TERMS OF BUSINESS / TÉRMINOS DE NEGOCIO

IMPORTANT

Reproduction of this catalogue or parts thereof is only allowed with our explicit permission in writing. Pictorial representations and design are copyrighted. Claims for damages, of any form whatsoever, resulting from details made in this catalogue or from incorrect use, application, storage or handling, are explicitly excluded. Contractual rights and any resulting or related claims based thereon, irrespective of form, initially come into being on the basis of a separate written agreement, in particular on the basis of our general terms of sale and delivery.

All former statements lose their validity with the publication of this catalogue.

The catalogue is not an operating manual for the use and installation of cylinder head gaskets, oil seals and cylinder headbolts. It does not contain any advice in a legal sense. The catalogue neither replaces the constantly applicable technical regulations – particularly for tolerances – nor the installation and maintenance stipulations of the individual engine manufacturer.

Also, it is not possible to forego the expertise of those carrying out the installation and application. The individual references made in this catalogue for the installation and the application of cylinder head gaskets, oil seals and cylinder headbolts are instructions solely for the technically qualified specialist and are to be checked and verified by them for their suitability in each case. Federal-Mogul accepts no responsibility for application decisions.

The contents of the catalogue are not intended to create or substitute any contractual agreement which has to be reserved exclusively to a separate agreement between 2 identified parties, whereby seller can be only one of our Federal-Mogul entities as mentioned on the inside back cover. The right is retained to correct errors and alterations, particularly with regard to amendments in the engine manufacturers' details and stipulations.

IMPORTANTE

Queda totalmente prohibida la reproducción, total o parcial, del contenido de este catálogo, salvo previa autorización nuestra, realizada por escrito. Están, asimismo, reservados todos los derechos sobre el diseño y presentación del catálogo. No se aceptará ningún tipo de reclamación que esté basada en la interpretación de los datos contenidos en este catálogo, así como en el incorrecto uso, manipulación o almacenaje de nuestras piezas. Únicamente se aceptarán reclamaciones que estén basadas en derechos contractuales o en los motivos arriba indicados, siempre que exista un acuerdo especial y por escrito basado en nuestras condiciones generales de venta y suministro. Con la edición de este catálogo queda anulada toda la información contenida en catálogos anteriores.

El catálogo no es un manual para el uso e instalación de juntas de culata, retenes y tornillos de culata, y no representa una asesoría técnica en el sentido legal. Los datos del catálogo no sustituyen, en ningún caso, a las especificaciones técnicas, tanto en lo que se refiere a tolerancias como a las instrucciones de instalación y mantenimiento, indicadas por los fabricantes de los motores, especificaciones que serán siempre prioritarias. Se entiende que el uso y montaje de estas piezas está encomendado a personal debidamente cualificado. Las indicaciones sobre uso y montaje de los tornillos de culata, contenidas en este catálogo, están exclusivamente dirigidas a profesionales con la debida capacitación y formación técnica, que deben decidir en cada caso sobre la exactitud de las mismas. La responsabilidad de estas decisiones no puede ser, en ningún caso atribuidas a Federal-Mogul.

La información facilitada en el catálogo no representa o sustituye ningún tipo de acuerdo, quedando a tal efecto, el acuerdo por separado entre dos partes donde sólo entidades de Federal-Mogul, pueden ser identificadas como la parte vendedora como se menciona en la contraportada. Los datos e instrucciones contenidos en este catálogo podrán ser corregidos o modificados sin previo aviso.

SEAL DESIGNS

RADIAL LIP SEAL WITH AN ALL METAL OUTER CASE

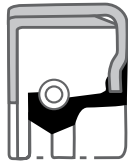

822N & 823N

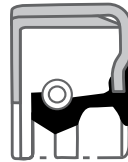

822S & 823S

Static sealing is achieved by OD to housing interference, and /or the use of a separate sealing compound. 832 versions are coated on the OD. The **822S** & **823S** type features a dust lip which prevents dirt from reaching the point of sealing.

RADIAL LIP SEAL WITH A DOUBLE STEEL CASING

824N

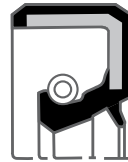

824S

This design results in greater rigidity in larger shaft size applications and helps prevent from damage or distortion during assembly. The **824S** type features a dust lip which prevents dirt from reaching the point of sealing.

RADIAL LIP SEAL WITH A FULLY ELASTOMERIC OD

827N

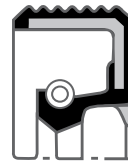

827S

The flexibility of this outer covering permits a positive static seal in the housing bores, even those subject to high thermal expansion or in split housings. The **827S** type features a dust lip which prevents dirt from reaching the point of sealing.

RADIAL LIP SEAL WITH A FULLY ELASTOMERIC CORRUGATED OD

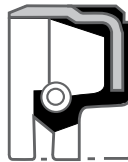

827NW

827SW

This design results in greater rigidity in larger shaft size applications and helps prevent from damage or distortion during assembly. The **824S** type features a dust lip which prevents dirt from reaching the point of sealing.

RADIAL LIP SEAL WITH PART ELASTOMERIC & PART STEEL OUTER SURFACE

829N

829S

This type of seal provides accurate central & axial positioning on assembly with excellent OD static seal and good seal retention. Suitable for split housings and housing bores subject to high thermal expansion. The **829S** type features a dust lip which prevents dirt from reaching the point of sealing.

840 – Integrated seal & housing design with FPM or ACM sealing lip

841 – Integrated seal & housing design with PTFE sealing lip

DD Bi-Directional

LD Anticlockwise hydrodynamic acid

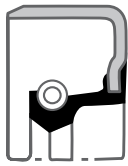

RD Clockwise hydrodynamic acid

SP Special

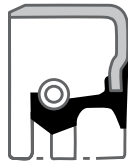

SS Multiple dust lips

W Ribbed/corrugated outer surface

SELLO DE LABIO RADIAL CON CARCASA EXTERNA DE METAL

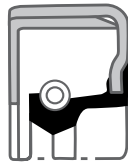

822N & 823N

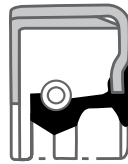

822S & 823S

El sellado estático se logra mediante la interferencia entre el alojamiento y el diámetro externo (Outer Diameter, OD) o el uso de un compuesto de sellado separado. Las versiones 832 tienen un revestimiento en el OD. Los tipos **822S** y **823S** presentan un labio de sellado contra el polvo que evita que ingrese suciedad en el punto de sellado.

SELLO DE LABIO RADIAL CON CARCASA DOBLE DE ACERO

824N

824S

El diseño ofrece una mayor rigidez en aplicaciones con tamaño de eje más grande y ayuda a evitar daños y deformaciones durante el ensamblaje. El tipo **824S** presenta un labio de sellado contra polvo que evita que ingrese suciedad en el punto de sellado.

SELLO DE LABIO RADIAL CON UN OD COMPLETAMENTE ELASTOMÉRICO

827N

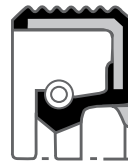

827S

La flexibilidad de este recubrimiento externo ofrece un sellado estático positivo en los orificios del alojamiento, incluso para los que quedan sujetos a una alta expansión térmica o en alojamientos partidos. El tipo **827S** presenta un labio de sellado contra polvo que evita que ingrese suciedad en el punto de sellado.

SELLO DE LABIO RADIAL CON UN OD CORRUGADO COMPLETAMENTE ELASTOMÉRICO

827NW

827SW

El diseño ofrece una mayor rigidez en aplicaciones con tamaño de eje más grande y ayuda a evitar daños y deformaciones durante el ensamblaje. El tipo **824S** presenta un labio de sellado contra polvo que evita que ingrese suciedad en el punto de sellado.

SELLO DE LABIO RADIAL CON SUPERFICIE EXTERNA PARCIALMENTE ELASTOMÉRICA Y PARCIALMENTE DE ACERO

829N

829S

Este tipo de sello proporciona un posicionamiento central y axial preciso sobre el ensamblaje, con una buena retención de sellado y un excelente sellado estático del OD. Ideal para alojamientos partidos y orificios de alojamiento sujetos a una alta expansión térmica. El tipo **829S** presenta un labio de sellado contra polvo que evita que ingrese suciedad en el punto de sellado.

840 – Diseño de alojamiento y sello integrado con labio de sellado de Caucho de acrilato (alkyl acrylate copolymer, ACM) o Caucho de fluoruro de vinilideno-hexafluorpropileno (vinylidene fluoride/hexafluoropropylene copolymer, FPM)

841 – Diseño de alojamiento y sello integrado con labio de sellado de politetrafluoroetileno (PTFE)

DD Bidireccional

LD Ácido hidrodinámico en el sentido contrario a las agujas del reloj

RD Ácido hidrodinámico en el sentido de las agujas del reloj

SP Especial

SS Múltiples labios de sellado contra polvo

W Superficie externa acanalada/corrugada
