

IN1144 LED PROJECTOR

InFocus

Bright Ideas Made Brilliant

Easy from the word Go

If you're going mobile, take the InFocus IN1144 with you. Our smallest and lightest projector also features the longest-lasting light source we've ever offered. At about the size of a paperback book and less than two pounds, the IN1144 is easy to pack in your bag and carry on.

Better still, our first lampless model makes maintenance easy—or nonexistent—with a light-emitting diode (LED) that lasts up to 30,000 hours. So you can go from place to place, presentation to presentation, without ever giving your projector a thought.

Why choose the IN1144?

- 30,000-hour LED light source
- Only 1.76 pounds (0.8 kg)
- WXGA (1280 x 800) widescreen resolution
- Excellent connectivity:
 - HDMI and VGA inputs
 - PC-less presentation via USB drive or SD card
 - Optional USB wireless connectivity
- Striking image quality and contrast
- Auto keystone correction

Connectivity

HDMI	USB Type A
VGA	3.5 mm composite video/stereo audio in
SD Card Slot	3.5 mm audio out

Long-lived lampless light

How long will the light source of IN1144 LED projector really last? The LED is rated for up to 30,000 hours—so if you use it 4 hours a day, 5 days a week, 50 weeks a year, it'll last about 12 years. Until then, it's maintenance-free—not even a filter to clean or replace. And LED projectors even use less power than their conventional cousins, so you can feel more “green” too.

Striking color and contrast

LED projectors are known for their image stability and saturated colors. But the IN1144 features a high contrast of 10,000:1, so it's even better at vividly rendering fine detail and subtle color differences. Even ho-hum business graphics and content pop on the screen.

10,000:1

Three presentation options

The IN1144 gives you three easy ways to connect. You can present content from your PC over a HDMI or VGA cable. Or forget the cable and connect wirelessly using your laptop and our optional USB WiFi adapter. Or forget the laptop and dynamically display PowerPoint presentations, Word documents, photos, videos and more from a USB thumb drive or SD card.

HDMI™
HIGH-DEFINITION MULTIMEDIA INTERFACE

Ultra-simple operation

When giving a presentation, you don't want to focus on your projector too. The IN1144 is ready when you are. You don't even have to wait for it to warm up: it's on when you flip the switch. And auto keystone correction keeps your image square and true wherever you're projecting.
