Lenovo ThinkSystem SR860 Server
Product Guide

The Lenovo ThinkSystem SR860 is a 4-socket server that features a 4U rack design with support for GPUs, and is optimized for price and performance and best-in-class expandability. Models of the SR860 are powered by up to four Intel Xeon Processor Scalable Family processors, each with up to 28 cores, for an efficient 4-socket solution. Using the same design as the 2U ThinkSystem SR850, the SR860's agile design provides rapid upgrades for processors and memory, and its large, flexible storage capacity helps to keep pace with data growth.

Suggested uses: General business consolidation, data analytics, virtualization, database, dense computing and scientific applications

Country availability: The ThinkSystem SR860 is only available in countries in Europe, the Middle East and Africa (EMEA), and in China.

Figure 1. Lenovo ThinkSystem SR860

Did you know?

The Lenovo ThinkSystem SR860 provides the advanced features and capabilities of the SR850 server plus the addition of support for four full-height slots or two double-wide GPU slots. The server offers support for up to four processors and 48 DIMMs, mix and match internal storage, and enterprise-grade systems management with the embedded Lenovo XClarity Controller.

The SR860 has space for 16x 2.5-inch drive bays, up to 8 of which can be configured as AnyBay drives - supporting SAS, SATA or NVMe drives. NVMe drives are high-speed, low-latency storage, ideal for storage tiering.

Key features

The flexible ThinkSystem SR860 server can scale from two to four Intel Xeon Gold or Platinum processors, delivering significantly faster performance than the previous generation. Built for standard workloads like general business applications and server consolidation, it can also accommodate high-growth areas such as databases and virtualization. The ThinkSystem SR860's agile design permits rapid upgrades for processors and memory, and its large, flexible storage capacity helps to keep pace with data growth.

With the capability to support up to 48 DIMMs, four sockets, mix-and-match internal storage with up to 16 drives, support for two high-performance GPUs, and a dedicated slot for Gigabit or 10 GbE networking, the SR860 provides unmatched features and capabilities in a 4U rack-mount design.

Scalability and performance

The SR860 offers numerous features to boost performance, improve scalability and reduce costs:

- Supports Gold and Platinum level processors in the Intel Xeon Processor Scalable Family. Processors supported have up to 28 cores, core speeds of up to 3.6GHz, L3 cache sizes up to 38.5 MB, and TDP ratings of up to 165W.

- The SR860's processor mezzanine tray design enables you to start with two processors and 24 DIMM sockets and upgrade to four processors and 48 DIMM sockets when you need it, helping lower initial costs and manage growth.

- Up to four processors, 48 cores, and 96 threads maximize the concurrent execution of multithreaded applications.

- Intelligent and adaptive system performance with Intel Turbo Boost Technology 2.0 allows processor cores to run at maximum speeds during peak workloads by temporarily going beyond processor TDP.

- Intel Hyper-Threading Technology boosts performance for multithreaded applications by enabling simultaneous multithreading within each processor core, up to two threads per core.

- Intel Virtualization Technology integrates hardware-level virtualization hooks that allow operating system vendors to better use the hardware for virtualization workloads.

- Support for up to 48 TruDDR4 memory DIMMs operating at 2666 MHz means you have the fastest available memory subsystem and memory capacity of up to 3.0 TB using 48x 64 GB LRDIMMs.

- Future processor options are planned to support 128 GB 3DS RDIMMs which will enable the SR860 to support 6.0 TB of high-speed TruDDR4 memory (M-suffix processor support and 3DS RDIMM support is planned for a future date)

- The use of solid-state drives (SSDs) instead of, or along with, traditional spinning drives (HDDs), can improve I/O performance. An SSD can support up to 100 times more I/O operations per second (IOPS) than a typical HDD.

- Up to 16x 2.5-inch drives -- SAS or SATA HDDs, SAS or SATA SSDs and the new NVMe PCIe SSDs -- provide a flexible and scalable all-in-one platform to meet your increasing demands.

- Support for up to 8 NVMe PCIe SSDs in a 2.5-inch form factor maximizes drive I/O performance, in terms of throughput, bandwidth, and latency.

- New high-speed RAID controllers from Broadcom provide 12 Gb SAS connectivity to the drive backplanes. A variety of RAID adapters are available, with cache up to 4 GB and support for 16 drives on a single controller.

- Support for two high-performance GPUs up to 300W each. GPUs adds additional processing power to the server.

- Supports a new Lenovo patented-design M.2 adapter for convenient operating system boot functions. Available M.2 adapters support either one M.2 drive or two M.2 drives in a RAID 1 configuration for boot drive performance and reliability.

- The server has a dedicated flexible LAN-on-motherboard (LOM) slot, supporting a variety of 10 GbE or Gigabit Ethernet adapters that do not occupy one of the standard PCIe slots.
- A total of up to 13 PCIe slots: 11 general-purpose PCIe 3.0 slots plus slots dedicated to the LOM adapter and the M.2 adapter.
- The server offers PCI Express 3.0 I/O expansion capabilities that improve the theoretical maximum bandwidth by almost 100% (8 GTps per link using 128b/130b encoding) compared to the previous generation of PCI Express 2.0 (5 GTps per link using 8b/10b encoding).

Availability and serviceability

The SR860 provides many features to simplify serviceability and increase system uptime:

- The server offers Single Device Data Correction (SDDC, also known as Chipkill), Adaptive Double-Device Data Correction (ADDDC, also known as Redundant Bit Steering or RBS), memory mirroring, and memory rank sparing for redundancy in the event of a non-correctable memory failure.
- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- The Dual M.2 Boot Adapter supports RAID-1 which enables two installed M.2 drives to be configured as a redundant pair.
- The server has up to two hot-swap redundant power supplies and six N+1 redundant fans to provide availability for business-critical applications.
- The power-source-independent light path diagnostics uses LEDs to lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- An LCD system information display panel (available on some models and configure-to-order) provides more detailed diagnostics by displaying all error messages and VPD data needed for a service call, thereby aiding with problem resolution and system uptime.
- Proactive Platform Alerts (including PFA and SMART alerts): Processors, voltage regulators, memory, internal storage (SAS/SATA HDDs and SSDs, NVMe SSDs, M.2 storage, flash storage adapters), fans, power supplies, RAID controllers, server ambient and subcomponent temperatures. Alerts can be surfaced through the XClarity Controller to managers such as Lenovo XClarity Administrator, VMware vCenter, and Microsoft System Center. These proactive alerts let you take appropriate actions in advance of possible failure, thereby increasing server uptime and application availability.
- Solid-state drives (SSDs) offer more reliability than traditional mechanical HDDs for greater uptime.
- The built-in XClarity Controller continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Built-in diagnostics in UEFI, using Lenovo XClarity Provisioning Manager, speed up troubleshooting tasks to reduce service time.
- Lenovo XClarity Provisioning Manager collects and saves service data to USB key drive or remote CIFS share folder, for troubleshooting and to reduce service time.
- Auto restart in the event of a momentary loss of AC power (based on the power policy setting in the XClarity Controller service processor)
- Support for the XClarity Administrator Mobile app running on a supported smartphone and connected to the server through the service-enabled USB port, enables additional local systems management functions.
- Three-year or one-year customer-replaceable unit and onsite limited warranty, 9 x 5 next business day. Optional service upgrades are available.

Manageability and security

Powerful systems management features simplify local and remote management of the SR860:

- Lenovo XClarity Controller (XCC) monitors server availability and performs remote management. XCC Advanced is standard, which enables remote KVM. Optional XCC Enterprise enables the mounting of remote media files (ISO and IMG image files), boot capture, and power capping.

- Lenovo XClarity Administrator offers comprehensive hardware management tools that help to increase uptime, reduce costs and improve productivity through advanced server management capabilities.

- New UEFI-based Lenovo XClarity Provisioning Manager, accessible from F1 during boot, provides system inventory information, graphical UEFI Setup, platform update function, RAID Setup wizard, operating system installation function, and diagnostic functions.

- Support for Lenovo XClarity Energy Manager, which captures real-time power and temperature data from the server and provides automated controls to lower energy costs.

- Integrated Trusted Platform Module (TPM) 2.0 support enables advanced cryptographic methods, such as digital signatures and remote attestation.

- Supports Secure Boot to ensure only a digitally signed operating system can be used. Supported with HDDs and SSDs, as well as M.2 drives in the M.2 Adapter.

- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.

- Intel Execute Disable Bit functionality can prevent certain classes of malicious buffer overflow attacks when combined with a supported operating system.

- Intel Trusted Execution Technology provides enhanced security through hardware-based resistance to malicious software attacks, allowing an application to run in its own isolated space, protected from all other software running on a system.

Energy efficiency

The SR860 offers the following energy-efficiency features to save energy, reduce operational costs, and increase energy availability:

- Energy-efficient planar components help lower operational costs.

- High-efficiency power supplies with 80 PLUS Platinum certifications

- Intel Intelligent Power Capability turns individual processor elements on and off as needed to reduce power draw.

- Low-voltage 1.2 V DDR4 memory offers energy savings compared to 1.35 V and 1.5 V DDR3 DIMMs.

- Solid-state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.

- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system and thus keeping your system cooler.

- Optional Lenovo XClarity Energy Manager provides advanced data center power notification, analysis, and policy-based management to help achieve lower heat output and reduced cooling needs.

Components and connectors

The following figure shows the front of the server.

The following figure shows the rear of the server.

Figure 2. Rear view of the Lenovo ThinkSystem SR860

The following figure shows the locations of key components inside the server.

Figure 3. Internal view of the Lenovo ThinkSystem SR860 (GPU Tray removed)

The upper 2U of the server is where the PCIe Expansion Tray is located. Two GPU riser cards are installed as shown in the following figure. The figure also shows the GPU riser card and the riser slots each riser card is connected into.
Figure 4. PCIe Expansion Tray with GPU riser cards installed

Standard specifications

The following table lists the standard specifications.

Table 1. Standard specifications

Components	Specification
Machine types	7X69 - 3 year warranty 7X70 - 1 year warranty
Form factor	4U rack.
Processor	Up to four Intel Xeon Processor Scalable Family of processors, either Gold or Platinum level processors (formerly codename "Skylake"). Supports processors up to 28 cores, core speeds up to 3.6 GHz, and TDP ratings up to 165W. Two processor sockets on the system board and two processors on the Processor and Memory Expansion Tray (standard on most models). Two Intel Ultra Path Interconnect (UPI) links at 10.4 GT/s each. Four processors are connected in a ring topology.
Chipset	Intel C624 "Lewisburg" chipset
Memory	Up to 48 DIMM sockets (12 DIMMs per processor) supporting Lenovo TruDDR4 DIMMs at up to 2666 MHz. RDIMMs and LRDIMMs (Load Reduced DIMMs) are supported, but memory types cannot be mixed. There are 24 DIMM sockets on the system board, and an additional 24 DIMM sockets on the processor and memory expansion tray (standard on most models).
Memory maximums	With RDIMMs: Up to 1.5 TB with 48x 32 GB RDIMMs and four processors. With LRDIMMs: Up to 3.0 TB with 48x 64 GB LRDIMMs and four processors. Planned support for up to 6.0 TB with 48x 128 GB 3DS RDIMMs (requires M-suffix processors that support greater than 786 GB memory per processor)
Memory protection	ECC, SDDC (for x4-based memory DIMMs), ADDDC (for x4-based memory DIMMs), memory mirroring, and memory sparing.

Components	Specification
Disk drive bays	Up to 16 2.5-inch hot-swap SAS/SATA bays.
Maximum internal storage	Up to 245.76 TB with 16x 15.36 TB 2.5" SAS SSDs, or up to 32 TB with 16x 2.0 TB 2.5" 7.2K SAS HDDs. With 8x SAS/SATA and 8x NVMe drives, up to 153.6 TB with 8x 15.36 TB 2.5" SAS SSDs and 8x 3.84 TB U.2 2.5" NVMe SSDs. Mix of SSDs/HDDs supported.
Storage controller	- No embedded RAID 12 Gb SAS/SATA RAID adapters: - RAID 530i (cacheless) supports RAID 0, 1, 10, 5, 50 - RAID 730-8i (China only) with 1GB cache supports RAID 0, 1, 10, 5, 50 - RAID 930-8i with 2GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60 - RAID 930-16i and 24i with 4GB flash-backed cache supports RAID 0, 1, 10, 5, 50, 6, 60 12 Gb SAS/SATA non-RAID: 430-8i and 430-16i HBAs
Optical drive bays	No internal optical drive.
Tape drive bays	No internal backup drive.
Network interfaces	Integrated 10Gb Ethernet controller, based on the Intel Ethernet Connection X722. The server supports 1 of 6 available Phy adapters, providing either 2- or 4-port Gigabit Ethernet, 2- or 4-port 10 GbE with SFP+ connections or 2- or 4-port 10 GbE with RJ45 connections. One port can optionally be shared with the XClarity Controller (XCC) management processor for Wake-on-LAN and NC-SI support.
PCI Expansion slots	Up to 13 PCIe slots including slots reserved for a LOM Ethernet adapter and an M.2 adapter. Six slots are on the system board and three (slots 5-7) are through a lower riser card. Slots 1 & 2 and 14 & 15 are via upper riser cards that connect through slots 3 and 13 respectively. Slots 1-13 available with 2 processors; slots 14 & 15 require 4 processors. The slots are as follows: - Slot 1-2: Riser card slots (choice of x8/x8 or x16) (FHFL) - Slot 3: Riser slot to enable slots 1 & 2 in the PCIe Expansion Tray (PCIe 3.0 x16)* - Slot 4: PCIe 3.0 x8 (low profile) - Slot 5-7: Riser card slots (choices are x8/x8/x8, x8/x8/x8ML2 and x8/x16ML2) - Slot 8: PCIe 2.0 x2 / 6 Gb SATA slot reserved to M.2 adapter and drives - Slot 9: Reserved for Ethernet LOM phy adapter - Slot 10: PCIe 3.0 x8 (low profile) - Slot 11: PCIe 3.0 x8 (low profile) - Slot 12: PCIe 3.0 x8 (low profile) - Slot 13: Riser slot to enable slots 14 & 15 in the PCIe Expansion Tray (PCIe 3.0 x16)* - Slot 14-15: Riser card slots (choice of x8/x8 or x16) (FHFL) * Slots 3 and 13 are used as riser slots to enable slots 1, 2, 14 and 15 in the PCIe Expansion Tray. It is also supported to have the PCIe Expansion Tray installed with only one riser installed. For example, it is supported to have a riser card in slot 3 but not in slot 13; slot 13 can then be used as a PCIe x16 slot.

Components	Specification
Ports	Front: One VGA video port. Two USB 2.0 ports or one USB 2.0 and one USB 3.0 port, model dependent. The first USB 2.0 port can be configured to support local systems management by using the XClarity Administrator mobile app on a mobile device connected via a USB cable. Rear: Two USB 3.0 ports, one VGA video port, one DB-9 serial port, and one RJ-45 XClarity Controller (XCC) systems management port. The serial port can be shared with the XCC for serial redirection functions. Internal: Optional M.2 adapter in dedicated slot supporting one or two M.2 drives (for OS boot support, including hypervisor support).
Cooling	Six N+1 redundant non-hot-swap 60 mm fans (all six standard). One additional fan connected to each of the two upper riser units. One additional fan integrated in each of the two power supplies.
Power supply	Up to two hot-swap redundant AC power supplies (all 80 PLUS Platinum certification): 750 W, 1100 W, 1600 W and 2000 W AC options, supporting 220 V AC. 750 W and 1100 W options also support 110V input supply. In China only, all power supply options support 240 V DC. Second power supply requires either Processor and Memory Expansion Tray or a power interposer card.
Video	G200 graphics with 16 MB memory with 2D hardware accelerator, integrated into the XClarity Controller. Maximum resolution is 1920x1200 32bpp at 60Hz.
Hot-swap parts	Drives and power supplies.
Systems management	XClarity Controller embedded management, XClarity Administrator centralized infrastructure delivery, XClarity Integrator plugins, and XClarity Energy Manager centralized server power management. XClarity Controller Advanced standard with the SR860; XClarity Controller Enterprise optional with software license upgrade. Light path diagnostics for local failure detection and reporting, with optional LCD diagnostics pull-out panel.
Security features	Power-on password, administrator's password, Trusted Platform Module (TPM), supporting TPM 1.2 or TPM 2.0. In China only, optional Trusted Cryptographic Module (TCM). Lockable top cover. Optional lockable front security bezel.
Operating systems supported	Microsoft Windows Server 2012 R2, 2016; RHEL 6 & 7 x64; SLES 11 & 12 x64; VMware ESXi 6.0, 6.5
Limited warranty	Three-year or one-year (model dependent) customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications. Actual offering may depend on the country where the server is installed and is subject to change.
Dimensions	Height: 175mm (6.9 in.), width with rack handle: 482mm (19 in.), width without rack handle: 447mm (17.6 in.), depth: 766mm (30.1 in)
Weight	Maximum: 39.8 kg (87.7 lb)

The SR860 servers are shipped with the following items:

- ThinkSystem Friction Rail kit
- Documentation flyer
- Power cords (model and region dependent)

Models

The following tables list the available models, grouped by region.

- Models for China
- Models for EMEA countries

Models for China

All models have the following common features:

- Field upgrade options for Processor and Memory Expansion Tray, Storage Backplane and PCIe risers
- XCC Advanced with optional upgrade to Enterprise
- No Pull-out LCD Display Panel
- Front USB ports are two USB 2.0
- 2x 2.8m, 13A/100-250V, C13 to C14 Jumper Cord
- Friction Rail Kit

Table 2. Models for China

Model	Intel Xeon processors†	Memory	RAID	Drive bays	Drives	Ethernet LOM	Slots	Power supplies
7X69 SG0600	2x Gold 5118 12C 105W 2.3GHz	4x 16GB 1Rx4	RAID 730-8i	8x 2.5" / 16	Open	4x1Gb LOM	6 base slots + LOM Optional risers	2x 1100W HS
7X69 SG0C00	2x Gold 5120 14C 105W 2.2GHz	4x 16GB 1Rx4	RAID 730-8i	8x 2.5" / 16	Open	4x1Gb LOM	6 base slots + LOM Optional risers	2x 1100W HS

† Processor detail: Quantity, model, core count, TDP, core frequency

Models for EMEA countries

All models have the following common features:

- XCC Enterprise
- Pull-out LCD Display Panel
- Front USB ports are USB 3.0 + USB 2.0
- 2x 2.8m, 13A/100-250V, C13 to C14 Jumper Cord
- Friction Rail Kit

Table 3. Models for EMEA countries

Model	Intel Xeon processors†	Memory	RAID	Drive bays	Drives	Ethernet LOM	Slots	Power supplies
7X69 A001EA	4x Gold 6130 16C 125W 2.1GHz	4x 32GB	RAID 930-8i	8x 2.5" / 16 (4x AnyBay)	Open	Open	4 base slots + LOM 1x 3x8 Riser 2x 1x16 Risers	2x 2000W HS
7X69 A002EA	4x Gold 5118 12C 105W 2.3GHz	4x 32GB	RAID 930-8i	8x 2.5" / 16 (4x AnyBay)	Open	Open	4 base slots + LOM 1x 3x8 Riser 2x 1x16 Risers	2x 2000W HS

† Processor detail: Quantity, model, core count, TDP, core frequency

Processor options

The SR860 supports Gold and Platinum level processors in the Intel Xeon Processor Scalable Family.

The server supports two or four processors.

- Processors 1 and 2 are installed in sockets on the system board.
- Processors 3 and 4 are installed on the Processor and Memory Expansion Tray.

The Processor and Memory Expansion Tray has a patent-pending sliding and rolling lift mechanism that requires only a one-handed operation to insert or remove from the server. It has a toolless design for superior usability, serviceability and reliability.

Figure 5. SR860 Processor and Memory Expansion Tray

The ordering information for the Processor and Memory Expansion Tray is shown in the following table.

Table 4. Processor and Memory Expansion Tray

Part number	Feature code	Description
7B27A03953	AUPY	SR850/SR860 Processor and Memory Expansion Tray

The following processor quantities are supported:

- Two processors, installed in sockets 1 and 2, without the Processor and Memory Expansion Tray
- Four processors, installed in all four sockets

Note: Configurations of one or three processors are not supported.

The SR860 supports the Intel Xeon Processor Scalable Family options listed in the following table.

All supported processors have the following characteristics:

- 14 nm process technology
- Six DDR4 memory channels
- 48 PCIe 3.0 I/O lanes
- 1 MB L2 cache
- 1.375 MB L3 cache per core (except where larger, as noted with ** in the table below)
- Intel Hyper-Threading Technology

- Intel Turbo Boost Technology 2.0
- Intel Advanced Vector Extensions 512 (AVX-512)
- Intel Ultra Path Interconnect (UPI) links at 10.4 GT/s (replaces QPI)

With two processors installed, the two processors are connected together using one UPI link. With four processors installed, the processors are connected together using a ring topology, using two UPI links, one to each adjacent processor in the ring.

Processors with the T suffix have more robust thermal characteristics (higher T-case).

Table 5. Processor options

Part number	Feature code	Description	Memory speed	Supports >768 GB per CPU	L3 cache	AVX-512 FMA units

7XG7A04969	AX7B	Intel Xeon Platinum 8158 12C 150W 3.0GHz	2666 MHz	No	24.75 MB**	2
7XG7A03937	AWGJ	Intel Xeon Platinum 8160 24C 150W 2.1GHz	2666 MHz	No	33 MB	2
7XG7A03936	AX6K	Intel Xeon Platinum 8164 26C 150W 2.0GHz	2666 MHz	No	35.75 MB	2
7XG7A03935	AX6J	Intel Xeon Platinum 8170 26C 165W 2.1GHz	2666 MHz	No	35.75 MB	2
7XG7A03934	AX6H	Intel Xeon Platinum 8176 28C 165W 2.1GHz	2666 MHz	No	38.5 MB	2

* All Gold 5000-level processors, except the 5122, support 2400 MHz memory speeds and have one AVX-512 512-bit FMA units. The 5122 processor supports 2666 MHz and has two FMA units
** L3 cache is 1.375 MB per core except for processor indicated with ** where the cache size is larger

Memory options

The SR860 server supports TruDDR4 memory. TruDDR4 memory uses the highest-quality components sourced from Tier 1 DRAM suppliers and only memory that meets strict tolerances is selected. It is compatibility tested and tuned to maximize performance and reliability.

TruDDR4 memory has a unique signature programmed into the DIMM, which enables ThinkSystem servers to verify whether the memory installed is qualified and supported. From a service and support standpoint, TruDDR4 memory automatically assumes the system's warranty, and service and support provided worldwide.

The SR860 supports up to 12 DIMMs per processor, for a total of 48 DIMMs when four processors are installed. Each processor has six memory channels, and supports one or two DIMMs per channel.

All DIMMs can operate at a speed of 2666 MHz, both at 1 DIMM per channel and 2 DIMMs per channel. However, if the processor selected has a lower memory bus speed (eg 2400 MHz), then all DIMMs will operate at that lower speed.

The following table lists the memory options that are available for the SR860 server.

Table 6. Memory options

Part number	Feature code	Description	Maximum supported
RDIMMs			
7X77A01301	AUU1	ThinkSystem 8GB TruDDR4 2666 MHz (1Rx8 1.2V) RDIMM	48 (12 per processor)
7X77A01302	AUNB	ThinkSystem 16GB TruDDR4 2666 MHz (1Rx4 1.2V) RDIMM	48 (12 per processor)
7X77A01303	AUNC	ThinkSystem 16GB TruDDR4 2666 MHz (2Rx8 1.2V) RDIMM	48 (12 per processor)
7X77A01304	AUND	ThinkSystem 32GB TruDDR4 2666 MHz (2Rx4 1.2V) RDIMM	48 (12 per processor)
LRDIMMs			
7X77A01305	AUNE	ThinkSystem 64GB TruDDR4 2666 MHz (4Rx4 1.2V) LRDIMM	48 (12 per processor)

The following rules apply when selecting the memory configuration:

- The server supports RDIMMs and LRDIMMs. 3DS RDIMM support is planned for 1Q/2018. UDIMMs are not supported.
- Mixing RDIMMs and LRDIMMs is not supported.
- Mixing 3DS RDIMMs with either RDIMMs or LRDIMMs is not supported.
- Mixing x4 and x8 DIMMs *is* supported.
- For best performance, populate memory DIMMs in quantities of 6 or 12 per processor, so that all memory channels are used.

The following memory protection technologies are supported:

- ECC
- SDDC (for x4-based memory DIMMs; look for "x4" in the DIMM description)
- ADDDC (for x4-based memory DIMMs)
- Memory channel mirroring
- Memory rank sparing

If memory channel mirroring is used, then DIMMs must be installed in pairs (minimum of one pair per processor), and both DIMMs in a pair must be identical in type and size. 50% of the installed capacity is available to the operating system.

If memory rank sparing is used, then a minimum of one quad-rank DIMM or two single-rank or dual-rank DIMMs must be installed per populated channel (the DIMMs do *not* need to be identical). In rank sparing mode, one rank of a DIMM in each populated channel is reserved as spare memory. The largest rank in the channel will be automatically selected as the spare rank. The amount of memory available to the operating system depends on the number, capacity and rank counts of the DIMMs installed.

Internal storage

The server can support up to 16x 2.5-inch drives, SAS, SATA or NVMe, depending on the selected backplane configuration. You can mix drives in the same server, but not in the same array. Drives are all installed from the front of the server. The server also supports one or two M.2 drives, installed in an M.2 adapter.

In this section:

- Backplanes and drive bays
- Adapters and cabling
- Field upgrades
- M.2 drives
- SED encryption key management with ISKLM

Backplanes and drive bays

The SR860 supports various internal storage configurations based on two different backplanes:

- 8-drive SAS/SATA backplane for 8x 2.5-inch SAS or SATA drives

- 8-drive SAS/SATA+AnyBay backplane for either:
  - 8x 2.5-inch SAS or SATA drives
  - 4x 2.5-inch SAS or SATA drives + 4x 2.5-inch U.2 (NVMe) drives

For configure-to-order (CTO) configurations, ordering information for the backplanes is in the following table.

Table 7. Backplane ordering

Part number	Feature code	Description
None*	AUR5	ThinkSystem 2U 2.5" AnyBay 8-Bay Backplane Kit
None*	AURA	ThinkSystem 2U/Tower 2.5" SATA/SAS 8-Bay Backplane Kit

* Backplanes are configure-to-order (CTO) only; however, upgrade kits are available that include backplanes, as described in the Field upgrades section below.

Regular 2.5-inch SAS/SATA drive bays support only SAS or SATA drives, however the Lenovo AnyBay drive bay design allows a choice of SATA, SAS or NVMe drives. This design enables the flexibility to configure some of the bays with high-performance PCIe SSDs and still use the remaining bays for high-capacity HDDs, which is the ideal solution for storage tiering.

Backplane connections are as follows:

- The 8-drive SAS/SATA backplane has two SAS/SATA connectors and connects to a supported RAID controller or SAS HBA.

- The 8-drive SAS/SATA+AnyBay backplane has two SAS/SATA connectors and connects to a supported RAID controller or SAS HBA plus four PCIe connectors to connect to either two PCIe connectors on the Processor and Memory Expansion Tray (see Figure 4), or four PCIe connectors on a NVMe Switch adapter installed in a PCIe slot.

Five drive configurations are possible with these two backplanes:

1. 8 drive bays, all SAS/SATA
2. 8 drive bays, where 4 are AnyBay
3. 16 drive bays, all SAS/SATA
4. 16 drive bays, where 4 are AnyBay
5. 16 drive bays, where 8 are AnyBay

These configurations are shown in the following figure.

Figure 6. Drive bay configurations

Adapters and cabling

This section describes the adapter and cabling requirements for each of the five configurations. There are two aspects of the server configuration that determine what adapters are needed:

- For configurations with two SAS/SATA backplanes, you can select either one 16-port SAS/SATA adapter or two 8-port SAS/SATA adapters

- For AnyBay drive bays, cabling varies depending on whether the server has four processors and the Processor and Memory Expansion Tray (with its two NVMe connectors) installed. If the server has only two processors configured, then the NVMe ports are provided by a NVMe Switch adapter.

The five drive bay configurations are shown in the subsections below. Where there are different adapter and cabling options, or for 2 or 4 processors, they are shown by the letters A, B, C, D. These configuration numbers are also later references in the Field upgrades section.

1. 8x drive bays, all SAS/SATA
2. 8x drive bays, where 4 are AnyBay
3. 16x drive bays, all SAS/SATA
4. 16x drive bays, where 4 are AnyBay
5. 16x drive bays, where 8 are AnyBay

Tip: The adapters are described in detail in the Controllers for internal storage section.

1. 8 drive bays, all SAS/SATA

In this drive bay configuration, all eight drives are connected to one 8-port SAS/SATA RAID adapter or HBA using two backplane cables, as shown in the following figure.

Figure 7. Adapter and cabling for 8x drive bays, all SAS/SATA

2. 8 drive bays, where 4 are AnyBay

In 8-drive bay configurations where four of those drive bays are AnyBay drive bays, possible adapter and cabling configurations are shown in the following figure.

When only two processors are selected, a NVMe Switch Adapter is used to provide the four needed NVMe ports. When four processors are selected, the NVMe ports on the Processor and Memory Expansion Tray are used to connect to the NVMe connectors on the backplane.

In this configuration you can have up to eight SAS or SATA drives, or you can instead put up to four NVMe drives in the AnyBay drive bays, along with up to four SAS/SATA drives in the other drive bays.

Figure 8. Adapter and cabling for 8 drive bays, where 4 of the bays are AnyBay

3. 16 drive bays, all SAS/SATA

In 16-bay configurations where all 16 drive bays are SAS/SATA drives, you can use either two 8-port SAS/SATA RAID adapters or HBAs or one 16-port SAS/SATA RAID adapter or HBA. These choices are shown in the following figure.
Figure 9. Adapter and cabling for 16 drive bays, all SAS/SATA

4. 16 drive bays, where 4 are AnyBay

In 16-drive configurations where four of the bays are AnyBay drive bays, you can elect to have either one 16-port adapter or two 8-port adapters for SAS/SATA connectivity. In addition, the NVMe connectivity depends on whether you have two or four processors installed: for two-processor systems, an NVMe Switch Adapter is required; for four-processor systems, the onboard NVMe ports can be used. The configurations are shown in the following figure.

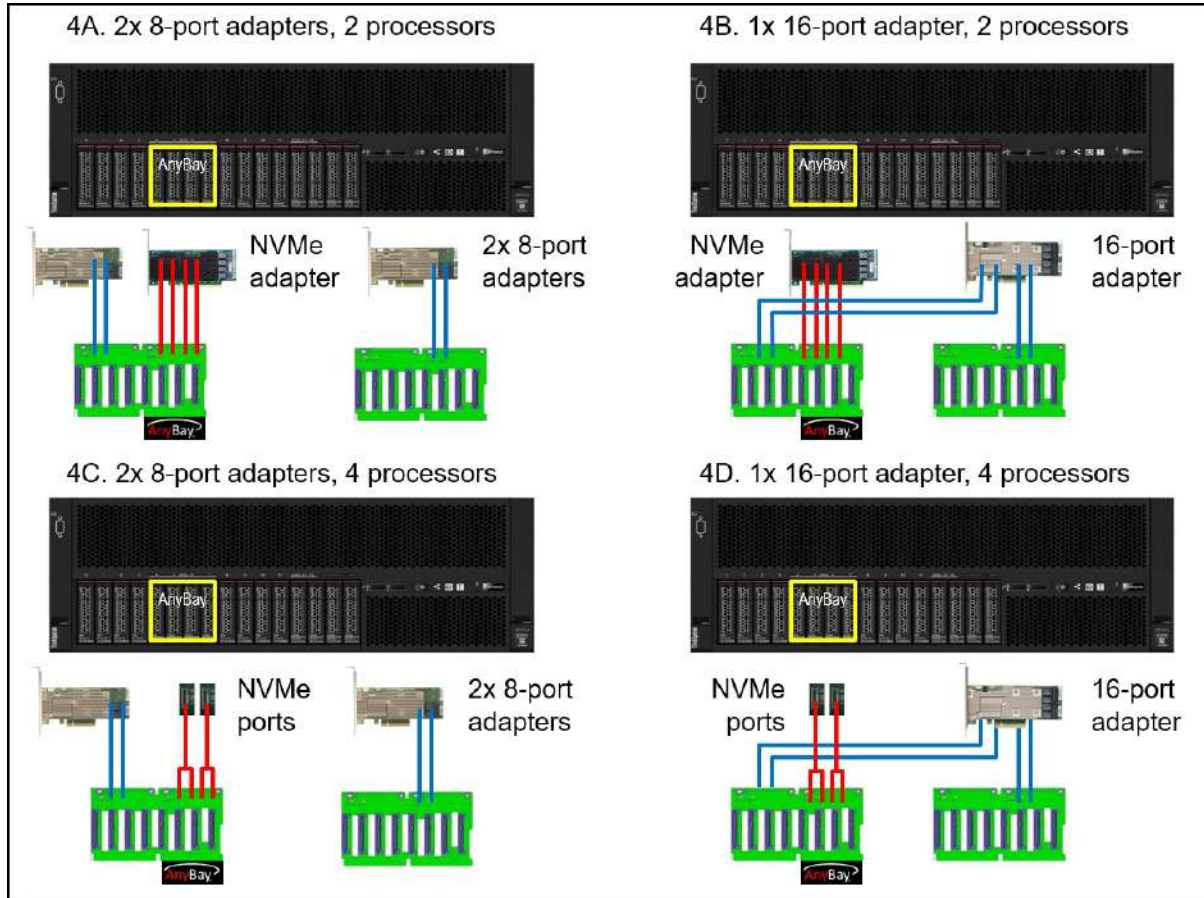

Figure 10. Adapter and cabling for 16 drive bays, where 4 of the bays are AnyBay

5. 16 drive bays, where 8 are AnyBay

In 16-drive configurations where eight of the bays are AnyBay drive bays, you can select either one 16-port adapter or two 8-port adapters for SAS/SATA connectivity. In addition, the NVMe connectivity depends on whether you have two or four processors installed: for two-processor systems, two NVMe Switch Adapters are required; for four-processor systems, the onboard NVMe ports is used for four of the AnyBay drive bays and an NVMe Switch Adapter is needed for the other four AnyBay drive bays. The configurations are shown in the following figure.
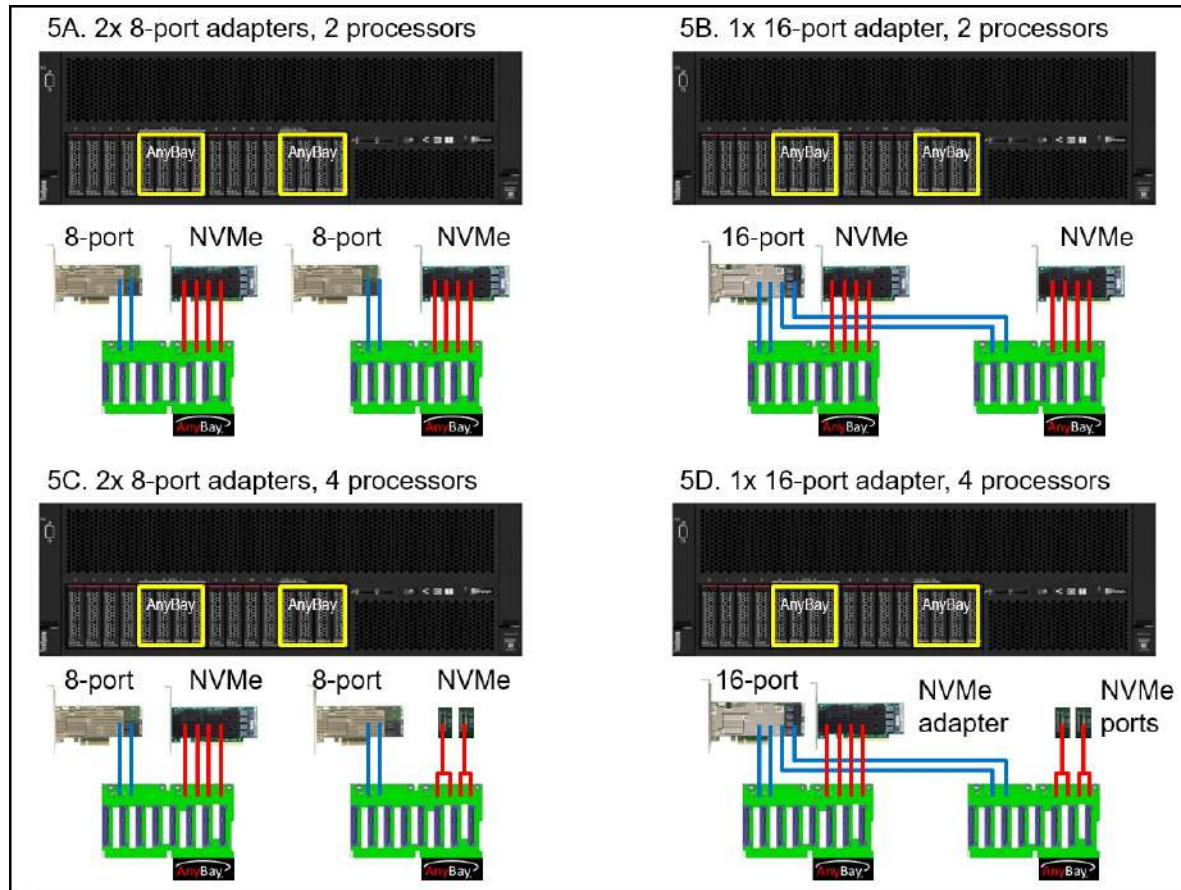

Figure 11. Adapter and cabling for 16 drive bays, where 8 of the bays are AnyBay

Field upgrades

This section describes how customers can upgrade their 8-bay configurations after the initial purchase of the server. The two backplane upgrade kits are listed in the following table.

Table 8. Drive backplane upgrades

Part number	Feature code	Description
7C57A03998	AXP7	ThinkSystem SR850/SR860 2.5" SATA/SAS 8-Bay BP Kit
7C57A03999	AXP8	ThinkSystem SR850/SR860 2.5" AnyBay 8-Bay BP Kit

The 2.5" SATA/SAS 8-Bay BP Kit, 7C57A03998, contains the following items:

- 1x 8-bay SAS/SATA backplane
- 1x backplane power cable

- 2x 900mm SAS/SATA cables
- 2x 720mm SAS/SATA cables
- 8x 1-bay fillers

The 2.5" AnyBay 8-Bay BP Kit, 7C57A03999, contains the following items:

- 1x 8-bay AnyBay backplane (4 SAS/SATA connectors, 4 AnyBay connectors)
- 1x backplane power cable
- 1x 900mm SAS/SATA cable
- 1x 720mm SAS/SATA cable
- 4x 750mm NVMe cables for use with NVMe Switch Adapter
- 2x 900mm NVMe cables for use with onboard NVMe ports

In addition to the backplane kits, you will need a RAID adapter or HBA, and for some upgrades you may also need an NVMe adapter. Upgrades needed are listed in the following two tables. Upgrading from an 8-port SAS/SATA adapter to a 16-port SAS/SATA adapter is supported, however that requires removing the existing 8-port adapter.

> **Tip**: The adapters are described in the Controllers for internal storage section.

The following table lists the available upgrades for SR860 servers with a single SAS/SATA backplane (See Configuration 1 above).

Table 9. Upgrades for servers with one 8-bay SAS/SATA backplane

Target configuration	Remove existing 8-port adapter	Components to add
Servers with two processors		
16x bays (all SAS/SATA) with 2x 8-port adapters (Config 3A)	No	1x SAS/SATA backplane 1x 8-port adapter
16x bays (4x AnyBay) with 2x 8-port adapters, 1x NVMe adapter (Config 4A)	No	1x AnyBay backplane 1x 8-port adapter, 1x NVMe adapter
16x bays (all SAS/SATA) with 1x 16-port adapter (Config 3B)	Yes	1x SAS/SATA backplane 1x 16-port adapter
16x bays (4x AnyBay) with 1x 16-port adapter, 1x NVMe adapter (Config 4B)	Yes	1x AnyBay backplane 1x 16-port adapter, 1x NVMe adapter
Servers with four processors		
16x bays (all SAS/SATA) with 2x 8-port adapters (Config 3A)	No	1x SAS/SATA backplane 1x 8-port adapter
16x bays (4x AnyBay) with 2x 8-port adapters (Config 4C)	No	1x AnyBay backplane 1x 8-port adapter, cables to onboard NVMe ports
16x bays (all SAS/SATA) with 1x 16-port adapter (Config 3B)	Yes	1x SAS/SATA backplane 1x 16-port adapter
16x bays (4x AnyBay) with 1x 16-port adapter (Config 4D)	Yes	1x AnyBay backplane 1x 16-port adapter, cables to onboard NVMe ports

The following table lists the available upgrades for SR860 servers with a single SAS/SATA backplane (See Configuration 2 above).

Table 10. Upgrades for servers with one 8-bay AnyBay backplane

Target configuration	Remove existing 8-port adapter	Components to add
Servers with two processors		
16x bays (4x AnyBay) with 2x 8-port adapters, 1x NVMe adapter (Config 4A)	No	1x SAS/SATA backplane 1x 8-port adapter
16x bays (8x AnyBay) with 2x 8-port adapters, 2x NVMe adapters (Config 5A)	No	1x AnyBay backplane 1x 8-port adapter, 1x NVMe adapter
16x bays (4x AnyBay) with 1x 16-port adapter, 1x NVMe adapter (Config 4B)	Yes	1x SAS/SATA backplane 1x 16-port adapter
16x bays (8x AnyBay) with 2x 8-port adapters, 2x NVMe adapters (Config 5B)	Yes	1x AnyBay backplane 1x 16-port adapter, 1x NVMe adapter
Servers with four processors		
16x bays (4x AnyBay) with 2x 8-port adapters (Config 4C)	No	1x SAS/SATA backplane 1x 8-port adapter
16x bays (8x AnyBay) with 2x 8-port adapters, 1x NVMe adapter (Config 5C)	No	1x AnyBay backplane 1x 8-port adapter, 1x NVMe adapter
16x bays (4x AnyBay) with 1x 16-port adapter (Config 4D)	Yes	1x SAS/SATA backplane 1x 16-port adapter
16x bays (8x AnyBay) with 2x 8-port adapters, 1x NVMe adapter (Config 5D)	Yes	1x AnyBay backplane 1x 16-port adapter, 1x NVMe adapter

M.2 drives

The server supports one or two M.2 form-factor SATA drives for use as an operating system boot solution. With two M.2 drives configured, the drives are configured by default as a RAID-1 mirrored pair for redundancy.

The M.2 drives install into an M.2 adapter which in turn is installed in a dedicated slot on the system board. See the internal view of the server in the Components and connectors section for the location of the M.2 slot.

There are two M.2 adapters supported, as listed in the following table.

Table 11. M.2 components

Part number	Feature code	Description	Maximum supported
7Y37A01092	AUMU	ThinkSystem M.2 Enablement Kit (contains the Single M.2 Boot Adapter; supports 1 drive)	1
7Y37A01093	AUMV	ThinkSystem M.2 with Mirroring Enablement Kit (contains the Dual M.2 Boot Adapter, supports 1 or 2 drives)	1

Supported drives are listed in the Internal drive options section.

For details about M.2 components, see the *ThinkSystem M.2 Drives and M.2 Adapters* product guide: https://lenovopress.com/lp0769-thinksystem-m2-drives-adapters

SED encryption key management with ISKLM

The server supports self-encrypting drives (SEDs) and FIPS 140-2 drives as described in the   Internal drive options section. To effectively manage a large deployment of these drives in Lenovo servers, IBM Security Key Lifecycle Manager (SKLM) offers a centralized key management solution. A Lenovo Feature on Demand (FoD) upgrade is used to enable this SKLM support in the management processor of the server.

The following table lists the part numbers and feature codes for the upgrades.

Table 12. FoD upgrades for SKLM support

Part number	Feature code	Description
Security Key Lifecycle Manager - FoD (United States, Canada, Asia Pacific, and Japan)		
00D9998	A5U1	SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 1 year S&S
00D9999	AS6C	SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 3 year S&S
Security Key Lifecycle Manager - FoD (Latin America, Europe, Middle East, and Africa)		
00FP648	A5U1	SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 1 year S&S
00FP649	AS6C	SKLM for System x/ThinkSystem w/SEDs - FoD per Install with 3 year S&S

Controllers for internal storage

The SR860 supports internal SAS and SATA drives with the addition of a RAID adapter or HBA. For NVMe support, the server offers two onboard NVMe ports on the processor and memory expansion tray (with four processors) and two ports with the use of an NVMe Switch Adapter.

The following table lists the adapters used for the internal storage of the SR860 server.

Tip: Unlike System x RAID adapters, no upgrades are available for these RAID adapters. All supported functions are included with the base part numbers.

Table 13. Controllers for internal storage

Part number	Feature code	Description	Number of ports	Maximum supported
SAS/SATA HBA				
7Y37A01088	AUNL	ThinkSystem 430-8i SAS/SATA 12Gb HBA	8	2
7Y37A01089	AUNM	ThinkSystem 430-16i SAS/SATA 12Gb HBA	16	1
RAID adapters				
7Y37A01082	AUNG	ThinkSystem RAID 530-8i PCIe 12Gb Adapter	8	2
7Y37A01083*	AUNH*	ThinkSystem RAID 730-8i 1GB Cache PCIe 12Gb Adapter	8	2
7Y37A01084	AUNJ	ThinkSystem RAID 930-8i 2GB Flash PCIe 12Gb Adapter	8	2
7Y37A01085	AUNK	ThinkSystem RAID 930-16i 4GB Flash PCIe 12Gb Adapter	16	1
NVMe adapter				
7Y37A01081	AUV2	ThinkSystem 1610-4P NVMe Switch Adapter	4	2

* The RAID 730-8i is available in China only

The following table compares the functions of the storage adapters.

Table 14. Comparison of internal storage controllers

Feature	430-8i	430-16i	RAID 530-8i	RAID 730-8i*	RAID 930-8i	RAID 930-16i	1610-4P NVMe

SSD Caching (CacheCade Pro 2.0)	No	No	No	No	No	No	No
SED support*	Yes	Yes	Yes	No	Yes	Yes	No

* SAS HBAs support SEDs (self-encrypting drives) by using software on the server and simply passing SED commands through the HBA to the drives. SED support by RAID controllers is provided using the built-in MegaRAID SafeStore functionality of the adapter.

For more information about the adapters see the product guides in the RAID adapters or HBA sections of the Lenovo Press web site:
https://lenovopress.com/servers/options/raid
https://lenovopress.com/servers/options/hba

Internal drive options

The following tables list the hard disk drive and solid-state drive options for the internal disk storage of the server.

- Table 15: 2.5-inch hot-swap 12 Gb SAS HDDs
- Table 16: 2.5-inch hot-swap 6 Gb SAS/SATA HDDs
- Table 17: 2.5-inch hot-swap 12 Gb SAS SSDs
- Table 18: 2.5-inch hot-swap 6 Gb SAS/SATA SSDs
- Table 19: 2.5-inch U.2 NVMe SSDs
- Table 20: M.2 drives

Tip: The use of M.2 drives requires an additional adapter as described in the M.2 drives subsection.

Table 15. 2.5-inch hot-swap 12 Gb SAS HDDs

Part number	Feature	Description	Maximum supported

Internal backup units

The server does not support any internal backup units, such as tape drives or RDX drives.

Optical drives

The server does not support an internal optical drive.

An external USB optical drive is available, listed in the following table.

Table 21. External optical drive

Part number	Feature code	Description
7XA7A05926	AVV8	ThinkSystem External USB DVD RW Optical Disk Drive

I/O expansion options

The SR860 supports up to 13 PCIe slots including slots reserved for a LOM Ethernet adapter and an M.2 adapter.

Six slots are on the system board and three (slots 5-7) are through a lower riser card. Slots 1 & 2 and 14 & 15 are via upper riser cards that connect through slots 3 and 13 respectively.

Slots 1-13 available with 2 processors; slots 14 & 15 require 4 processors.

The following figure shows the locations of the externally accessible PCIe slots.
Figure 12. SR860 slot numbering

The PCIe slots are as follows:

- Slot 1-2: Riser 2 (upper left) card slots (see the table below) (CPU 2)
- Slot 3: PCIe 3.0 x16 (low profile) or riser slot for slots 1 and 2 (CPU 2)
- Slot 4: PCIe 3.0 x8 (low profile) (CPU 2)
- Slot 5-7: Riser 1 (lower) card slots (see the table below) (CPU 2)
- Slot 8: PCIe 2.0 x2 dedicated to M.2 adapter and drives (internal)
- Slot 9: Dedicated to Ethernet LOM phy adapter (CPU 1)
- Slot 10: PCIe 3.0 x8 (low profile) (CPU 1)
- Slot 11: PCIe 3.0 x8 (low profile) (CPU 1)
- Slot 12: PCIe 3.0 x8 (low profile) (CPU 1)
- Slot 13: PCIe 3.0 x16 (low profile) or riser slot for slots 14 and 15 (CPU 1)
- Slots 14-15: Riser 3 (upper right) card slots (see the table below) (CPU 1*)

* Slots 14 & 15 connect to CPU 1 however additional power is drawn from the Processor and Memory Expansion Tray which requires 4 processors total to be installed.

Note: The slot labeled Slot 8 is for the M.2 adapter as described in the M.2 drives section.

Slots 5-7 are implemented using a lower riser card, and the SR860 supports three different riser cards as listed in the following table.

The following table lists the ordering information and slot information for each the riser card options for slots 5-7.

Table 22. PCI riser card options (slots 5-7)

Part number	Feature code	Description	Maximum supported
Riser 1 - Lower riser (supplies slots 5-7)			
7C57A03950	AUR4	ThinkSystem SR850/SR860 x8/x8/x8 PCIe FH Riser 1 Kit • Slot 5: PCIe 3.0 x8 FHHL • Slot 6: PCIe 3.0 x8 FHHL • Slot 7: PCIe 3.0 x8 FHHL	1
7C57A03951	AUR7	ThinkSystem SR850/SR860 x8/x8/x8ML2 PCIe FH Riser 1 Kit • Slot 5: PCIe 3.0 x8 FHHL • Slot 6: PCIe 3.0 x8 FHHL • Slot 7: PCIe 3.0 x8 ML2 FHHL	1
7C57A03952	AURB	ThinkSystem SR850/SR860 x8/x16ML2 PCIe FH Riser 1 Kit • Slot 5: PCIe 3.0 x8 FHHL • Slot 6: None • Slot 7: PCIe 3.0 x16 ML2 FHHL	1

Slots 1 and 2 are on a riser card that is installed in slot 3. Slots 14 and 15 are on a riser card that is installed in slot 13. The following table lists the riser card options.

Table 23. PCI riser card options (slots 1, 2, 14, 15)

Part number	Feature code	Description	Maximum supported
Riser 2 - Upper left riser (supplies slots 1 & 2, installs in slot 3)			
4C57A08184	AXL0	ThinkSystem SR860 2x8 PCIe FH Riser 2 (Slot 1 & 2) • Slot 1: PCIe 3.0 x8 FHFL • Slot 2: PCIe 3.0 x8 FHFL	1
4C57A08186	AXL2	ThinkSystem SR860 1x16 PCIe FH Riser 2 (Slot 1) • Slot 1: PCIe 3.0 x16 FHFL • Slot 2: Not present	1
Riser 3 - Upper right riser (supplies slots 14 & 15, installs in slot 13)			
4C57A08185	AXL1	ThinkSystem SR860 2x8 PCIe FH Riser 3 (Slot 14 & 15) • Slot 14: PCIe 3.0 x8 FHFL • Slot 15: PCIe 3.0 x8 FHFL	1
4C57A08187	AXL3	ThinkSystem SR860 1x16 PCIe FH Riser 3 (Slot 14) • Slot 14: PCIe 3.0 x16 FHFL • Slot 15: Not present	1

Riser 3 requires four processors: Riser 3 (upper right riser) draws power from the Processor & Memory Expansion Tray. As a result, four processors must be selected if a Riser 3 riser is selected

The following figure shows Riser 3 (upper right riser) with two x8 slots. As shown, the riser also includes an integrated cooling fan. The figure also shows the x16 board that provides one x16 slot as well as an auxiliary power connector for high-powered GPUs.
Figure 13. ThinkSystem Riser 3 (upper right riser)

Network adapters

The SR860 has an integrated 10Gb Ethernet controller, based on the Intel Ethernet Connection X722. The X722 has the following features:

- Integrated into the Intel PCH chipset
- Supports 1GbE or 10GbE connections, depending on the selected LOM Phy adapter
- Offers VXLAN/NVGRE hardware offloads
- Supports VMDq and SR-IOV for advanced virtualization
- Supports iWarp RDMA

To provide connectivity to the X722, the SR860 supports six different LOM (LAN on Motherboard) cards which provide the Ethernet PHY function. Only 1 LOM card can be installed. See Figure 3 for the location of the LOM slot.

The LOM card supports NC-SI to allow the network connection to be shared between the operating system and the XClarity Controller (XCC) management module (also known as IMM, short for integrated management module). The LOM also supports Wake-on-LAN (WOL).

For more information about the X722 controller, see the Lenovo Press product guide:
http://lenovopress.com/LP0654-intel-x722-integrated-controller

The following table lists the supported LOM cards.

Note: None of the LOM cards listed in the table support speeds lower than 1 Gbps.

Table 24. Supported LOM adapters

Part number	Feature code	Description	Ports	Slots supported	Maximum supported
Gigabit Ethernet					
7ZT7A00544	AUKG	ThinkSystem 1Gb 2-port RJ45 LOM	2x RJ45	9	1
7ZT7A00545	AUKH	ThinkSystem 1Gb 4-port RJ45 LOM	4x RJ45	9	1
10 Gb Ethernet					
7ZT7A00546	AUKJ	ThinkSystem 10Gb 2-port SFP+ LOM	2x SFP+ bays	9	1
7ZT7A00547	AUKK	ThinkSystem 10Gb 4-port SFP+ LOM	4x SFP+ bays	9	1
7ZT7A00548	AUKL	ThinkSystem 10Gb 2-port Base-T LOM	2x RJ45 (10GBASE-T)	9	1
7ZT7A00549	AUKM	ThinkSystem 10Gb 4-port Base-T LOM	4x RJ45 (10GBASE-T)	9	1

The SR860 also supports an ML2 card provided a suitable ML2 riser card is installed (see the I/O expansion options section for details). The ML2 card supports NC-SI and WOL. The following table lists the supported ML2 adapters.

> **VFA5.2 and FCoE support**: ThinkSystem servers do not support Features on Demand, so the Emulex VFA5.2 ML2 Dual Port 10GbE SFP+ Adapter, 00AG560, cannot be upgraded to FCoE support. If you need FCoE or iSCSI support use 01CV770 instead.

Table 25. Supported ML2 adapters

Part number	Feature code	Description	Bus width	Slots supported	Maximum supported
Gigabit Ethernet					
7ZT7A00536	AUKW	ThinkSystem Intel I350-T4 ML2 1Gb 4-Port RJ45 Ethernet Adapter	PCIe 3.0 x8	7	1
10 Gb Ethernet					
00JY940	ATRH	Intel X710-DA2 ML2 2x10GbE SFP+ Adapter	PCIe 3.0 x8	7	1
7ZT7A00497	AUKQ	ThinkSystem Broadcom NX-E ML2 10Gb 2-Port Base-T Ethernet Adapter	PCIe 3.0 x8	7	1
00AG560**	AT7U	Emulex VFA5.2 ML2 Dual Port 10GbE SFP+ Adapter	PCIe 3.0 x8	7	1
01CV770	AU7Z	Emulex VFA5.2 ML2 2x10 GbE SFP+ Adapter and FCoE/iSCSI SW	PCIe 3.0 x8	7	1
25 Gb Ethernet					
7ZT7A00507	AUKU	ThinkSystem Mellanox ConnectX-4 Lx ML2 25Gb 2-Port SFP28 Ethernet Adapter	PCIe 3.0 x8	7	1
00MN990	ATZR	Mellanox ConnectX-4 Lx ML2 1x25GbE SFP28 Adapter	PCIe 3.0 x8	7	1
InfiniBand					
7ZT7A00501	AUKR	ThinkSystem Mellanox ConnectX-3 Pro ML2 FDR 2-Port QSFP VPI Adapter	PCIe 3.0 x8	7	1

* ThinkSystem servers do not support Features on Demand, so the Emulex VFA5.2 ML2 Dual Port 10GbE SFP+ Adapter, 00AG560, cannot be upgraded to FCoE support. If you need FCoE or iSCSI support use 01CV770 instead.

The following table lists additional supported network adapters that can be installed in the regular PCIe slots.

> **VFA5.2 and FCoE support**: ThinkSystem servers do not support Features on Demand, so the Emulex VFA5.2 2x10 GbE SFP+ PCIe Adapter, 00AG570, cannot be upgraded to FCoE support. If you need FCoE or iSCSI support use 00AG580 instead.

Table 26. Supported PCIe Network Adapters

Part number	Feature code	Description	Slots supported	Maximum supported
10 Gb Ethernet - 10GBase-T				
7ZT7A00496	AUKP	ThinkSystem Broadcom NX-E PCIe 10Gb 2-Port Base-T Ethernet Adapter	1-4, 6, 7, 10, 11, 13-15	9
00MM860	ATPX	Intel X550-T2 Dual Port 10GBase-T Adapter	1-4, 6, 7, 10, 11, 13-15	9
10 Gb Ethernet - SFP+				
7ZT7A00537	AUKX	ThinkSystem X710-DA2 PCIe 10Gb 2-Port SFP+ Ethernet Adapter	1-7, 10, 11, 13-15	10
7ZT7A00493	AUKN	ThinkSystem Emulex OCe14104B-NX PCIe 10Gb 4-Port SFP+ Ethernet Adapter	1, 2, 5-7, 14, 15	7
00AG570*	AT7S	Emulex VFA5.2 2x10 GbE SFP+ PCIe Adapter	1-7, 10, 11, 13-15	10
00AG580	AT7T	Emulex VFA5.2 2x10 GbE SFP+ Adapter and FCoE/iSCSI SW	1-7, 10, 11, 13-15	10
25 Gb Ethernet				
7ZT7A00505	AUKS	ThinkSystem Broadcom NX-E PCIe 25Gb 1-Port SFP28 Ethernet Adapter	1-7, 10, 11, 13-15	10
01GR250	AUAJ	Mellanox ConnectX-4 Lx 2x25GbE SFP28 Adapter	1-7, 10, 11, 13-15	10
40 Gb Ethernet				
00MM950	ATRN	Mellanox ConnectX-4 Lx 1x40GbE QSFP+ Adapter	1-7, 10, 11, 13-15	10
100 Gb Ethernet				
00MM960	ATRP	Mellanox ConnectX-4 2x100GbE/EDR IB QSFP28 VPI Adapter	1-3,13-15	4
InfiniBand				
7ZT7A00500	AUVG	ThinkSystem Mellanox ConnectX-4 PCIe FDR 2-Port QSFP VPI Adapter	1-7, 10, 11, 13-15	10

* ThinkSystem servers do not support Features on Demand, so the Emulex VFA5.2 2x10 GbE SFP+ PCIe Adapter, 00AG570, cannot be upgraded to FCoE support. If you need FCoE or iSCSI support use 00AG580 instead.

For more information, including the transceivers and cables that each adapter supports, see the list of Lenovo Press Product Guides in the Networking adapters category:
https://lenovopress.com/servers/options/ethernet

Fibre Channel host bus adapters

The following table lists the Fibre Channel HBAs supported by SR860 server.

Table 27. Fibre Channel HBAs

Part number	Feature code	Description	Slots supported	Maximum supported
32 Gb Fibre Channel HBAs				
7ZT7A00516	AUNS	ThinkSystem QLogic QLE2740 PCIe 32Gb 1-Port SFP+ Fibre Channel Adapter	1-7, 10, 11, 13-15	10
7ZT7A00518	AUNU	ThinkSystem QLogic QLE2742 PCIe 32Gb 2-Port SFP+ Fibre Channel Adapter	1-7, 10, 11, 13-15	10
7ZT7A00519	AUNV	ThinkSystem Emulex LPe32002-M2-L PCIe 32Gb 2-Port SFP+ Fibre Channel Adapter	1-7, 10, 11, 13-15	10
7ZT7A00517	AUNT	ThinkSystem Emulex LPe32000-M2-L PCIe 32Gb 1-Port SFP+ Fibre Channel Adapter	1-7, 10, 11, 13-15	10
16 Gb Fibre Channel HBAs				
01CV750	ATZB	QLogic 16Gb Enhanced Gen5 FC Single-port HBA	1-7, 10, 11, 13-15	10
01CV760	ATZC	QLogic 16Gb Enhanced Gen5 FC Dual-port HBA	1-7, 10, 11, 13-15	10
01CV830	ATZU	Emulex 16Gb Gen6 FC Single-port HBA	1-7, 10, 11, 13-15	10
01CV840	ATZV	Emulex 16Gb Gen6 FC Dual-port HBA	1-7, 10, 11, 13-15	10

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters category:
https://lenovopress.com/servers/options/hba

SAS adapters for external storage

The following table lists SAS HBAs and RAID adapters supported by SR860 server for use with external storage.

Table 28. Adapters for external storage

Part number	Feature code	Description	Slots supported	Maximum supported
SAS HBAs				
7Y37A01090	AUNR	ThinkSystem 430-8e SAS/SATA 12Gb HBA	1-7, 10, 11, 13-15	10
7Y37A01091	AUNN	ThinkSystem 430-16e SAS/SATA 12Gb HBA	1-7, 10, 11, 13-15	10
External RAID adapters				
7Y37A01087	AUNQ	ThinkSystem RAID 930-8e 4GB Flash PCIe 12Gb Adapter	1-7, 10, 11, 13-15	4

For more information, see the list of Lenovo Press Product Guides in the Host bus adapters and RAID adapters categories:
https://lenovopress.com/servers/options/hba
https://lenovopress.com/servers/options/raid

The following table compares the specifications of the external SAS HBAs and RAID adapters.

Table 29. Comparison of external storage adapters

Feature	430-8e	430-16e	930-8e
Adapter type	HBA	HBA	External RAID
Part number	7Y37A01090	7Y37A01091	7Y37A01087
Controller chip	LSI SAS3408	LSI SAS3416	LSI SAS3508
Broadcom equivalent	HBA 9400-8e	HBA 9400-16e	MegaRAID 9480-8e
Host interface	PCIe 3.0x8	PCIe 3.0x8	PCIe 3.0x8
Port interface	12 Gb SAS	12 Gb SAS	12 Gb SAS
Number of ports	8	16	8
Port connectors	2x Mini-SAS HD SFF8644	4x Mini-SAS HD SFF8644	2x Mini-SAS HD SFF8644
Drive interface	SAS/SATA	SAS/SATA	SAS,SATA
Drive type	HDD/SSD/SED*	HDD/SSD/SED*	HDD,SED,SSD
Hot-swap drives	Yes	Yes	Yes
Maximum devices	512 (planned: 1024)	512 (planned: 1024)	64 (planned: 216)
RAID levels	None	None	0/1/10/5/50/6/60
JBOD mode	Yes	Yes	Yes
Cache	None	None	4GB (Standard)
CacheVault cache protection	None	None	Yes (Flash)
Performance Accelerator (FastPath)	No	No	Yes
SSD Caching (CacheCade Pro 2.0)	No	No	No
SED support*	Yes	Yes	Yes

* SAS HBAs support SEDs (self-encrypting drives) by using software on the server and simply passing SED commands through the HBA to the drives. SED support by RAID controllers is provided using the built-in MegaRAID SafeStore functionality of the adapter.

Flash Storage Adapters

The server supports the PCIe Flash Storage adapters listed in the following table.

Table 30.

Part number	Feature code	Description	Slots supported	Maximum supported
7N47A00097	AUUP	ThinkSystem HHHL PX04PMC 1.92TB Mainstream NVMe PCIe 3.0 x4 Flash Adapter	1-7, 10, 11, 13-15	10
7N47A00098	AUVY	ThinkSystem HHHL PX04PMC 3.84TB Mainstream NVMe PCIe 3.0 x4 Flash Adapter	1-7, 10, 11, 13-15	10
7XB7A05925	AWG8	ThinkSystem HHHL PX04PMC 1.6TB Performance NVMe PCIe 3.0 x4 Flash Adapter	1-7, 10, 11, 13-15	10
7XB7A05924	AWG9	ThinkSystem HHHL PX04PMC 3.2TB Performance NVMe PCIe 3.0 x4 Flash Adapter	1-7, 10, 11, 13-15	10

For details about these adapters, see the Lenovo Press product guides in the Flash Adapters category: https://lenovopress.com/servers/options/ssdadapter

GPU adapters

The SR860 supports the graphics processing units (GPUs) listed in the following table:

Table 31. GPU adapters

Part number	Feature code	Description	Slots	Maximum supported
00KG655	B0TB	NVIDIA Tesla M60 GPU, PCIe (Passive)	1, 14	2

The following rules apply when using GPUs:

- The x16 risers must be ordered, one for each GPU
- When the M60 is installed, the total system memory must be less than 1 TB
- If 1 GPU is installed, an 1100W power supply or larger must be installed
- If 2 GPUs are installed, a 1600W power supply or larger must be installed

Power supplies

The server supports up to two redundant hot-swap power supplies.

Installing a second power supply requires either the Processor and Memory Expansion Tray (7B27A03953) or the power interposer (feature AUPZ).

The power interposer enables redundant power support when the Processor and Memory Expansion Tray is not installed. If you do not have the Processor and Memory Expansion Tray installed and want to install two power supplies, then the power interposer card must be installed.

Table 32. Power supply options for SR860

Part number	Feature code	Description	Maximum supported	110V AC	220V AC	240V DC China only
None*	AUPZ	SR850/SR860 2S Power Paddle (power interposer)	1**	Yes	Yes	Yes
7N67A00883	AUPR	ThinkSystem 750W (230V/115V) Platinum Hot-Swap Power Supply	2	Yes	Yes	Yes
7N67A00885	AUPS	ThinkSystem 1100W (230V/115V) Platinum Hot-Swap Power Supply	2	Yes	Yes	Yes
7N67A00886	AUPT	ThinkSystem 1600W (230V) Platinum Hot-Swap Power Supply	2	No	Yes	Yes
7N67A00887	AXRT	ThinkSystem 2000W (230V) Platinum Hot-Swap Power Supply	2	No	Yes	Yes

* Configure-to-order only
** Only needed if two power supplies are installed but the Processor and Memory Expansion Tray is not installed

750W and 1100W power supplies are auto-sensing and support both 110V AC (100-127V 50/60 Hz) and 220V AC (200-240V 50/60 Hz) power. The 1600 W and 2000 W power supplies only supports 220V AC power.

For China customers, all power supplies support 240V DC.

Note: At 110 V, the 1100W power supply generates 1050W of power.

Power supply options do not include a line cord.

For server configurations, the inclusion of a power cord is model dependent. Configure-to-order models can be configured without a power cord if desired.

Power cords

Country-specific line cords and rack power cables can be ordered as listed in the following table.

Table 33. Power cords

Part number	Feature code	Description
Rack cables		
00Y3043	A4VP	1.0m, 10A/100-250V, C13 to C14 Jumper Cord

00WH545	6401	2.8M, 13A/125V, C13 to NEMA 5-15P (US) Line Cord
4L67A08359	6370	4.3m, 10A/125V, C13 to NEMA 5-15P (US) Line Cord
4L67A08361	6373	4.3m, 10A/250V, C13 to NEMA 6-15P (US) Line Cord
4L67A08360	AX8A	4.3m, 13A/125V, C13 to NEMA 5-15P (US) Line Cord

110V customers: If you plan to use the ThinkSystem 1100W power supply with a 110V power source, select a power cable that is rated above 10A. Power cables that are rated at 10A or below are not

supported with 110V power.

Integrated virtualization

The server supports booting from an operating system or hypervisor installed on an M.2 solid-state drive. See the M.2 drives section for details and the list of available options.

You can download supported VMware vSphere hypervisor images from the following web page and load it on the M.2 drive using the instructions provided:
http://shop.lenovo.com/us/en/systems/solutions/alliances/vmware/#tab-vmware_vsphere_esxi

Systems management

The server contains an integrated service processor, XClarity Controller (XCC), which provides advanced control, monitoring, and alerting functions. The XCC is based on the Pilot4 XE401 baseboard management controller (BMC) using a dual-core ARM Cortex A9 service processor.

Local management

The SR860 offers a front operator panel with key LED status indicators, as shown in the following figure.

Figure 14. Front operator panel

As an alternative to the front operator panel, (certain models or configure-to-order; not available as a field upgrade), the server supports a pull-out LCD display panel. The LCD display panel allows quick access to system status, firmware, network, and health information. The following figure shows the front operator panel with LCD display.
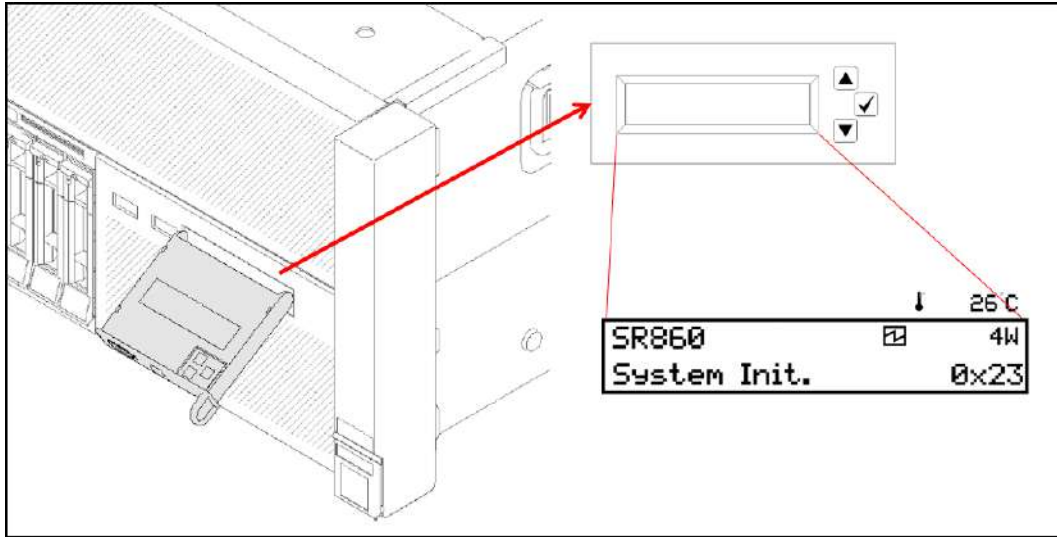

Figure 15. Front operator panel with LCD display

The LCD display and the function buttons give you access to the following information:

- Error messages
- System VPD: machine type & mode, serial number, UUID string
- System firmware levels: UEFI and XCC firmware
- XCC network information: hostname, MAC address, IP address, DNS addresses
- Environmental data: Ambient temperature, CPU temperature, AC input voltage, estimated power consumption
- System reset action

The front operator panel with LCD display can be ordered as listed in the following table.

Table 34. LCD system information display panel

Part number	Feature code	Description
None*	AUMW	Front operator panel with LCD display

* Only available configure-to-order or with predefined models

The server offers light path diagnostics. If an environmental condition exceeds a threshold or if a system component fails, the XCC lights LEDs inside the server to help you diagnose the problem and find the failing part. The SR860 has fault LEDs next to the following components:

- Each processor
- Each memory DIMM
- Each drive bay
- Each system fan
- Each power supply

The front of the server also houses an information pull-out tab (also known as the network access tag). See Figure 2 for the location. A label on the tab shows the network information (MAC address and other data) to remotely access XClarity Controller.

System status with XClarity Mobile

The XClarity Mobile app now includes a tethering function where you can connect your Android or iOS device to the server via USB to see the status of the server.

The steps to connect the mobile device are as follows:

1. Enable USB Management on the server, by holding down the ID button for 3 seconds (or pressing the dedicated USB management button if one is present)
2. Connect the mobile device via a USB cable to the server's USB port with the management symbol

3. In iOS or Android settings, enable Personal Hotspot or USB Tethering
4. Launch the Lenovo XClarity Mobile app

Once connected you can see the following information:

- Server status including error logs (read only, no login required)
- Server management functions (XClarity login credentials required)

Remote management

Remote server management is provided through industry-standard interfaces:

- Intelligent Platform Management Interface (IPMI) Version 2.0
- Simple Network Management Protocol (SNMP) Version 3 (no SET commands; no SMNP v1)
- Common Information Model (CIM-XML)
- Representational State Transfer (REST) support
- Redfish support (DMTF compliant)
- Web browser - HTML 5-based browser interface (Java and ActiveX not required) using a responsive design (content optimized for device being used - laptop, tablet, phone) with NLS support

A virtual presence (remote control) capability also comes standard in the server for remote server management. Virtual media (remote drive images) support is optional via a software license upgrade.

The remote control functions include the following:

- Remotely viewing video with graphics resolutions up to 1600x1200 at 75 Hz with up to 23 bits per pixel, regardless of the system state
- Remotely accessing the server using the keyboard and mouse from a remote client
- Capturing blue-screen errors
- International keyboard mapping support
- LDAP-based authentication
- With the XCC Enterprise license upgrade, mapping ISO and diskette IMG image files as virtual drives that are available for use by the server

The Enterprise license upgrade, shown in the following table, enables the following features:

- Boot Capture
- Remote mounting of ISO and IMG files
- Virtual console collaboration - Ability for up to 6 remote users to be log into the remote session simultaneously
- Power capping
- License for XClarity Energy Manager

Table 35. XClarity Controller Enterprise Upgrade

Part number	Feature code	Description
4L47A09133	AVUU	ThinkSystem XClarity Controller Advanced to Enterprise Upgrade

Lenovo XClarity Administrator

Lenovo XClarity Administrator is a centralized resource management solution designed to reduce complexity, speed response, and enhance the availability of Lenovo systems and solutions.

Lenovo XClarity Administrator provides agent-free hardware management for ThinkSystem servers, in addition to ThinkServer, System x, and Flex System servers. The administration dashboard is based on HTML 5 and allows fast location of resources so tasks can be run quickly.

Because Lenovo XClarity Administrator does not require any agent software to be installed on the managed endpoints, there are no CPU cycles spent on agent execution, and no memory is used, which means that up to 1GB of RAM and 1 - 2% CPU usage is saved, compared to a typical managed system where an agent is required.

Lenovo XClarity Administrator provides full management function to ThinkSystem servers, including the following:

- Discovery
- Inventory
- Monitoring and alerting
- Call home
- Centralized user management
- Cryptography modes, server certificates, and encapsulation
- Configuration patterns
- Operating system deployment
- Firmware updates

For more information about Lenovo XClarity Administrator, including ordering part numbers, see the Lenovo XClarity Administrator Product Guide:
https://lenovopress.com/tips1200-lenovo-xclarity-administrator

Lenovo XClarity Provisioning Manager

Lenovo XClarity Provisioning Manager is a UEFI-based application embedded in ThinkSystem servers and accessible via the F1 key during system boot.

Lenovo XClarity Provisioning Manager provides the following functions:

- Graphical UEFI Setup
- System inventory information and VPD update
- System firmware updates (UEFI and XCC)
- RAID setup wizard
- OS installation wizard (including unattended OS installation)
- Diagnostics functions

Lenovo XClarity Essentials

Lenovo offers the following XClarity Essentials software tools that can help you set up, use, and maintain the server at no additional cost:

- Lenovo Essentials OneCLI

  OneCLI is a collection of server management tools that uses a command line interface program to manage firmware, hardware, and operating systems. It provides functions to collect full system health information (including health status), configure system setting, and update system firmware and drivers.

- Lenovo Essentials UpdateXpress

  The UpdateXpress tool is a standalone GUI application for firmware and device driver updates that enables you to maintain your server firmware and device drivers up-to-date and help you avoid unnecessary server outages. The tool acquires and deploys individual updates and UpdateXpress System Packs (UXSPs) which are integration-tested bundles.

- Lenovo Essentials Bootable Media Creator

  The Bootable Media Creator (BOMC) tool is used to create bootable media for offline firmware update.

For more information and downloads, visit the Lenovo XClarity Essentials web page: http://support.lenovo.com/us/en/documents/LNVO-center

Lenovo XClarity Energy Manager

Lenovo XClarity Energy Manager is an agent-free, web-based console that provides power management for ThinkSystem servers as well as System x and ThinkServer systems. It enables server density and data center capacity to be increased through the use of power capping.

Lenovo XClarity Energy Manager is a licensed product. A single-node XClarity Energy Manager license is included with the XClarity Controller Enterprise (XCC Enterprise) upgrade as described in the Remote Management section. If your server does not have the XCC Enterprise upgrade, Energy Manager licenses can be ordered as shown in the following table.

Table 36. Lenovo XClarity Energy Manager

Description	Part number	Maximum supported
4L40E51621	Lenovo XClarity Energy Manager Node License	1 node
4L40E51622	Lenovo XClarity Energy Manager Node License Pack	5 nodes
4L40E51623	Lenovo XClarity Energy Manager Node License Pack	50 nodes

Security

The server offers the following security features:

- Administrator and power-on password
- Trusted Platform Module (TPM) supporting both TPM 1.2 and TPM 2.0
- Optional Trusted Cryptographic Module (TCM), available only in China
- Lockable top cover to help prevent access to internal components
- Optional lockable front security bezel
- Self-encrypting drives with support for IBM Security Key Lifecycle Manager

The TCM module, available only for China customers, is installed in a dedicated socket on the system board, as shown in Figure 4.

The optional lockable front bezel is shown in the following figure and includes a key that enables you to secure the bezel over the drives and system controls thereby reducing the chance of unauthorized or accidental access to the server.
Figure 16. Lockable front security bezel

The dimensions of the security bezel are:

- Width: 437 mm (17.2 in.)
- Height: 87 mm (3.4 in.)
- Width: 23 mm (0.9 in.)

The following table lists the security options for the server.

Table 37. Security features

Part number	Feature code	Description
None*	AVKE	ThinkSystem Trusted Cryptographic Module (China customers only)
7Z17A02580	AURX	ThinkSystem 2U Security Bezel

* The Trusted Cryptographic Module (TCM) for China customers is not available as a field upgrade. The component is CTO on pre-configured models only.

For SED drives and IBM Security Key Lifecycle Manager support see the SED encryption key management with ISKLM section.

Rack installation

The following table lists the rack installation options that are available for the server.

Note: The SR860 is not supported shipped installed in a rack cabinet.

Table 38. Rack installation options

Option	Feature Code	Description
4M17A07273	AXFM	ThinkSystem Toolless Friction Rail

The following table summarizes the rail kit features and specifications.

Table 39. Rail kit features and specifications summary

Feature	ThinkSystem Toolless Friction Rail
Part number	4M17A07273
Rail type	Half-out slide (friction)
Toolless installation	Yes
Cable Management Arm (CMA) support	No
In-rack server maintenance	No
1U PDU support	Yes
0U PDU support	Limited**
Rack type	Lenovo and IBM 4-post, IEC standard-compliant
Mounting holes	Square or round
Mounting flange thickness	2 mm - 3.3 mm (0.08 - 0.13 in.)
Distance between front and rear mounting flanges	610 mm - 864 mm (24 - 34 in.)
Rail length***	728 mm (28.7 in.)

* For 0U PDU support, the rack must be at least 1100 mm (43.31 in.) deep without a CMA, or at least 1200 mm (47.24 in.) deep if a CMA is used.
** For 0U PDU support with the friction rail kit, the rack must be at least 1000 mm (39.37 in.) deep.
*** Measured when mounted on the rack, from the front surface of the front mounting flange to the rear most point of the rail.

Operating system support

The server supports the following operating systems:

- Microsoft Windows Server 2012 R2
- Microsoft Windows Server 2016
- SUSE Linux Enterprise Server 11 SP4
- SUSE Linux Enterprise Server 12 SP3
- Red Hat Enterprise Linux 6.9
- Red Hat Enterprise Linux 7.3
- VMware ESXi 6.0 U3
- VMware ESXi 6.5

For details about the specific versions and service levels supported and any other prerequisites, see the Operating System Interoperability Guide: https://lenovopress.com/osig#servers=sr860-7x69-7x70&support=all

For configure-to-order configurations, the server can be preloaded with VMware ESXi installed on M.2 cards. Ordering information is listed in the following table.

Table 40. VMware ESXi preload

Part number	Feature code	Description
CTO only	AXFT	VMware ESXi 6.5 (factory installed)
CTO only	AXFS	VMware ESXi 6.0 U3 (factory installed)

Physical and electrical specifications

Dimensions and weight:

- Height: 175 mm (6.9 in.)
- Width:
    - With rack handles: 482 mm (19.0 inches)
    - Without rack handles: 447 mm (17.6 inches)
- Depth: 766 mm (30.1 inches)
- Maximum weight: 39.8 kg (87.7 lb)

Electrical specifications:

- Electrical - Input voltage
    - 100 - 127 (nominal) V AC, 50 Hz or 60 Hz
    - 200 - 240 (nominal) V AC, 50 Hz or 60 Hz
    - 180 - 300 V DC (support is planned; China only)
- Inlet current:
    - 100-127 V:
        - 750W power supply: 8.4 A
        - 1100W power supply: 12 A
    - 200-240 V:
        - 750W power supply: 4.1 A
        - 1100W power supply: 6 A
        - 1600W power supply: 8.7 A
        - 2000W power supply: 11 A
- Power consumption (two power supplies):
    - 100-127 V:
        - 2x 750W power supplies: 0.9 kVA
        - 2x 1100W power supplies: 1.32 kVA
    - 200-240 V:
        - 2x 750W power supplies: 0.9 kVA
        - 2x 1100W power supplies: 1.32 kVA
        - 2x 1600W power supplies: 1.92 kVA
        - 2x 2000W power supplies:

Operating environment

The ThinkSystem SR860 server complies with ASHRAE Class A2 specifications, and depending on the hardware configuration, also complies with ASHRAE Class A3 and Class A4 specifications. System performance may be impacted when operating temperature is outside ASHRAE A2 specification.

To comply with ASHRAE class A3 and class A4 specifications, the server models must meet the following hardware configuration requirements:

- Two power supplies installed
- GPUs not installed
- NVMe drives not installed
- PCIe flash storage adapters not installed

In addition, CPU core speed may be reduced depending on the processor selected.

The SR860 is supported in the following environment:

- Air temperature:
    - Operating:
        - ASHARE Class A2: 10°C to 35°C (50°F to 95°F); the maximum ambient temperature decreases by 1°C for every 300 m (984 ft) increase in altitude above 900 m (2,953 ft).
        - ASHARE Class A3: 5°C to 40°C (41°F to 104°F); the maximum ambient temperature decreases by 1°C for every 175 m (574 ft) increase in altitude above 900 m (2,953 ft).
        - ASHARE Class A4: 5°C to 45°C (41°F to 113°F); the maximum ambient temperature decreases by 1°C for every 125 m (410 ft) increase in altitude above 900 m (2,953 ft).
    - Server off: 5°C to 45°C (41°F to 113°F)
    - Shipment/storage: -40°C to 60°C (-40°F to 140°F)
- Maximum altitude: 3,050 m (10,000 ft)
- Relative Humidity (non-condensing):
    - Operating
        - ASHRAE Class A2: 8% to 80%; maximum dew point: 21°C (70°F)
        - ASHRAE Class A3: 8% to 85%; maximum dew point: 24°C (75°F)
        - ASHRAE Class A4: 8% to 90%; maximum dew point: 24°C (75°F)
    - Shipment/storage: 8% to 90%

The server generates the following heat and noise:

- Heat/thermal output:
    - Minimum configuration: 579 BTU, 169 W (in BTU per hour and watts)
    - Maximum configuration: 5320 BTU, 1559 W (in BTU per hour and watts)
- Noise level (LWAm)
    - Sound power levels, idle: 5.8 bels (minimum), 6.4 bels (typical), 6.6 bels (maximum)
    - Sound power levels, operating: 6.8 bels (minimum), 7.0 bels (typical), 7.2 bels (maximum)

The server has the following vibration and shock limits:

- Vibration:
    - Operating: 0.21 G rms at 5 Hz to 500 Hz for 15 minutes across 3 axes
    - Non-operating: 1.04 G rms at 2 Hz to 200 Hz for 15 minutes across 6 surfaces
- Shock:
    - Operating: 15 G for 3 milliseconds in each direction (positive and negative X, Y, and Z axes)
    - Non-operating:
        - 12-22 kg: 50 G for 152 in./sec velocity change across 6 surfaces
        - 23-31 kg: 35 G for 152 in./sec velocity change across 6 surfaces
        - Over 31 kg: Square wave 35G, deltaV=136 in./sec

Warranty

The SR860 has a 1-year or 3-year warranty based on the machine type of the system:

- 7X69: 3 year warranty
- 7X70: 1 year warranty

The standard warranty terms are customer-replaceable unit (CRU) and onsite (for field-replaceable units, FRUs, only) with standard call center support during normal business hours and 9x5 Next Business Day Parts Delivered.

Also available are Lenovo Services warranty maintenance upgrades and post-warranty maintenance agreements, with a predefined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

Lenovo warranty service upgrade offerings are country-specific. Not all warranty service upgrades are available in every country. For more information about Lenovo warranty service upgrade offerings that are available in your country, go to the Data Center Advisor and Configurator (formerly known as LESC) website http://lesc.lenovo.com, then do the following:

1. In the Customize a Model box in the middle of the page, select the **Services** option in the Customization Option dropdown menu
2. Enter the machine type & model of the system
3. From the search results, you can click either **Deployment Services** or **Support Services** to view the offerings

The following table explains warranty service definitions in more detail.

Table 41. Warranty service definitions

Term	Description
Onsite Service	If a problem with your product cannot be resolved via telephone, a Service Technician will be dispatched to arrive at your location.
Parts Delivered	If a problem with your product cannot be resolved via telephone and a CRU part is required, Lenovo will send a replacement CRU to arrive at your location. If a problem with your product cannot be resolved via telephone and a FRU part is required, a Service Technician will be dispatched to arrive at your location.
Technician Installed Parts	If a problem with your product cannot be resolved via telephone, a Service Technician will be dispatched to arrive at your location.
Hours of coverage	9x5: 9 hours/day, 5 days/week, during normal business hours, excluding local public & national holidays 24x7: 24 hours per day, 7 days per week, 365 days per year.
Response time target	2 hours, 4 hours, or Next Business Day: The time period from when the telephone based troubleshooting is completed and logged, to the delivery of the CRU or arrival of a Service Technician and part at the Customer's location for repair.
Committed Repair	6 hours: The time period between the service request registration in Lenovo's call management system and the restoration of the product to conformance with its specification by a Service Technician.

The following Lenovo warranty service upgrades are available:

- Warranty and maintenance service upgrades:

    - Three, four, or five years of 9x5 or 24x7 service coverage
    - Parts delivered or technician installed parts from next business day to 4 or 2 hours
    - Committed repair service
    - Warranty extension of up to 5 years
    - Post warranty extensions

- Committed Repair Service

    Committed Repair Services enhances the level of Warranty Service Upgrade or Post Warranty/Maintenance Service offering associated with the selected systems. Offerings vary and are available in select countries.

    - Priority handling to meet defined time frames to restore the failing machine to good working condition
    - 24x7x6 committed repair: Service performed 24 hours per day, 7 days per week, within 6 hours

- YourDrive YourData

    Lenovo's YourDrive YourData service is a multi-drive retention offering that ensures your data is always under your control, regardless of the number of drives that are installed in your Lenovo server. In the unlikely event of a drive failure, you retain possession of your drive while Lenovo replaces the failed drive part. Your data stays safely on your premises, in your hands. The YourDrive YourData service can be purchased in convenient bundles with Lenovo warranty upgrades and extensions.

- Microcode Support

    Keeping microcode current helps prevent hardware failures and security exposure. There are two levels of service: analysis of the installed base and analysis and update where required. Offerings vary by country and can be bundled with other warranty upgrades and extensions.

- Enterprise Software Support

    Lenovo Enterprise Server Software Support can help you troubleshoot your entire server software stack. Choose support for server operating systems from Microsoft, Red Hat, SUSE, and VMware; Microsoft server applications; or both operating systems and applications. Support staff can help answer troubleshooting and diagnostic questions, address product compatibility and interoperability issues, isolate causes of problems, report defects to software vendors, and more.

    In addition, you can access hardware "how to" support for ThinkSystem servers. Staff can help resolve hardware problems not covered under warranty, refer you to the right documentation and publications, provide corrective service information for known defects, and transfer you to a hardware support call center if needed.

- Hardware Installation Services

    Lenovo experts can seamlessly manage the physical installation of your server, storage, or networking hardware. Working at a time convenient for you (business hours or off shift), the technician will unpack and inspect the systems on your site, install options, mount in a rack cabinet, connect to power and network, check and update firmware to the latest levels, verify operation, and dispose of the packaging, allowing your team to focus on other priorities. Your new systems will be configured and ready for your software installation.

Regulatory compliance

The SR860 server conforms to the following standards:

- Energy Star v2.1
- IEC 60950-1
- IEC 60950-1 (CB Certificate and CB Test Report)
- China CCC (GB4943.1), GB9254 Class A, GB17625.1
- Russia, Belorussia and Kazakhstan, EAC: TP TC 004/2011(for Safety); TP TC 020/2011(for EMC)
- CE Mark (EN55032 Class A, EN60950-1, EN55024, EN61000-3-2, and EN61000-3-3)
- CISPR 32, Class A
- TUV-GS (EN60950-1 /IEC60950-1, EK1-ITB2000)
- ErP lot3
- FCC (US; Canada)
- cULus cert

External drive enclosures

The server supports attachment to external drive enclosures using a RAID controller with external ports or a SAS host bus adapter. Adapters supported by the server are listed in the SAS adapters for external storage section.

The following table lists the 6 Gbps SAS external drive enclosures that are offered by Lenovo that can be used with the server for storage expansion.

Table 42. E1012 and E1024 external drive enclosure models

Part number	Description
64111B1	Lenovo Storage E1012 LFF Disk Expansion Single SAS IO Module, Rail Kit, 9x5 NBD
64111B2	Lenovo Storage E1012 LFF Disk Expansion Dual SAS IO Module, Rail Kit, 9x5 NBD
64111B3	Lenovo Storage E1024 SFF Disk Expansion Single SAS IO Module, Rail Kit, 9x5 NBD
64111B4	Lenovo Storage E1024 SFF Disk Expansion Dual SAS IO Module, Rail Kit, 9x5 NBD

For details about supported drives and cables for the Lenovo Storage E1012 and E1024, see the Lenovo Press Product Guide:
http://lenovopress.com/lp0043

The following table lists the standard models of the 12 Gbps SAS external drive enclosures offered by Lenovo that can be used with the server for storage expansion.

Table 43. D1212 and D1224 standard models

Part number	Description
LFF models	
4587A11*	D1212 LFF Chassis, Dual 3-port ESMs (US English documentation)
4587A1C^	D1212 LFF Chassis, Dual 3-port ESMs (Simplified Chinese documentation)

Brazil and Latin America - SFF models	
4587E6U	D1224 SFF Chassis, Dual 3-port ESMs, 9x 1.2TB 10K HDDs, 4x 0.5m SAS cables
4587E2U	D1224 SFF Chassis, Dual 3-port ESMs, 9x 1.2TB 10K HDDs, 2x 400GB SSDs, 4x 0.5m SAS cables
4587E4U	D1224 SFF Chassis, Dual 3-port ESMs, 9x 1.2TB 10K HDDs, 4x 400GB SSDs, 4x 0.5m SAS cables
4587E5U	D1224 SFF Chassis, Dual 3-port ESMs, 18x 1.2TB 10K HDDs, 1x 0.5m SAS cable
4587E1U	D1224 SFF Chassis, Dual 3-port ESMs, 18x 1.2TB 10K HDDs, 2x 400GB SSDs, 4x 0.5m SAS cables
4587E3U	D1224 SFF Chassis, Dual 3-port ESMs, 18x 1.2TB 10K HDDs, 4x 400GB SSDs, 4x 0.5m SAS cables

For details about supported drives and cables for the Lenovo Storage D1212 and D1224, see the Lenovo Press Product Guide:
http://lenovopress.com/lp0512

The following table lists the standard models of the 12 Gbps SAS external high density drive enclosures offered by Lenovo.

Table 45. D3284 standard models

Description	Part number
Lenovo Storage D3284 4TB x 84 HD Expansion Enclosure	641311F
Lenovo Storage D3284 6TB x 84 HD Expansion Enclosure	641312F
Lenovo Storage D3284 8TB x 84 HD Expansion Enclosure	641313F
Lenovo Storage D3284 10TB x 84 HD Expansion Enclosure	641314F

The following table lists the TopSeller models of the 12 Gbps SAS external high density drive enclosures offered by Lenovo.

Table 46. D3284 TopSeller models

Description	Part number
Lenovo Storage D3284 High Density Expansion Enclosure	6413E5F
Lenovo Storage D3284 4TB x 42 HD Expansion Enclosure	6413E1H
Lenovo Storage D3284 4TB x 84 HD Expansion Enclosure	6413E1F
Lenovo Storage D3284 6TB x 42 HD Expansion Enclosure	6413E2H
Lenovo Storage D3284 6TB x 84 HD Expansion Enclosure	6413E2F
Lenovo Storage D3284 8TB x 42 HD Expansion Enclosure	6413E3H
Lenovo Storage D3284 8TB x 84 HD Expansion Enclosure	6413E3F
Lenovo Storage D3284 10TB x 42 HD Expansion Enclosure	6413E4H
Lenovo Storage D3284 10TB x 84 HD Expansion Enclosure	6413E4F

For details about supported drives, adapters, and cables for the Lenovo Storage D3284, see the Lenovo Press Product Guide:
http://lenovopress.com/lp0513

External storage systems

The following table lists the NAS and SAN external storage systems that are offered by Lenovo.

Table 47. External storage systems

Part number	Description
Lenovo ThinkSystem DS Series Storage (SAS host connectivity)	
4599A41*	Lenovo ThinkSystem DS2200 LFF SAS Dual Controller Unit (US English documentation)
4599A4C^	Lenovo ThinkSystem DS2200 LFF SAS Dual Controller Unit (Simplified Chinese documentation)
4599A4J**	Lenovo ThinkSystem DS2200 LFF SAS Dual Controller Unit (Japanese documentation)
4599A21*	Lenovo ThinkSystem DS2200 SFF SAS Dual Controller Unit (US English documentation)
4599A2C^	Lenovo ThinkSystem DS2200 SFF SAS Dual Controller Unit (Simplified Chinese documentation)
4599A2J**	Lenovo ThinkSystem DS2200 SFF SAS Dual Controller Unit (Japanese documentation)

Part number	Description
4617A41*	Lenovo ThinkSystem DS4200 LFF SAS Dual Controller Unit (US English documentation)
4617A4C^	Lenovo ThinkSystem DS4200 LFF SAS Dual Controller Unit (Simplified Chinese documentation)
4617A4J**	Lenovo ThinkSystem DS4200 LFF SAS Dual Controller Unit (Japanese documentation)
4617A21*	Lenovo ThinkSystem DS4200 SFF SAS Dual Controller Unit (US English documentation)
4617A2C^	Lenovo ThinkSystem DS4200 SFF SAS Dual Controller Unit (Simplified Chinese documentation)
4617A2J**	Lenovo ThinkSystem DS4200 SFF SAS Dual Controller Unit (Japanese documentation)
4619A21*	Lenovo ThinkSystem DS6200 SFF SAS Dual Controller Unit (US English documentation)
4619A2C^	Lenovo ThinkSystem DS6200 SFF SAS Dual Controller Unit (Simplified Chinese documentation)
4619A2J**	Lenovo ThinkSystem DS6200 SFF SAS Dual Controller Unit (Japanese documentation)
Lenovo ThinkSystem DS Series Storage (iSCSI or FC host connectivity)	
4599A31*	Lenovo ThinkSystem DS2200 LFF FC/iSCSI Dual Controller Unit (US English documentation)
4599A3C^	Lenovo ThinkSystem DS2200 LFF FC/iSCSI Dual Controller Unit (Simplified Chinese documentation)
4599A3J**	Lenovo ThinkSystem DS2200 LFF FC/iSCSI Dual Controller Unit (Japanese documentation)
4599A11*	Lenovo ThinkSystem DS2200 SFF FC/iSCSI Dual Controller Unit (US English documentation)
4599A1C^	Lenovo ThinkSystem DS2200 SFF FC/iSCSI Dual Controller Unit (Simplified Chinese documentation)
4599A1J**	Lenovo ThinkSystem DS2200 SFF FC/iSCSI Dual Controller Unit (Japanese documentation)
4617A31*	Lenovo ThinkSystem DS4200 LFF FC/iSCSI Dual Controller Unit (US English documentation)
4617A3C^	Lenovo ThinkSystem DS4200 LFF FC/iSCSI Dual Controller Unit (Simplified Chinese documentation)
4617A3J**	Lenovo ThinkSystem DS4200 LFF FC/iSCSI Dual Controller Unit (Japanese documentation)
4617A11*	Lenovo ThinkSystem DS4200 SFF FC/iSCSI Dual Controller Unit (US English documentation)
4617A1C^	Lenovo ThinkSystem DS4200 SFF FC/iSCSI Dual Controller Unit (Simplified Chinese documentation)
4617A1J**	Lenovo ThinkSystem DS4200 SFF FC/iSCSI Dual Controller Unit (Japanese documentation)
4619A11*	Lenovo ThinkSystem DS6200 SFF FC/iSCSI Dual Controller Unit (US English documentation)
4619A1C^	Lenovo ThinkSystem DS6200 SFF FC/iSCSI Dual Controller Unit (Simplified Chinese documentation)
Lenovo Storage V Series (iSCSI, FC, or FCoE host connectivity)	
6535C1D	Lenovo Storage V3700 V2 LFF Control Enclosure
6535EC1	Lenovo Storage V3700 V2 LFF Control Enclosure (TopSeller)
6535C2D	Lenovo Storage V3700 V2 SFF Control Enclosure
6535EC2	Lenovo Storage V3700 V2 SFF Control Enclosure (TopSeller)
6535C3D	Lenovo Storage V3700 V2 XP LFF Control Enclosure
6535EC3	Lenovo Storage V3700 V2 XP LFF Control Enclosure (TopSeller)
6535C4D	Lenovo Storage V3700 V2 XP SFF Control Enclosure
6535EC4	Lenovo Storage V3700 V2 XP SFF Control Enclosure (TopSeller)
6536C12	Lenovo Storage V5030 LFF Control Enclosure 3Yr S&S
6536C32	Lenovo Storage V5030 LFF Control Enclosure 5Yr S&S
6536C22	Lenovo Storage V5030 SFF Control Enclosure 3Yr S&S
6536C42	Lenovo Storage V5030 SFF Control Enclosure 5Yr S&S

Part number	Description
6536B1F	Lenovo Storage V5030F SFF Control Enclosure 3Yr S&S
6536B2F	Lenovo Storage V5030F SFF Control Enclosure 5Yr S&S
IBM Storwize for Lenovo (iSCSI, FC, or FCoE host connectivity)	
6096CU2^	IBM Storwize V3500 3.5-inch Dual Control Storage Controller Unit
6096CU3^	IBM Storwize V3500 2.5-inch Dual Control Storage Controller Unit
6099L2C	IBM Storwize V3700 3.5-inch Storage Controller Unit
6099S2C	IBM Storwize V3700 2.5-inch Storage Controller Unit
6195SC5†	IBM Storwize V7000 2.5-inch Storage Controller Unit, w/3 Yr S&S (Model 524)
6195SCL‡	IBM Storwize V7000 2.5-inch Storage Controller Unit, w/3 Yr S&S (LA) (Model 524)
61951F1†	IBM Storwize V7000 2.5-inch Storage Controller Unit, w/5 Yr S&S (Model 524)
61951FL‡	IBM Storwize V7000 2.5-inch Storage Controller Unit, w/5 Yr S&S (LA) (Model 524)
6195C32†	IBM Storwize V7000 SFF Control Enclosure, 3YR SWMA (Model HC1 [Gen2+])
6195C3L‡	IBM Storwize V7000 SFF Control Enclosure, 3YR SWMA, LA (Model HC1 [Gen2+])
6195C52†	IBM Storwize V7000 SFF Control Enclosure, 5YR SWMA (Model HC1 [Gen2+])
6195C5L‡	IBM Storwize V7000 SFF Control Enclosure, 5YR SWMA, LA (Model HC1 [Gen2+])
Lenovo Storage DX8200 Series (S3 cloud storage)	
5120D1x	Lenovo Storage DX8200C 56TB (14x 4TB HDDs) with Cloudian HyperStore - 3yr HW/SW S&S
5120D2x	Lenovo Storage DX8200C 84TB (14x 6TB HDDs) with Cloudian HyperStore - 3yr HW/SW S&S
5120D3x	Lenovo Storage DX8200C 112TB (14x 8TB HDDs) with Cloudian HyperStore - 3yr HW/SW S&S
5120D4x	Lenovo Storage DX8200C 140TB (14x 10TB HDDs) with Cloudian HyperStore - 3yr HW/SW S&S
51205Dx	Lenovo Storage DX8200C 168TB (14x 12TB HDDs) with Cloudian HyperStore - 3yr HW/SW S&S
Lenovo Storage DX8200 Series (NAS, iSCSI connectivity; optional FC connectivity)	
5135A3x	Lenovo Storage DX8200D Storage Virtualization Entry, 4TB, 3yr SW S&S
5135J3x	Lenovo Storage DX8200D Storage Virtualization Entry, 4TB, 4yr SW S&S
51351Wx	Lenovo Storage DX8200D Storage Virtualization Entry, 4TB, 5yr SW S&S
5135B3x	Lenovo Storage DX8200D Storage Virtualization Mid, 16TB, 3yr SW S&S
5135L3x	Lenovo Storage DX8200D Storage Virtualization Mid, 16TB, 4yr SW S&S
51352Wx	Lenovo Storage DX8200D Storage Virtualization Mid, 16TB, 5yr SW S&S
5135C3x	Lenovo Storage DX8200D Storage Virtualization High, 64TB, 3yr SW S&S
5135M3x	Lenovo Storage DX8200D Storage Virtualization High, 64TB, 4yr SW S&S
51353Wx	Lenovo Storage DX8200D Storage Virtualization High, 64TB, 5yr SW S&S
5135D3x	Lenovo Storage DX8200D ServerSAN Entry, 8TB, 3yr SW S&S
5135N3x	Lenovo Storage DX8200D ServerSAN Entry, 8TB, 4yr SW S&S
51354Wx	Lenovo Storage DX8200D ServerSAN Entry, 8TB, 5yr SW S&S
5135F3x	Lenovo Storage DX8200D ServerSAN Mid, 16TB, 3yr SW S&S
5135P3x	Lenovo Storage DX8200D ServerSAN Mid, 16TB, 4yr SW S&S
51355Wx	Lenovo Storage DX8200D ServerSAN Mid, 16TB, 5yr SW S&S
5135G3x	Lenovo Storage DX8200D ServerSAN High, 32TB, 3yr SW S&S
5135Q3x	Lenovo Storage DX8200D ServerSAN High, 32TB, 4yr SW S&S
51356Wx	Lenovo Storage DX8200D ServerSAN High, 32TB, 5yr SW S&S
5128C1x	Lenovo Storage DX8200N with 1x N2226 HBA

Part number	Description
5128C2x	Lenovo Storage DX8200N with 2x N2226 HBAs

* Available worldwide (except China and Japan).
^ Available only in China.
** Available only in Japan.
† Available worldwide except Latin America.
‡ Available only in Latin America.

Top-of-rack Ethernet switches

The following table lists the Ethernet LAN switches that are offered by Lenovo.

Table 48. Ethernet LAN switches

Part number	Description
1 Gb Ethernet switches	
7165H1X	Juniper EX2300-C PoE Switch
7165H2X	Juniper EX2300-24p PoE Switch
7159BAX	Lenovo RackSwitch G7028 (Rear to Front)
7159CAX	Lenovo RackSwitch G7052 (Rear to Front)
7159G52	Lenovo RackSwitch G8052 (Rear to Front)
10 Gb Ethernet switches	
7159A1X	Lenovo ThinkSystem NE1032 RackSwitch (Rear to Front)
7159B1X	Lenovo ThinkSystem NE1032T RackSwitch (Rear to Front)
7159C1X	Lenovo ThinkSystem NE1072T RackSwitch (Rear to Front)
7159BR6	Lenovo RackSwitch G8124E (Rear to Front)
7159G64	Lenovo RackSwitch G8264 (Rear to Front)
7159DRX	Lenovo RackSwitch G8264CS (Rear to Front)
7159CRW	Lenovo RackSwitch G8272 (Rear to Front)
7159GR6	Lenovo RackSwitch G8296 (Rear to Front)
25 Gb Ethernet switches	
7159E1X	Lenovo ThinkSystem NE2572 RackSwitch (Rear to Front)
40 Gb Ethernet switches	
7159BRX	Lenovo RackSwitch G8332 (Rear to Front)
100 Gb Ethernet switches	
7159D1X	Lenovo ThinkSystem NE10032 RackSwitch (Rear to Front)

For more information, see the list of Product Guides in the following switch categories:

- 1 Gb Ethernet switches: http://lenovopress.com/networking/tor/1gb?rt=product-guide
- 10 Gb Ethernet switches: http://lenovopress.com/networking/tor/10gb?rt=product-guide

- 40 Gb Ethernet switches: http://lenovopress.com/networking/tor/40gb?rt=product-guide
- 100 Gb Ethernet switches: https://lenovopress.com/networking/tor/100Gb?rt=product-guide

Fibre Channel SAN switches

The following table lists the Fibre Channel SAN switches that are offered by Lenovo and can be used with this system.

Table 49. Fibre Channel SAN switches

Part number	Description
8 Gb FC	
3873AR3	Lenovo B300, 8 ports activated, 8x 8Gb SWL SFPs, 1 PS, Rail Kit
3873AR4	Lenovo B6505, 12 ports activated, 12x 8Gb SWL SFPs, 1 PS, Rail Kit
3873BR2	Lenovo B6510, 24 ports activated, 24x 8Gb SWL SFPs, 2 PS, Rail Kit
16 Gb FC	
6559D2Y	Lenovo ThinkSystem DB610S, 8 ports activated, 8x 16Gb SWL SFPs, 1 PS, Rail Kit
6559D1Y	Lenovo ThinkSystem DB610S, 24 ports activated, 24x 16Gb SWL SFP, Enterprise SW, 1 PS, Rail Kit
3873AR5	Lenovo B6505, 12 ports activated w/ 16Gb SWL SFPs, 1 PS, Rail Kit
3873BR3	Lenovo B6510, 24 ports activated w/ 16Gb SWL SFPs, 2 PS, Rail Kit
32 Gb FC	
6559D3Y	Lenovo ThinkSystem DB610S, 8 ports activated, 1 PS, Rail Kit
6415G11	Lenovo ThinkSystem DB620S, 24 Ports Activated, 24x 32Gb SWL SFPs, 2 PS, Rail Kit
6415G2A	Lenovo ThinkSystem DB620S, 48 Ports Activated, 48x 32Gb SWL SFPs, 2 PS, Rail Kit
6684B2A	Lenovo ThinkSystem DB400D 32Gb FC Director, up to 192 ports, 8U, Enterprise SW
6682B1A	Lenovo ThinkSystem DB800D 32Gb FC Director, up to 384 ports, 14U, Enterprise SW

For more information, see the list of Product Guides in the Rack SAN Switches category:
http://lenovopress.com/storage/switches/rack?rt=product-guide

Uninterruptible power supply units

The following table lists the uninterruptible power supply (UPS) units that are offered by Lenovo.

Table 50. Uninterruptible power supply units

Part number	Description
55941AX	RT1.5kVA 2U Rack or Tower UPS (100-125VAC)
55941KX	RT1.5kVA 2U Rack or Tower UPS (200-240VAC)
55942AX	RT2.2kVA 2U Rack or Tower UPS (100-125VAC)
55942KX	RT2.2kVA 2U Rack or Tower UPS (200-240VAC)
55943AX	RT3kVA 2U Rack or Tower UPS (100-125VAC)
55943KX	RT3kVA 2U Rack or Tower UPS (200-240VAC)
55945KX	RT5kVA 3U Rack or Tower UPS (200-240VAC)
55946KX	RT6kVA 3U Rack or Tower UPS (200-240VAC)
55948KX	RT8kVA 6U Rack or Tower UPS (200-240VAC)
55949KX	RT11kVA 6U Rack or Tower UPS (200-240VAC)
55948PX	RT8kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)
55949PX	RT11kVA 6U 3:1 Phase Rack or Tower UPS (380-415VAC)

For more information, see the list of Product Guides in the UPS category:
https://lenovopress.com/servers/options/ups

Power distribution units

The following table lists the power distribution units (PDUs) that are offered by Lenovo.

Table 51. Power distribution units

Part number	Description
0U Basic PDUs	
00YJ776	0U 36 C13/6 C19 24A/200-240V 1 Phase PDU with NEMA L6-30P line cord
00YJ777	0U 36 C13/6 C19 32A/200-240V 1 Phase PDU with IEC60309 332P6 line cord
00YJ778	0U 21 C13/12 C19 32A/200-240V/346-415V 3 Phase PDU with IEC60309 532P6 line cord
00YJ779	0U 21 C13/12 C19 48A/200-240V 3 Phase PDU with IEC60309 460P9 line cord
Switched and Monitored PDUs	
00YJ780	0U 20 C13/4 C19 Switched and Monitored 32A/200-240V/1Ph PDU w/ IEC60309 332P6 line cord
00YJ781	0U 20 C13/4 C19 Switched and Monitored 24A/200-240V/1Ph PDU w/ NEMA L6-30P line cord
00YJ782	0U 18 C13/6 C19 Switched / Monitored 32A/200-240V/346-415V/3Ph PDU w/ IEC60309 532P6 cord
00YJ783	0U 12 C13/12 C19 Switched and Monitored 48A/200-240V/3Ph PDU w/ IEC60309 460P9 line cord
46M4002	1U 9 C19/3 C13 Switched and Monitored DPI PDU (without line cord)
46M4003	1U 9 C19/3 C13 Switched and Monitored 60A 3 Phase PDU with IEC 309 3P+Gnd line cord
46M4004	1U 12 C13 Switched and Monitored DPI PDU (without line cord)
46M4005	1U 12 C13 Switched and Monitored 60A 3 Phase PDU with IEC 309 3P+Gnd line cord
Ultra Density Enterprise PDUs (9x IEC 320 C13 + 3x IEC 320 C19 outlets)	
71762NX	Ultra Density Enterprise C19/C13 PDU Module (without line cord)
71763NU	Ultra Density Enterprise C19/C13 PDU 60A/208V/3ph with IEC 309 3P+Gnd line cord
C13 Enterprise PDUs (12x IEC 320 C13 outlets)	
39M2816	DPI C13 Enterprise PDU+ (without line cord)
39Y8941	DPI Single Phase C13 Enterprise PDU (without line cord)
C19 Enterprise PDUs (6x IEC 320 C19 outlets)	
39Y8948	DPI Single Phase C19 Enterprise PDU (without line cord)
39Y8923	DPI 60A 3 Phase C19 Enterprise PDU with IEC 309 3P+G (208 V) fixed line cord
Front-end PDUs (3x IEC 320 C19 outlets)	
39Y8938	DPI 30amp/125V Front-end PDU with NEMA L5-30P line cord
39Y8939	DPI 30amp/250V Front-end PDU with NEMA L6-30P line cord
39Y8934	DPI 32amp/250V Front-end PDU with IEC 309 2P+Gnd line cord
39Y8940	DPI 60amp/250V Front-end PDU with IEC 309 2P+Gnd line cord
39Y8935	DPI 63amp/250V Front-end PDU with IEC 309 2P+Gnd line cord
NEMA PDUs (6x NEMA 5-15R outlets)	
39Y8905	DPI 100-127V PDU with Fixed NEMA L5-15P line cord
Line cords for PDUs that ship without a line cord	
40K9611	DPI 32a Line Cord (IEC 309 3P+N+G)
40K9612	DPI 32a Line Cord (IEC 309 P+N+G)
40K9613	DPI 63a Cord (IEC 309 P+N+G)
40K9614	DPI 30a Line Cord (NEMA L6-30P)

Part number	Description
40K9615	DPI 60a Cord (IEC 309 2P+G)
40K9617	DPI Australian/NZ 3112 Line Cord
40K9618	DPI Korean 8305 Line Cord

For more information, see the Lenovo Press documents in the PDU category:
https://lenovopress.com/servers/options/pdu

Rack cabinets

The following table lists the supported rack cabinets.

Table 52. Rack cabinets

Part number	Description
93072RX	25U Standard Rack
93072PX	25U Static S2 Standard Rack
93634PX	42U 1100mm Dynamic Rack
93634EX	42U 1100mm Dynamic Expansion Rack
93604PX	42U 1200mm Deep Dynamic Rack
93614PX	42U 1200mm Deep Static Rack
93084EX	42U Enterprise Expansion Rack
93084PX	42U Enterprise Rack
93074RX	42U Standard Rack
Withdrawn rack cabinets	
201886X*	11U Office Enablement Kit
93604EX*	42U 1200mm Deep Dynamic Expansion Rack
93614EX*	42U 1200mm Deep Static Expansion Rack
93074XX*	42U Standard Rack Extension
93624PX*	47U 1200mm Deep Static Rack
93624EX*	47U 1200mm Deep Static Expansion Rack
93634BX*	PureFlex System 42U Expansion Rack
93634DX*	PureFlex System 42U Expansion Rack
93634AX*	PureFlex System 42U Rack
93634CX*	PureFlex System 42U Rack

* Withdrawn from marketing

For specifications about these racks, see the Lenovo Rack Cabinet Reference, available from:
https://lenovopress.com/lp0658-lenovo-rack-cabinet-reference

For more information, see the list of Product Guides in the Rack cabinets category:
https://lenovopress.com/servers/options/racks

KVM console options

The following table lists the supported KVM consoles, keyboards, and KVM switches.

Table 53. Console keyboards

Part number	Description
Consoles	
17238BX	1U 18.5" Standard Console (without keyboard)
Console keyboards	
7ZB7A05469	ThinkSystem Keyboard w/ Int. Pointing Device USB - Arabic 253 RoHS v2
7ZB7A05468	ThinkSystem Keyboard w/ Int. Pointing Device USB - Belg/UK 120 RoHS v2
7ZB7A05206	ThinkSystem Keyboard w/ Int. Pointing Device USB - Czech 489 RoHS v2
7ZB7A05207	ThinkSystem Keyboard w/ Int. Pointing Device USB - Danish 159 RoHS v2
7ZB7A05208	ThinkSystem Keyboard w/ Int. Pointing Device USB - Dutch 143 RoHS v2
7ZB7A05210	ThinkSystem Keyboard w/ Int. Pointing Device USB - Fr/Canada 445 RoHS v2
7ZB7A05209	ThinkSystem Keyboard w/ Int. Pointing Device USB - French 189 RoHS v2
7ZB7A05211	ThinkSystem Keyboard w/ Int. Pointing Device USB - German 129 RoHS v2
7ZB7A05212	ThinkSystem Keyboard w/ Int. Pointing Device USB - Greek 219 RoHS v2
7ZB7A05213	ThinkSystem Keyboard w/ Int. Pointing Device USB - Hebrew 212 RoHS v2
7ZB7A05214	ThinkSystem Keyboard w/ Int. Pointing Device USB - Hungarian 208 RoHS v2
7ZB7A05215	ThinkSystem Keyboard w/ Int. Pointing Device USB - Italian 141 RoHS v2
7ZB7A05216	ThinkSystem Keyboard w/ Int. Pointing Device USB - Japanese 194 RoHS v2

Lenovo Financial Services

Lenovo Financial Services reinforces Lenovo's commitment to deliver pioneering products and services that are recognized for their quality, excellence, and trustworthiness. Lenovo Financial Services offers financing solutions and services that complement your technology solution anywhere in the world.

We are dedicated to delivering a positive finance experience for customers like you who want to maximize your purchase power by obtaining the technology you need today, protect against technology obsolescence, and preserve your capital for other uses.

We work with businesses, non-profit organizations, governments and educational institutions to finance their entire technology solution. We focus on making it easy to do business with us. Our highly experienced team of finance professionals operates in a work culture that emphasizes the importance of providing outstanding customer service. Our systems, processes and flexible policies support our goal of providing customers with a positive experience.

We finance your entire solution. Unlike others, we allow you to bundle everything you need from hardware and software to service contracts, installation costs, training fees, and sales tax. If you decide weeks or months later to add to your solution, we can consolidate everything into a single invoice.

Our Premier Client services provide large accounts with special handling services to ensure these complex transactions are serviced properly. As a premier client, you have a dedicated finance specialist who manages your account through its life, from first invoice through asset return or purchase. This specialist develops an in-depth understanding of your invoice and payment requirements. For you, this dedication provides a high-quality, easy, and positive financing experience.

For your region specific offers please ask your Lenovo sales representative or your technology provider about the use of Lenovo Financial Services. For more information, see the following Lenovo website:
