5.8	What methods of evaluation of Answer Scripts does the University follow? Whether external experts are invited for evaluation?	<p>1. The university has the centralized digital evaluation system. The external examiners who will be appointed to conduct the practical examination will also evaluate the theory answer scripts. There will be two evaluations of each theory paper i.e. the 1st and 2nd evaluation. The average of the two evaluations is taken as the marks secured by the candidate. A third evaluation is done only if the difference in marks is 15% or more. Answer keys are provided for the evaluators for having standardization in evaluation.</p> <p>2. Yes, The University examinations will have 50% of examiners as internals and another 50% will be external examiners who are not affiliated to our university. The external examiners will be appointed for the authoring of the question paper, review of synopsis and dissertation, end term and resit university practical examinations.</p> <p>3. The external examiners who are appointed for the end term and resit practical examinations will also carry out the theory scripts evaluation at the centralized digital evaluation centre, office of the COE. A separate reserve day will be allotted for the external examiners for the theory evaluation apart from the practical exam days. In a given session they will be allotted 30 (more or less) answer scripts for the evaluation as per the enrolled student count.</p>

5.10	Does the University have a continuous internal evaluation system?	Yes, Regular Internal assessments are conducted periodically. Formative Evaluation will be done that comprises of theory and practical components. There will total of 3 sessional examination, and two assignments. The Average of all five will be considered for the award of final IA marks.
5.11	How are the question papers set to ensure the achievement of the course objectives?	<p>Question papers are not merely, a collection of assorted questions. We plan in advance, and appoint three external examiners for authoring the QP for each subject. Once we receive the QP from the externals, we appoint one senior faculty from each subject, for the moderation of QP. The moderator will plan & select the questions from the sets sent by the external examiner keeping in view the objectives and the content of the course and the forms of questions to be used to test the students' cognitive level, which is the most important aspect of objective assessment system.</p> <p>To bring about the objective assessment, weightage has to be given for different contents of the course and different forms of questions will be incorporated. Framing of the questions will also be looked at, following the principles of Blooms taxonomy. It is felt that the application of Blooms Taxonomy system has enabled the teachers to set examination papers that are well balanced, testing the different cognitive skills without a tilt towards a tough or easy paper perception.</p>

Details of curriculum design: (Ref. 5.4)

I. SDM College of Medical Sciences & Hospital

SDM College of medical sciences has framed time table with modules for alignment of subjects in all phases. The modules are framed such that the teaching and learning process will include same or similar content emphasized during teaching training in all subjects across phases.

Example: Module – General aspects of phase II MBBS will include General Pathology, general Pharmacology and general Microbiology.

Module Immunology will include all related aspects being discussed during training sessions in Pathology, Pharmacology and Microbiology.

- 1) Students of MBBS Phase I of SDM College of medical sciences will be trained in various inter disciplinary area like computer applications, legal & ethical issues (laws), sports, yoga, biomedical waste management, sociology etc during the foundation course marking the inter and multidisciplinary approach.
- 2) The MBBS students of Phase II Part I of SDM College of medical sciences will be allotted electives of their choice in various fields in industry, research and public health sectors.
- 3) Students of MBBS Phase II part II of SDM College of medical sciences will be trained for physical and rehabilitation medicine by experts of physiotherapy apart from physical medicine dept. This inter disciplinary approach has been framed to provide real life patient experience for the Indian medical graduates.

II. SDM College of Dental Sciences & Hospital

(Activities that are in addition to the regulatory council requirements)

Undergraduate curriculum (BDS): Innovative curricular content have been introduced (Beyond routine) like attending courses by external agencies and participated in Novel e-learning activities

Post-graduate curriculum (MDS): Post -graduate Students have participated in inter-university post graduate online seminars, post-graduate conventions on new advancements, Clinic-pathological conferences and attending of Special courses / exchange programs/ postings. Post-graduate students have also attended courses conducted by external agencies. Inter-departmental seminars and journal clubs, presentations have been held. Post -graduate program has also involved collaborations with outside institutions for research work. Departments have also introduced innovative curricular contents beyond routine curriculum.

III. SDM College of Physiotherapy

Students of BPT are having clinical postings as well as class room teachings by different preclinical, Para clinical and clinical departments of SDM college of medical sciences & hospital, Dharwad.

Students of MPT are having clinical postings as well as class room teachings by different clinical departments of SDM college of medical sciences & hospital, Dharwad.

IV. SDM Institute for Nursing Sciences

Will be implemented from the A Y 2021-22 as a part of the revised curriculum for UG

V. SDM Research Institute for Biomedical Sciences

The aim of our academic programs is to train individuals who can have a wide perspective of, understanding, competencies, social concern, and the self-motivation required to become effective practitioners, within their respective domains. Fundamental to the postgraduate programs and curricular choice is the idea that any practitioner in Education, Development and Public Policy cannot meaningfully engage with these domains without a reasonable understanding of the diverse disciplines, their relevance and impact. The curriculum is equally informed by direct, first hand understanding of the grass root level work of the foundation in school education, with governments and several development organizations in other fields. This has led to a curriculum that amalgamates theoretical and conceptual understanding with practice and emphasizes both.

While this foundational understanding is achieved through a set of core courses, a strong basis to learn further and carve out their own specialization is also critical. Therefore, the design of the program specifically provides students the opportunity to study various fields (called Core and Elective courses) within the domain in depth through a selection of electives courses is taken very seriously in this programme. At the same time students can opt for a broad spread of electives if they do not wish to take up a specialize area.

Biomedical Science is an amalgamation of Biological Sciences and Medical Sciences. Advanced biomedical research is a rapidly-changing, dynamic and complex science that continuously demands accuracy, efficiency and attention to minute details. The focus of this course is to gain advanced knowledge and skills in the field of Biomedical Sciences, which would create a strong base for R&D, innovative ideas & translation of inventions to clinical medicines.

And other factors:

Inter/multidisciplinary: The value of inter/multi-disciplinary science cannot be ignored while making a progressive curriculum. Here at our University, students will get an opportunity to study inter/multi-departmental training in related to medical sciences to acquire knowledge, including human anatomy, physiology, pharmacology, cell and molecular biology, pathology, nutrition immunology etc. along with other regular basic bioscience subjects.

Modularity & Flexibility: Given the wide range of engagement possibilities within these domains, it is imperative that students have the choice to specialize further and branch off into different fields. They need

the flexibility to devote attention to their area of interest and wide choice as well.

Core Course

A course which should compulsorily be studied by a candidate as a core requirement is termed as a Core course.

Hard Core

A compulsory core course is called a Hard-Core Course.

Soft Core

A Core course may be a Soft Core if there is a choice or an option for the candidate to choose a course from a pool of courses from the main discipline or from a sister/related discipline/subject which supports the main discipline/subject.

Generally, a course which can be chosen from a pool of courses and which may be very specific or specialized or advanced or supportive to the discipline/subject of study or which provides an extended scope or which enables an exposure to some other discipline/subject/domain or nurtures the candidate's proficiency/skill is called an Elective Course. Elective courses may be offered by the main discipline/subject of study or by sister/related discipline/subject of study. A Soft-Core course may also be considered as an elective.

List of Hard Core and Soft Core are given attachment. Refer Table-I

Course of Independent Study: Students can choose elective course designed to acquire a special/advanced knowledge, such as supplement study/support study to a project work, and a candidate study such a course on his own with an advisory support by a teacher is called a Self-Study.

Open Courses: Students can take elective course chosen generally from an unrelated discipline/subject, with an intention to seek exposure is called an Open Elective.

Apart from Classroom instruction, other avenues of learning provided for the students (Ref. 5.6)

I. SDM College of Medical Sciences & Hospital

1) Students of SDM College of medical sciences are trained and encouraged to present student seminars, role plays apart from classroom instruction. The time table has been framed such that every subject has to conduct small group discussion with small group of students to conduct focused group discussion, seminar and general clinics. Students are posted to field training from their 1st MBBS onwards. The students take up research projects in all departs and present the same during undergraduate conferences. The internship of 365 days as a rotatory program is an essential part of the MBBS curriculum.

2) Post graduate students in all disciplines of SDM College of medical sciences are trained in seminars, group discussions, case study discussions, critical reviewing of published articles in journal club meetings journal, mortality meetings, small group discussions etc. Constructive feedback is also given to the students to enhance their academic and clinical performance.

II. SDM College of Dental Sciences & Hospital

Undergraduate curriculum (BDS): Under-graduate Students have participated in Subject seminar, Pedagogy exercise, Project works, Field visits, Quiz, E-poster on academic topics, Making of educational material or videos, Outreach activities, Special postings-UG (beyond routine curriculum. Undergraduate students have obtained research grants from India Council of Medical Research (ICMR) and Rajiv Gandhi University of Health Sciences (RGUHS).

Post-graduate curriculum (MDS): Post -graduate quiz competitions, making of special educational materials like videos and E-posters for general public and participation in camps and other outreach activities. Novel e-learning activities have also been conducted by departments.

Aspect related to examination / assessments: Various departments have conducted following test / assessment / examination practices in addition to the regulatory council requirements as follows:

Under-graduate examinations (BDS): Undergraduate students have been assessed using novel practical examination methods like OSCE (Objective structured clinical examination), Case based learning and Problem based learning. Undergraduate students have been exposed to innovative assessment practices such as self - assessment exercises and structured viva with viva cards. E-assessments have been conducted by some departments.

Post-graduate examinations (MDS): Post- graduate students have also been assessed using novel practical examination methods like OSCE (Objective structured clinical examination), E-assessments, Self-assessment exercises, Case based learning, and Problem based learning and evaluation of collaborative learning projects.

III. SDM College of Physiotherapy

Students of BPT are having: Projects/ research work starting in III Year which will continue in IV Year and the internship.

Case presentations are regular routine events either individually or in groups for BPT students.

Seminars, journal presentation, case presentations are regular routine events for MPT students.

Compulsory rotatory Internship in different departments is also part of the BPT Curriculum.

Field visits and Community physiotherapy camps are also arranged regularly for the benefits in the society and exposures for the students. MPT & BPT Students are encouraged to actively participate under the guidance of teaching staffs.

IV. SDM Institute for Nursing Sciences

Field Training in the Clinical Area, Mini Projects, Internship

V. SDM Research Institute for Biomedical Sciences

The University provides several methods for student learning other than classroom education. The curriculum of the Biomedical Science program development program devotes part of total credits for field projects. In addition, weekly practicum is an integral part of the courses taught.

Practicum: Interdepartmental training to acquire knowledge in a range of medically related subjects, including human anatomy, physiology, pharmacology, cell and molecular biology, pathology, nutrition immunology etc. along with other regular basic bioscience subjects.

Project work: The project work is aimed at training a postgraduate candidate in research methodology and techniques. It includes identification of the problem, formulation of a hypothesis, experimentation, review of literature, getting acquainted with recent advances, designing of a research study, collection of data, critical analysis, and comparisons of results and drawing conclusions during their last semester of the course.

Industrial/field visits (1-2): Industrial visit has its own importance in a career of a student who is pursuing a professional degree and one of the tactics of teaching. Industrial visit is to provide students an insight regarding how theoretical concepts are put into action, thereby aiding their practical learning. Students are exposed to real working environment and shown how things are done in an organisation/company. The details of time line management and team work in achieving targets, and work ethics, industrial work culture, etc will be covered during the visits. Besides, provides an opportunity to learn practically through interaction, working methods, and employment practices, and introduction to advanced technologies used in the companies. Helps in updating the advanced technologies, building good relation with companies and getting job as well.

Workshops /Conferences: Once in a year/semester:

Such events are an important part of the university's work in knowledge creation and dissemination. The university is planning to organize many national and international level events over the next five years. Some key ones planned to be carried out this year are listed below,

- Workshop on Cancer Precision Medicine
- National conference on Bioscience themes
- Workshop on Bioinformatics tools used for molecular & Omics study

Seminar/webinar series:

The University recognizes the value-to students, faculty and staff at the University - of the opportunity to listen to and learn from the outside world on a variety of topics and experiences from within India and abroad. The University organise a monthly lecture (webinar) and events where academicians and field practitioners are invited to the campus, engaging in lecturers, panel discussions with students and faculty. As part of these events, the university has hosted several distinguished and eminent scholars and practitioners.

Research article presentation/reading: At least one presentation per semester: soft skills like reading a research article, understand and presenting them in front of professor helps students to build their confidence and improve communication ability.

Annexure 9

Please provide details of the examination system (Whether examination based or practical based) (Ref. 5.7)

The University shall conduct two examinations annually at an interval of 90 days as notified by the University from time to time for both Theory and Practical Examinations.

Annual Examination will be held at the end of Academic year (in September/October)

Resit examination will be conducted within 90 days from the date of the announcement of end-term exam results.

University Theory Examination

1. The students write the examinations on a digital device called Digitaal, an electronic device with a stylus that allows writing freely on the epad similarly as we write on the paper. Epad will be kept on each table in the examination halls half an hour before the examination. The examinees are allowed to enter the hall Just 15 minutes before the commencement of Examination. The students have to perform the biometrics on the device to log in and then the E-Hall ticket will be displayed on the device with their photograph. For biometrics, the device has the option of taking an iris scan or any of the finger impressions.
2. Question papers get downloaded on the device at the start of the Examination time.
3. After writing the complete question paper answers, the student will click on the "Finish" icon to save the digital answer script file on the cloud with encryption.
4. The device gets closed as soon as the Examination time gets over.
5. The saved digital answer script file is available for digital evaluation for the evaluators from the next working day of the examination.
6. The BOAE will select 6 names of the examiners from the list of the approved panel of external examiners. From this list the office of the COE will appoint the external examiners for QP authoring and also the external examiners for University Practical Examinations.
7. Once the external QP is received, the office of the COE will conduct the QP moderation. QP moderator will be appointed from the respective subject department. Usually he/she will be a senior faculty in the department. The moderator will then prepare final QP making questions from the sets received from the external examiners
8. University Practical Examinations. Practical examinations are conducted immediately after the theory after a gap of 2-3 days. The external examiners are called for the practical examinations. The number of external examiners appointment depends on the requirement mentioned as per the regulations of the respective course apex bodies. In case if there are no apex bodies for some courses then there will be one external examiner for such course practical examinations.
9. The theory paper will have marks distribution as per the weightage. The internal assessment and University examinations will be taken for consideration as aggregate for passing criteria. The percentage weightage of marks consideration for internal and university examination may vary from course to course as per the regulations followed.

The practical examinations will have the practical procedures and the viva voce.
