**Doc Type:** Working Group Document  
**Title:** Final proposal for encoding the Tangut script in the SMP of the UCS  
**Source:** China, Ireland, and UK  
**Status:** National Body Contribution  
**Action:** For consideration by JTC1/SC2/WG2 and UTC  
**Replaces:** N3577  
**Date:** 2010-04-05

---

## 1. Summary

This document is a revised proposal to encode a set of Tangut characters in the SMP of the UCS. The proposal is the result of collaboration between experts from China, France, Ireland, Russia, UK and USA, and represents a consensus of opinion. The current document proposes the encoding of a set of 6,054 Tangut characters based on a single, authoritative source, Lǐ Fànwén's 2008 *Tangut-Chinese Dictionary* (*Xià-Hàn Zìdiàn* 夏漢字典), as well as a single Tangut iteration mark. The 6,054 characters represent all the distinct characters used as head entries in Lǐ Fànwén's dictionary, including significant character variants.

These 6,055 characters are proposed for encoding in a main Tangut block, and there will be a future proposal to encode a smaller set of characters and character variants attested in other sources (estimated to be about 300 characters) in a supplementary Tangut block. A revised proposal to encode a set of Tangut radicals and components (see N3495) will also be made at a later date.

## 2. Introduction

Tangut is a logographic script that was used to write the Tangut language, an extinct member of the Tibeto-Burman language family that was spoken in northwestern China by the Tangut people (known as the Dǎngxiàng 黨項 in Chinese, and as the Mi-nyag མི་ཉག in Tibetan). The script was devised in about 1036, under the supervision of Lǐ Yuánhào 李元昊, the first emperor of the Western Xia 西夏 state (1038–1227). After the fall of the Western Xia to the Mongols, the script continued to be used through the Yuan dynasty (1271–1368) and into the early Ming dynasty (1368–1644), with the latest examples of the script dating to the late 15th century and early 16th century. During the Ming dynasty Tangut national identity and culture disintegrated, and remaining Tangut populations either became assimilated into the surrounding Chinese or Mongolian populations or else migrated to the region of Tibet. By the end of the Ming dynasty the Tangut script was long obsolete.

The script was widely used over a period of several hundred years for official, private and religious purposes, and a huge corpus of material written in the Tangut script is still extant, including thousands of complete and fragmentary examples of printed books and sutras, manuscript texts, and monumental inscriptions.

**Fig.1: Chrysographic Edition of the Lotus Sutra**

When the Tangut script was rediscovered in the late 19th century it was completely unintelligible, and it was largely through the efforts of the Russian scholar N. A. Nevskij (1892–1937) that scholars are now able to read the script at all. The script has now been almost completely deciphered, although there are still many phonological and grammatical issues that remain. The decipherment of Tangut was greatly aided by the discovery during the early 20th century of a number of contemporary Tangut phonological texts, including an incomplete monoglot Tangut rhyming dictionary, the *Sea of Characters* (Chinese *Wén Hǎi* 文海).

The study of the Tangut language is now a well-established discipline, with scholars from China, Japan, Russia and many other countries publishing books and monographs on Tangut language and culture that quote extracts of Tangut text in the original script or which discuss individual Tangut characters. Over the last fifty years a number of important dictionaries and linguistic works have been published, including Tangut–Chinese, Tangut–Japanese, Tangut–Russian and

Tangut–English dictionaries. More recently, with the advent of the internet, several linguistic bloggers have been attempting to represent Tangut characters and text on the web.

**Fig.2: Fragment of a Memorial Stone from the Western Xia Royal Tombs**

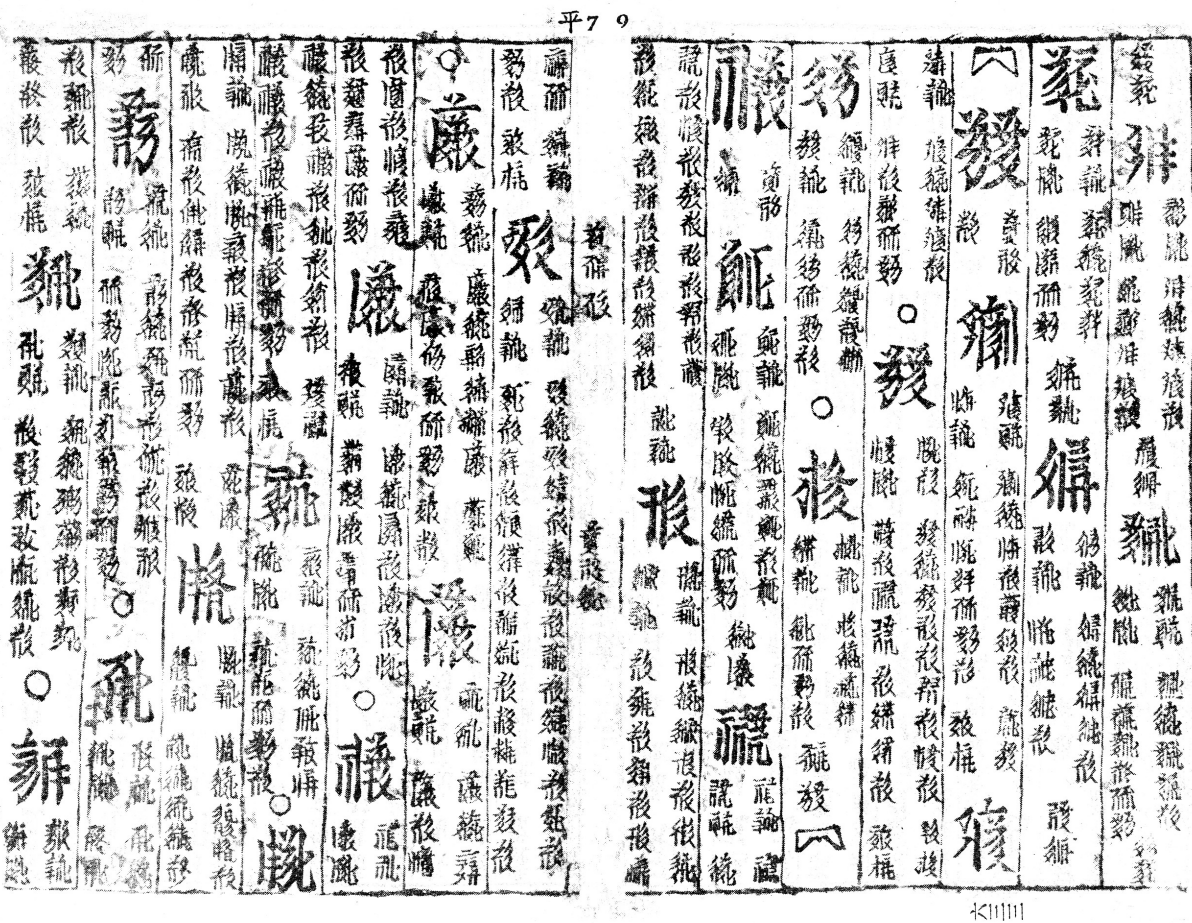

The Tangut script is composed of about 6,000 individual characters that superficially resemble Chinese ideographs, and that were written top-to-bottom in lines running right-to-left across the writing surface in the same way that Chinese was traditionally written (see Figs. 1 and 2). In modern usage the script is written left-to-right. Although the individual characters are quite complex, with most characters comprising 8-15 strokes, the script is not itself complex. There are no combining characters, and characters do not interact with each other typographically.

### 3. Character Repertoire

It is difficult to determine the exact number of Tangut characters as no complete example of a contemporary dictionary of Tangut has survived to the present day (the extant fragment of the *Sea of Characters* dictionary has 3,052 entries), but modern dictionaries include about 6,000 characters (LFW1997 has exactly 6,000 entries, LFW2008 has 6,074 entries and Kyčanov 2006 has 5,803 entries). As Tangut characters are individually complex it is common to find the same basic character written somewhat differently in different sources, sometimes with a different arrangement of the same component elements (e.g. LFW2008-0076 𐰇 and LFW2008-0786 𐰇) and sometimes with one component element substituted for another (e.g. LFW2008-2080 𐰇 and LFW2008-4023 𐰇). Hán Xiǎománg 2004 recognises 5,861 basic characters with a total of 6,066 glyph forms, indicating that about 3.5% of Tangut characters are variant forms. The problem of character variants has been exacerbated by the widespread inclusion of erroneous character forms in modern Tangut dictionaries and glossaries. Some of the erroneous character forms are due to scholars misreading indistinct or poorly written characters in original Tangut texts, whereas others are due to scholars miswriting the complex strokes of a character when copying it down. Whatever their origin, many of these erroneous character forms have taken on a life of their own, being copied from one dictionary to another, either inadvertently or in order to deliberately point the character out as a mistake.

Fig.3: Page from the 'Sea of Characters' Dictionary

In order for scholars to be able to accurately represent original source texts as well as entries in modern dictionaries, it has been agreed in principle to encode all characters attested in modern dictionaries with distinct glyph forms, i.e. character variants with a different structural composition or with a different structural arrangement of the same component elements. This is similar to the unification rules applied to the encoding of CJK Unified Ideographs. However, due to the difficulty of deciding which character variants should be encoded and which should not, it has been agreed to encode Tangut characters in two blocks:

- A main Tangut block covering all distinct characters used as head entries in Li Fànwén's 2008 dictionary (LFW2008);
- A supplementary Tangut block for any other characters and significant character variants that are attested in other sources.

This document proposes to encode 6,054 characters used as head entries in LFW2008 in the main Tangut block. A proposal for additional characters to be encoded in a supplementary block will be made at a later date. It is estimated that the supplementary block will include about 300 additional characters.

Basing the character repertoire of the main block on LFW2008 is considered to be the best solution as this is the most recent and most comprehensive dictionary of Tangut, and using a single source avoids the issue of which character variants to include and which to exclude. The first edition of Li Fànwén's dictionary (LFW1997) was used as the basis for the Mojikyo Tangut character set, which has been widely used for electronic publishing, so basing the main Tangut block on Li Fànwén's dictionary is helpful for users migrating from a Mojikyo solution to a Unicode solution. There are, however, some significant differences between LFW2008 and

LFW1997 that mean that the Mojikyo set does not exactly map to the proposed main Tangut block: LFW1997 5995–6000 are not in LFW2008 (and therefore not proposed for encoding in the main Tangut block), and conversely LFW2008 5995–6074 are not in LFW1997, so that Mojikyo nos. 575995 through 576000 are currently unmapped (LFW1997 5995–6000 may be considered for encoding in the supplementary Tangut block). Moreover, as Mojikyo does not unify characters with the same glyph shape, there is not a one-to-one mapping between the Mojokyo set and the proposed main Tangut block. LFW2008 has a total of 6,074 entries, but twenty characters have been unified, as indicated below.

A. The following eleven pairs of entries have different meanings and/or readings but have identical glyphs:

- LFW2008-0406/0407 𐞑𐞑
- LFW2008-1106/1107 𐞑𐞑
- LFW2008-1317/1318 𐞑𐞑
- LFW2008-1666/1667 𐞑𐞑
- LFW2008-1734/1735 𐞑𐞑
- LFW2008-2252/2253 𐞑𐞑
- LFW2008-2298/2299 𐞑𐞑
- LFW2008-3435/3436 𐞑𐞑
- LFW2008-3488/3489 𐞑𐞑
- LFW2008-3683/3684 𐞑𐞑
- LFW2008-4456/4457 𐞑𐞑

B. The following five pairs of entries have the same meaning, reading and glyph shape in LFW2008, and can be considered to be duplicates:

- LFW2008-1383/1384 𐞑𐞑 (same glyph forms in both LFW1997 and LFW2008; different definitions in LFW1997, but merged into a single entry [LFW2008-1383] in LFW2008)
- LFW2008-1981/3517 𐞑𐞑 (same glyph forms in LFW2008, and no significant difference between glyphs in LFW1997; based on the four-corner index LFW1997-1981 may originally have been intended to be written differently to LFW1997-3517, but this is not reflected in the actual glyph forms used in LFW1997)
- LFW2008-2027/2350 𐞑𐞑 (slightly different glyph forms in LFW1997, but identical in LFW2008)
- LFW2008-2221/2807 𐞑𐞑 (same glyph forms in both LFW1997 and LFW2008; LFW2008-2807 has an erroneous four-corner index)
- LFW2008-2840/4591 𐞑𐞑 (slightly different glyph forms in LFW1997, but identical in LFW2008)

C. The following four pairs of entries have the same meaning and reading, but have insignificantly different glyph forms reflecting a different four-corner index analysis of the character (each pair only differs in the size of the gap between the top of the lefthand vertical stroke and the top horizontal stroke):

- LFW2008-0042/4537 𐞑𐞑 / 𐞑𐞑
- LFW2008-0057/4548 𐞑𐞑 / 𐞑𐞑
- LFW2008-0184/4510 𐞑𐞑 / 𐞑𐞑
- LFW2008-1134/4624 𐞑𐞑 / 𐞑𐞑

LFW2008 also includes a number of character variants that are not proposed for encoding in the main Tangut block, but which can be considered as candidates for encoding in the supplementary Tangut block, as described below.

**A.** Three characters have two entries, differentiated as 'A' and 'B', where the 'A' entry is the main entry for the character, and the 'B' entry is for a glyph variant that simply cross-references to the 'A' entry. In these cases only the 'A' entry is proposed for encoding in the main Tangut block.

- LFW2008-2941B 𐞑 on page 482 is indicated as a variant form of LFW2008-2941A 𐞑 on page 389
- LFW2008-3007B 𐞑 on page 491 is indicated as a variant form of LFW2008-3007[A] 𐞑 on page 424
- LFW2008-3286B 𐞑 on page 533 is indicated as a variant form of LFW2008-3286A 𐞑 on page 372

**B.** Three characters are listed twice under the same index number (not differentiated as 'A' and 'B') but with a different four-corner index, where one is the main entry and the other simply cross-references to the main entry. In these cases only the main entry character is proposed for encoding in the main Tangut block.

- LFW2008-1267 on page 212 𐞑 is indicated as a "corrupt form" of the entry on page 215 𐞑
- LFW2008-2799 on page 460 𐞑 is indicated as a "corrupt form" of the entry on page 455 𐞑
- LFW2008-5150 on page 814 𐞑 is indicated as a "corrupt form" of the entry on page 808 𐞑

**C.** The entries for the following characters note a variant form of the character that is found in a primary source, but there is no head entry for the noted variant form. These characters are not proposed for encoding in the main Tangut block.

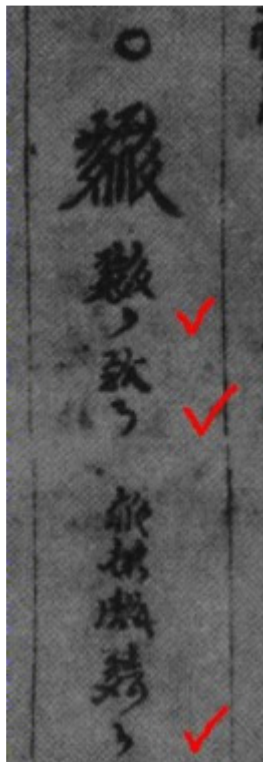

- the entry for LFW2008-1232 𐞑 notes the variant form 𐞑
- the entry for LFW2008-3400 𐞑 notes the variant form 𐞑
- the entry for LFW2008-4932 𐞑 notes the variant form 𐞑
- the entry for LFW2008-5580 𐞑 notes the variant form 𐞑
- the entry for LFW2008-5995 𐞑 notes the variant form 𐞑
- the entry for LFW2008-6016 𐞑 notes the variant form 𐞑
- the entry for LFW2008-6045 𐞑 notes the variant form 𐞑
- the entry for LFW2008-6049 𐞑 notes the variant form 𐞑

There are no script-specific punctuation marks used for Tangut, so no Tangut punctuation characters are proposed. However, an iteration mark 𐞑 is attested in contemporary and modern sources (see Figs. 4 and 5). Although this iteration mark is not included in Lǐ Fànwén's dictionary, we consider it appropriate to be included in the main Tangut block.

#### 4. Character Naming Convention

Three possible naming systems for Tangut characters were considered:

1. Algorithmically derived names based on code point, as used for CJK Unified Ideographs;
2. Names based on the reconstructed pronunciations of the characters;
3. Names based on the character's source reference.

The first solution has nothing to recommend it, and was easily rejected. The second solution is appealing, but is problematic as not all Tangut characters have a reconstructed reading. Furthermore, scholars disagree on the exact details of Tangut phonetics and the reconstructed pronunciations of individual characters. As it was thought unlikely that an agreement on any one system of phonetic reconstruction could be arrived at, a decision was made to instead base the character names on their primary source reference. This was agreed to be a useful way of naming characters as scholars often refer to characters by their index number in modern dictionaries.

For the main Tangut block the source reference for all characters is LFW2008, and so all characters (other than the iteration mark) are proposed to be named as **TANGUT CHARACTER LFW2008-*nnnn*** (for characters which map to a single entry in LFW2008) or **TANGUT CHARACTER LFW2008-*nnnn-nnnn*** (for the twenty characters that unify two entries in LFW2008), where *nnnn* is the four-digit index number with leading zeros of the corresponding entry in LFW2008. There are two instances where the index numbers in LFW2008 are swapped with respect to the index numbers in LFW1997 (LFW2008 1913/1914 = LFW1997 1914/1913, and LFW2008 4452/4453 = LFW1997 4453/4452), and in these cases the proposed character names use the index numbers given in LFW2008. This means that Mojikyo no. 571914 maps to TANGUT CHARACTER LFW2008-1913, etc.

It is intended that the names of characters encoded in the supplementary Tangut block will use the same naming convention as the main Tangut block, with the following potential sources for

additional characters represented using the following prefixes to the associated character index number:

- Grinstead 1972 = **GRI1972**
- Hán Xiǎománg 2004 = **HXM2004**
- Jǐng Yǒngshí 2008 = **JYS2008**
- Keping et al. 1969 = **KEP1969**
- Kolokolov and Kyčanov 1966 = **KOL1966**
- Kyčanov 2006 = **KYC2006**
- Lǐ Fànwén 1986 = **LFW1986**
- Lǐ Fànwén 1997 = **LFW1997**
- Lǐ Fànwén 2008 = **LFW2008**
- Nakajima et al. 2000 = **NAK2000**
- Nevskij 1960 = **NEV1960**
- Nishida 1966 = **NIS1966**
- Shǐ Jīnbō et al. 1983 = **SJB1983**
- Sofronov 1968 = **SOF1968**

## 5. Character Ordering Principles

It is essential to have a clearly defined system of character ordering for a large character set such as Tangut, so that users are able to easily locate any character. Defining a systematic method of character ordering for the main Tangut block will also facilitate the encoding of characters in any subsequent supplementary Tangut block.

Unfortunately, there is no universally accepted or standard character ordering system for Tangut that we can follow. All the Tangut dictionaries that have survived from the Western Xia period (1038–1227) order characters according to phonetic principles, but this is not suitable for our purposes as we do not know the phonetic characteristics of all the proposed characters, and a phonetic ordering would not facilitate character lookup.

In contrast, almost all modern Tangut dictionaries and glossaries order characters by radical and stroke count (the Lǐ Fànwén dictionary orders by four-corner indices, but includes a Radical/Stroke index), but there is considerable variation in the set of radicals used as a basis for ordering. With no contemporary radical classification of Tangut characters to guide them, compilers of modern Tangut dictionaries have of necessity defined sets of artificial radicals that are based on common structural elements, but which do not necessarily have a semantic determinative function in the same way that most Chinese radicals do. As these modern radical classification systems are intended only as an aid to character lookup, and do not reflect a natural grouping of characters with a common semantic element, the choice of elements to use as radicals is fairly arbitrary, with the result that every modern Tangut radical/stroke index is somewhat different from every other one.

There are two different basic approaches to defining Tangut radicals. Most authors (e.g. Nishida, Sofronov, Shǐ Jīnbō et al., Lǐ Fànwén, and Hán Xiǎománg) choose the leftmost structural element of a character as its radical where possible, and the top, bottom or surrounding element if not; but some authors (e.g. Grinstead, Kolokolov & Kyčanov, and Kyčanov) choose the structural element at the bottom right of a character as its radical. As most structural elements can occur at the left side or at the right side of a character, there is considerable overlap in the set of radicals obtained using these two different methods. Although both systems have their relative merits, we have decided to use a radical system based on the leftmost structural element as the basis for ordering the proposed character repertoire, as this method is more widespread than the bottom righthand corner method. However, as there are inconsistencies and imperfections with all existing radical

classifications, and as none of them have achieved canonical status, we have decided to devise our own radical classification and ordering principles, based on those used in Hán Xiǎománg 2004, but with some modifications, and applied consistently to the entire set of proposed characters.

The determination of radicals and the definition of stroke count and stroke ordering for an extinct script is necessarily a somewhat arbitrary task, but by following a clearly defined set of ordering principles we have aimed to produce a consistent and deterministic system of ordering for Tangut characters. The following principles have been used to determine what radical a character is ordered under:

- The leftmost element or group of elements is chosen as the radical where possible (e.g. 𠂇 for LFW2008-2771 𠂇, and 𠂇 for LFW2008-5205 𠂇)
- Where a character does not have an element or group of elements on the left side, the top, bottom or enclosing element is chosen as the radical (e.g. 𠂇 for LFW2008-4122 𠂇, 𠂇 for LFW2008-2397 𠂇, and 𠂇 for LFW2008-4742 𠂇)
- Where a character has both a top and bottom element (but no left side element), the top element is chosen as the radical (e.g. 𠂇 for LFW2008-4093 𠂇)
- Characters that occur as a left side radical are ordered with the characters that use it as a radical, even if the character itself could be more naturally ordered under a different radical (e.g. the character LFW2008-0100 𠂇 is ordered together with the character LFW2008-1863 𠂇 under the radical 𠂇, rather than under the radical 𠂇)
- If the same radical shape occurs in different positions they are treated as separate radicals (e.g. 𠂇 and 𠂇 are treated as separate radicals, and 𠂇 and 𠂇 are treated as separate radicals)
- Left side radicals and left-and-under radicals with the same basic glyph shape are treated as separate radicals (e.g. 𠂇 and 𠂇 are treated as separate radicals, and 𠂇 and 𠂇 are treated as separate radicals)

Based on these principles we have identified a set of 513 radicals that can be used to order the proposed set of characters in the main Tangut block. Note that this is not an exhaustive set of radicals required for ordering Tangut characters, and that some other radicals would need to be identified for some characters in the supplementary Tangut block. This set of radicals is a subset of the set of Tangut components that are required to be encoded in order to cover all the different systems of radical classification.

The relative ordering of these 513 radicals, as well the ordering of characters within the same radical, is based on the nominal stroke count and stroke order of the character. We have identified eighteen basic stroke types used for Tangut characters, as shown in the table below, each of which we assign an identifying letter “A” through “R”. Note that as Tangut strokes are not exactly the same as the strokes used in writing Han ideographs, there may be disagreement amongst different Tangut experts as to what constitutes an elementary stroke. For example the stroke that we identify as “J” 𠂇 is treated as two conjoined strokes by Nishida.

Table 1 : Tangut Strokes

Letter	Stroke(s)	Example Components
A	一	二 卅 丰
B	丨	卅 丰
C	ノ	ン 卍 彡
D	丶	ン 一 卍 彡
E	ㄗ ㄊ	卅 卅
F	フ	彡 彡 卅
G	マ	彡
H	ㄣ	彡
I	ㄣ	彡
J	ㄣ	彡 彡
K	二	彡 彡 彡
L	ㄥ	彡 彡
M	し	彡 彡
N	ㄣ	彡
O	ㄣ	彡 彡
P	く	彡 彡
Q	ㄣ	彡 彡
R	ノ	彡 彡

The 513 radicals used to order the main Tangut block are listed in Appendix A. We have assigned each radical an alphabetic sort key derived from the letters assigned to each stroke in the above table. The order of letters in the sort key is based on the nominal order in which the strokes of the character should be written. Thus Radical 179 𐰀 is given a sort key of *DCBOE* based on the nominal writing order of its five constituent strokes. Note that although it is possible to reconstruct the stroke order of Tangut characters to a certain extent by analogy with the stroke order used for writing Han ideographs, some Tangut stroke constructions are unlike anything found in Chinese, and different scholars have different opinions as to what their correct stroke order should be, and even whether a stroke is a single stroke or two conjoined strokes. Although there may not be universal agreement on our definition of stroke count and stroke order in all cases, we have attempted to be completely consistent, so that the same stroke construction always has the same alphabetic sort key wherever it occurs.

Radicals are ordered by stroke count and then by their alphabetic sort key. For example, Radical 184 𐰁 is ordered immediately after Radical 183 𐰂 as they both have a stroke count of 5, but Radical 183 has a sort key of *DCFCQ* and Radical 184 has a sort key of *DCKBB*. Where two or more radicals have the same sort key the following principles are used to determine their relative order:

- Left side radicals are ordered before top radicals with the same glyph shape (e.g. Radical 348 𐰃 *DCFABBB* is ordered before Radical 349 𐰄 *DCFABBB*)

- Top radicals are ordered before bottom radicals with the same glyph shape (e.g. Radical 061  *ABBB* is ordered before Radical 062  *ABBB*)
- Radicals with a final long slanting stroke are ordered immediately after the similar radical with a short slanting slope (e.g. Radical 079  *CCCQ* is ordered immediately after Radical 078  *CCCQ*)
- Radicals with a long stroke bending to the right are ordered immediately after the similar radical with a stroke that does not bend to the right (e.g. Radical 096  *DCBE* is ordered immediately after Radical 095  *DCBE*)
- Radicals with crossing strokes are ordered after characters with non-crossing strokes (e.g. Radical 186  *EAAAB* is ordered after Radical 185  *EAAAB*, and Radical 285  *EABEAA* is ordered after Radical 284  *EABEAA* which is ordered after Radical 283  *EABEAA*)

The characters assigned to each radical are ordered by residual stroke count and stroke order using the same principles used for ordering radicals. The resultant ordering of the proposed set of 6,054 characters is shown in Appendix B.

**ISO/IEC JTC 1/SC 2/WG 2  
PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS  
FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646**

Please fill all the sections A, B and C below.

Please read Principles and Procedures Document (P & P) from

<http://www.dkuug.dk/JTC1/SC2/WG2/docs/principles.html> for guidelines and details before filling this form.

Please ensure you are using the latest Form from <http://www.dkuug.dk/JTC1/SC2/WG2/docs/summaryform.html>.

See also <http://www.dkuug.dk/JTC1/SC2/WG2/docs/roadmaps.html> for latest *Roadmaps*.

**Form number: N3452-F** (Original 1994-10-14; Revised 1995-01, 1995-04, 1996-04, 1996-08, 1999-03, 2001-05, 2001-09, 2003-11, 2005-01, 2005-09, 2005-10, 2007-03, 2008-05)

### A. Administrative

1. Title:	<i>Final proposal for encoding the Tangut script in the SMP of the UCS</i>	
2. Requester's name:	<i>China, Ireland, and UK</i>	
3. Requester type (Member body/Liaison/Individual contribution):	<i>National Body contribution</i>	
4. Submission date:	<i>2010-04-05</i>	
5. Requester's reference (if applicable):		
6. Choose one of the following:		
This is a complete proposal:		<i>Yes</i>
(or) More information will be provided later:		

### B. Technical - General

1. Choose one of the following:		
a. This proposal is for a new script (set of characters):	<i>Yes</i>	
Proposed name of script:	<i>Tangut</i>	
b. The proposal is for addition of character(s) to an existing block:	<i>No</i>	
Name of the existing block:		
2. Number of characters in proposal:		<i>6,055</i>
3. Proposed category (select one from below - see section 2.2 of P&P document):		
A-Contemporary	B.1-Specialized (small collection)	B.2-Specialized (large collection)
C-Major extinct	D-Attested extinct	E-Minor extinct
F-Archaic Hieroglyphic or Ideographic	<input checked="" type="checkbox"/> X	G-Obscure or questionable usage symbols
4. Is a repertoire including character names provided?		
a. If Yes, are the names in accordance with the "character naming guidelines"	<i>Yes</i>	
b. Are the character shapes attached in a legible form suitable for review?	<i>Yes</i>	
5. Who will provide the appropriate computerized font (ordered preference: True Type, or PostScript format) for publishing the standard?		
	<i>Jing Yongshi and Michael Everson</i>	
If available now, identify source(s) for the font (include address, e-mail, ftp-site, etc.) and indicate the tools used:		
	<i>Michael Everson, Fontographer.</i>	
6. References:		
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?	<i>Yes</i>	
b. Are published examples of use (such as samples from newspapers, magazines, or other sources) of proposed characters attached?	<i>No</i>	
7. Special encoding issue		
Does the proposal address other aspects of character data processing (if applicable) such as input, presentation, sorting, searching, indexing, transliteration etc. (if yes please enclose information)?		
		<i>Yes</i>
8. Submitters are invited to provide any additional information about Properties of the proposed Character(s) or Script that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script. Examples of such properties are: Casing information, Numeric information, Currency information, Display behaviour information such as line breaks, widths etc., Combining behaviour, Spacing behaviour, Directional behaviour, Default Collation behaviour, relevance in Mark Up contexts, Compatibility equivalence and other Unicode normalization related information. See the Unicode standard at <a href="http://www.unicode.org">http://www.unicode.org</a> for such information on other scripts. Also see <a href="http://www.unicode.org/Public/UNIDATA/UCD.html">http://www.unicode.org/Public/UNIDATA/UCD.html</a> and associated Unicode Technical Reports for information needed for consideration by the Unicode Technical Committee for inclusion in the Unicode Standard.		

## C. Technical - Justification

1. Has this proposal for addition of character(s) been submitted before? If Yes explain	<b>Yes</b> <i>See N3577.</i>
2. Has contact been made to members of the user community (for example: National Body, user groups of the script or characters, other experts, etc.)? If Yes, available relevant documents:	<b>Yes</b>
3. Information on the user community for the proposed characters (for example: size, demographics, information technology use, or publishing use) is included? Reference:	<b>No</b>
4. The context of use for the proposed characters type of use; common or rare) Reference:	<b>Rare</b>
5. Are the proposed characters in current use by the user community? If Yes, where? Reference:	<b>Yes</b>
6. After giving due considerations to the principles in the P&P document must the proposed characters be entirely in the BMP? If Yes, is a rationale provided? If Yes, reference:	<b>No</b>
7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)?	<b>Yes</b>
8. Can any of the proposed characters be considered a presentation form of an existing character or character sequence? If Yes, is a rationale for its inclusion provided? If Yes, reference:	<b>No</b>
9. Can any of the proposed characters be encoded using a composed character sequence of either existing characters or other proposed characters? If Yes, is a rationale for its inclusion provided? If Yes, reference:	<b>No</b>
10. Can any of the proposed character(s) be considered to be similar (in appearance or function) to an existing character? If Yes, is a rationale for its inclusion provided? If Yes, reference:	<b>No</b>
11. Does the proposal include use of combining characters and/or use of composite sequences? If Yes, is a rationale for such use provided? If Yes, reference: Is a list of composite sequences and their corresponding glyph images (graphic symbols) provided? If Yes, reference:	<b>No</b>
12. Does the proposal contain characters with any special properties such as control function or similar semantics? If Yes, describe in detail (include attachment if necessary)	<b>No</b>
13. Does the proposal contain any Ideographic compatibility character(s)? If Yes, is the equivalent corresponding unified ideographic character(s) identified? If Yes, reference:	<b>No</b>

**Doc Type:** Working Group Document  
**Title:** Final proposal for encoding the Tangut script in the SMP of the UCS  
Appendix A  
**Source:** China, Ireland, and UK  
**Status:** National Body Contribution  
**Action:** For consideration by JTC1/SC2/WG2 and UTC  
**Date:** 2010-04-05

### Appendix A : Tangut Radical List

This appendix lists the 513 radicals that are used to order the 6,054 Tangut characters listed in Appendix B. The radicals are themselves ordered by stroke count and stroke order as described in N3797 Section 5.

Number	Radical	Strokes	Stroke Order	Chars	Notes
001	一	1	A	45	See also Radicals 006 二, 007 厂, 058 𠄎, 068 三, 123 𠄎, and 217 𠄎.
002	丨	1	B	154	See also Radical 071 廌.
003	丿	1	C	1	L1885 爻 only
004	𠄎	1	F	4	
005	彳	1	O	42	Includes L3554 彳. See also Radicals 055 𠄎, 122 𠄎, 216 𠄎, 301 𠄎, 302 𠄎, and 377 𠄎.
006	二	2	AA	29	
007	厂	2	AB	12	
008	川	2	BB	153	
009	𠄎	2	BE	2	
010	𠄎	2	BE	1	
011	彳	2	CB	4	
012	𠄎	2	DA	16	See also Radical 039 𠄎.
013	𠄎	2	DC	4	
014	𠄎	2	EA	3	See also Radicals 045 𠄎, 103 𠄎, and 189 𠄎.
015	𠄎	2	EA	71	

Number	Radical	Strokes	Stroke Order	Chars	Notes
016	彳	2	HO	16	
017	彳	2	JC	43	Includes L1168 彳.
018	巾	2	NB	1	See also Radical 033 巾.
019	彳	2	OF	179	
020	彳	2	OG	2	
021	彳	3	AAB	5	
022	彳	3	AAB	47	
023	彳	3	AAM	1	
024	彳	3	ABA	3	
025	彳	3	ABB	2	
026	彳	3	ABB	11	
027	彳	3	ABE	14	
028	彳	3	ABO	21	
029	彳	3	ABR	1	
030	彳	3	AJC	13	
031	彳	3	BAA	14	
032	彳	3	BAE	1	
033	巾	3	BEB	6	See also Radical 018 巾.
034	彳	3	CBB	11	See also Radical 048 彳.
035	彳	3	CCC	2	
036	彳	3	CCQ	57	
037	彳	3	CCQ	7	
038	彳	3	CCQ	18	
039	彳	3	DAB	11	
040	彳	3	DAB	2	
041	彳	3	DCA	274	
042	彳	3	DCB	5	See also Radicals 262 彳, 266 彳, 334 彳, 335 彳, 337 彳, and 454 彳.
043	彳	3	DCB	1	
044	彳	3	DDC	7	
045	彳	3	EAA	43	See also Radical 103 彳.
046	彳	3	EAG	88	
047	彳	3	FBA	5	
048	彳	3	FBB	16	See also Radicals 034 彳 and 094 彳.
049	彳	3	FCB	23	Unifies 彳 and 彳 (difference does not appear to be significant). See also Radical 098 彳.

Number	Radical	Strokes	Stroke Order	Chars	Notes
050	𠄎	3	FCQ	25	See also Radical 066 𠄎.
051	𠄏	3	HAB	21	
052	𠄐	3	HBB	7	
053	𠄑	3	KDD	11	
054	𠄒	3	LBO	1	
055	𠄓	3	OFB	2	
056	𠄔	4	AAAB	4	
057	𠄕	4	AABB	54	
058	𠄖	4	AABB	1	
059	𠄗	4	AABE	8	
060	𠄘	4	AAJC	14	
061	𠄙	4	ABBB	336	
062	𠄚	4	ABBB	9	
063	𠄛	4	ABEA	17	
064	𠄜	4	ABEB	18	
065	𠄝	4	ABFQ	89	
066	𠄞	4	ACCQ	13	See also Radical 050 𠄎.
067	𠄟	4	AFCQ	14	See also Radical 127 𠄟.
068	𠄠	4	AKDD	2	
069	𠄡	4	BAAE	5	
070	𠄢	4	BAEA	2	
071	𠄣	4	BBAE	3	
072	𠄤	4	BEAA	3	
073	𠄥	4	BECC	1	
074	𠄦	4	BFCQ	2	
075	𠄧	4	CBAA	4	
076	𠄨	4	CCBB	25	Unifies 𠄨 and 𠄩 (difficult to tell which one of these two some characters should be classified under).
077	𠄩	4	CCBE	1	
078	𠄪	4	CCCQ	554	See also Radical 159 𠄪
079	𠄫	4	CCCQ	27	Includes L2439 𠄫.
080	𠄬	4	CCCQ	2	
081	𠄭	4	CCCQ	7	
082	𠄮	4	CCQB	2	
083	𠄯	4	CCQD	11	

Number	Radical	Strokes	Stroke Order	Chars	Notes
084	彡	4	CCQO	19	
085	乚	4	CMCD	1	
086	亅	4	CQBB	14	
087	亅	4	DABE	30	
088	亢	4	DABE	3	
089	彡	4	DAHO	1	
090	彡	4	DAJC	5	
091	彡	4	DAOF	1	
092	彡	4	DCAB	9	
093	彡	4	DCBA	1	
094	彡	4	DCBB	29	See also Radical 048 彡.
095	彡	4	DCBE	4	
096	彡	4	DCBE	54	
097	彡	4	DCBO	4	
098	彡	4	DCCB	17	See also Radical 049 彡.
099	彡	4	DCCQ	8	
100	彡	4	DCEA	3	Unifies 彡 and 彡 (only one character with the latter form). See also Radical 344 彡.
101	彡	4	DCJC	29	
102	彡	4	DCJC	9	
103	彡	4	EAAC	2

**Doc Type:** Working Group Document  
**Title:** Final proposal for encoding the Tangut script in the SMP of the UCS  
Appendix B  
**Source:** China, Ireland, and UK  
**Status:** National Body Contribution  
**Action:** For consideration by JTC1/SC2/WG2 and UTC  
**Date:** 2010-04-05

### Appendix B : Tangut Character List

This appendix lists the 6,055 proposed Tangut characters. The Tangut iteration mark is ordered first, and the 6,054 remaining characters are ordered by the 513 radicals listed in Appendix A, and within each radical by stroke count and stroke order according to the principles described in N3797 Section 5.
