## PERIODICAL OPERATING NOTICE

### CONTAINING

AMENDMENTS TO NATIONAL OPERATIONS PUBLICATIONS  
INCLUDING NATIONAL OPERATING INSTRUCTIONS  
MISCELLANEOUS INSTRUCTIONS AND NOTICES

### INCORPORATING

SUPPLEMENT NO. 65 TO THE LNE ROUTE  
SECTIONAL APPENDIX

**SATURDAY 02 DECEMBER 2023**  
**to**  
**FRIDAY 01 MARCH 2024**  
**Inclusive**

For additional items during the currency of this Notice, see Section D of the Weekly Operating Notice (WON).

Published quarterly, on the first Saturday of March, June, September and December.

**This notice comprises of 34 pages**

**For queries regarding the content of this publication contact:  
[PlanningPublications@networkrail.co.uk](mailto:PlanningPublications@networkrail.co.uk)**

THIS PAGE IS INTENTIONALLY BLANK

## ACKNOWLEDGEMENT SLIP

Please complete the Acknowledgement Slip below (if appropriate), detach it and hand it to your Supervisor/Manager.

I, the undersigned, acknowledge receipt of the Periodical Operating Notice and Supplement No. 65 to the LNE Route Sectional Appendix effective from Saturday 02 December 2023 to Friday 01 March 2024

I undertake to familiarise myself with the contents and observe the instructions therein which apply to me.

**Full Name** (in capitals): \_\_\_\_\_

**Signature** (in full): \_\_\_\_\_

**Location:** \_\_\_\_\_

**Date:** \_\_\_\_\_

THIS PAGE IS INTENTIONALLY BLANK

## Introduction

This Periodical Operating Notice (PON) composed of two sections:-

Part 1 contains items published for the first time in the PON. Items published in this first section that have not been published in the Weekly Operating Notice (WON) are additionally noted by a vertical line in the margin.

Part 2 contains items previously published in the PON that are still valid.

Items marked \* \* will not appear in future issues of the PON and a note must be taken of them.

### **Supplement to the Sectional Appendix**

Attached to the back of this Notice are updates to the existing Sectional Appendix in the form of a Supplement. This is not part of the PON. It is a document in its own right. It has been physically attached to the PON to:

- ensure its effective distribution to all users
- reduce the amount of raw materials consumed in its generation and distribution
- reduce costs associated with production

The Supplement is identified as Supplement No. 65 and is dated 02 December 2023. In line with current industry standards items published in the Supplement will not appear in future PONs.

**Enquiries concerning amendments to the Sectional Appendix must be e-mailed to the  
Planning Publications mailbox  
[PlanningPublications@networkrail.co.uk](mailto:PlanningPublications@networkrail.co.uk)**

**Enquiries concerning amendments to the :  
NATIONAL OPERATING PUBLICATIONS should be addressed to  
STEVE RAY, NETWORK OPERATIONS.**

**Amendments to the Rule Book and Working Manuals for Railway Staff are produced by Rail Safety  
& Standards Board.**

**NETWORK RAIL LNE ROUTE TAKE NO RESPONSIBILITY FOR ANY ERRORS THAT MAY BE  
CONTAINED IN THESE AMENDMENTS**

**Enquiries concerning amendments to the Rule Book and Working Manual should be addressed  
to:**

**RSSB  
The Helicon  
1 South Place  
London  
EC2M 2RB**

Email: [enquirydesk@rssb.co.uk](mailto:enquirydesk@rssb.co.uk)

### **RECORDING OF CONVERSATIONS**

Telephone calls to Network Rail Signal boxes, Electrical Controls and Production Controls may be recorded for the purposes of monitoring the quality of safety related information being exchanged and to assist with investigations into incidents.

**This publication is printed and distributed by APS Group**

***Telephone:***

0161 495 4515

***E-mail:***

[nrrons@theapsgroup.com](mailto:nrrons@theapsgroup.com)

**LATE OR NON-DELIVERY**

Please contact APS Group if you have not received your PON by 15.00 hours on the Wednesday prior to the operative Saturday of this publication, thus allowing adequate time to expedite tracking and replacement procedures as necessary.

If you receive this publication from your line manager or a local distribution point arrangement, then please contact them direct and NOT APS Group

## Part A - Foreword

### A1 Introduction

This document contains new and previously published amendments to National Operations Publications, which are considered too urgent to await a complete reissue of the document concerned.

### A2 Scope

This document is primarily used to publish minor changes to National Operations Publications. However, it may also be used to publish material changes that have already been consulted on but do not justify the reissue of a Rule Book module and / or handbook.

### A3 Implementation

The publication date of this document is **02 December 2023**.

### A4 Technical content

The technical content of this document has been approved by James Webb, Professional Head of Rail Operations, RSSB. Enquiries should be directed to RSSB at <https://customer-portal.rssb.co.uk/>.

### A5 Definitions

#### Material change

Where duty holders are required by a Railway Group Standard to do something physically different.

#### Minor change

A minor change comprises of one of the following:

- Typographical errors or changes to administrative details such as telephone numbers, or
- Changes for the purpose of clarification, where there is negligible potential for misinterpretation which diminishes safety, or
- Changes to operational documents affecting only one duty holder, provided that the duty holder consents to those changes.

### National Operations Publications

These are Railway Group Standards which set out mandatory requirements for direct application in the workplace and which are subject to frequent changes. These include any modules or handbooks forming part of the Rule Book (GERT8000) or its associated information handbooks with references in the RS500 series.

### Periodical Operating Notice

An official document for publishing details of changes to National Operations Publications and local operational publications to the railway industry. This is often referred to as the PON.

## Part B - Changes since previous issue

| <b>Amendment No</b>  | <b>Publication and section</b>  |
|--|---|
| Part C - New amendments to National Operations Publications      |   |
| 04/23  | GERT8000-T3, Rule Book module T3, Possession of a running line for engineering work, issue 11, section 9.1  |
|  |   |
| <b>Amendment No</b>  | <b>Publication and section</b>  |
| Part D - Previous amendments to National Operations Publications |   |
| 02/21  | GERT8000-SS2 Rule Book module SS2 Shunting, Issue 5, section 4.2. This amendment is not carried forward as it has been published in the Rule Book.                                  |
| 01/22  | Various modules and handbooks. Amendments to Rule Book modules TS2 and TS11 and Rule Book Handbook 19 have not been carried forward as they have been published in the Rule Book.   |
| 02/22  | Various modules and handbooks. The amendment to Rule Book Handbook 10 has not been carried forward as it has been published in the Rule Book.                                       |
| 01/23  | GERT8000-TW1, Rule Book module TW1, Preparation and movement of trains, issue 18, section 1. This amendment is not carried forward as it has been published in the Rule Book.       |
| 02/23  | GERT8000-TW4 Rule Book module TW4 Preparation and working of freight trains, issue 1, section 9.4. This amendment is not carried forward as it has been published in the Rule Book. |
|  |   |

## Part C - New amendments to National Operations Publications

### GERT8000 Rule Book

#### Module T3 Possession of a running line for engineering work

##### 9.1 Authority for movements of engineering trains (see diagram T3.4)

###### Explanation of change

Following a recent incident in which an on-track machine entered a possession at an intermediate point without getting the necessary authority from the PICOP or the signaller, it was agreed that the instructions to a driver on who can give that authority do not completely explain the procedure. Section 9.1 a) states that when entering from a line not under possession the signaller gives the authority and that the driver will be met, but does not explain where or by whom. Section 9.1 b) explains that for a movement from a siding under possession, the PICOP gives authority. Section 9.1 c) does not refer to a movement from a siding under possession directly into a work site. Handbook 11 and handbook 12 do explain to PICOPs and ESs that they, or competent persons on their behalf, will meet the train and where they will do so. Section 9.1 a) has been expanded to explain that when the signaller authorises a movement to enter a possession at an intermediate point, the train will be met at that point by the PICOP if the train is to enter the possession between work sites, or by the ES if the train is to enter directly into a work site. In either case this can be a competent person on behalf of the PICOP or ES. Section 9.1 b) has not been changed as the PICOP when authorising the movement from an adjacent siding will give the driver any necessary instructions. Section 9.1 c) now includes a new item to say that a movement from a siding under possession directly into a work site will be met at the siding exit by the ES or a competent person on the ES's behalf. As the competency of safe work leader is now obsolete, the previous references to an SWL have been removed. Section 9.1 has been revised as shown. Diagram T3.4 has not been changed.

## 9.1 Authority for movement of engineering trains (See diagram T3.4)

### driver

You must make movements only if you have the authority of the following personnel.

#### a) Signaller

The signaller will personally authorise you to make a movement that is required to:

- proceed from either end towards the detonator protection for the possession
- proceed to the location where your train will be met when entering the possession when the PICOP has the token on a single line
- enter the possession at an intermediate point where your train will be met
- pass through points or crossings that are protecting the possession at an intermediate point when leaving the possession
- proceed past the location of the detonator protection when leaving the possession
- proceed from the location agreed between the PICOP and signaller when the train is leaving the possession when the PICOP has the token on a single line.

If you are given permission to enter the possession at an intermediate point between work sites, you will be met there and given instructions by the PICOP, or a competent person sent by the PICOP. If the movement from that point will be directly into a work site, you will be met there by the ES, or a competent person sent by the ES.

driver

**b) PICOP**

The PICOP (or competent person on the PICOP's behalf) will authorise you to make a movement that is required to:

- go past the location of the detonator protection into the possession
- pass through points or crossings that are protecting the possession at an intermediate point when entering the possession
- enter or leave the possession from a siding that is also under possession
- move between the detonator protection at each end of the possession and the nearest work site
- pass the work-site marker board (WSMB) at the exit from a work site, this will be showing two yellow flashing lights
- move between work sites.

The PICOP will wear an armband on the left arm, or a badge on the upper body, with PERSON I.C. POSSESSION in red letters on a yellow background.

**c) ES**

The ES (or a competent person on the ES's behalf) will authorise you to make a movement:

- past a WSMB into a work site, this will be showing two red flashing lights
- within a work site.

The ES can permit a person to travel in your cab to give you instructions about the working of your train while loading and unloading, as shown in module SS2 *Shunting*.

If you are entering the possession from an adjacent siding under possession directly into a work site, the ES, or a competent person sent by the ES, will meet you at the exit from the siding to give you instructions.

The ES will wear an armband on the left arm, or a badge on the upper body, with ENGINEERING SUPERVISOR in blue letters on a yellow background.

driver

## Part D - Previous amendments to National Operations Publications

### GERT8000 Rule Book

#### Handbook RS524 List of Dangerous Goods and their United Nations numbers

**Table 1**

**Explanation of change**

The 2023 RID regulations include a number of changes to the details of UN numbers which are as shown below.

**Delete:** the following which ceased to be valid after 30<sup>th</sup> June 2023:

| UN Number | Substance                  | Dangerous Goods Class | Subsidiary Hazard(s) | Packing Group |
|-----------|----------------------------|-----------------------|----------------------|---------------|
| 1169      | Extracts, aromatic, liquid |                       |                      |               |

**Amend:** the following as shown:

| UN Number | Substance   | Dangerous Goods Class | Subsidiary Hazard(s) | Packing Group |
|-----------|---|-----------------------|----------------------|---------------|
| 1197      | Extracts, liquid for flavour or aroma   | 3                     |                      | II, III       |
| 1345      | Rubber scrap or Rubber shoddy, powdered or granulated not exceeding 840 microns and rubber content exceeding 45%      | 4.1                   |                      | II            |
| 1872      | Lead dioxide  | 5.1                   |                      | III           |
| 1891      | Ethyl bromide (Bromoethane)   | 3                     | 6.1                  | II            |
| 2015      | Hydrogen peroxide, stabilized or hydrogen peroxide, aqueous solution, stabilized with more than 70% hydrogen peroxide | 5.1                   | 8                    | I             |

**Add:** the following new entry:

| UN Number | Substance  | Dangerous Goods Class | Subsidiary Hazard(s) | Packing Group |
|-----------|--|-----------------------|----------------------|---------------|
| 3550      | Cobalt dihydroxide powder, containing not less than 10% respirable particles | 6.1                   |                      | I             |

## Changes to various modules and handbooks as a result of the term ‘pilotman’ being replaced by ‘pilot’

### Explanation of change

It has been pointed out that the use of the term ‘pilotman’ in Rule Book modules P1 *Single line working* and P2 *Working single and bi-directional lines by pilotman* suggests that the person carrying out the role must be a man. This is not correct and the term has been changed to ‘pilot’.

The modules and handbooks concerned will be reissued over a period. Those listed below will not be reissued in printed format at this stage, but were amended as shown from 3 December 2022. Existing copies should be altered in ink to show these changes.

Electronic versions of the modules and handbooks including these changes can be found at [www.rssb.co.uk](http://www.rssb.co.uk) or in the Rule Book App.

| Rule Book module or handbook   | Section or regulation  | Amendment  |
|--|--|--|
| G1 General safety responsibilities and personal track safety for non-track workers                         | 5.3<br>5.6   | Amend ‘pilotman’ to ‘pilot’  |
| T3 ERTMS Possession of an ERTMS running line for engineering work where lineside signals are not provided. | 7.2  | Amend ‘pilotman’ to ‘pilot’  |
| TS3 Absolute block regulations   | 9.1<br>9.2.2<br>9.2.4<br>9.5   | Amend ‘pilotman’ to ‘pilot’  |
| TS4 Electric token block regulations   | 2.2<br>8.1.1<br>8.2.1<br>8.6.1   | Amend title of module P2 to read<br><i>‘Working single and bi-directional lines by pilot’.</i> |
| TS4 Electric token block regulations   | 8.1.1<br>8.1.2<br>8.2.1<br>8.2.2<br>8.2.3<br>8.5<br>8.6.1<br>8.6.2<br>8.7<br>8.8 | Amend ‘pilotman’ to ‘pilot’  |

|                                    |   |  |
|------------------------------------|---|--|
| TS5 Tokenless block regulations    | 8.1<br>8.2  | Amend title of module P2 to read ' <i>Working single and bi-directional lines by pilot</i> ' |
| TS5 Tokenless block regulations    | 8<br>8.1<br>8.2<br>8.3<br>8.4<br>8.5<br>8.5.2                             | Amend 'pilotman' to 'pilot'  |
| TS7 No-signaller token regulations | 2.2<br>8.1.1<br>8.2.1<br>8.3.1  | Amend title of module P2 to read ' <i>Working single and bi-directional lines by pilot</i> ' |
| TS7 No-signaller token regulations | 3.1<br>8.1.1<br>8.1.2<br>8.2.1<br>8.2.2<br>8.2.3<br>8.3.1<br>8.3.2<br>8.4 | Amend 'pilotman' to 'pilot'  |
| TS8 One-train working regulations  | 8.1<br>8.4.1  | Amend title of module P2 to read ' <i>Working single and bi-directional lines by pilot</i> ' |
| TS8 One-train working regulations  | 3.1<br>3.2<br>8<br>8.1<br>8.2<br>8.3<br>8.4.1<br>8.4.2                    | Amend 'pilotman' to 'pilot'  |
| Handbook 5 Handsignalling duties   | 4<br>6.1  | Amend 'pilotman' to 'pilot'  |

## Changes to various modules and handbooks as a result of the term ‘manned level crossing’ being replaced by ‘manually-controlled level crossing’

### Explanation of change

It has been pointed out that the use of the term ‘manned level crossing’ in the Rule Book suggests that the person operating the crossing must be a man. This is not correct and the wording has been changed as necessary to refer to these crossings as ‘manually-controlled’.

The modules and handbooks concerned will be reissued over a period. Those listed below will not be reissued in printed format at this stage but were amended as shown from 3 December 2022. Existing copies should be altered in ink to show these changes.

Electronic versions of the modules and handbooks including these changes can be found at [www.rssb.co.uk](http://www.rssb.co.uk) or in the Rule Book App.

| Rule Book module or handbook  | Section or regulation | Amendment  |
|---|-----------------------|--|
| T3 ERTMS Possession of an ERTMS running line for engineering work where lineside signals are not provided | 5.9                   | Amend ‘manned level crossing’ to ‘manually-controlled level crossing’  |
| TS9 Level crossings – signallers’ regulations   | 1                     | Amend ‘manned crossing with barriers’ to ‘manually-controlled level crossing with barriers’<br><br>Amend ‘manned crossing with gates’ to ‘manually-controlled crossing with gates’ |
| TW8 Level crossings – drivers’ instructions   | 1                     | Amend ‘manned crossing with barriers’ to ‘manually-controlled level crossing with barriers’<br><br>Amend ‘manned crossing with gates’ to ‘manually-controlled crossing with gates’ |

## Handbook RS523 GSM-R Handbook

### 8 Broadcast calls

#### Explanation of change

A GSM-R acknowledged safety broadcast can now be used by a signaller to inform drivers that a warning board or speed indicator for a temporary speed restriction is missing or obscured. Section 8.4 has been amended to include this. (This addition was first published in the December 2017 Periodical Operating Notice).

The '**Poor rail conditions**' section has now been changed to refer to 'reportable' railhead conditions to match the changes that have been made in Rule Book module TW1 'Preparation and movement of trains' to describe rail conditions.

### 8.4 Acknowledged (safety) broadcast calls

Safety broadcast calls are used to reach a clear understanding by using non verbal acknowledgement.

After listening to the message in its entirety and after the call has been terminated the driver acknowledges their understanding of the message by pressing the **ST** button.

#### Uses for safety broadcasts

Safety broadcast calls can be used for the following scenarios.

- Poor rail conditions.
- Animals on the line (Not tunnels).
- Defective Emergency Indicators.
- Missing or obscured Temporary Speed Restriction (TSR) board.
- Unusual events (Not Track or Signalling).

#### Scripts for safety broadcasts

The following scripts set out the content of a pre-recorded safety broadcast:

### Poor rail conditions

"This is a safety broadcast from the signaller at \_\_\_\_\_. There are reportable railhead conditions at/on\* the approach to \_\_\_\_\_. Only acknowledge if you have fully understood this message. To acknowledge, press the **ST** button. End of safety broadcast."

\*Delete as appropriate.

### Animals on or near the line

"This is a safety broadcast from the signaller at \_\_\_\_\_. There are animals on or near the line at/between\* \_\_\_\_\_ and\* \_\_\_\_\_, proceed at caution. Only acknowledge if you have fully understood this message. To acknowledge, press the **ST** button. End of safety broadcast."

\*Delete as appropriate.

### Defective Emergency Indicators

"This is a safety broadcast from the signaller at \_\_\_\_\_. There is a defective emergency indicator for a \_\_\_\_\_ mph emergency speed restriction at \_\_\_\_\_. Only acknowledge if you have fully understood this message. To acknowledge, press the **ST** button. End of safety broadcast."

### Missing or obscured TSR board

"This is a safety broadcast from the signaller at \_\_\_\_\_. There is a missing/obscured\* warning board or speed indicator\* for the \_\_\_\_\_ mph temporary speed restriction at \_\_\_\_\_\*\*. Only acknowledge if you have fully understood this message. To acknowledge, press the **ST** button. End of safety broadcast."

\*Delete as appropriate

\*\* Insert name or location.

Note: If more than one TSR board is missing or obscured for a speed restriction then a GSM-R berth-triggered broadcast message cannot be used for this purpose.

### Unusual events

"This is a safety broadcast from the signaller at \_\_\_\_\_. \* \_\_\_\_\_. Only acknowledge if you have fully understood this message. To acknowledge, press the **ST** button. End of safety broadcast."

\*Insert details of the incident, location and any speed restriction in the main body of the broadcast.

Note: unusual events can include overcrowding on station platforms. The location of the event must be easily identifiable by the signaller and the driver.

## Part E - Amendments summary

### GERT8000 Rule Book

# Rule Book Module G1 - General safety responsibilities

## Section 1, Clause 1.1 - Rules, regulations and instructions

### Mainline Turnback Boards

Trackside retroreflective Mainline Turnback Boards are installed at locations to act as a further Driver Aid so that the Driver can be assured that the rear of their train (dependant of unit length) is clear of the controlling Track Circuit to facilitate a Turnback Manoeuvre from the track circuitry associated with that Signal. These signs are primarily for Class 700 trains and are formed of white squares with black lettering and border, photographs illustrate the two types: -

It is to be noted that there are usually 2 Turnback Boards for every Signal. One that is denoted TB 210m and the other which is denoted TB 275m. The board stating TB 210m has been positioned to ensure a Class 700 RLU (Reduced Length Unit) which is formed of 8 carriages of approx. 20m and allowing for a Signal Standback of 15 m. When the driver of a Class 700 RLU is parallel to that sign they are clear of the controlling circuit at the rear of their unit. Similarly, with a 12 Car unit\FLU (Full Length Unit) once parallel with TB 275m sign the unit will be in a position to safely undertake a Turnback Procedure\Manoeuvre. These signs have been designed to also act as reference points for Driver's of alternative rolling stock to show meterage from the controlling circuit.

It is to be noted that these signs are purely a Driver Aid and contact with the Signaller to clarify the safe positioning of the train to undertake any Turnback Procedure is still required.

**London North Eastern Route GI - Dated: 11/04/20**

# Rule Book Module G1 - General safety responsibilities

## Section 5 - Communications procedure

### Using GSM-R berth triggered messages and non-verbal acknowledgements to caution Drivers

It is now authorised to use to caution Drivers via operational safety messages for 5 scenarios using a GSM-R berth-triggered broadcast, with the Driver confirming receipt and acknowledging a clear understanding of the broadcast by using the GSM-R 'ST' acknowledgement button. All GSM-R Fitted Units in the area will receive these Broadcasts. The berth triggered safety broadcasts process can be used for live events for the five scenarios listed:

Reportable railhead conditions.

Animals on the line.

Defective Emergency Indicators.

Wheel Impact Load Detector Activations.

Unusual events (Not Track or Signalling).

**Drivers of services not fitted with version 3.5 software may disregard the GSM-R berth triggered safety broadcast for,**

Reportable railhead conditions.

Animals on the line.

Defective Emergency Indicators.

Wheel Impact Load Detector Activations.

Unusual events (Not Track or Signalling).

**The berth trigger broadcasts will be in the following areas**

***York ROC Kings Cross WS***

***York ROC Finsbury Park WS***

***York ROC Wood Green WS***

***York ROC Langley WS***

***York ROC Hitchin WS***

***York ROC Huntingdon WS***

***York ROC Peterborough WS***

***Alnmouth SB***

***ECM7 Alnmouth – Tweedmouth***

***Tweedmouth SB***

***ECM7/8 Tweedmouth – Marshall Meadows***

***York South Workstation***

***York North Workstation***

London North Eastern Route Sectional Appendix Module LN1

**Leeds East Workstation**

**Leeds East Assist Workstation**

**Leeds West Workstation**

**Leeds North West Workstation**

**Leeds Ardsley Workstation**

**Methodology**

Signaller records the berth triggered safety broadcast to a set script and stores it on the system.

Signaller sets up the berth triggered safety broadcast at the appropriate signal berth.

Signaller will maintain the protecting signal at danger. This is the signal where the Signaller would stop and caution the train if the Signaller does not receive the acknowledgement.

The safety broadcast will be made automatically to each train occupying the designated berth(s).

The Driver acknowledges that the safety broadcast has been received and that it has been understood by pressing the ST Button.

The protecting signal is maintained at danger until the signaller has received an acknowledgement from the approaching train. The acknowledgement will be an 'Acknowledgement' (ACK) message from the Driver.

The protecting signal may be cleared when the Signaller receives the acknowledgement message.

If the acknowledgement message is not received by the Signaller the protecting signal remains at danger and the Driver obeys all signals as normal. The driver should contact the relevant signaller at the earliest opportunity, if brought to a stand, as per the rule book requirements"

When the caution message is received and acknowledged by the Driver they will continue to obey all signals and apply the appropriate rule over the section of line.

**Broadcast Message Content**

**Poor Railhead**

'This is a safety broadcast from the signaller at \_\_\_\_\_. There are low/exceptionally poor\* railhead conditions at/on\* the approach to \_\_\_\_\_. Only acknowledge if you have fully understood this message. To acknowledge, press the ST Button. End of safety broadcast

***\*Delete as appropriate***

**Animals on or near the line**

'This is a safety broadcast from the signaller at \_\_\_\_\_. There are animals on or near the line at/between\* \_\_\_\_\_ and\* \_\_\_\_\_. Only acknowledge if you have fully understood this message. To acknowledge, press the ST Button. End of safety broadcast

***\*Delete as appropriate***

**Defective Emergency Indicators**

'This is a safety broadcast from the signaller at \_\_\_\_\_. There is a defective emergency indicator for a \_\_mph emergency speed restriction at \_\_\_\_\_. Only acknowledge if you have fully understood this message. To acknowledge, press the ST Button. End of safety broadcast

***\*Delete as appropriate***

**Wheel Impact Load Detection**

'This is a safety broadcast from the signaller at \_\_\_\_\_. There has been a wheel impact load detection alert for your train, continue at \_\_mph and obey all signals. Only acknowledge if you have fully understood this message. To acknowledge, press the ST Button. End of safety broadcast

***\*Delete as appropriate***

**Unusual events**

'This is a safety broadcast from the signaller at \_\_\_\_\_. \* \_\_\_\_\_. Only acknowledge if you have fully understood this message. To acknowledge, press the ST Button. End of safety broadcast

***\*Insert details of the incident, location and any speed restriction in the main body of the broadcast***

**Note:**

Unusual events and structure faults can include overcrowding on station platforms or loose canopy on stations platforms. These locations must be easily identifiable by both the signaller and the driver.

### **Trial using GSM-R to advise drivers of speed restrictions relating to Track Defects between 28 June 2019 and 28 December 2019**

A trial is taking place to test additional scenarios for GSM-R Safety Broadcasts to pass safety critical information to Drivers with the Driver confirming receipt and acknowledging understanding by using the 'acknowledgement' button.

The trial involves TOC/FOC services only and will be for Track Defects. The trial will be in the following areas:

Lincoln West, Lincoln East, Lincoln City, Lincoln South and Allington Junction

#### **Methodology**

1. Signaller identifies the requirement to caution
2. Signaller decides whether cautioning using GSM-R is possible and the signals where the berth broadcast is to be triggered (these may be predefined for some trial scenarios covering static locations e.g. Bridges)
3. Signaller records the caution message to a set script and stores it on the system (unless pre-recorded message exists)
4. The message content shall contain full words and no abbreviations.
5. The message shall be recorded to the set scripts using the 'Safety' identifier.
6. The message shall make it clear that the message is complete.
7. The berth triggered broadcast will be active for a period of four hours and will need to be reset or a new message recorded to supersede it.
8. Only one berth broadcast can be recorded per signaller but the message can be triggered at separate signal berths on several lines.
9. Signaller sets up the berth triggered broadcast at the correct signal berth(s).
10. Signaller will maintain the protecting signal at danger with a reminder appliance applied. This is the signal where the Signaller would stop and caution the train under current conditions.
11. *Broadcast made automatically to each train occupying the designated berth(s) and is received by the Driver*
12. The Signaller shall monitor GSM-R to determine whether the message has failed and the failure code is displayed on the fixed terminal.
13. A failed message will have a 'can not be sent' message or 'failure' message on the fixed terminal.
14. The message is broadcast automatically over the loud speaker in the Drivers cab
15. When the Driver is involved in another call the broadcast will be seen as a call waiting on the cab radio display. If the Driver terminates the call within 20 seconds the message will be broadcast over the loudspeaker.
16. The Driver acknowledges that the message has been received and that it has been understood by pressing the ST button on the radio head.
17. The protecting signal is maintained at danger until the signaller has received an acknowledgement from the approaching train at a signal in rear of the signal being held at danger. The acknowledgement will be a 'acknowledge' message from the Driver.
18. The reminder appliance will be removed and the protecting signal cleared when the Signaller receives the acknowledgement before the signal being held at danger (see special instructions).
19. If the ST acknowledgement is not received or is received after the set location the signal remains at danger and the Driver obeys all signals as normal.
20. *When the train has passed the protecting signal, the protecting signal is replaced to danger and the reminder appliance applied.*
21. When the caution message is received and acknowledged by the Driver they continue without stopping and obey the speed restriction and all signals.

#### **Message Content**

##### **Track Defects**

"This is a safety broadcast from the Signaller at \_\_\_\_\_. Due to a track defect, a safety speed of \_\_\_ mph has been imposed between (Name/Location) \_\_\_\_\_ and \_\_\_\_\_ (Name/Location). If understood, press the ST button."

*Note: During the trial period all other caution on the move messages will end with the text "If understood, press the ST button."*

**London North Eastern Route GI - Dated: 28/08/2023**

## Rule Book Module S5 - Passing a signal at danger : Part A

### Passing a signal at danger on the signaller's authority

#### Level crossings with crossing keeper operated non block signals

Authority to pass over the level crossing during signal failure/disconnection or Single Line Working.

At the level crossings listed at the end of this instruction, the protecting signals are not part of the block signalling and are only provided to protect the level crossing. The Driver will receive a green hand signal from the Crossing Keeper as authority to pass over the crossing:-

When due to failure or disconnection it is necessary to pass the protecting signal at Danger. The Driver must, after passing over the crossing, regulate the speed of his train, having regard to the aspect displayed at the section signal.

During Single Line Working when (in accordance with Rule Book Module P1, Section 6.2 b) (other manned level crossing) a train in the wrong direction is authorised to pass over a level crossing, where the normal position of the gates or barriers is open for road traffic.

#### \* = Crossings normally open for road traffic

##### Ulceby North Jn to Barton on Humber

\* Barton Road (Down direction)

\* Barrow Road (Single line)

##### Mansfield Woodhouse to Shireoaks East Jn

Norwood

##### York to Scarborough

Howsham

##### Leeds Armley Jn to York (Skelton Jn) via Harrogate

##### Hull to Seamer West Jn

\* Gristhorpe (Single line)

##### King Edward Bridge South Jn to Carlisle North Jn

\* Milton Village

##### Bedlington North to Lynemouth Alcan

\* North Seaton

London North Eastern Route GI - Dated: 08/12/18

## Rule Book Module SP-Speeds:Emergency speed restriction

### Section 4 – Emergency Speed Restrictions (ESR) - How emergency speed restrictions are set up

If an emergency speed restriction (ESR) is imposed and before the speed restriction equipment has been set up, the signaller will tell the driver of a train to pass over the ESR the actual speed limit that has been imposed by the engineer.

It will no longer be necessary for the drivers of all trains to proceed at no more than 20 mph prior to the erection of the speed restriction equipment but drivers must travel over the restriction at no more than the speed given by the signaller.

This also means that only trains which would normally be running at a speed higher than the ESR to be imposed will need to be cautioned by the signaller. For example, if an ESR of 60 mph is imposed, it will not be necessary to stop and advise the drivers of trains classes 6, 7 or 8.

National GI - Dated: 07/06/14

## Rule Book Module TS1 - General signalling regulations

### Section 13

### Handbook 8 - IWA, COSS or PC blocking a line

### Handbook 21 – Safe Work Leader (SWL) blocking a line

#### Swing Bridges at Goole, Hull, Keadby and Selby

When arranging a blockage of a line which passes over the swing bridge, then the COSS/IWA/SWL/PC must come to a clear understanding with the signaller/bridge operator that either:

a) The swing bridge will remain closed to river traffic for the duration of the blockage.

OR

b) The signaller will obtain the authority of the COSS/IWA/SWL/PC before opening the bridge to river traffic.

OR

c) The work site is clear of the bridge and will not affect the operation of the bridge.

London North Eastern Route GI - Dated: 06/12/14

## Rule Book Module TS1 - General signalling regulations

### Section 13, Clause 13.2.4 – T-COD

## Rule Book Module HB8-IWA, COSS or PC blocking a line

### Section 2, Clause 2.5 - Using a track circuit operating device T-COD

## Handbook 21 Safe Work Leader (SWL) blocking a line

### Section 2, Clause 2.5 - Using a track circuit operating device T-COD

#### Providing additional protection by use of a track circuit operating device (T-COD)

Remotely activated T-Cod (e.g. ZKL): These devices are static devices permanently fitted to the rail. These devices are operated remotely and occupy a track circuit to provide additional protection in exactly the same way as a T-Cod, which is described in Rule Book Module TS1 Clause 13.2.4. These devices are authorised providing a Signalbox Special Instruction (SBSI) is in place.

TCOD's may be used to provide additional protection on the following sections of line listed below subject to the restrictions shown:-

Must not be used on track circuits between the signals protecting a RC or CCTV level crossing and the track circuit that passes through the crossing deck. On bi-directional and single lines, TCOD's must not be used between the signals protecting the crossing.

- Must not be used where there are check rails.
- Must not be used within Axle Counter Areas
- TCOD's are best used clear of points and crossings and not in overlap track circuits. If it is necessary for a TCOD to be used in the vicinity of points, the Signaller must before giving permission consider the implications of track circuit controls etc. on other lines, particularly if the points will need to be moved during the time the TCOD is in use.

| Routes and locations on which TCOD can be used                 | Remarks, including Locations/Sections where TCOD cannot be used, in addition to those detailed above and in the RULE BOOK  |

London North Eastern Route GI - Dated: 02/09/2023

## CLASS 950 (formerly Class 150) TRACK RECORDING UNIT (TRU) ROUTES AND RESTRICTIONS

The Class 950 TRU (formerly Class 150) may be worked over all lines detailed in Table A of the London North Eastern Sectional Appendix subject to the following restrictions:

| Route  | Restriction   |
|--|---|
| Moorgate – Drayton Park                                      | Prohibited (diesel prohibition)   |
| Northallerton Longlands Jn – Newcastle East Jn via the coast | Speed restriction of 40mph between Monkwearmouth and East Boldon; 91m 32ch - 93m 17ch |

London North Eastern Route GI - Dated: 06/04/13

## CLASS 373/2 TRAINS: ROUTES AND RESTRICTIONS

The Class 373/2 may be worked over the lines listed below subject to the restrictions listed in 2.

### 1. Routes

#### North London Incline Line

- a) Camden Road Central Jn - Copenhagen Jn

#### East Coast Main Line

- d) All Main and Fast lines between Kings Cross and York
- e) All Slow and Goods lines and Passenger Loops between Kings Cross and York
- f) Ferme Park Carriage Sidings - Nos. 1, 2 and 3 lines
- g) Ferme Park North Jn to Wood Green South Jn - Down Carriage line
- h) Peterborough to New England North, Easfield South Down Arrival, Eastfield North Down Departure, Eastfield North Up Arrival, Eastfield South Up departure
- i) Between Loversall Carr Jn and Decoy North Jn via Down and Up Lincoln Flyover.
- j) Holgate Loop and Down Sidings
- k) Marshgate Jn to Down Thorne Limit of Shunt via Down Thorne (electrified sections only) except:
  - (i) Up Decoy Goods lines 1, 2 and 3 and Transfer line
  - (ii) No.1 Slow line Kings Cross – Belle Isle

#### Hertford Loop

- a) Wood Green South Jn to Langley Jn

### 2. Restrictions

#### 2.1 Speed Restrictions

Speed shall be restricted to the lower of 125 mph or the permissible line speed except:

- b) between the locations shown in figures i, ii, iii the maximum speed must not exceed 110mph:
  - (i) Down Fast line between 59m 10ch and 59m 30ch (Huntingdon North Jn)
  - (ii) between Grantham (105m 77ch) and Shaftholme Jn (160m 00ch Down/160m 20ch Up)
  - (iii) between Colton Jn (182m 75ch) and York
- c) Maximum speed of 60 mph if any trailer vehicle suspension deflated
- d) Hitchin Underbridge No.102 (32m 03ch)                      20 mph                      Up Slow
- e) Hitchin Underbridge No.102 (32m 03ch)                      50 mph                      Down Slow

**Note:** these speed restrictions are not signed at the lineside, except restrictions (a) i, (c) and (d).

## London North Eastern Route Sectional Appendix Module LN1

## 2.2 Route Restrictions

- |     |   |  |
|-----|---|--|
| (a) | Kings Cross Station   | Platforms 1 & 6 only permitted.  |
| (b) | Doncaster Station   | Platforms 1, 3, 4 & 8 only permitted.  |
| (c) | York Station  | Platforms 3, 5, 9, 10 & 11 only permitted.<br>(All movements are prohibited beyond the platform starting signals at the North end of York Station as defined above). |
| (e) | Up and Down Flyover lines at Doncaster  | No train to pass Class 373/2 between 116m 46ch and 117m 46ch.  |
| (f) | Eastfield Up and Down South Arrival and Departure lines at Peterborough   | When a Class 373/2 is travelling on Departure or South Down Arrival line no train to pass Class 373/2 on South Down Arrival or South Up Departure line.              |
| (g) | The total number of Class 373/2 trains operating under their own power between Mitre Bridge, Kings Cross and York is limited to four. |  |
| (h) | The use of the Doncaster Station ladder (points 2429, 2428, 2422 in the reversed position) is prohibited.                             |  |
| (i) | Down Thorne line When a Class 373/2 is travelling on the Down Thorne line no train to pass Class 373/2 on opposite line.              |  |

**London North Eastern Route GI - Dated: 28/08/23**

## GSM-R - CAB RADIO REGISTRATION AT MAIN AND POSITION LIGHT SIGNALS - LOCATION CODES

DRIVERS ARE TO REGISTER USING THE LAST 3 DIGITS OF THE SIGNAL ID, ADDING LEADING ZEROS WHERE REQUIRED (E.G. FOR SIGNAL SN23, REGISTER USING 023) EXCEPT WHERE THE SIGNAL IS LISTED BELOW. IN SUCH CASES, THE CORRESPONDING LOCATION CODE IN THIS SECTION IS TO BE USED.

#### **GSM-R – CAB RADIO REGISTRATION – AREA SPECIFIC 99X LOCATION CODES**

When required to use a 99X location code (also known as 'wild card number') to pre-register or to register the cab radio as shown in the GSM-R user procedures the following area specific location code must be used in the areas covered by this Sectional Appendix:

997 East Midlands Route  
998 LNE Route.

**London North Eastern Route GI - Dated: 28/08/23**

## **GSM-R GENERAL INSTRUCTION**

#### **TW5 SECTION 24 – KNOWN SEARCHING NETWORK LOCATIONS**

The locations in the table below have encountered a temporary reduction in radio coverage with the GSM-R system which may result in registration problems and the ability of the driver to contact the signaller. This will be presented to the Driver on the DCP as 'searching for network'.

Drivers must carry out the 'Pending Registration' process on the radio and continue their journey.

## Overlay Miniature Stop Light Level Crossings (OMSL)

A Miniature Stop Light (MSL) is the conventional active warning system used to give indications at private user worked crossings, public bridleway and footpath crossings. Indications provided for the user to determine that the crossing is safe to cross (green) or not safe to cross (red). The system is designed to overlay existing infrastructure without interacting with it, however permissible speeds in the wrong direction on the approach should be identified on multiple track lines with wrong direction speed boards. It is expected that train detection inputs to the system will usually be provided as part of the system and typically these systems may be referred to as "EBI Gate 200" or "VaMoS", although other systems may be used. The system is usually activated by wheel sensors that operate in a similar way to Axle Counters, when they detect a train they set the lights to red, when the train hits the strike out sensor the lights go to green.

Where a system failure is detected or operational scenario (e.g. train failure, slow trains, engineering works) may incur the red (not safe to cross) indication for excessive periods, user indications are suppressed. On encountering this mode the user is directed on safe operation by the signage provided, however they can be reactivated by another train passing or through a manual reset.

**Would all staff please note that**, like Axle Counters, using metal tools or simply passing by within a metre wearing safety boots can cause activation of these sensors and should be avoided.

London North Eastern Territory GI - Dated: 02/06/18

## Proceeding over a manned level crossing equipped with non block signals operated by a crossing keeper during signal failure/disconnection of equipment or Single Line Working

At the level crossings listed the protecting signals are not part of the block signalling and are only provided to protect the level crossing.

During a signal failure/disconnection of equipment the driver will receive a green hand signal from the crossing keeper as authority to proceed over the level crossing irrespective of the aspect/indication shown at that protecting signal at locations on the lines indicated below:

### **Ulceby North Jn to Barton on Humber (LN744-LN5)**

Barrow Road

### **Mansfield Woodhouse to Shireoaks Jn (LN768-LN5)**

Norwood

### **York to Scarborough (LN880-LN7)**

Howsham

### **Leeds Armley Jn to York Skelton Jn (via Harrogate) (LN838-LN7)**

Belmont (Up direction only\* - SPT provided on Down direction signal)

Wilstrop

Marston Moor

### **Hull to Seamer West Jn (LN914-LN7)**

Gristhorpe

### **King Edward Bridge Jn to Carlisle North Jn (LN682-LN8)**

Milton Village

### **Bedlington North Jn to Lynemouth Alcan (LN702-8)**

North Seaton

The Driver having received the green handsignal must regulate the speed of the train in accordance with the aspect/indication previously displayed at the section signal.

London North Eastern Route Sectional Appendix Module LN1

During Single Line Working at those locations shown below a green handsignal will be displayed at the crossing as authority for movements in the wrong direction to proceed over the crossing.

**Nottingham East Jn to Newark Castle (LN3625-LN4)**

Fiskerton Station

**Mansfield Woodhouse to Shireoaks Jn (LN768-LN5)**

Norwood

**York to Scarborough (LN880-LN7)**

Howsham

**Leeds Armley Jn to York Skelton Jn (via Harrogate) (LN838-LN7)**

Belmont

**King Edward Bridge Jn to Carlisle North Jn (LN682-LN8)**

Milton Village

**Bedlington North Jn to Lynemouth Alcan (LN702-8)**

North Seaton

London North Eastern Route GI - Dated: 08/12/2018

## PROTECTING A STABLED TRAIN ON A PLATFORM LINE

The following locations are permitted to have trains stabled in the platform during a blockage using TS1, 13.2

- St Pancras Station
- Luton Station
- Leicester Station
- Nottingham Station
- Hull Paragon Station
- Kings Cross Station

When a platform line is to be blocked under Rule book procedure TS1, 13.2 and a train is stabled on that line, the COSS must supply and ensure that the following protection is placed on the train before authorising the work to start:

- During daylight - a NOT TO BE MOVED board.
- During darkness or fog and falling snow - a red light (steady or flashing).

You must make sure the protection is displayed on the platform side of the train:

- at the end from which the train is to be driven, or
- at both ends of the train if it can be driven from either end.

The following locations are permitted to have trains stabled in the platform during a T3 possession

- Kings Cross Station
- Peterborough Station

When a platform line is to be blocked by a T3 possession and a train is stabled on that line, You and the PICOP must agree

- Any train in the platform is at a stand
- The PICOP has been advised of the lines affected
- The details are to be recorded on the T3 form when the possession is taken

You may take possession without the requirement for this to be published.

In addition to the above for Peterborough station only you must also ensure

- NOT TO BE MOVED boards are applied during daylight or
- During darkness, fog and falling snow a red light (flashing or steady) is provided

These are to be provided on the platform side and to each end the train can be driven from

Trains are authorised to stable at Peterborough Station

London North Eastern Route GI - Dated: 30/09/2023

## RAILWAY CRIME

All railway staff must be vigilant to railway crime and cable theft, and report any suspicious activity on the operational railway, or in the area of electrical substations, to the controlling signaller.

Some examples of suspicious activity could be:

- Anyone not wearing appropriate PPE, or that do not appear to have a safe system of work.
- Anyone not responding to a train drivers warning, or appearing to hide as trains or people approach.
- Vehicles that do not have any company markings or logos
- Signalling location cabinets with doors open or missing, or troughing lids newly disturbed, with no staff nearby.
- People 'loitering' in the area of electrical substations.

In such cases, please inform the controlling signaller as quickly as possible giving precise location details. Drivers do not need to stop their trains immediately to report this, unless they consider it a safety of the line issue.

**National GI - Dated: 30/08/2014**

## SEMI-AUTOMATIC TRAIN WARNING SYSTEM (SATWAS)

Network Rail (NR) is improving track worker safety, by introducing higher integrity warning systems that do not require lookouts to be positioned to warn of approaching trains, these systems include SATWS.

SATWS will give track workers sufficient audio and visual warning of approaching trains within the required derived warning time (minimum 25 seconds) to locations where sighting of trains is difficult and / or traffic density is high, precluding line blocks being taken for protection and to meet NR's target of zero unassisted lookout working.

The system can only be operated by trained operators who hold the required competence and who have received the required briefing on associated SBSI requirements attached to the safe use of this track warning system.

**The SATWAS system applies to the following locations and lines of route.**

| LOR       | Line of Route description                   | Section of Line Equipped   | Worksite Area  |

## **LN101 - KINGS CROSS TO SHAFTHOLME JN**

### **Belmont Yards**

#### **Belmont down sidings**

A notice board worded "STOP AND TELEPHONE" is situated at the exit from Belmont Down Sidings. In the event of the telephone failing, or otherwise being unable to communicate with the Person in Charge, Drivers may proceed cautiously along the Engine line to ground position light signal D1434.

Notice boards worded "STOP AND TELEPHONE" are situated at the Belmont end of No's 1,2 and 3 Reception lines. In the event of the telephones failing, on no account must any of these boards be passed until authority is obtained by other means. Where a light locomotive is proceeding to the hump to pick up a train, the Guard should request a train list to be sent to whichever of the manned yard locations is most appropriate to the route being taken by the engine, so that he may collect it there.

#### **Belmont Up Reception Lines**

Notice boards capable of displaying dual instructions are provided at the South end of the Up West Reception Line and the Up Reception Loop.

The boards will normally display the words "**STOP. PROCEED IF CLEAR**".

Whenever shunting is taking place the Shunter will change the instruction to read "**STOP. AWAIT INSTRUCTIONS**".

**Dated: 02/12/06**

## **LN101 - KINGS CROSS TO SHAFTHOLME JN**

### **DONCASTER**

#### **Turning of HST power cars**

A single HST power car is authorised to run light between Doncaster West Yard, South Yorkshire Junction. St. James Junction, Bridge Junction and Doncaster Station for the purpose of turning the power car.

The power car may run with the blunt end leading subject to the observance by National Express staff of their company instructions.

**Dated: 08/11/08**

## **LN101 - KINGS CROSS TO SHAFTHOLME JN**

### **Doncaster West Yard**

The crews of arriving / departing are required to set and examine the hand points to / from the siding required.

There is no assistance available for D.O.O trains.

The Sidings are numbered 1 to 6. Number 6 siding is nearest to Doncaster Station and is the only siding wired for electric trains. Number 1 sidings the furthest from Doncaster Station and gives access to the A.B.B. works.

Access to Number 1 siding is restricted and the hand points between sidings No's. 1 and 2 are secured by padlock towards No. 2 siding. The padlock keys are held by both A.B.B and Doncaster Signal box.

Arriving trains should, where possible, be routed to an empty siding but avoiding using No. 6 siding unless it is an electric train.

Before proceeding beyond the fouling point of the siding which they are to leave, Drivers of departing trains must telephone the Signaller and request permission to proceed towards 1475 position light signal.

The Signaller will not give permission if any conflicting movement has been authorised.

**Dated: 02/12/06**

## LN854 Hall Royd Jn. To Colton Jn.

### Colton South Junction to Church Fenton

#### ELR = NOC

The Transpennine Route Upgrade East (TRUe) Project will be undertaking signal renewals on the Up and Down Leeds Lines and Up and Down Normanton Lines between Colton Jn and Church Fenton (ELR: NOC Route: LNE).

The area of the works is between 10m 00ch (ELR: NOC) to 6m 20ch (ELR: NOC).

The proposed work is to replace 16 existing Signal posts with fold down LED lit signals.

The following signals have been included within a signal box special instruction (SBSI) to prohibit the use of hand signallers:

CF724 (9M 74CH), CF736 (9M 07CH), CF742 (8M 23CH), Y746 (7M 42CH) and Y752 (6M 73CH) on the Up Leeds.

CF733 (9M 60CH), Y737 (9M 08CH), Y743 (8M 24CH) and Y747 (7M 43CH) on the Down Normanton.

Dated: 27/12/2021

## LN860 - DIGGLE JN. TO COPLEY HILL EAST JN.

### Standedge Tunnel

No vehicle with a diameter of less than 14 inches (350mm), vehicle on a wheelskate or road/rail vehicle may be placed on or run over the Down or Up line through Standedge Tunnel without the Signaller's authority. This instruction must also be applied when the line is under Possession.

Emergency telephones connected to Huddersfield Workstation are installed at four points in the former Down Slow tunnel, the single bore immediately adjacent (Up side) to the double line running tunnel. The telephones are attached to S&T location cabinets and are not illuminated.

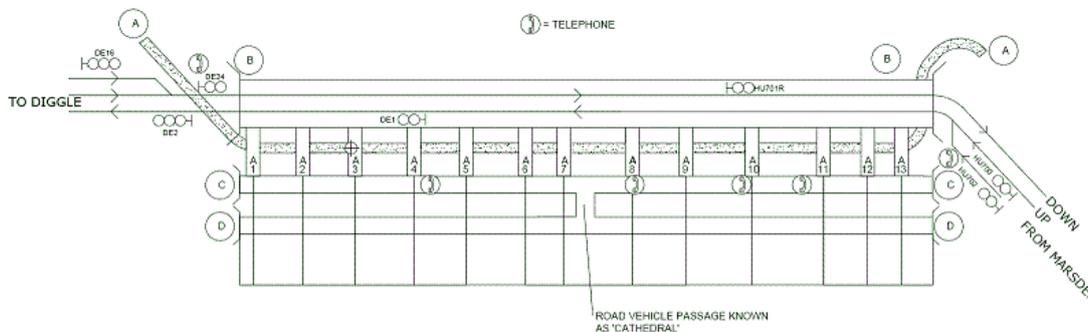

Access to the single bore tunnel can be obtained through cross passages and only the cross passages indicated below may be used. These have a reflective sign showing a white telephone on a blue background. In addition, there are numbered tablets along the wall of the running tunnel to assist in identifying where you are.

Other cross passages may not be safe to use and must not be used, some have vertical holes leading down into the canal tunnel, which is at a lower level.

The locations of the telephones are as follows:

| <u>Phone number</u> | <u>Mileage</u> | <u>Nearest tablet number to safe cross passage</u> |
|---------------------|----------------|--|
| (Marsden end)       |                |  |
| 1                   | 17m 58ch       | 270  |
| 2                   | 17m 32ch       | 237  |
| 3                   | 16m 69ch       | 181  |
| 4                   | 15m 75ch       | 81   |

(Diggle end)

- A** CANAL TUNNEL. Lower than rail tunnels. Cross passages 1 - 12 pass over the canal. All water in tunnel drains via the canal.
- B** DOUBLE RAIL BORE (North Bore). Straight except for curve at Marsden end. Access to Nicholson bore via 13 cross passages (A1 to A13).
- C** NICOLSON BORE (Centre Bore). Access gates padlocked. Access to double bore via 13 cross passages, or via vehicle cross passage known as the "Cathedral". Straight throughout.
- D** NELSON BORE (South Bore). Access gates padlocked. Access to double bore via 13 cross passages, or via vehicle cross passage known as the "Cathedral". Straight throughout.

Dated: 20/01/18

**LN860 - DIGGLE JN. TO COPLEY HILL EAST JN.****Standedge Tunnel Down Huddersfield****Rule Book Module S7, Section 5 & 6: Automatic Brake Activation**

Restarting (at caution) trains on the Down Huddersfield in Standedge tunnel should there be an automatic brake application by AWS /TPWS OSS for the 45 PSR:-

Following conformation by the Driver that they have had an automatic brake application by AWS /TPWS OSS for the 45 PSR the driver must ensure the train comes to a stand. If the Driver can then establish that the train is in a fit state to proceed, the train may be restarted and proceed at caution (max 20mph) until the tunnel exit and only as far as HU701, the driver must stop the train at HU701 even if the signal is displaying a proceed aspect. The Driver then contacts the Signaller at the YROC Huddersfield WS via GSMR, or alight to use the signal post telephone (if GSMR is defective) to inform the Signaller of the activation and follow the Rule book module instructions regarding further movement.

**Dated: 20/01/2018****LN860 - DIGGLE JN. TO COPLEY HILL EAST JN.****Huddersfield North Tunnel****Huddersfield 761 Signal**

761 signal on the Down Huddersfield is situated inside Huddersfield North Tunnel. It is positioned on the right hand side of the line.

The signal post telephone associated with this signal has been removed from the signal post and relocated to a position on the right hand tunnel wall situated behind the adjacent relay case.

Drivers using this S.P.T. must take special care due to the underfoot conditions existing in this area.

**Dated: 20/01/18****LN860 - DIGGLE JN. TO COPLEY HILL EAST JN.****Morley Tunnel - 36m 25ch to 38m 19ch (MDL1 -37)**

Due to limited clearances, train crew must not put their heads out of the train windows, on the approach to, or when passing through Morley Tunnel.

Excursions and diverted services composed of stock with droplight windows, that are required to pass through the tunnel, may do so provided 'on board' warnings of restricted clearances are given to passengers by the guard"

**Table D2B (London North Eastern) – Route clearance of electric multiple units**

Last Updated: 23/09/2023

To be read in conjunction with General Notes.

357 MOD = 357 (Modified) and refers to Class 357 units that have had 65mm removed from the width of their footsteps
