GUIDE TO COURSE INFORMATION

Course Numbering System

The present system of numbering courses prescribes that all courses use three digits to indicate the course level and/or type of course, and a three-letter subject to indicate the department or college.

The following catalog numbering guidelines indicate the level and type of course:

Remedial and noncredit courses	000-099
Freshman-level courses	100-199
Sophomore-level courses	200-299
Junior- and senior-level courses	300-499
Joint undergraduate- and graduate-level courses	500-599
First-year graduate-level courses	600-699
Second- and third-year graduate-level courses	700-899
Readings, research, and individual study courses at only the doctoral level	900-996
Master's thesis	997
Individualized study program	998
Doctoral dissertation	999

Crosslisted Course: Two or more different subject designators, same or different course numbers, but with the same title and catalog description, e.g., ANT/NAT 447. Crosslisting may occur within a school or college, or between or among schools/colleges.

Double Numbered Course: Same subject designator, two different course numbers at the same or different levels, usually undergraduate and graduate, e.g., ANT 447/647

Experience Credit, Independent Study, Honors Thesis, Readings and Research Courses

All-University courses allow students considerable flexibility in developing individual academic programs. Students enrolled in any school or college within the University may enroll in these courses. Some, but not all, all-University courses are displayed under individual school and college course listings in this catalog. Whether listed or not, the descriptions are standard in every program and are provided below.

Experience credit and independent study courses may be elected for one to six credits, depending on individual arrangements with the participating faculty member. In selected topics courses, students may earn one to six credits. Students are advised to check carefully with their faculty advisors and the dean of their school or college before registering for an all-University course to be sure that the course will be accepted toward the completion of their degree requirements.

Selected Topics Course (title may vary)

(Subject) (Catalog Number) Selected Topics 1-6 credits
Exploration of a topic (to be determined) not covered by the standard curriculum but of interest to faculty and students in a particular semester.

Experience Credit Course

(Subject) (Catalog Number) Experience Credit 1-6 credits
Participation in a discipline- or subject-related experience. Students must be evaluated by written or oral reports or an examination. Limited to those in good academic standing. The student must get permission, in advance, of assigned instructor, department chair, or dean.

International Course

(Subject) (Catalog Number) (Title and Name of Institution) 1-12 credits
Offered through Syracuse University Abroad (SU Abroad) by an educational institution outside the United States. Student registers for the course at the foreign institution and is graded according to that institution's practice. SU Abroad works with SU's academic department to assign the appropriate course level, title, and grade for the student's transcript.

Independent Study Course

(Subject) (Catalog Number) Independent Study 1-6 credits
In-depth exploration of a problem or problems. Individual independent study upon a plan submitted by the student. Admission by consent of supervising instructor or instructors and the department. May be repeated for credit.

Honors Thesis Course

(Subject) 499 Honors Thesis 3-6 credits
The "499" number is used as needed by all departments in the University. Students sign up for Honors Thesis the same way they do for the other all-University courses - by filling out a form at registration each time they register for the course.

Mode of Instruction

Online Asynchronous Residency Class (O2)

A class offering with limited duration in-person, on-campus class meetings, followed and/or preceded by online asynchronous class delivery/access, primarily without scheduled class sessions or real-time interaction.

Online Synchronous Non-Residency Class (O3)

A class offering taught synchronously, with students and instructors physically separated but interacting and exchanging class content online in real-time during scheduled class sessions, having no face-to-face interactions (except as mediated by technology).

Online Synchronous Residency Class (O4)

	20115	SEC	M001	TBA	Ritchie	1.0	6.0	Class Topic: Plant Resource Dynamics. The ways that plants use their resources, such as carbon, water, nitrogen, phosphorus, has a huge impact on the form and function of plants in different environments, and on the dynamics of food webs and ecosystems. The evolution of plant physiology of photosynthesis, respiration and growth is set in the context of limiting supplies of resources, light and thermal energy, possibilities for benefits from resource exchange mutualists, and various risks (e.g., herbivory, climate extremes, disease, competition). This seminar-style course will explore these topics from an evolutionary and ecological perspective by reading recent literature and presenting syntheses.

MAT 830 Topics in Modern Algebra							
12844	SEC	M001	TTh	03:30PM-04:50PM	Staff	3.0	Class Topic: Group and Hopf Algebra Actions. Description: For certain algebras over a field (or a commutative ring), the tensor product of two modules is again an A-module. The most familiar example is a group algebra, but this notion also includes enveloping algebras and the coordinate ring of an affine algebraic group. The underlying structure is that of a Hopf algebra. (These are described as ubiquitous by Rotman.) In this language, classical Galois theory can be revisited, along with more general actions by groups and Lie algebras on noncommutative rings.

MAX - Maxwell School

MAX 123 Critical Issues for U.S.							
<i>MAX 123 and MAX 132 are designed to give first and second year students a better understanding of public life and closer contact with faculty members. The courses are interdisciplinary; professors from various social science departments participate. Each course will satisfy three hours of the liberal arts core requirement in social science; together they fulfill the sequence requirement. If used as a sequence, either course may be taken first. Class Topic: Computational Solid Mechanics. MAE 600 is a graduate level course on the theory and implementation of the finite element method for solving boundary value problems in solid mechanics. On completing the course, you should be: (i) Familiar with the theoretical foundations of the finite element method; (ii) Able to use the commercial finite element code ABAQUS, (including user-elements) and open source finite element codes, such as FEniCS; and (iii) Able to use and extend your own finite element code to solve boundary and initial value problems in solid mechanics. Prerequisites: MAE 635 and MAE 675, MAE 721 is helpful but not essential; experience with MATLAB is helpful.

							FIELD STUDIES This course is an advanced studio in which you will bring your artistic practice to bear on the problem of understanding and appreciating Place. Ranging from personal places that reflect the circuits within which you act and belong to places newly encountered & be it a cityscape, industrial ruins or a forest. In this class you will explore how a mental geography of place can be expressed in artistic terms. Through readings, screenings, discussions, and creative assignments, you will develop your ability and confidence to articulate an artistic vision of place. The course will follow an arch starting from an exploration of places close by (the personal) to those further afield.

							MYTH, FAIRY TALES & ACHETYPES Myth, fairy tales and cultural folklore, along with archetypal themes, occur repeatedly in animation, film, video, visual imagery, literature and everyday life. These tales originated from the local culture to provide a means of navigating the world on a deeper subconscious and social level. As our own world becomes more global and less local, some of these older myths become less relevant. But like the phoenix rising from the ashes, new myths are being created as older ones are rethought and restructured. In this advanced studio, you'll have the opportunity to explore how myths have relevance to your personal work. They can act as a road map in the creation of narrative through time-based work and still images. The class will consist of engaging discussions, one presentation from each student and independent projects that relate to what we're discussing and researching. We'll be viewing excerpts of animations, films and reading myths/tales from different cultures so we can compare, contrast and draw our own conclusions.
	19147	SEC	M003	M 08:25AM-12:30PM	Dragoeva	3.0	Transmedia Juniors Only. Prerequisite: TRM251 This course is an advanced studio class, which will focus on the concept of μtransmedia story telling, μ as used in creative commercial industry and its overlap with the term μtransmedia, μ as used in art. This course will give basic understanding and skills for development of Transmedia campaign, useful to filmmakers, photographers, computer animation specialists and artists, who develop their campaigns for the creative industry, art venues or for social activism. Students will work on one assignment project of their design through the semester and will give weekly updates. Discussion in class is essential. The class will also include visits of two prominent artists, who have extensive experience in developing socially engaged scenarios for Transmedia campaigns and computer games such as: Paolo Pederchini (Molleindustria http://www.molleindustria.org Carnegie Mellon University) and Heidi Boisvert PhD (http://www.heidiboisvert.com/about/).

Co-taught with School of Architecture Professor, Yutaka Sho, this course asks students to construct new story telling methods by deploying art and architectural means. The course will question the naturalized and static understandings of historical events, and reveal the storytellers' intentions, biases, and dissemination mechanisms. The course will examine subsequent political and social impacts of such history telling in the contemporary world and will intervene in order to propose alternative methods and meanings. We will investigate storytelling experiences of historical atrocities, and will focus on the atomic bomb attack on Hiroshima in 1945.
