# AER2200 Series Enterprise Router

Designed for small to mid-sized branches, the Cradlepoint AER2200 Series Router is an all-in-one router that offers organizations the high availability of embedded Gigabit-Class LTE and ease of use of point-and-click cloud management. With wired and wireless routing, foundational SD-WAN, embedded Gigabit-Class LTE, Wi-Fi, and comprehensive security, the cloud-managed AER2200 router greatly simplifies branch networking. The AER2200 router offers single-pane-of-glass management for the entire branch site, including Cradlepoint APs and IoT devices.

## Notable Features

- Gain agility through an embedded Gigabit-Class LTE Advanced Pro 1.2 Gbps modem (theoretical maximum modem speed).
- Comprehensive wired and wireless routing for flexibility and high availability.
- Enable larger branch locations needing security and connections to cloud-based applications.
- Foundational SD-WAN ensures optimal application performance and uptime.
- Define policies through centralized, cloud-based management for easy deployment at scale.
- Remote management of router-connected devices.
- Add 5G with modular modem or Captive Modem capability.

## Ideal for Wireless WAN

For an all wireless WAN, the AER2200 Series Router offers Gigabit LTE performance, which can support the throughput and service needs of an enterprise branch with the ability to add a second LTE connection for increased available bandwidth and reliability. For organizations moving to a Wireless WAN, the AER2200 Series Router offers the ability to pair with a wired link and use LTE as a failover connection or a primary connection.

## 5G Ready for Upward Compatibility

The AER2200 Series Router is 5G-ready with the ability to act as a controller for a Cradlepoint 5G Wideband Adapter. The unique capability of Cradlepoint to operate the adapter in captive mode means that the two separate, Ethernet-connected appliances can be managed as a single entity. In addition, the AER2200 Series Router is designed to embed a future generation modular 5G modem. These two capabilities ensure compatibility for 5G.

## Performance

Stateful Firewall Throughput:	IPS Throughput:	Application Aware Services & Analytics:	IPSec VPN Throughput:	Concurrent VPN Tunnels:	Concurrent Sessions (TCP):	Typical Client Count:
<b>940 Mbps</b>	<b>250 Mbps</b>	<b>250 Mbps</b>	<b>40 Mbps</b>	<b>20</b>	<b>32,000</b>	<b>100</b>

Performance testing was conducted based on requirements as defined in RFC2544 using fixed-frame 1518 byte packets. Throughput results reflect uni-directional UDP traffic with less than 1% packet loss as tested with wired connections.

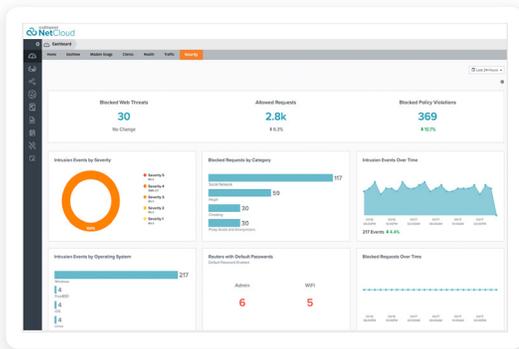

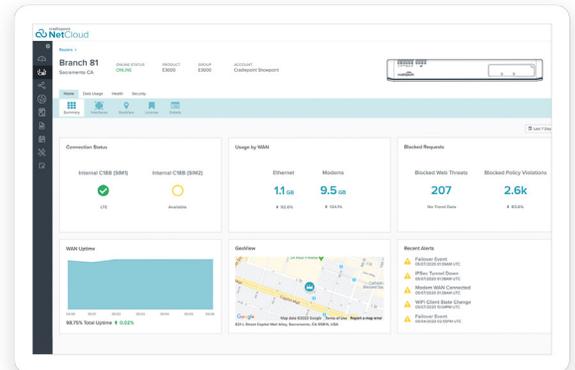

Results do not reflect performance of the cellular wireless operator networks.

## Key Software Capabilities

The Cradlepoint NetCloud for Branch with AER2200 Series Router provides everything needed to unlock the power of LTE at the network edge and connect users and IoT devices to critical applications and services. NetCloud includes routing, VPN, SD-WAN, and security capabilities for robust, enterprise-class performance. Cloud-based management designed for simplification, insights and scale includes group policy definition, reports, troubleshooting, and analytics dashboards. The service includes a warranty for as long as there is an active subscription on the router, online training, live and online support, and all software and firmware updates.

## Router Services

The next generation hardware has the processing power to handle demanding router-delivered services, dynamic routing protocols, and application aware traffic steering, supported with our exclusive NetCloud Essentials + Advanced software package.

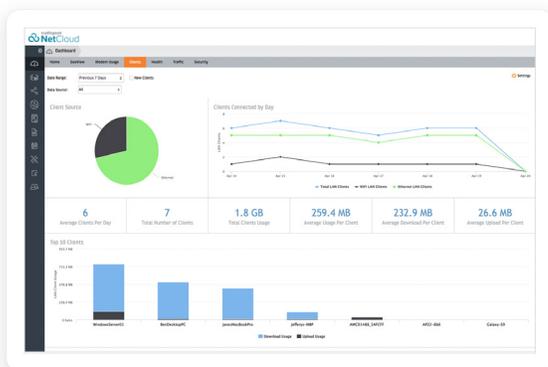

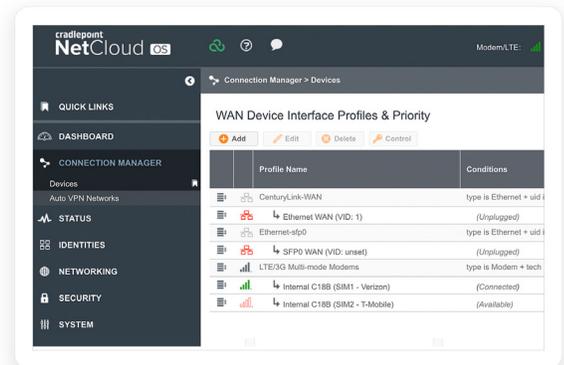

## Security Services

NetCloud Essentials + Advanced packages include security features and options, such as stateful zone-based firewall, intrusion prevention, and threat protection, to optimize the AER2200 Series Router to meet the evolving security needs of distributed environments. Additional security add-ons from leading technology partners make a rich security stack manageable from NetCloud.

## Connection Manager

Connection Manager provides the ability to manage all WAN connections types, both wireless and wired, from a single software-defined policy. Our custom-built modem software ensures users establish Wireless WAN connectivity faster while maintaining the highest level of resiliency.

## Cloud Services

NetCloud Manager delivers true zero-touch deployment with the ability to define and deliver policy across entire groups of endpoints. Users can create a cloud-orchestrated hub and spoke VPN network and gain insights and analytics required for rapid troubleshooting and diagnostic workflows.

<sup>†</sup>Cellular carriers and operators throughout the world may only require telecom industry certifications, like PTCRB or GCF, to operate on their network. Some carriers require additional testing and approval, beyond telecom certifications, to operate on their network. A carrier listed in the approvals section means Cradlepoint completed additional testing and acquired technical approval for that given carrier. Any carrier not listed may not require additional testing or approval beyond telecom industry certifications to operate on their network.

## Ordering Guide

**NetCloud Branch Essentials** packages and plans contain all the features and capabilities required for small to mid-sized branch applications. Essentials Packages include 24x7 support (phone support: 24 hour weekdays with emergency response on weekends, web: 24x7, chat: 24x5) and a limited lifetime warranty.

For additional capabilities, a **NetCloud Branch Advanced Plan** can be added to the NetCloud Branch Essentials Package at any time.

## Support & Warranty

The AER2200 Series Router is only sold as a component of NetCloud Branch Packages.

- NetCloud Packages include support for the full subscription term.
- All Cradlepoint hardware products are covered by a limited lifetime warranty for as long as they have a subscription license to an active NetCloud Service Plan.
