MERCO MARINE™

Merco Marine is a manufacturer of boat dock building components and accessories. We were established in 1979. Everything we manufacture is made in the United States, with US Steel, and US workers.

The products shown here are only a small portion of the over 2000 items that we manufacture and keep in inventory for boat dock building and marinas.

For a complete list of our products check us out on the web at www.mercoboatdocks.com or give us a call at 304-737-3006. You can also request a free copy of our 65 page catalog.

Merco Marine can provide simple parts and pieces for your small pond or lake dock to build on site, or we can build entire marinas from start to finish.

WOOD DOCK HARDWARE

Inside Corner (H-IC) has slots and can be used with 1-1/2" - 3" thick wood. The inside corner sandwiches the wood between the opposite outside corner, keeping bolts from burying themselves in the wood. A corner gusset gives the unit a lot of strength and helps from racking the dock. **H-IC Ship#7 \$13.95**

Outside Corner Female (H-OCF) has two 1/2" tabs and a hole for a 3/4" bolt or B-PIN. Would be used with an Outside Corner Male (H-OCM) or with a Single "T" Male (H-SM). **H-OCF Ship#9 \$22.23**

Single "T" Female (H-SF) has two 1/2" tabs and is used with an Outside Corner Male (H-OCM) or a Single "T" Male (H-SM). Both male and female singles can be bolted to the side of a dock to make finger attachments. They can also be bolted to seawalls to make ramps. **H-SF Ship#4 \$13.04**

Single "T" Male (H-SM) has one 1/2" tab and is used with an Outside Corner Female (H-OCF) or Single "T" Female (H-SF). **H-SM Ship#3 \$9.22**

WOOD DOCK HARDWARE

MADE WITH 1/4" HIGH STRENGTH STEEL THEN HOT DIPPED GALVANIZED

Washer Plates (H-W) are used mostly with Angles (H-A) and Cleat Angles (H-CA). The square hole in the plate keeps the carriage bolts from turning when the bolts are tightened. **H-W Ship#1 \$1.24**

Angles (H-A) used to hold all cross stringers to side stringers using a Washer Plate (H-W). The wood is sandwiched between the steel and creates a solid corner. **H-A Ship#2 \$3.45**

Backup Plates (H-B) are used with Single "T" Males (H-SM) and Single "T" Females (H-SF) for additional strength and to keep bolts from pulling through the wood. **H-B Ship#2 \$3.30**

WOOD DOCK HARDWARE

Cleat Angles (H-CA) have slots for various sizes of cleats. The cleat angle is bolted to the side stringer using a Washer Plate (H-W). The cleat is then bolted through the deck into the cleat angle. This keeps the cleat from pulling out of the deck. **H-CA Ship#2 \$4.88**

HOOP PILE HOLDERS

Our convertible Hoop Pile Holders have 3 basic pieces, a deck plate, a hoop and a roller assembly. This allows you to have a hoop pile holder the way you want it, whether it be a permanent hoop, a removable hoop or a hoop with a roller. You can use the roller assembly on the deck plate or bolt it directly to the dock. All parts are hot dipped galvanized. Add a UHMW Roller to any assembly as shown at the bottom of page 19. All assemblies include a deck plate, hoop, roller assembly, and 6 carriage bolts. Fasteners required to bolt to your dock sold separately on page 28.

STRONGER DESIGN!

Our mounting plates are 5" x 2" x 3/8" which are welded to the hoop and are used to mount the hoop to the deck plate. Our mounting plates are 33% thicker and 25% wider than most other hoop mounting plates on the market.

An easy way to determine the diameter of your existing pipe or piling is to measure the circumference and divide by 3.14. We've done the math for you with our Circumference chart to the left.
