

Nubis

propeller water meter with horizontal impeller axle

Nubis is propeller, dry water meter Woltman's type, with horizontal impeller axle, parallel to pipe axles. Nubis water meters are characterized by modern construction and technology solutions, which make them long-lasting and perfectly proved in cooperation with pulse transmitters and remote system for measuring data readings.

APPLICATION

Water meters are assigned to industrial measurements of water usage up to 30 degrees of cold water and up to 130 degrees of hot water in relatively regular and strong flow rate. Construction of the water meter gives possibility of mounting on horizontal, vertical and inclined water supply systems with counter set upwards, sideways or in medium position H-V. Optionally, there is available version of water meter for demineralised water for DN40-150 (cold and hot water) and with the input for pressure sensor (M14x1,5) for DN50-150.

WATER METERS MWN TYPE

WITH RADIO MODULE

WITH PULSE TRANSMITTER

WITHOUT PULSE TRANSMITTER

ADVANTAGES

- Permanent and efficient construction, ensuring the flow of water in low loss of pressure and easiness in assembly in random waterworks installations.
- Lowered weight of water meter.
- Interchangeable and unified metering layer fitting to several sizes of body and assuring optimal water meter management.
- Standard water meter is suitable for remote readings in AMR system.
- The possibility of mounting the water meter in the intermediate position without the influence on the metrological parameters, larger possibilities in designing and modernizing new used water meters connections.
- Very good anticorrosive and mechanical qualities of paint coat (powder paint- epoxy).

CHARACTERISTIC FEATURES

- Resistant to the external magnetic field, according to EN14154-3
- Low starting slow rate
- Wide measuring range
- Ease read-out due to a freely adjustable rotary counter dial placed in the casing
- Possibility of electronic check-up of the metrological parameters of the water meter
- Modular structure
- Removable measuring insert in covered casing
- Magnetic clutch

ACCORDANCE WITH STANDARDS AND RULES OF LAW

- 2004/22/EC directive of the European Parliament and the Council of Europe from the March 31 2004 on measuring instruments
- PN-EN-14154:2005- Water meters. Part 1÷3
- OMIL R49:2004 and 2006- Water meters designed for measuring cold drinking water and hot water
- Research certificate WE type- cold water no. SK08-MI001-SMU002, hot water no. SK10-MI001-SMU013
- MWN water meters have applied Hygienic Attests (PZH) allowing the product to contact with drinking water
- Mechanical classification of environmental conditions - Class M1 - by RMG dated 18.12.2006
- Classification of environmental conditions, climate and mechanical - Class B - PN-EN-14154-3: 2005 + A1,
- Classification of electromagnetic environmental conditions-Class E1 - by RMG dated 18.12.2006

Roller-pointer counter housed, adapted for the radio module, it co-operates with NK and NO transmitters. The counter mechanism is equipped with the element of optical data transition is housed in the plastic airtight casing.

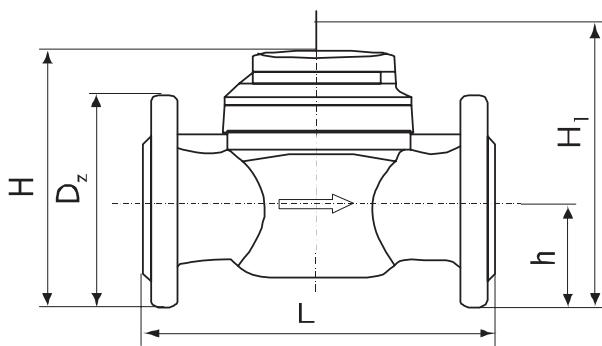

IP68 counter (only for cold water) co-operates with NK transmitter and is placed in the copper cover, in the airtight casing closed with mineral glass.

Possibility of remote counting of water volume and low rate in the AMR system

Tabela 1. TECHNICAL CHARACTERISTICS

Parameter	MWN, MWN-XX
