GUIDE TO COURSE INFORMATION

Course Numbering System

The present system of numbering courses prescribes that all courses use three digits to indicate the course level and/or type of course, and a three-letter subject to indicate the department or college.

The following catalog numbering guidelines indicate the level and type of course:

Remedial and noncredit courses	000-099
Freshman-level courses	100-199
Sophomore-level courses	200-299
Junior- and senior-level courses	300-499
Joint undergraduate- and graduate-level courses	500-599
First-year graduate-level courses	600-699
Second- and third-year graduate-level courses	700-899
Readings, research, and individual study courses at only the doctoral level	900-996
Master's thesis	997
Individualized study program	998
Doctoral dissertation	999

Crosslisted Course: Two or more different subject designators, same or different course numbers, but with the same title and catalog description, e.g., ANT/NAT 447. Crosslisting may occur within a school or college, or between or among schools/colleges.

Double Numbered Course: Same subject designator, two different course numbers at the same or different levels, usually undergraduate and graduate, e.g., ANT 447/647

Experience Credit, Independent Study, Honors Thesis, Readings and Research Courses

All-University courses allow students considerable flexibility in developing individual academic programs. Students enrolled in any school or college within the University may enroll in these courses. Some, but not all, all-University courses are displayed under individual school and college course listings in this catalog. Whether listed or not, the descriptions are standard in every program and are provided below.

Experience credit and independent study courses may be elected for one to six credits, depending on individual arrangements with the participating faculty member. In selected topics courses, students may earn one to six credits. Students are advised to check carefully with their faculty advisors and the dean of their school or college before registering for an all-University course to be sure that the course will be accepted toward the completion of their degree requirements.

Selected Topics Course (title may vary)

(Subject) (Catalog Number) Selected Topics 1-6 credits
Exploration of a topic (to be determined) not covered by the standard curriculum but of interest to faculty and students in a particular semester.

Experience Credit Course

(Subject) (Catalog Number) Experience Credit 1-6 credits
Participation in a discipline- or subject-related experience. Students must be evaluated by written or oral reports or an examination. Limited to those in good academic standing. The student must get permission, in advance, of assigned instructor, department chair, or dean.

International Course

(Subject) (Catalog Number) (Title and Name of Institution) 1-12 credits
Offered through Syracuse University Abroad (SU Abroad) by an educational institution outside the United States. Student registers for the course at the foreign institution and is graded according to that institution's practice. SU Abroad works with SU's academic department to assign the appropriate course level, title, and grade for the student's transcript.

Independent Study Course

(Subject) (Catalog Number) Independent Study 1-6 credits
In-depth exploration of a problem or problems. Individual independent study upon a plan submitted by the student. Admission by consent of supervising instructor or instructors and the department. May be repeated for credit.

Honors Thesis Course

(Subject) 499 Honors Thesis 3-6 credits
The "499" number is used as needed by all departments in the University. Students sign up for Honors Thesis the same way they do for the other all-University courses - by filling out a form at registration each time they register for the course.

Mode of Instruction

Online Asynchronous Non-Residency Class (O1)

A class offering taught asynchronously, with students and instructors physically separated, and delivered/accessed online, primarily without scheduled class sessions or real-time interaction.

Online Asynchronous Residency Class (O2)

A class offering with limited duration in-person, on-campus class meetings, followed and/or preceded by online asynchronous class delivery/access, primarily without scheduled class sessions or real-time interaction.

Online Synchronous Non-Residency Class (O3)

A class offering taught synchronously, with students and instructors physically separated but interacting and exchanging class content online in real-time during scheduled class sessions, having no face-to-face interactions (except as mediated by technology).

Online Synchronous Residency Class (O4)

A class offering with limited duration in-person class meetings, followed and/or preceded by synchronous class delivery/access with students and instructors interacting and exchanging class content in real-time online during scheduled class sessions (that may include face-to-face interactions mediated by technology).

BIO 396	Stem Cells and Society — Crosslisted with PHI 396, REL 359.							
	33485	SEC	M001	MWF	10:35AM-11:30AM	Erdman Paakkunainen	3.0	The science of stem cells and the philosophical, religious and legal complexities surrounding the research and use of stem cell technologies.
BIO 400	Selected Topics							
	32957	SEC	M001	W	02:15PM-05:05PM	Gold	3.0	Class Topic: Experimental Designs & Interpr. Jrs. & Srs. only. This seminar will discuss how historical ideas and data, even when no longer believed to be correct, shape the way current research is performed. The course will include multiple presentations and papers. Meets with BIO 600-001.
	41269	SEC	M002	T	02:00PM-04:45PM	Korol	3.0	Class Topic: Sem: Neurodegenerative Disease. Jrs. & Srs. only. This seminar course is intended to review and to stimulate discussion about the current status of our knowledge about neurodegenerative diseases, emphasizing distinctions between pathological and healthy brain aging. While the main focus is on the etiology, neurobiology, and emergent symptoms of the diseases, broader biological, sociological, and historical perspectives are woven into the material. Seminar format including lectures, discussions, student presentations, and a variety of written assignments. Meets with BIO 600-002.
	41508	SEC	M004	MWF	10:35AM-11:30AM	Phillips	3.0	Class Topic: Pharmaceuticals & Cells: Jrs. & Srs. only. How do drugs affect cells, and why should we care? Students will be introduced to a variety of signal transduction pathways and their function in the regulation of cellular processes. To demonstrate applications of signal transduction in biotechnology, this course focuses on signaling cascades targeted in the treatment (or potential treatment) of medical conditions including cancer, asthma, depression, drug addiction, neurodegeneration, cardiovascular disease and developmental abnormalities. Additional work required of graduate students. Meets with BIO 600-004.

BIO 600	Selected Topics	32958	SEC M001	W 02:15PM-05:05PM	Gold	3.0	Class Topic: Experimental Designs & Interpr. This seminar will discuss how historical ideas and data, even when no longer believed to be correct, shape the way current research is performed. The course will include multiple presentations and papers. Meets with BIO 400-001.
		41268	SEC M002	T 02:00PM-04:45PM	Korol	1.0 6.0	Class Topic: Sem: Neurodegenerative Disease. This seminar course is intended to review and to stimulate discussion about the current status of our knowledge about neurodegenerative diseases, emphasizing distinctions between pathological and healthy brain aging. While the main focus is on the etiology, neurobiology, and emergent symptoms of the diseases, broader biological, sociological, and historical perspectives are woven into the material. Seminar format including lectures, discussions, student presentations, and a variety of written assignments. Meets with BIO 400-002.
		41565	SEC M003	Th 02:00PM-04:30PM	Frank	1.0 3.0	Class Topic: Climate Change. Climate change (global warming) is rapidly becoming one of the most pressing issues of the twenty-first century. This course introduces students to the challenges posed by climate change through a unique multidisciplinary exploration of the scientific, economic, policy, communicative, and even philosophical dimensions of the issue. The course will cover topics such as the current state of scientific knowledge about climate change, the role of the media in shaping public opinion on the issue, competing discourses of climate change, risk and uncertainty in decision-making, costs and benefits of different types of policies, the Kyoto protocol and other policy initiatives, actions being taken to address the issue, and the ethical dimensions of the choices facing humanity. Faculty from SU and ESF in law, economics/public administration, earth science, and environmental studies will co-teach this course and bring to students a unique dialog that crosses traditional disciplinary boundaries. Moreover, emphasis will be placed on drawing out the general lessons obtained from a multidisciplinary approach to climate change: many of the insights will be applicable to other complex, highly technical environmental problems. This course is intended to bring together students from a diverse range of backgrounds and does not have specific prerequisites. Meets with PPA 730 & LAW 891.
		41507	SEC M004	MWF 10:35AM-11:30AM	Phillips	1.0 6.0	Class Topic: Pharmaceuticals & Cells: How do drugs affect cells, and why should we care? Students will be introduced to a variety of signal transduction pathways and their function in the regulation of cellular processes. To demonstrate applications of signal transduction in biotechnology, this course focuses on signaling cascades targeted in the treatment (or potential treatment) of medical conditions including cancer, asthma, depression, drug addiction, neurodegeneration, cardiovascular disease and developmental abnormalities. Additional work required of graduate students. Meets with BIO 400-004.

	Class Topic: Physical Hydrology. We use models to make predictions, to evaluate scenarios, and to better understand how a given system functions. This course will cover the use of earth systems models, drawing some examples from hydrology but suited for a broad audience. Course topics will include parameter estimation, uncertainty analysis, sensitivity analysis, optimization, and visualization. The course will be taught in Matlab; a background in Matlab or R is generally recommended.

		Type	Nbr			Units	Units	
	33555	SEC	U201	TTh	05:00PM-06:20PM	Staff	1.0 6.0	Class Topic: Politics of Modern Turkey. This course introduces students to one of the most important political developments in the Middle East and Europe: the politics of the late Ottoman Empire and the Turkish Republic (1876 to the present day). In this course, we will focus on how the Ottoman's imperial practices of managing multi-ethnic, multi-faith and multi-linguistic societies, along with their pluralistic legal frameworks, were transformed into the assimilationist policies and constitutional structure of the modern Turkish Republic. In doing so we will examine how Turkey's mono-ethnic, Sunni Islam-dominated and mono-linguistic nation-state identity has developed from its pluralistic Ottoman past. We will learn about Western influences and continued attempts to modernize Turkey. The struggles between secularism, Islamism and nationalism - ongoing since 1876 - will also be examined, with a particular focus on the longstanding Turkish-Kurdish conflict. Other important themes examined throughout this course include the significance of gender and the battle for equality within contestations of the Turkish state, and Turkey's approach to democracy, human rights and free speech.

ELE 691	Special Topics in ELE					
	34553	SEC M002	MW 03:45PM-05:05PM	Song	3.0	Class Topic: Physcl Pmcpcl of Wireless Comm. This course integrates the topical areas of wave propagation and antennas with consideration to their applications to designing the physical layer in modern wireless communication systems. Topics to be covered include introduction of modern wireless communications and their special features, noise in wireless communications, antennas, RF wave propagation, statistical considerations in designing cell phone systems and wireless local area networks (WLANs), tropospheric and ionospheric effects in long rang communication. Class Topic: Image and Video Processing.

	37213	SEC M001	M	12:45PM-03:30PM	Wang	3.0	Class Topic: Privacy Policy, Law, and Tech. Privacy has long been considered as a fundamental human right. Emerging technologies such as social media, smart grid, Internet of Things, drones, and self-driving cars have raised heightened privacy issues. Recent development of regulations such as the European Union's General Data Protection Regulation (GDPR) is also drawing increasing attention from technologists, policy makers, and the media. How to protect people's privacy is a key challenge of our time. This course provides an in-depth look into privacy, privacy laws and self-regulations, privacy-enhancing technologies and mechanisms. Privacy will be examined from historical, philosophical, cultural, legal, economic, behavioral, and technical perspectives. This course is designed primarily for graduate students in a wide range of disciplines such as information science, computer science and engineering, law, business, media studies, economics, politics, and psychology.

	41171	SEC U802		Sanders	3.0	Class Topic: Analyzing the Basketball Org.. O1 = Online Asynchronous Non-Res. Winterlude. All classes contingent upon sufficient enrollment. You are encouraged to register by December 12th. Analyzing the Basketball Organization will address business and managerial aspects of professional basketball organizations. Organizational structure and primary functions of management within professional basketball leagues and teams. The WNBA Collective Bargaining Agreement, NBA Collective Bargaining Agreement and similar documents of professional basketball leagues throughout the world. We will compare leagues in terms of organizational structure, market valuation, and competitive balance and study the rules governing player, player trades, free agency, and salary caps, as well as the importance of the NBA's U.S. anti-trust exemption to its supremacy among professional basketball leagues. Designed primarily to train sport management and sport analytics majors but may also appeal management, finance or economics students. Pre-law students would also benefit from the Collective Bargaining Agreement treatment within the course. Course texts will be chosen such that students without an extensive background in sport management can supplement their readings and achieve success in the class.

DES 200	Selected Topics								
	41588	SEC	M001	MW	02:15PM-03:35PM	Nyboer	1.0	6.0	Class Topic: Creative Problem Solving. Creative Problem Solving is a design course for anyone seeking to increase their creative ability. Creativity is a measurable yet flexible ability that can be increased by exploring diverse applications of the creative process and design thinking. The course applies design-inspired practices to facilitate individual and professional creative growth, and to guide investigations that are multidisciplinary and empathic. A generative model of learning encourages learners to analyze and challenge the contexts that define normal practices and circumstances. Enhanced by unusual exercises, readings, lectures, and discussions, the course emphasizes the importance of "different" in achieving meaningful creative outcomes.

	41589	SEC	M001	MW	02:15PM-03:35PM	Nyboer	1.0	6.0	Class Topic: Creative Problem Solving. Creative Problem Solving is a design course for anyone seeking to increase their creative ability. Creativity is a measurable yet flexible ability that can be increased by exploring diverse applications of the creative process and design thinking. The course applies design-inspired practices to facilitate individual and professional creative growth, and to guide investigations that are multidisciplinary and empathic. A generative model of learning encourages learners to analyze and challenge the contexts that define normal practices and circumstances. Enhanced by unusual exercises, readings, lectures, and discussions, the course emphasizes the importance of "different" in achieving meaningful creative outcomes.

	41449	SEC	M003	Th	09:30AM-12:10PM	Saluti	3.0		Class Topic: Identify Materials, Process Te. An essential skill when working with collection objects is the ability to understand and identify the various techniques and materials makers use. From painting to sculpture to photography and the universe of print processes, this course examines the wide range of techniques and materials that populate permanent collections. Contextual lecture that explores the history of process is augmented by hands on experiences in the University's extensive collections and live demonstrations from practicing artists and craftsmen. Ideal for students interested in collections management or curatorial practice.

Music

AMC - Applied Music Classes

GROUP INSTRUMENT CLASSES FOR NON-MUSIC MAJORS:

PIANO CLASS, VOICE CLASS, and GUITAR CLASSES FOR NON-MUSIC MAJORS are offered under the AMC prefix (see AMC 100/500).

Students who are not VPA majors or VPA minors will be charged \$75 per credit hour for courses taken in VPA. These charges will be applied to their bursar account after the Financial Drop Deadline. VPA majors who are UC/Part-Time students will also be charged \$75 per credit. This additional per credit hour fee does not apply to courses taught at SU Abroad Centers.

PRIVATE MUSIC LESSONS (ONE-TO-ONE INSTRUCTION) FOR EITHER MUSIC MAJORS OR NON-MUSIC MAJORS: (Students may incur an additional charge for Private Music lessons. Please read fee details below.)

Private Music Lessons can be taken for 1, 2 or 4 credits and are offered in bassoon, clarinet, double bass, drumset, euphonium, French horn, flute, guitar, harp, harpsichord, oboe, organ, percussion, piano, saxophone, trombone, trumpet, tuba, violoncello, viola, violin, and voice. See individual instrument categories for course prefix and number (composition lessons can be found under the MTC prefix; conducting lessons can be found under the CTG prefix).

Private Music Lessons in JAZZ piano, guitar, double bass, drumset, saxophone, trumpet, trombone, and voice are located under MTC 100/200/300/400.

Applied Music lessons MAY NOT be audited.

All lesson registrations are done by the School of Music staff. STUDENTS CANNOT REGISTER THEMSELVES FOR PRIVATE LESSONS.

To register for Private Music Lessons, students must complete a Private Music Instruction Registration Form on the Setnor School of Music website at <http://setnor-resources.vpa.syr.edu/>. Click on either 'Music Majors' or 'Non-Music Majors' to locate the form that is specific for you.

Lessons must be dropped through the School of Music Office, 208 Crouse College, or via email at music@syr.edu. PLEASE DO NOT USE AN ADD/DROP FORM TO ADJUST LESSON REGISTRATION. Students who want to drop lessons must do so BEFORE THE FINANCIAL DROP DEADLINE to avoid paying the Applied Music fee.

PRIVATE MUSIC LESSON FEES:

There are no refunds for Private Music Instruction after the financial drop deadline!

FEES: (Fees apply to all students, including HOM, except as specified below.)

1 credit (14 half-hour lessons) = \$650 Lesson Fee.

2 credits (14 hour lessons) = \$1,300 Lesson Fee.

Fees will either be waived or reduced for the following majors/minors:

SETNOR SCHOOL OF MUSIC MAJORS (B.A., B.M.):

VPA program fee covers primary and secondary REQUIRED lessons. Additional lessons that are NOT REQUIRED (elective) are \$650/credit.

B.S. in RAE MAJORS:

No fees charged for a 1 credit (half-hour) lesson per semester. Additional credits are \$650/credit.

NON-VPA MAJORS, PURSUING A MINOR IN THE SETNOR SCHOOL OF MUSIC:

\$50 fee for 1 credit (half-hour) of required lessons per semester. Additional credits are \$650/credit (i.e. 2 credits = \$700 Fee). Student will be charged a VPA Music Minor program fee.

VPA MAJORS, PURSUING A MINOR IN THE SETNOR SCHOOL OF MUSIC:

No fees charged for a 1 credit (half-hour) of required lessons per semester. Additional credits are \$650/credit. Student will be charged a VPA Music Minor program fee.

GRADUATE STUDENTS:

Setnor School of Music: VPA program fee covers REQUIRED lessons. Additional credits are \$650/credit.

School of Education/Music Education Students: 1 credit = \$650 Fee OR 2 credits = \$1,300 Fee.

Non-VPA Students: 1 credit = \$650 Fee OR 2 credits = \$1,300 Fee.

GTR - Guitar Instruction

GROUP GUITAR CLASSES (Learn to Play Guitar) for NON-MUSIC MAJORS: These can be found under the AMC 100 prefix and are recommended over private lessons for BEGINNERS or those with little or no formal training.

Students who are not VPA majors or VPA minors will be charged \$75 per credit hour for courses taken in VPA. These charges will be applied to their bursar account after the Financial Drop Deadline. VPA majors who are UC/Part-Time students will also be charged \$75 per credit. This additional per credit hour fee does not apply to courses taught at SU Abroad Centers.

PRIVATE GUITAR LESSONS (Located Below): These are recommended for students with PRIOR TRAINING OR EXPERIENCE with guitar.

	40505	SEC	M001	M	09:30AM-01:30PM	Dragoeva	3.0	Prerequisite: TRM251 This course is an advanced studio class, which will focus on the concept of transmedia story telling as used in creative commercial industry and its overlap with the term "transmedia," as used in art. This course will give basic understanding and skills for development of Transmedia campaign, useful to filmmakers, photographers, computer animation specialists and artists, who develop their campaigns for the creative industry, art venues or for social activism. Students will work on one assignment project of their design through the semester and will give weekly updates. Discussion in class is essential. The class will also include visits of two prominent artists, who have extensive experience in developing socially engaged scenarios for Transmedia campaigns and computer games such as: Paolo Pederchini (Molleindustria http://www.molleindustria.org Carnegie Mellon University) and Heidi Boisvert PhD (http://www.heidiboisvert.com/about/).
	39676	SEC	M002	T	02:15PM-06:15PM	Hoffman	3.0	Pre Req TRM 251.

TRM 500	Selected Topics								
	40255	SEC	M001		MW	03:45PM-05:05PM	Morris	3.0	Class Topic: Art & Ecology: Animals. How do we look at animals? How do animals look at us? Are humans truly exceptional and different? In this interdisciplinary course we will read and discuss a survey of current critical writing about animal consciousness and existence, look at various important art and media about animal life, and develop our own projects in response to these readings and examples. Student projects can include artwork, creative activism, journalism, blog entries, research, etc. Collaboration is encouraged, as is further developing work begun in other classes and/or relevant thesis work. Class will result in a publication, exhibition, event and/or intervention designed by the class. Open to all university departments and majors, as well as ESF. This class is offered through The Canary Lab in Transmedia.
