MANAGE TURBULENCE AROUND THE TRAILER WHEELS TO SAVE FUEL

Skirts Can't Cover Everything

When using multiple aerodynamic products it is important to consider how well they work together. The Trailer AeroSlider works in tandem with side skirts and/or tails, smoothing the airflow across the trailer.

Tool-Free Wheel End Access

The 'Quick-Release' design has set the standard for drivers and mechanics. The hub-mounted latch allows the cover to be removed and reattached in seconds with a simple push and turn motion. No tools required.

Spec Smart to Save Fuel

Aluminum wheels are expensive. Spec cheaper steel wheels with wheel covers, and get a clean look that saves fuel. Lower your wheel cost and increase your fuel economy. Ask about our polished chrome color option.
