter flash durations minimize observed object, while longer durations provide blurring of the more light.

Key Features

- Uniformed illumination pattern
- Pulse width can be altered to match application
- Slim profile allows easy installations
- Low glare on reflective surfaces
- Eliminates hot spots

The 1xF Advantages

- Long life LED lamps last 5-8 years
- No replacement expense
- lower energy consumption
- Noiseless

We can repair your current strobe!! Call for Details!!

UNILUX STROBES

Unilux Strobes improve quality control by lighting the entire width of the web. Its brighter, even light spread eliminates hot spots for fine detailed inspection Its short flash duration produces sharp, clear images.

- Extra long-life lamp.
- Low maintenance.
- High brightness and even light spread.
- Variable intensity.
- Short flash duration produces sharp, clear images.
- Safe, isolated high voltage supply with double bleeders.
- Automatically adjusts to worldwide supply voltages
- Available 9600 flashes/minute
- Totally self-contained
- Heavy duty construction
- Automatically syncs to trigger signal
- Covers wide web widths

(at 300mm & 100% intensity)

- 750 Lux @ 1500 F/M
- 645 Lux @ 6000 F/M

Display

- 7.6mm high, 5-digit red LED

Weight

- 0.9 kg without accessories, 1.36 kg with battery & handle

Triggering

- Internal
- 10 turn high resolution control

External

- Optoisolator input for positive pulse (source) signals (2.4Vpk to 24Vpk pulse amplitude, 100µsec to 1 msec pulse width)
- Input can also accommodate contact closure or open collector (sink) signals

Power Input

- 12 to 16 Volts DC; 12 watts max
- 120/240 VAC to 12VDC power adapter

Environmental

- 0°C to 40°C (32°F to 104°F) operating temperature range
- Humidity: 95% noncondensing

Intensity Adjustment

- 35% to 100% adjustment range; accomplished by supplying a 0 to 5VDC voltage at triggering connector
- 12 to 16 Volts DC internally connected to power input

- * Clockwise & Counterclockwise Winding
- * Many More Options Available

TRIM REMOVAL SYSTEMS

FOX TRIMAWAY SYSTEMS

Unique Approach to Trim Removal:

System Design

The FOX TrimAway® System uses a regenerative blower to generate a motive air stream at significantly higher pressures than that of a conventional blower. A unique venturi design is used to convert this output into the high velocity required for efficient material transport. This combination yields outstanding performance with typically 50% in energy savings over axial blower type systems.

Features:

- Venturi Construction
- Material: Aluminum, PTFE lining available.
- Unique design: Motive flow rate may be adjusted to optimize performance.
- Regenerative Blower Construction
- Mounting base, impeller and housing manufactured of aluminum allow for maximum strength, reduced weight and increased corrosion resistance. Totally enclosed, fan-cooled motor with thermal overload protection.
- Direct drive motor/blower combination dynamically balanced for reliability.
- Plastic, metal and PTFE-lined ducting is available.
- The FOX TrimAway System is supplied with all necessary intake and discharge ducting and fittings to make a ready-for-installation system.
- Noise levels well below conventional systems. Silencing mufflers are not required to meet OSHA standards.
- Energy Efficient
- Power consumption reduced in half: Only one HP is required for most waste removal applications.
- Typical venturi/blower combination occupies approximately one cubic foot
- Versatile Mounting
- Compact venturi may be mounted at point of use or integrally with blower.

ECONOMY TRIM REMOVAL SYSTEM

The most economical way for trim removal in the market today. This unique design is compact, energy efficient, and offers a number of ways to be mounted on the press.

- Connects to air from the press
- Trim of 1/4" to 3/8" pressure sensitive material can be removed
- *These units are sweeping the market!!*

Includes:

- Ultrasonic Tank*
- Stainless Steel Lid
- Heater
- Timer
- Removable Stainless Steel Rotator*
- Adjustable Stainless Steel Support Bar

*Can clean up to 2 regular size rolls at a time,
or up to 4 webtron 650 / 750 rolls at a time!!*

* The New Ultrasonic Tank & Rotator has a 1 Year Warranty!!

SUPERCELL UV CURING SYSTEMS

- Arc Lengths from 9" to 24"
- Multiple Lamp Intensities: 200, 300 and 400 WPI
- Slide In, Slide Out Lamp Module
- Exhaust Blower
- Portable Control Panel
- Quick Change Lamp Cassette
- Elliptical Reflector Extrusion
- Multi Focal Point Reflector Design
- Idlers and Cool UV at additional Cost

WEB CLEANING

WEBVAC

The WebVac Web Cleaning System continuous-duty cleaning system designed to provide contact or non contact cleaning of narrow and wide webs in a variety of critical applications – enabling converters the ability to simultaneously improve the quality of product and increase profits by reducing rejects. In a single package, the WebVac combines three proven cleaning technologies – powerful vacuum, static neutralization, and compressed air blow-off to remove dry contaminants from narrow and wide webs quickly and efficiently. Once removed, the WebVac captures and collects the contaminants for safe and easy disposal.

Operating Principle

The typical WebVAC configuration first employs a static neutralizing bar to neutralize static electrical charges on the web that electrostatically bind contaminants to the surface. A gentle blast of compressed air supplied by the air tube lifts the contaminants from the web surface into the air. Vacuum from the vacuum collector then draws the airborne contaminants into the WebVAC hood, carries them to the collector and traps them in the collector's filter bag module for safe disposal. In the contact cleaning mode a soft brush is mounted in front of the static bar to loosen the contaminants just prior to static neutralization and removal. In some special cases the position and sequence of the static bar, air tube and brush may vary but the WebVAC system will continue to follow the fundamental operating principle of static neutralization, compressed air blow-off and vacuum removal of dislodged and suspended contaminants.

CORONA TREATERS

The air gap adjustment is extremely simple and easy. The air gap setting is critical for proper treatment levels.

Air Cylinders lift the electrodes away from the rolls due ease of material thread up.

All stations are provided with a zero speed switch to prevent operation when the web is not moving. This feature eliminates when the web is stationary.

All stations are designed to meet the needs of thin films and lower web tension by using lightweight aluminum core rolls and free turning bearings. The rolls can also be driven, if necessary.

The electrode is completely enclosed for both safety reasons and easy removal of the ozone.

All stations include safety interlock switches preventing operation when the doors are open. Also the switches are mounted on the electrode to prevent operation when the electrode is retracted.

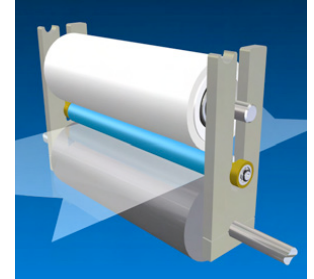

WEB CLEANING & ACCESSORIES

WEB CLEANERS

- Single or Double Sided Contact Cleaners
- Available in a range of widths from 10" - 26"
- Made to fit any press including: Mark Andy, Webtron, Aquaflex, Nilpeter, Gallus, Propheteer, Comco & More
- Options available include anti-static bars, idler rollers and extended shafts

ELCLEAN WEB CLEANERS

- Innovative single-button operation for the easiest possible usage
- Fully automatic interaction with the printing press
- Fewer wearing parts and interfering contours
- Tool-free roller replacement
- No safety risk
- Suitable for webs from 10", 13" & 16" nominal width

ADHESIVE ROLLS FOR WEB CLEANERS

- Silicone-based or silicone free formulations
- Continuous or pre-sheeted rolls
- Range of tack levels and core sizes
- Rigid cores for stability at high speed and straightness
- Replacement rolls available for virtually every machine

Item #	Description	Item #	Description
TT-13.6	ADHESIVE TAPE ROLL 13.6"	TT-23	ADHESIVE TAPE ROLL 31" X 3.90"
TT-16	ADHESIVE TAPE ROLL 16" X 66FT	TT-30	ADHESIVE TAPE ROLL 30" X 3.90"
TT-21	ADHESIVE TAPE ROLL 21" X 3.90"		

WEB GUIDES

FIVES NORTH AMERICAN WEB GUIDE AND SPLICE TABLE

- Combines two processes into one compact package
- Reduces in-machine web path and idler rolls
- Saves machine assembly time unit is ready to be installed

Perfect for Mark Andy / Arpeco & all other printing equipment

ELGUIDER WEB GUIDING SYSTEMS

E+L Web guiding systems are designed to eliminate error-influencing variables and to assure permanent, precision web alignment and winding. E+L offer a wide variety of systems with the latest technology.

- The new pivoting frame system, especially designed for guiding narrow webs, is a perfect combination of function and design
- Perfectly suited for applications under limited space as it makes optimum use of the elasticity of the web
- Easy integration into any machine and control system
- User friendly operating panel

WEB INSPECTION

BAR CODE INSPECTION SYSTEM

The CODE-TRACKER SERIES of products offer a wide range of bar code inspection capabilities.

Code-Tracker® CT200 Product Overview

- Advanced bar code reading system
- Pass/Fail indication
- High speed scanners
- Computer based
- Options: Sequential number checking, audit trail, and multiple heads

Code-Tracker® CT300 Product Overview

- Low cost ANSI bar code verification system
- Bar code grading (A-F)
- Computer based
- Options: Multiple heads

**EXCELLENT
PRODUCT!**

**EXCELLENT
RESULTS!**

E + L SMARTSCAN

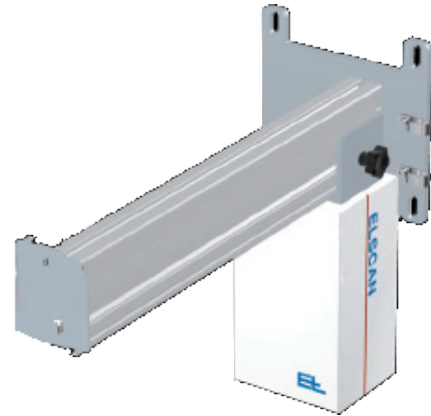

- Single camera system for 100% control of presses and finishing machines in the labeling and narrow web sector
- Continuous inspection of the entire width and length of the web
- 100% web monitoring with zoom function
- Detection of printing errors, missing labels, unremoved matrices, splice points or flags
- Counting functions for labels and defects
- Logging function of inspection runs
- Signal output for defect location or to activate signal lamps

DIGITAL WEB INSPECTION SYSTEMS

ELSCAN OMS 4 Web Monitoring and Inspection Systems

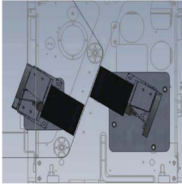

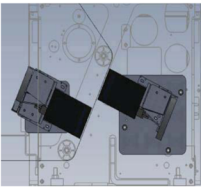

ELSCAN OMS 4112 is the basic version of the ELSCAN OMS 4 product range. It is a highly compact web monitoring system for installations where there is little space and is used preferably in narrow web label printing and converting sectors. ELSCAN OMS 4112 is always installed for easy access by the operator. The keypad is fitted to the crossbeam on the operator's side to suit the installation position.

- + Standard scan in direction of web travel (Autoscan Y)
- + Standard master-print image comparison with simultaneously saved hotspot position that can be opened at the press of a button
- + Intuitive, direct operation using the mouse
- + Image stabilization in the direction of web travel
- + Direct switching between large, small field of view

Discover the ELSCAN OMS 4 Product Family.....

The ELSCAN product family stands for continuous monitoring of print quality. Numerous innovative features and an intuitive, clear user interface make it possible for you to always keep an eye on your job. The ELSCAN OMS 4 family offers suitable solutions for a range of different tasks. Thanks to different camera types, the option of a double camera system and the modular software concept, ELSCAN can be adapted to fit your needs

VIDEO WEB INSPECTION SYSTEM

The GV SERIES

The GV500 SERIES web viewers are easy to use systems designed with industrial, high performance parts. The GV500 series features long lasting LED lighting, making it perfect for high speed applications

GV510

- High Resolution Cameras
1280x960px to 2400x2000px
- Bar Code Decoding
- Remote control

Included With All Models:

- High-Resolution Camera
- 2 Year Parts & Labor Warranty
- 19" Monitor

GV520

- High Resolution Cameras
1280x960px to 2400x2000px
- Extended Field of View

Additional Options:

- Split Screen
- Image Save
- Touch Screen Monitor

GV530

- High Resolution Cameras
1280x960px to 2400x2000px
- Advanced Positioning Options

Additional Options:

- Synchronized & Independent
Dual Camera
- UV LED Lighting

GUARDIAN PQV MINI

The Guardian PQV Mini is PC Industries' newest addition to the Guardian Vision Inspection Systems line. It offers the unique advantage of being a 100% customizable system, so you only purchase the features you need for your press or slitter/rewinder. Additional modules can also be purchased as needed.

Introducing the Guardian PQV Mini!

The PQC Mini is a customizable system that allows you to select only the features that you need. It's an economical alternative to the full-featured Guardian PQC 100% Print Quality Verification system.

Each system includes all the standard hardware you need to get started. Expand the ability of your PQC Mini by selecting one from any of our standard software module, including 100% Inspection, OCV/OCR with sequential check, Bar Code Verification, and more, at no additional cost.

Standard Hardware

- 1280 x 960 px color or grayscale camera
- Camera enclosure
- Relay board with programmable jog, stop, and flagging outputs
- Alarm light stack and audible alarm
- Industrial computer enclosure
- Remote support via internet connection
- Windows XP Operating System

Guardian PQC Mini Modules

Select from any one of the following at no additional cost, or fully customize a system to meet your budget.

- 100% print quality verification
- OCV/OCR with sequential check
- Linear bar code decoding with sequential check
- Absence/presence
- Dimensional gauging
- Repeat length monitoring

Advanced Modules

For more power and flexibility, add any of our advanced modules to your customized system and still stay within budget!

- ANSI/ISO linear grading (includes decoding and sequential check)
- ANSI/ISO data matrix grading (includes decoding and sequential check)
- FDA 21 CFR Part 11 compliance

Graymills Ink Pumps

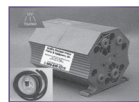

- In-tank Agitator
- Tank Lid has A 3/4" Hole for Return Hose
- High Strength Steel Shaft
- MOTOR OPTIONS
- Variable Speed Air Motor
- Tank options
 - plastic or stainless steel

Ink Pumps

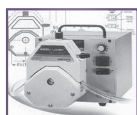

Pneumatic Diaphragm

- Lowest Priced Pump
- Includes Regulator Kit
- Pump up to 5 gpm
- Mounts in any Position — 360 Degrees

Masterflex Peristaltic

- Reversible Pumping
- Self Priming
- 2 Year Warranty
- Chemically compatible for life.
- Different tubing for wide flow range
- Lowest Priced Variable Speed Drive
- Many styles to choose from

Transfer Pump III

- Easy Clean Up
- 20 feet Suction Lift
- Chemically Compatible
- 6 Month Warranty

Quick Change Peristaltic Ink Pump

- Quick Change out of pump heads and hoses
- Adjustable flow rate and direction-pump to and from decks
- Maximizes performance and tube life
- Eliminates snaking, kinks and flow stoppage

**All Peristaltic Ink Pumps and Hosing Available!
Call for Details!!**

New and Recovered Rubber Rolls

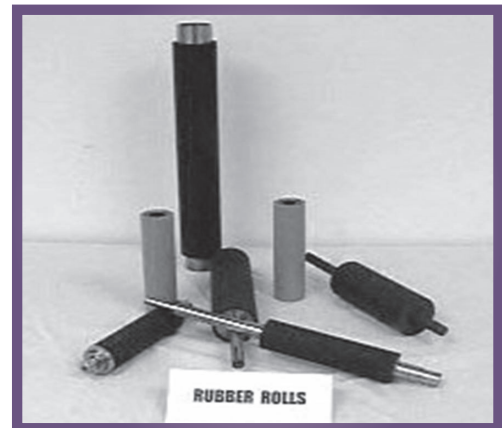

Rolls for all presses and slitter
rewinders. Comes in EPDM,
BUNA, and Silicone.

Other compounds available.

All sizes available

Best Pricing!!

Call for Pricing and details!

Ask about Replacement Bearings!!

Now Available! OEM Parts for the following presses: • Nilpeter / Rotopress

• Allied • Propheteer • Need Aquaflex Parts?? Call today for details!!

We now have the ability to do in-house custom manufacturing.

Call to request a quote on the custom equipment you need!!

Tint Sleeves are precision ground polymeric tubing which is applied over plate cylinders. This assembly is used to replace the plate and plate cylinder in flexographic presses when a continuous solid coating is required. The sleeves are slid over the tint cylinder using air assist or lubricants to facilitate assembly. Locking collars are placed on both sides of the sleeves to prevent slippage.

Applications

Tint sleeves (also known as flood coaters) are usually used to lay down a continuous uniform solid color or overcoat. They are also sometimes used for applying primers and adhesives. With the addition of custom grooving, they can be used to apply a continuous stripe.

The EP 55, 65 and 67 sleeves are specifically designed for use in coating water, UV, alcohol, ketone and ester based inks, coatings and adhesives.

TINT RUBBER CUTTERS

with Air-Assisted Mandrels

This tint rubber cutter was developed to make clean, precise cuts quickly and accurately, even when cutting extremely small lengths. The air-assisted mandrel allows quick, easy installation and removal of rubber.

UV SYSTEMS

UV Coaters
for Digital Presses

SuperCell Lamp Heads & Power Supplies

The SuperCell lamp heads feature state-of-the-art technology and design. These advanced features, coupled with the flexibility of fitting almost any press type! Programmable set-up parameters facilitate the operator/equipment interface, and a remote touch-screen interface is standard on multi-lamp systems.

UV/AQ Coating on printed sheets offline or near-line has become the Printers need of the Century. With so much On-demand Printing going on, Printers need a solid reliable solution for their Coating necessities and a company to support them. With Digital Printing, you have many challenges in matching the right Coating with your print to achieve good lay downs, good adhesion and high gloss levels. With our expertise, all of these can be achieved. On the Commercial Printing side, with a wide array of Coatings available, low cost and mileage is what you need. Let us put together a SOLUTION PLAN that fits your budget!
