

VERSATILE, POTENT & EASY TO DOSE HYDROGEN SUPPLEMENT

KEY BENEFITS:

- **GENERATES** Hydrogen (H₂) that protects your cells
- **BOOSTS** antioxidant enzymes in your cells
- **PROVIDES** Plant-Derived Bioavailable minerals
- **ZERO CONTRAINDICATIONS** - integrates into any protocol

HOW DOES IT GENERATE HYDROGEN?

Our patented **Activated Magnesium Carbonate** donates electrons (e⁻) to the positive hydrogen ions (H⁺) in liquid, thereby liberating Hydrogen (H₂)

HYDROH2 is designed to utilize the acidity of your stomach over a period of 12 hours to constantly generate Hydrogen that your cells can utilize for maximum benefit.

H₂

GAME-CHANGING ANTIOXIDANT
MOLECULAR HYDROGEN

WHAT MAKES HYDROGEN SO GREAT?

Small Size

Hydrogen (H₂) is the smallest molecule in existence. It can easily pass through cell membranes and slip through mitochondrial membranes to eliminate harmful free radicals at their source, **inside the mitochondria**. This makes Hydrogen significantly more **bioavailable** than other antioxidants.

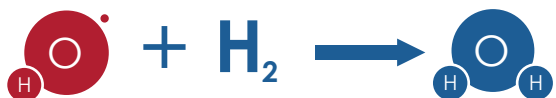

Selectivity

Hydrogen targets only the harmful free radicals such as **Hydroxyl Radicals** or **Peroxynitrites**. Other antioxidants eliminate any kind of free radical, sometimes causing an imbalance inside the cells.

ZERO Byproducts

Hydrogen freely donates electrons to **Hydroxyl Radicals** and **Peroxynitrites** leaving no byproducts other than **water**. Other antioxidants transform into weak free radicals after neutralizing a free radical.

H₂ Neutralizes Hydroxyl Radical Into Water

Synergy

Hydrogen stimulates the production of endogenous antioxidant enzymes such as **Glutathione Peroxidase**, **Catalase**, and **Superoxide Dismutase**. These enzymes strengthen the antioxidant defense system of your cells.
