# GUIDE TO COURSE INFORMATION

## Course Numbering System

The system of numbering courses prescribes that all courses use three digits to indicate the course level and/or type of course, and a three-letter subject designator to indicate the department or college.

- The first, or left, digit of the course catalog number indicates level.
- The second, or middle, digit may or may not indicate the study area, depending upon the curriculum structure of the particular department.

The following course catalog numbering guideline indicates the level and type of course:

Remedial and noncredit courses	000-099
Freshman-level courses	100-199
Sophomore-level courses	200-299
Junior- and senior-level courses	300-499
Joint undergraduate- and graduate-level courses	500-599
First-year graduate-level courses	600-699
Second- and third-year graduate-level courses	700-899
Readings, research, and individual study courses at the doctoral level only	900-996
Master's thesis	997
Individualized study program	998
Doctoral dissertation	999

**Crosslisted Course:** Two or more different subject designators, same or different course numbers, but with the same title and catalog description, e.g., ANT/NAT 447. Crosslisting may occur within a school or college, or between or among schools/colleges.

**Double Numbered Course:** Same subject designator, two different course numbers at the same or different levels, usually undergraduate and graduate, e.g., ANT 447/647

## Experience Credit, Independent Study, Honors Thesis, Readings and Research Courses

All-University courses allow students considerable flexibility in developing individual academic programs. Students enrolled in any school or college within the University may enroll in these courses.

Students are advised to check carefully with their faculty advisors and the dean of their school or college before registering for an all-University course to be sure that the course will be accepted toward the completion of their degree requirements.

All students registering for Independent Study, Experience Credit, or Honors Thesis classes must make arrangements with a faculty sponsor prior to registration. **Students cannot register for Independent Study classes via MySlice registration.** Proposal for Independent Study Course forms, available in deans' offices and online, must be completed and submitted to the Registrar's Office, 106 Steele Hall. The form must have the signatures of the faculty sponsor, the chairperson of the department in which the student is taking the class, and for undergraduates the dean of the student's home college. Some classes may have an associated class fee.

### Selected Topics Course (title may vary)

(Subject) (Catalog Number, usually ending in 00) Selected Topics 1-6 credits

Exploration of a topic (to be determined) not covered by the standard curriculum but of interest to faculty and students in a particular semester.

### Experience Credit Course

(Subject) (Catalog Number, usually ending in 70) Experience Credit 1-6 credits

Participation in a discipline- or subject-related experience. Students must be evaluated by written or oral reports or an examination. Limited to those in good academic standing. The student must get permission, in advance, from assigned instructor, department chair, or dean.

### International Course

(Subject) (Catalog Number, usually ending in 80) (Title and Name of Institution) 1-12 credits

Offered through Syracuse University Abroad (SU Abroad) by an educational institution outside the United States. Student registers for the course at the foreign institution and is graded according to that institution's practice. SU Abroad works with SU's academic department to assign the appropriate course level, title, and grade for the student's transcript.

### Independent Study Course

(Subject) (Catalog Number, usually ending in 90) Independent Study 1-6 credits

In-depth exploration of a problem or problems. Individual independent study upon a plan submitted by the student. The student must get permission, in advance, from assigned instructor or department chair. May be repeated for credit.

### Honors Thesis Course

(Subject) (Catalog Number 499) Honors Thesis 3-6 credits  
The "499" number is used as needed by all departments in the University.

## Mode of Instruction

### Online Asynchronous Non-Residency Class (O1)

A class offering taught asynchronously, with students and instructors physically separated, and delivered/accessed online, primarily without scheduled class sessions or real-time interaction.

### Online Asynchronous Residency Class (O2)

A class offering with limited duration in-person, on-campus class meetings, followed and/or preceded by online asynchronous class delivery/access, primarily without scheduled class sessions or real-time interaction.

### Online Synchronous Non-Residency Class (O3)

A class offering taught synchronously, with students and instructors physically separated but interacting and exchanging class content online in real-time during scheduled class sessions, having no face-to-face interactions (except as mediated by technology).

### Online Synchronous Residency Class (O4)

A class offering with limited duration in-person class meetings, followed and/or preceded by synchronous class delivery/access with students and instructors interacting and exchanging class content in real-time online during scheduled class sessions (that may include face-to-face interactions mediated by technology).

Complex traits are features whose properties are controlled by many genes and whose inheritance does not follow the simple rules of Mendelian genetics, mostly due to the role of environmental variation in affecting the phenotype. This seminar course will use recent literature and student-led discussions and presentations along with writing assignments to understand the significance of complex traits and explore current methods. Student will learn how genetic and genomic approaches are used to understand the interaction between genotype and environment in producing a phenotype. Topics will range from disease-related traits in humans to plant breeding and agriculture, with model systems ranging from mice to maize. Class Topic: Global Change Biology. Jrs. & Srs. only. Meets with BIO 600-009.

Meets with BIO 600-010 Behavioral adaptations based on individual experiences give animals the ability to use their pasts to solve new problems, an ability that can be obviously important to an animal's survival. This course will examine behavioral plasticity and the brain mechanisms responsible for the changes in behavior. Interestingly, there appears to be considerable conservation across much of the animal kingdom of basic biological mechanisms that mediate behavioral and brain plasticity. The class will include information that crosses several levels of analysis, from the organism, to brain systems, to neurons, to synapses, to biochemical mechanisms. The class will also consider information about memory dysfunctions as seen in aging, dementia, and retardation in humans and in laboratory model animals such as rats and mice. The format will be lecture/discussion sessions with evaluations of student performance based on participation, writing assignments, and exams.  There are no specific prerequisites for this course. However, prior completion of at least one of the following classes listed is expected: Bio 327 Cell Biology, Bio 326 Genetics, Bio 211 Intro to Neuroscience, Psy 223 Biopsychology, Bio 355 General Physiology.

	51363	SEC M001	TBA	Maye	3.0		Meets with CHE/PHY 638 A seminar on the critical analysis of the current literature on interfaces, whereby we will define the frontiers of interface research by identifying unsolved problems. Small interdisciplinary groups will scour online databases for hot articles or research groups associated with a particular research topic (e.g., biomaterial interfaces relevant to a particular disease or injury; fundamental interface problems in soft matter physics; techniques for patterning surfaces; mechanisms for bacterial biofilm control; novel mechanisms for drug delivery) ultimately selecting a single paper to be pitched to the entire class for in-depth consideration by all. Following this selection, several students will lead the discussion of the article. The class will critically analyze the paper and end with updating a developing list of unsolved problems. This course goes beyond traditional seminar or paper classes by developing appreciation for the process of defining a research project in the context of friendly, interdisciplinary debate that fosters improved scientific communication. Near the end of the course teams will be asked to prepare a concrete research proposal to be refereed by the class. The diverse composition of the teams will challenge the students to find ways of taking advantage of their different expertise and will provide a taste of team grant-writing. Offered every year in the Spring semester.

52077	SEC	U800			O'Keefe	3.0	Class Topic: Life/Times of George Washngton. O1 = Online Asynchronous Non-Res. Focus on the career of George Washington as Commander-in-Chief of the Continental Army and as the first President of the United States, analyzing the impact of Washington's skills as a military leader, and as President, taking into account his support of the ratification of the Constitution and transferring the ideals of the Revolution into reality. Gain insights into broader subjects such as slavery, republicanism, and the meaning of the American experiment. Read selections from Washington's writings; understand how Washington's ideas became manifest over time. Review historical and biographical treatments of Washington, as well as the important question of whether Washington should be understood as a creative force in the founding or exclusively as a symbol of those collective efforts.

MAT 830	50958	SEC	M001	TTh	02:00PM-03:20PM	Staff	3.0		Class Topic: Variational Energy Integrals. LECTURES ON VARIATIONAL METHODS IN GEOMETRIC FUNCTION THEORY AND NONLINEAR ELASTICITY This course is about Sobolev mappings of domains in the Euclidean n-space which satisfy certain nonlinear partial differential equations (PDEs). They appear naturally in Geometric Function Theory (GFT) as quasiconformal mappings and in Materials Science as hyperelastic deformations; that is, mappings (predominantly homeomorphisms) which minimize a given energy integral. The central issues are: existence, uniqueness and regularity of the energy-minimal deformations, also the associated phenomena such as occurrence of cracks and fractures. The course makes no pretension to be looked at as learning the modern theory of nonlinear elasticity, PDEs or quasiconformal mappings, but provides useful mathematical outlook. In particular, topological curiosities and theoretical prediction of failure of bodies caused by cracks should appeal to mathematical analysts and researchers in the engineering fields. No special prerequisites (only basics in analysis) are required; some of them (Sobolev spaces) will be reviewed if the need will arise.
MAT 850	50959	SEC	M001	MW	12:45PM-02:05PM	Staff	3.0		Class Topic: Representation Theory. The course will cover topics such as: Auslander-Reiten theory, geometric methods in representations of finite dimensional algebras, self-injective algebras, tilted algebras and Koszul algebras. Prerequisites are MAT 737 and MAT 731. Having taken MAT 732 is a plus, but not a prerequisite in this course.
MAT 999	50960	SEC	M001	TTh	12:30PM-01:50PM	Staff	3.0		Class Topic: Categorical Data Analysis. Goal: To learn to analyze categorical responses in contingency tables as well as understand and apply appropriate generalized linear models for categorical data. Learning Outcomes: Two-way and three-way contingency tables, logistic regression, loglinear models for contingency tables, ordinal associations, multicategory logit models.

	Class Topic: Media, Democracy & Social Issues. Description: What are "media" and "democracy" in the U.S. context in the 21st century? What is the relationship between media, democracy and a range of social issues? What is popular culture? Can a person's uses of popular culture impact the politics around social issues in the U.S. experience? How do creators of popular culture texts (movies, magazines, music, videos, video games, comic books, romance novels, etc.) use these forms to stabilize, challenge, or make more complex political or social issues in the U.S. experience? How do these popular culture texts construct and shape the meanings we make of identity markers such as race, gender, class, sexuality, etc.? How does the audience "read" and experience these popular culture texts? What factors, if any, influence the multiple meanings, interpretations and pleasures audiences derive from engaging popular culture texts? Who "owns" media outlets in the U.S.? What is the relationship between media ownership and democracy? What is the role of schools in assisting students to become more media literate? In U.S. society, unlike most European and African nations and Canada, media literacy is not required of high school students. Why is this? How is the study and teaching of media and media education implicated in both the reinforcement of and resistance against oppression in the U.S. context?.

Designed for doctoral students and advanced master's degree students, this course examines historical and current discourses of autism through a variety of mediums and modalities, including research literature, autobiographies, film, television, blogs and fictional representations. Primary consideration will be given to autobiographical and family accounts of autism, set against the backdrop of the larger cultural conversation. In addition to exploring how autism is represented, constructed, and enacted, we will explore implications for educational practice and research.

**Music****AMC - Applied Music Classes****GROUP VOICE AND INSTRUMENT CLASSES FOR NON-MUSIC MAJORS:**

VOICE CLASS I, PIANO CLASS I and II, AND GUITAR CLASSES FOR NON-MUSIC MAJORS are offered under the AMC prefix (see AMC 100/200/500).

Students who are not VPA majors or VPA minors will be charged \$75 per credit hour for courses taken in VPA. These charges will be applied to their bursar account after the Financial Drop Deadline. VPA majors who are UC/Part-Time students will also be charged \$75 per credit.

**PRIVATE MUSIC LESSONS (ONE-TO-ONE INSTRUCTION) FOR EITHER MUSIC MAJORS OR NON-MUSIC MAJORS:**

Private Music Lessons can be taken for 1, 2 or 4 credits and are offered in bassoon, clarinet, double bass, drumset, euphonium, French horn, flute, guitar, harp, harpsichord, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, violoncello, viola, violin, and voice. See individual instrument categories for course prefix and number (composition lessons can be found under the MTC prefix; conducting lessons can be found under the CTG prefix).

Private Music Lessons in JAZZ piano, guitar, double bass, drumset, saxophone, trumpet, trombone, and voice are located under MTC 100/200/300/400.

Applied Music lessons MAY NOT be audited.

All lesson registrations are done by the School of Music staff. STUDENTS CANNOT REGISTER THEMSELVES FOR PRIVATE LESSONS.

To register for Private Music Lessons, students must complete a lesson registration form on the Setnor School of Music website at <http://vpa.syr.edu/music/resources>. You must select the correct form depending on what type of student you are (Music Major: Undergraduate, Music Major: Graduate, or Non-Music Major).

Please SAVE the form to your computer, then TYPE your information into the form and SAVE it AGAIN. We cannot accept handwritten forms. PRINT a copy of the form, sign and date it, and bring it to the School of Music Office, 215 Crouse College.

Lessons must be dropped through the School of Music Office, 215 Crouse College, or via email at [music@syr.edu](mailto:music@syr.edu).

PLEASE DO NOT USE AN ADD/DROP FORM TO ADJUST LESSON REGISTRATION.

Students who want to drop lessons must do so BEFORE THE FINANCIAL DROP DEADLINE to avoid paying the Applied Music fee.

**PRIVATE MUSIC LESSON FEES:**

There are no refunds for Private Music Instruction after the financial drop deadline!

FEES: (Fees apply to all students, including HOM, except as specified below.)

1 credit (14 half-hour lessons) = \$650 Lesson Fee + \$15 Practice Room Fee.

2 credits (14 hour lessons) = \$1,300 Lesson Fee + \$20 Practice Room Fee.

Fees will either be waived or reduced for the following majors/minors:
