### EXPLANATION OF SHORT FORMS USED FOR TAG TYPES

Letters in parentheses are utilized to enter tag type data on computer forms. The first letter is the code for tag type, the second letter is for tag colour and the third letter, when present, is for the prefix letter on the tag serial number.

L.	-	large
Sm.	-	small
M.F.	-	Modified Carlin tag, with monofilament attachment
S.S.	-	Carlin tag, with stainless steel attachment
T-Bar	-	tubular plastic T-Bar tag
V-Dart	-	large tubular plastic dart tag (single barb attachment)
Petersen disc	-	2 circular plastic discs, with metal pin attachment

## INTRODUCTION

This report provides a comprehensive summary of fish tagging, conducted in Nova Scotia, New Brunswick, and Prince Edward Island from 1967 to 1975, under the direction of the staff of the Resource Development Branch, Fisheries and Marine Service, Halifax. Species tagged include Atlantic salmon (*Salmo salar*), both sea-run and landlocked or Sebago; American shad (*Alosa sapidissima*); and striped bass (*Roccus americanus*).

The "Time" column indicates time of release, although some groups were tagged earlier.

In the section on adult salmon tagging, all groups, unless otherwise indicated, consist of a mixture of both grilse and older salmon. Also, except where specifically indicated, all tagged adults were obtained from wild stocks.

In the section on juvenile salmon tagging, all groups, unless otherwise indicated, were tagged during the smolt stage.

ATLANTIC SALMON - ADULTS

MEDWAY RIVER, NOVA SCOTIA

Release location	Year	Tag type	Tag series	Number released	Time
Greenfield	1967	Sm. Blue Carlin M.F. (BBB)	B00,240-B00,256	17	Sep-Oct
