Why Dell Premier?

Transform the way you purchase IT with Dell Premier.

Modernise your technology purchasing and free up your time so that you can focus on the bigger picture. Dell Premier provides you with a customised, secure online toolset for purchasing, reporting and product support, all backed by a dedicated account team - reliable, efficient and available 24/7.
Get greater control over the entire procurement ecosystem.

Learn More

Simplified one-stop procurement

Customised for your business

Easy tracking of orders

Comprehensive and scalable solutions

Save time and money by shopping our product catalogue on Dell Premier.

From redesigned Latitude family to Dell Precision to OptiPlex, we offer devices designed for the way you work - anywhere, anytime. With a broader portfolio of technology solutions, accessories and services, we can help you grow confidently and embrace the transformative technology your organisation needs.

The world's number #1 monitor company[1] delivers a wide range of displays with innovative technology, multitasking and comfort features that expand your productivity, no matter where you work. And the Dell Client Peripherals perfectly complement Dell systems - from docks to mice to power banks to headsets. Our accessories will help you work comfortably and efficiently in the office or on-the-go.

Give your workforce the right technology to stay productive from anywhere, anytime. A whole range of devices and peripherals designed for the workforce of future.

Improve scalability, speed and agility with Dell Technologies. Access applications online, faster and more efficiently with the right IT infrastructure to give your business the tools it needs to grow, compete or perform at its best.

Dell Smart UPS, Power Distribution Units, Racks and Rack Accessories, and Dell KVM and KMM solutions – all designed to maximize productivity with flexibility and control.

Pay less, be more productive and maximise sustainability throughout the lifecycle with our Technology Rotation solution.

The PC that knows you.

Get to work anywhere with the beautifully redesigned Latitude family. Smaller footprints and revolutionary features like ExpressCharge, ExpressConnect and Dell ExpressSign-in make these the ideal systems for productivity on the go.

Visit: DellTechnologies.com/En-Au/Latitude/Index.htm

Technology that adapts as fast as you do.

Jump-start your day: Power on by opening the lid, then stay synced. Thanks to Modern Standby capability.

Log in instantly with ExpressSign-in: Proximity sensor or optional fingerprint reader in the power button.
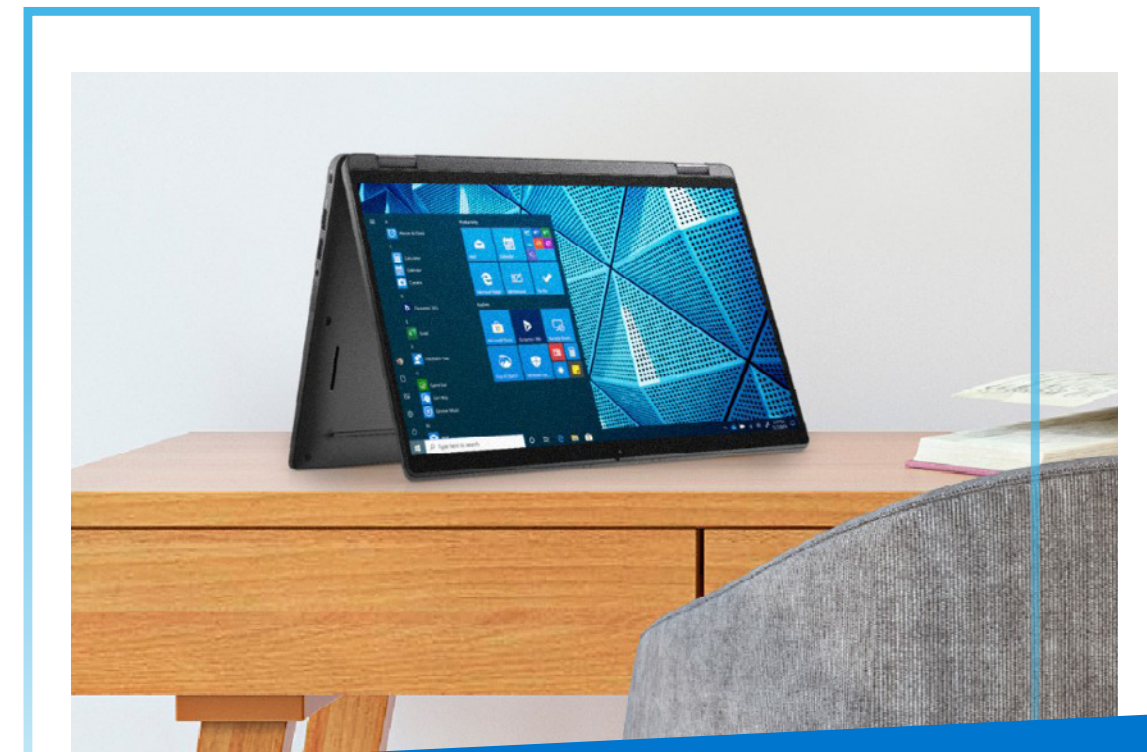

Stay in the zone: Get our best screen experience on a premium PC with Latitude's first 4K low blue light panel.

Power through: Super low power panel gives you more power savings without compromising resolution, colour or brightness.

Keep your work private: The Latitude 7410 notebook features a variety of the latest privacy features, including a camera privacy shutter and SafeScreen to keep out prying eyes.

Work wherever: Corning® Gorilla® Glass offers premium glass innovation for reduction in reflections, so you can work anywhere your job takes you.

Improved performance: Up to the latest 10th Generation Intel® Core™ i5-10210U (4 Core, 6M cache, base 1.6GHz, up to 4.2GHz) vPro® processors offer businesses the performance, manageability, built-in security features and stability of Intel® vPro® Platform and align to a future-proof roadmap.

Latitude 7410
Smaller and smarter than ever.
The world's smallest 14-inch premium business laptop with Intel 10th Gen[1], featuring first-of-its-kind Dell Optimizer and built-in AI that adjusts to the way you work, wherever you are.

Starting at **$1,644.15**＊
As low as **$53.04/mo^**

ExpressCharge: Get your battery from 0% up to 80% in as fast as an hour# so that you're not tied down to an outlet while out and about.

Upgraded keyboard: The larger edge-to-edge keyboard, keycaps and glass-feel mylar touchpad is an improved user experience that makes your work more accessible than ever.

One-of-a-kind modern client: Dell Hybrid Client[1] is a client computing software with hybrid cloud management enabling seamless access to applications and data whether they are in the cloud, in the data center, or stored locally.

#Within Dell Power Manager software, selecting either the Default mode of Adaptive Charge or ExpressCharge can recharge system battery from 0% up to 35% within 20 minutes when system is powered-off and battery temperature is between 16-45 degrees C. With ExpressCharge mode enabled, the system battery can then continue charging up to 80% within 60 minutes. After charging has reached 80% capacity, charging speed will return to normal speed. Recommended for use with the provided Dell power adapter; not recommended with a smaller capacity power adapter. Charging time may vary +/-10% due to system tolerance.

[1]Dell Hybrid Client is available with select configurations only. For more details see DellTechnologies.com/DellHybridClient or contact your Dell Technologies Services Representative.

Latitude 5310 2-in-1
Scalable. Intelligent. Versatile.

The world's smallest,[2] mainstream business-class 13" 2-in-1, packed with AI-based optimisation software – Dell Optimizer.

ExpressResponse with built-in AI and Intel® Adaptix™ technology

ExpressCharge boost to gain 35% charge in about 20 minutes to get you up to 80% in an hour.#

Intelligent Audio to manage speech volume and refining overall sound experience

SERVERS THAT MEET DEMANDING WORKLOADS OF TODAY, AND TOMORROW.

Dell EMC PowerEdge servers help turn data into insights faster, by maximising performance across the widest range of applications while protecting your business and customers with a deep layer of defence.

HOW MCLAREN ACCELERATES INNOVATION.

Dell Technologies solutions enable the McLaren Formula 1 team to rapidly innovate with real-time, data-driven insights, lower operating costs and deliver faster outcomes. Learn more about their story, here!

A. PowerEdge T340

The T340 tower server is well-suited for single-tier workloads and offers room for expansion. While it supports general-purpose applications such as Collaboration/Sharing, Database, Mail/Messaging, and Backup/Recovery, the T340 offers greater internal storage capacity compared with our other tower offerings. Its convenient tower form also makes it a popular choice for remote office/branch office sites such as bank branches and retail outlets.

Call for pricing.

B. PowerEdge R440

The PowerEdge R440 is an Entry level 1U/2S enterprise capable platform optimised for deployments within and/or outside of datacenters. Powered by 2nd Generation Intel® Xeon® Scalable processors, the R440 offers a combination of performance and density for HPC and web-tech deployments. Boost your business and take back control with intelligent automation and integrated security.

Call for pricing.

C. PowerEdge R6515

"The PowerEdge R6515 offers peak performance and maximised density with up to 64 cores for scale-out workloads and applications such as virtualisation, hyper-converged infrastructure and Network Function Virtualisation. Powered by one **3rd Generation AMD EPYC™** processor, the R6515 is a single-socket 1U rack design with dual-socket capabilities."

Call for pricing.

4. PowerEdge R750

New Dell EMC PowerEdge R750. Enables database and Analytics, VDI and Mixed Workload Standardization. Full-featured enterprise server, delivering outstanding performance for the most demanding workloads. With Up to two 3rd Generation Intel Xeon Scalable processors.

Call for pricing.

See data in a whole new way.

Unlock the value of your data capital with storage and data protection solutions that simplify, automate and protect all your data from edge to core to cloud.

DATA STORAGE

A

B

A. PowerStore.

Built from the ground up with next-generation storage technology to make your business more agile and prepared for change.

Key Features: End to End NVMe[1], Storage Class Memory, "Always on" data reduction with 4:1 guarantee, Block or File workloads, AppsOn Technology with optional Built-in VMware hypervisor. Anytime Upgrade keeps PowerStore continuously modern without disruption. Featuring Intel® Xeon® Processors.
Call for pricing.

B. VxRail.

Modernise your software-defined data center with the only jointly engineered, pre-configured and pre-tested VMware hyper-converged infrastructure appliance for a seamless experience and simplified IT service delivery.
Call for pricing.

**START REALISING
THE FUTURE-PROOF ADVANTAGES.**
The Dell EMC Future-Proof Loyalty Program gives you additional peace of mind with guaranteed satisfaction and investment protection for future technology changes.
Visit DellTechnologies.com/En-Au/Products/Future-Proof-Program.htm

[1]Initial PowerStore release includes NVMe drive support within the base appliance. NVME-oF on existing PowerStore appliances will be provided as non-disruptive upgrade in a future release.
*See page 32 of Dell T&Cs.
^See page 32 for more financing details.

C

POWERFUL DATA PROTECTION
Eliminate risk of data loss and leverage the value of protected data while meeting ever more demanding SLAs and increasing ROI.

C. PowerProtect DP4400.

PowerProtect DP series appliances deliver powerful backup and recovery of all your data, wherever it lives, using a single appliance. Extends data protection to private and public clouds with Cloud Tier for LTR and Cloud DR with no additional hardware. Improved compression with higher performance; up to 65x deduplication and up to 30% higher data compression[1].
Call for pricing.

D

NETWORKING SIMPLIFIED
Open, standards-based technology that delivers agility and operational efficiencies in just a few clicks.

D. PowerSwitch S5212F-ON.

Modernise compute, storage and HCI connectivity with this half-width 1RU ToR switch that features 12 x 25GbE SFP28 ports and 3 x 100GbE QFSP28 ports, plus the Open Network Install Environment (ONIE) for zero-touch installation of network operating systems.

Call for pricing.

[1]Based on Dell EMC analysis of field telemetry from PowerProtect DD series appliances, October 2020. Results applied to PowerProtect DD and DP series appliances. Results will vary. Based on Future-Proof Program data protection deduplication guarantee.

Technology Rotation

The simple way to make lifecycle savings, contribute to sustainability and make management easier.

Technology rotation can help you achieve savings throughout the IT lifecycle.

Two 3 year renewable leases of PCs over six years

Two 3 year renewable leases of x86 server over six years

Two 3 year renewable leases of storage over six years is

SAVES 28%

SAVES 33% LESS

26% LESS EXPENSIVE

over buying one machine and holding on to it for six years[1]

than buying one server and keeping it for six years[2]

than buying storage equipment over six years[3]

When you choose a technology rotation strategy to manage your IT solutions, you are contributing to the circular economy because we:

Refurbish
hardware at the end of the term

Remarket
hardware after data sanitisation

Recycle
hardware in a secure and environmentally conscious manner
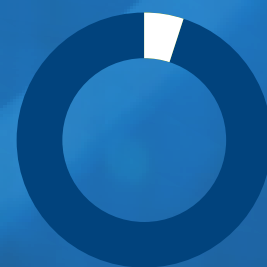

95%
of systems are refurbished, gaining a second life by being resold.
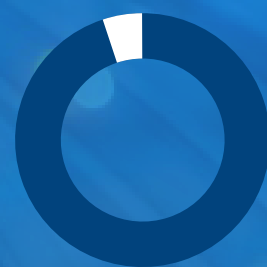

The remaining **5%** are recycled in adherence with local regulatory guidelines such as the EPA in USA, WEEE in Europe and NTCRS in Australia.
