

# VFM-F30/WXL Motorised Flat Panel Floor Stand with XL Wheels

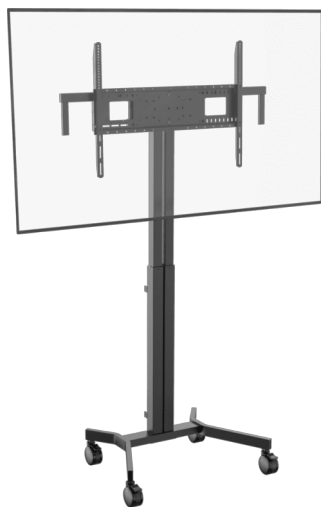

1 EU SAP: 5062718 US SAP: 70017404

[visionaudiovisual.com/vfm-f30-wxl](http://visionaudiovisual.com/vfm-f30-wxl)

Large-format flat panels 47-90"  
VESA 800 (wide) x 600 mm (tall)  
Lifts up to 130 kg (286 lb)  
800 mm (31.5") height adjustment  
Extra Large leg design for maximum stability  
Premium 100 mm 4" wheels

The VFM-F30/WXL is a powerful, attractive motorised portable floor stand for large displays. This premium mount has extra long feet to provide stability for heavier displays. It has unobtrusive design elements and a hidden motor which help it blend in instead of dominating a room - essential for high quality boardroom and meeting space decor.

Installation is super-fast; just take it out of the box, attach the flat-panel mount, and fix the wheel assembly. Vision's floor stands transmit the load of the heavy display safely to the floor.

## Heavy Duty

The F30 uses heavy-gauge components to take up to SWL 130kg (286 lbs), and a powerful linear drive which moves at 16 mm (0.6") per second.

## For 47-90" Displays

Fits most displays from 47-90". Note: curved screens are not supported by this mount.

## 800 mm / 31.5" Motorised Height Adjustment

The columns move up and down with 800 mm / 31.5" of range. With no pinch-points this is a very safe design.

## Telescopic Columns

The tolerance of the telescopic legs is exceptional, resulting in smooth motion with no unwanted wobble at the screen.

## Wireless Control

A remote control is included with simple up and down functions, plus two programmable memory positions. *Note: users should not rely on memory to lower the stand in case of harm or injury.*

## Grab Handles

Two handles come with the wheel assembly to help users move the floor stand around without having to grab the display.

## Safety Stop

A safety stop is triggered when the display lowers onto hard furnishings. Note soft items may fail to trigger the stop. Care should be taken whenever moving the display down.

**VISION**

### **Cable Management**

Dual cable strips on the rear keep the cables tidy, and a spring-loaded reel helps keep slack cable out of sight when the display is lowered.

### **Media Player Fixing**

Media players can be fixed to the wall bracket assembly out of sight.

### **VESA 800 x 600**

This product includes Vision's heavy-duty [VFM-W8X6](#) wall mount which fits most large-format flat panels from 47-90". Vision's larger [VFM-W10X6](#) wall bracket can also fix to this column, or the smaller [VFM-W6X4](#).

### **Optional Laptop Shelf**

An optional shelf fixes at four different heights in 80 mm (3.1") increments to the horizontal part of the wall mount. The platform is 450 mm (17.7") wide by 306 mm (12.0") deep. At the lowest height setting the shelf is 680 mm (26.8") below the centre of screen. *Part Number: VFM-WLS [EU SAP: 4857149 / US SAP: 13557610] Due into stock late 2019*

### **Optional Video Conference Shelf**

This shelf fixes in the centre above or below the display. It accommodates cameras such as Logitech's Rally, and also Logitech's Meetup, Yamaha's YVC-1000, or Barco's Clickshare CSE-200 base stations. With VESA100 holes on the vertical section, product's like iPad enclosures can be fixed above or below the display. *Part Number: VFM-WVC [EU SAP: 5048878 / US SAP: 13557673]*

### **Large 100 mm / 4" Wheels**

Big wheels make it easier to pull along, and reduce vibration. They even have curved corners so they are gentler on your feet.

### **Display Secured in Place**

The display latches into place on the floor stand.

### **Optional Rotation**

A rotary bearing assembly can be added, allowing the display to be turned from portrait to landscape. With the bearing the SWL of the display is limited to 40 kg / 88 lb. *Part Number: VFM-WRT [EU SAP tbc / US SAP tbc] Note: Due into stock late 2019*

### **Extra Large Feet**

The feet extend further to ensure the display is as stable as possible. It has UL1678 stability certification - that is the floorstand will not fall over on a 10° incline. For lighter displays which won't be moved a lot you may consider [VFM-F30/W](#) which has shallower feet.
