FABRIC BODY, 6 FABRIC STRIPS, GOLD FABRIC HORN, 50 SEQUINS, TWINE 18 FT (5.48 M), STUFFING TOOL, GLUE BOTTLE 0.33 FL OZ (10 ML), FILLING, INSTRUCTION SHEET

FOR VIDEO INSTRUCTIONS VISIT: [ROSEART.COM/LAURDIYCRAFTKITS](http://ROSEART.COM/LAURDIYCRAFTKITS)

### TO BEGIN:

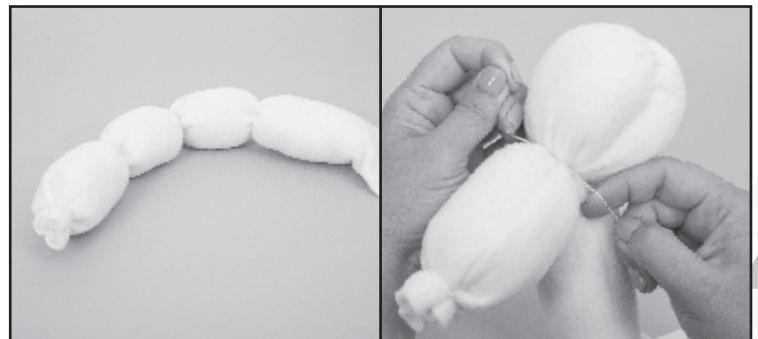

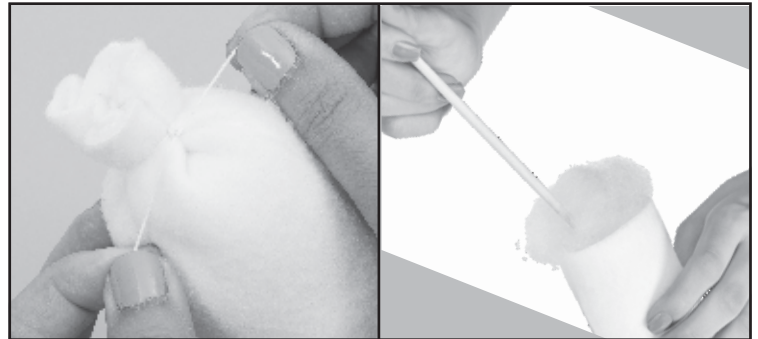

- Choose a work area with a flat surface.
- Cover your work area before use.

### ITEMS NEEDED BUT NOT INCLUDED:

SCISSORS & RULER

### CREATE YOUR UNICORN

1. The first step to making your Balloon Unicorn Pillow is to cut the twine in 8" long pieces. These will be used to tie off each section of the Unicorn body. You will start at the nose of the Unicorn, stuff and tie to create each portion of the pillow.
2. **To make the nose** of the Unicorn, first scrunch the end of the fabric tube and tie it off about 1" from the end.
3. Next, add filling and gently push it with the stuffing tool to fill a space about 3.5" in length. Tie off with twine. Make sure and double knot your tie so that it won't come undone. This is now the head of the unicorn.
4. **To make the ears**, stuff and tie two smaller sections of fabric, approximately 2" each. Then fold the 2 pieces over and secure with another piece of twine.

5. To make the legs and body, continue to stuff and tie each section in the length shown in the illustration. Fold the front legs together and tie off with twine. This is the same process used to make the ears. Leave the end of the fabric tube untied so that you can add the tail pieces.

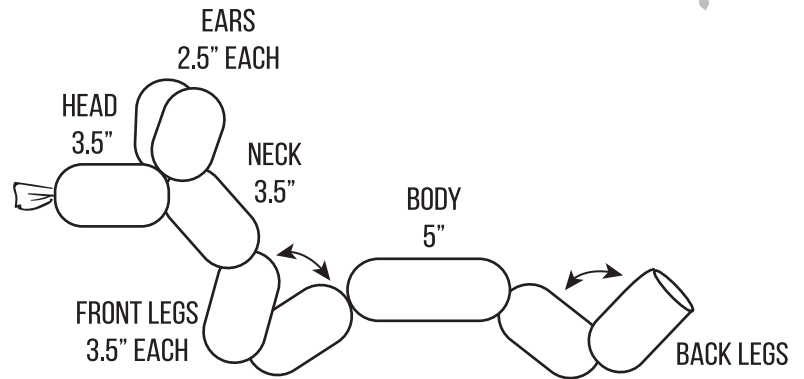

**NOTE:**

- Trim the excess twine used to tie each section of the body
- Leave enough stuffing for the unicorn horn.

6. **To make the tail**, group together strips of colored fabric and tie a knot at one end. Insert into the end of the tube and tie off after the knot to secure tail in Unicorn's last section. Then fold & tie back legs together.

7. Add the pre-sewn **unicorn horn** to the head. Stuff the horn with filling and use the stuffing tool to push filling to the tip of the horn. Fold the fabric in at the base of the horn and attach to the Unicorn using plenty of glue. You may need to hold the horn in place for a few minutes while the glue takes hold.

8. Use the sequins to add detail to the Unicorn. You can use at the feet, around the tail or anywhere you desire. Place a drop of glue and add the sequin. Make sure and allow time for the glue to fully dry.
