# RECHMOND WHEEL & CASTOR CO

# **About Us**

# Richmond is an Australian family owned company that has been designing, manufacturing and supplying rolling solutions for over 60 years.

Wheels & castors are the heart and soul of what we do. We are the leading supplier of these products in ANZ and as a result the knowledge we have accumulated is world class.

Over the decades we have added other rolling divisions to our business, spanning categories such as conveyors, trolleys, gate automation and materials handling. We have over 8000 solutions for you to choose from – and if you can't find what you're looking for, we'll custom design and manufacture it for you.

This ability to design and manufacture the rolling products our customers need has always been at the core of Richmond and remains so today.

Our products are widely used by OEMs, factories, farms, mines, defence, infrastructure, schools and homes across Australia and New Zealand. If it rolls, think Richmond.

We are capable, we are curious and we love what we do.

Contact our team today for a solution for your business.

# If it rolls, think Richmond.

Richmond is an Australian family-owned company that has been designing, manufacturing and supplying rolling solutions for over 60 years.

# **Our History**

Three generations of Australian innovation.

#### Founded in 1958

Over 63 years of service across Australia and New Zealand.

#### 100% Australian Family-Owned and Run

Three generations and counting. Our family values shine through everything we do.

#### **Over 300 Collective Years of Staff Expertise**

Our key players have been living and breathing rolling solutions for decades. It's what we know best.

#### **Thriving Through Global Downturns**

Many companies have been swept away by history while we have grown due to our ability to adapt and innovate.

# **Now & Into the Future**

'Always keep growing' - that's our motto. You'll never see us sitting idle. Richmond is dedicated to investing in a bigger, brighter and more sustainable future for our customers.

#### **Over 8000 Standard Products**

If we don't have what you're looking for, we can design, manufacture and supply it for you.

#### **Branch Network**

We have locations in every state across Australia and in Auckland, New Zealand. Our nationwide servicing capacity is unparalleled.

#### **In-House Engineers & Fabrication Facility**

We aren't just suppliers - we're creators. Our team have the knowledge and the tools to take every project to the next-level.

#### **Growing Through COVID-19**

When the world came to a halt, Richmond kept going. As a provider to essential services, we always stay open.

#### **Expanding Our National Footprint**

We continue to expand our operations by opening new branches across Australia. Recent additions include an additional facility in North West Melbourne and another on The Gold Coast.

#### **Investments In Automation**

We see the future of manufacturing is in automation. We are increasingly utilising cobots to increase production and efficiency within our warehouses and manufacturing facility.

# **Selecting The Right Wheel Or Castor For Your Application**

5 Variables to consider when choosing your castor

### **1. LOAD CAPACITY**

Heavier loads will require larger capacity castors with wheels made from higher density materials.

Sudden impacts that the wheel or castor may encounter during transport should also be considered. These sudden loads will add to the amount of force that is applied to the castor during transport.

To calculate the minimum load capacity, divide the typical weight by the number of castors to be used on the item. This number will give you the capacity for an evenly distributed load.

#### **CALCULATE THE THE CAPACITY** YOUR CASTORS NEED TO BE

EQUIPMENT WEIGHT + LOAD WEIGHT **NO. CASTORS - 1** 

E.G. Total weight of trolley and load = 400kg

If you divide this by 4 (one castor each corner), then each castor would need to be at least 100kg capacity (In this case the castors would running at their max limit)

> If you divide by 3 instead, this will provide a safety margin for the application.

## 2. FLOOR TYPE

Wheels and castors perform differently depending on the floor surface.

#### CARPET:

Nylon wheels are the best option due to the decreased rolling resistance.

#### **CONCRETE OR TILES:**

Polyurethane, rebound rubber or other compound rubber wheels are the best option.

#### **UNEVEN SURFACE:**

May lead to irregular weight distribution and temporarily increase the load on the castors.

#### WOOD, VINYL, CORK & EPOXY FLOORS:

Non-marking wheels such as grey rubber, rebound rubber and polyurethane are best suited for these surfaces.

#### **EASILY MARKED SURFACES:**

To prevent marking of the floor, polyurethane, rebound polyurethane, grey rubber, donut profile, or rebound rubber wheels are the best options.

Richmond has a wheel type to suit all floor surfaces

## 4. CLIMATE & ENVIRONMENT

Several requirements should be considered when choosing the right wheel or castor for vour environment:

- · Temperature to which the castor will be exposed, extreme heat or cold (Cool rooms, freezers, ovens)
- Will the wheel or castor be used in wet/wash down areas?
- Harshness of the environment (Sea water, dirt, sand, chemicals, clean room etc.)

Richmond's high/low temperature wheels can perform in extreme temperatures from -30°C to 300°C

## 3. EASE OF ROLLING

The major factors that contribute to rolling resistance are:

- Load
- Wheel Diameter
- Wheel Hardness
- · Floor Surface

The worse the floor, the bigger and softer the wheel needs to be

Rolling resistance can be improved by selecting the largest suitable wheel diameter for your application.

When unsure, speak with the knowledgeable store staff to advise you on the most suitable castor for your application.

## **5. APPLICATION**

Are there any specific requirements or industry standards that your wheel/castor needs to meet? Below are some important things to consider when making a selection:

- · Do the castors require brakes and/or directional locks?
- · Is the load being towed, and if so at what speed?
- · Wheel noise dampening
- Shock loads Will the load be subject to sudden shocks whilst moving?
- Frequency of use
- · Height/clearance restrictions
- Mounting requirements Plate or bolt mount? Rigid, swivel, or brake frame?

FRAMES	Single bolt mount in swivel, plate mount in swivel, rigid & brake varieties.	Mild or stainless steel. Single bolt mount in swivel, plate mount in swivel, rigid & brake varieties.	Mild or stainless steel. Plate mount in swivel, rigid, brake, and swivel lock & brake varieties.		
WHEEL TYPE	Single & twin wheel castors.	Rebound rubber, nylon, polyurethane, high temp polymer and more.	Rebound rubber, nylon, polyurethane, high temp polymer, cast iron & SG iron and more.		
APPLICATIONS	Household furniture, light duty cabinets, shop fitting, display equipment.	Medical & lab equipment, kitchens, cool rooms, bakeries, general industry and more.	Logistics, manufacturing, rapid moving production lines, steel manufacture, exhibition services, waste bins and more.		

#### **INSTITUTIONAL RUBBER**

Designed for hospitals, nursing homes, offices, schools and any other light duty indoor applications these institutional rubber wheels feature non-marking tyres, sealed bearings and a matching grey thread guard.

#### **REBOUND RUBBER**

Non-marking, quiet and shock absorbing with a low rolling resistance compared to institutional rubber that ensures they move over small obstructions easily.

#### **HIGH/LOW TEMPERATURE**

Our wheels handle temperatures ranging from -30°C to 300°C. Cast iron, SG iron, glass filled nylon, aluminium, and high temperature polymer wheels are available.

#### **PUNCTURE PROOF WHEELS**

Eliminates the need to repair punctures. Suited to hand trucks, nursery and industrial equipment, these wheels combine the strength and stability of solid rubber wheel with the cushioned ride of a pneumatic.

#### **POLY TYRED NYLON CENTRED**

Features an injection moulded polyurethane tyre around a nylon hub, these wheels are hard wearing, non-marking and long lasting with high load capacities.

Available with a polyurethane hardness ranging from 60A to 75D on the shore scale, with a cast iron centre. FRAS (Fire Resistant Anti Static wheels are available to order)

#### PNEUMATIC WHEELS

Available with plastic or steel centre. Our pneumatic wheels offer an easy rolling solution ideal for use on agricultural equipment, hand trolleys, wheelbarrows and lots more.

#### SOLID NYLON

Highly durable wheel that has a low rolling resistance. Ideal for hard, smooth surfaces and outdoor/wet environments.

#### **CAST IRON & SG IRON**

Ensures a high capacity with low rolling resistance. They are hard wearing as well as abrasive and heat resistant.

More in-depth information on our huge wheel & castor range can be found on our website **richmondau.com** 

#### WHAT IS THE DIFFERENCE BETWEEN A WHEEL AND A CASTOR?

A wheel is a round object, usually with a centre hole for a spindle or axle.

A castor is a wheel contained in a rotating mount or frame. Allowing the wheel to be mounted to equipment.

#### **HOW WILL THE CASTOR BE MOUNTED?**

#### **Plate Fixing**

Best supported fitting. Either bolt or weld the castor frame to the product.

#### Bolt Fixing

Ideal for fixing into tube. Suited for trolleys, racking, and display equipment.

Make sure you check the baseplate dimensions or bolt size of the castor frame to ensure they meet your requirements.

#### CASTORS

**Rigid Castor:** Non-swivelling castor

Swivel Castor: Swivel rotates without restriction

#### **BRAKE TYPES**

Wheel Brake: Prevents the wheel from rotating.

**Directional Lock:** Locks the swivel in any direction.

**Swivel Lock & Brake:** Simultaneously brakes the wheel and locks the swivel in any direction.

## **BEARING TYPES**

#### PLAIN BORE WHEELS

are normally polypropylene, nylon or cast iron and are suitable for lighter loads where rolling resistance is not as important. They are used in very wet, corrosive or high heat conditions where better bearings would not survive.

#### ROLLER BEARINGS

are suitable for medium duty applications. If kept well greased, they can cope with some dirt or water. Best service is given on hardened axles. These bearings do not require axial adjustment.

#### PRECISION DEEP GROVE BALL BEARINGS

are fitted to most of our heavy duty wheels. Such wheels have very low rolling resistance and are normally provided with double seal bearings that are 'sealed for life.' If the application required regular greasing, grease nipples can be fitted.

#### TAPER ROLLER BEARINGS

are the best choice for power towing applications and have the highest carrying capacity. All wheels with taper roller bearings are fitted with oil seal sleeves. The axle design must allow for fine adjustment of distance between bearing cones.

## LOAD RATINGS

Our load capacities are based upon ideal/average working conditions. These ratings are for normal use. If the castors or wheels are in continuous use (e.g. as 24 hour a day drive wheels) these ratings would have to be downgraded. Ideal load ratings mean that the floor must be smooth and there is no chance of overloading the castor. Average load ratings are used when conditions are not perfect (i.e. probably on most sites where castors are used). It may be necessary to underate castors to ensure ease of use, especially under harsh conditions. Our castors are tested on a concrete floot free of door sills, breaks, rails etc and capacities are based on 'hand operation' except where otherwise designated.

## **ROLLING RESISTANCE**

The ease of moving a piece of equipment is determined by the resistance of the wheels to rolling (known as Rolling Resistance). Rolling resistance is described as "that effort required to move the equipment from rest and keep it moving." The easiest rolling is achieved by hard tyred wheels on a hard smooth surface. However, if the wheels must overcome obstacles from rest, then the effort required includes the force needed to lift the wheels over the obstructions. Resilient tyred wheels (e.g. pneumatic tyred wheels) roll over these obstructions more easily, while both bearing wheels and larger wheels make it more and more easier.

**NOTE:** The graph to the right provides relative differences between wheel types assuming 150mm diameter wheels with precision ball bearings. Detailed advice can be given on request as many other factors need to be taken into account.

With so many variations to consider, the only realistic measurement of rolling resistance is actual site testing. Wheels are usually much cheaper to replace than the floors they run on. Cast iron wheels can damage concrete, especially if rolled over the same area. Nylon wheels are a good compromise and are long lasting. Rubber tyred wheels offer good protection, but are unable to carry the higher loads required of modern equipment. Polyurethane tyred wheels will not damage or mark floors and can carry high loads. Both cast iron and nylon wheels can often be noisy in operation. In areas where low noise levels are important, rubber or polyurethane tyred wheels are the best choice.

## CASTOR MOUNTING OPTIONS

#### SWIVEL CASTORS/ RIGID CASTORS

This solution offers excellent load bearing capacity and manoeuvrability and eliminates the danger of overturning uneven loads

#### **RIGID CASTORS**

This solution is recommended for medium-sized loads and trolleys moved predominantly in a straight line. With no rotating parts on the castors, maintenance is kept to a minimum.

#### **SWIVEL CASTORS**

This solution is recommended for trolleys which will be required to work in confined spaces and will be pushed or pulled from all sides. It offers the advantage of excellent manoeuvrability and load capacity.

#### SWIVEL CASTORS/ RIGID CASTORS

This is the best solution for large trolleys intended for heavy loads. It offers excellent load capacity and manoeuvrability with perfect stability. The trolley may be pushed or pulled from either of the ends with pivoting castors will pivot on half in length.

#### SWIVEL CASTORS/ RIGID CASTORS

This solution combines an excellent load capacity with equally good manoeuvrability. The load is borne by the two central fixed wheels and the pivoting wheels. There is a danger of overturning if the load is off centre and the trolley is pulled from the side.

# **FURNITURE CASTORS**

Richmond's range of furniture castors are made to suit most office furniture including chairs, trolleys and light duty cabinets such as TV units and display racking.

Featuring an economic and attractive twin wheel hooded design, these castors are perfect for DIY retro-fitting and returning rolling functionality to your furniture. This range is hard wearing and rolls over carpeted surfaces easily. A wide range of fitting options are available to suit all applications.

To order castors with Brake add B to end of swivel code e.g. S54PK2B

# BED LEG CASTORS

## Richmond's bed leg castor range is compatible with most major bed brands.

These castors and glides provide a convenient way to reposition or move your bedroom furniture on carpeted surfaces without damaging the pile.

They can also be used to provide additional clearance to allow for storage under a TV or display unit.

- Black nylon wheel or glide foot
- Suitable for carpeted surfaces
- 5/16" BSW or 3/8" BSW thread type

BEDLEG001PK2

BEDLEG005PK2

3 to de PK2B

#### Please Note: as a rule of thumb if a standard HB hex pencil slides into the threaded hole in the bed, it is 3/8".

# WEIGHT ACTIVATED FURNITURE CASTORS

These castors feature a spring-loaded brake to keep your chair from rolling away when not in use.

When sitting down and placing weight on the castor, the brake will release allowing you to roll around in your chair as normal. When getting up from your chair, the castor will lock the wheel in place.

These castors are designed to suit most office chairs and feature a wire clip fitting.

- · Grey polypropylene wheels
- Suitable for carpeted and tiled surfaces
- Wire clip fitting

RICHMOND

# LIGHT INDUSTRIAL SERIES CASTORS

This series is the ultimate choice for medium-duty applications. It offers a wide range of wheel types to suit different floor surfaces and load requirements.

The Light Industrial series is the preferred option for produce bins, market stalls and others as it provides an economical hard wearing reliable castor. It is also widely used on mobile equipment, in hospitals, nurseries, shops and general industry.

- Wide range of wheel types
- Suitable for medium-duty applications
- Available with brake

ZINC DUROLITE SERIES

# CHROME DUROLITE BOLT CASTORS

## These castors feature an attractive chrome finish, making them ideal for use in hospitals, institutions, nursing homes and retail displays.

A robust twin swivel race provides durability and longevity in the workplace.

- Large variety of wheel types
- Corrosion resistant chrome finish
- Baseplate frame or single bolt hole frame
- Available with brake

BR = Red Brake

D = Green Directional Lock

To order castors with Brake or Directional Lock add BR or D to end of swivel code e.g. S4480BR

# indicates castors not available with directional lock.

#### Castor Fitting Requirements

To fit this castor to a 20mm thick base requires a 50mm x 12mm set screw. Reduction bush 100RED12100BT available to allow fitting with 10mm set screw.

These castors have a 12mm bolt hole but can be reduced to suit an 8mm or 10mm bolt with a reduction bush (top hat).

Reduction bushes available to suit 8mm fittings, code: 100RED12080BT

to suit 10mm fittings, code: 100RED12100BT

# 200 SERIES CASTORS

With a load capacity of up to 200kg, this series features a standout red nylon thread guard for extra protection against dirt and debris.

These castors are suitable for medium-duty applications and are available with a number of wheel types.

- Nylon, poly/nylon or rebound rubber wheels
- Available with brake

( - - - )

S5600B

**Brake** 

B = Brake

Options

To order castors with

Brake add B to end of swivel code e.g. S3604B

# **300 SERIES** BOLT CASTORS

## This castor series has a higher load capacity of up to 300kg, making it perfect for a wide range of uses.

In this range, nylon wheels are the most common choice for industrial and trolley applications, rebound rubber wheels are ideal for road cases and transportable crates, while poly nylon wheels are best suited for undercover and showroom displays.

# **SELF-ALIGNING** CASTOR FRAME

The self-aligning castor function is available on all 150mm and 200mm 300 series and Excel Series castors with a swivel, brake, or directional lock.

The purpose of the self-alignment function is to eliminate free spinning of the swivel castor as the wheel becomes airborne in applications such as AGV trolley transportation in hospitals, factories, warehouses and more. The castor wheel stays in its intended tracking position, then returns to full swivel function once it makes contact with the ground. This prevents the castor from becoming jammed when it returns to the ground. The self-aligning function does not affect the overall height of the castor, and can be used with conductive or anti-static wheels.

In hospitals, Automated Guided Vehicles (AGVs) are used to transport trolleys remotely – without human assistance. A location is entered into a computer system as part of a programmed mission, all of which are monitored from a control centre. AGV trolleys remove significant labour hours from each day of hospital operations, allowing staff more time to care for patients and complete other tasks.

#### Here are some of the benefits of using self-aligning castors on trolleys that will be used with AGV systems:

- Keeps trolley wheels securely straight and in line while the AGV has the trolley raised from the ground
- Provides accurate and safe unloading of the trolleys
- Reduces physical strain and manual labour for employees
- Ensures maximum safety for staff
- Ensures maximum workplace efficiency
- · Removes any potential hazards from outward facing wheels

The purpose of the self-alignment function is to eliminate free spinning of the swivel castor. The springs will return the castor back to default forward position.

# AGV systems have many benefits in hospitals, some of those include:

- Providing a back of house hidden transportation solution
- Removal of competition for lifts or corridor walkways increasing efficiency
- Less maintenance and repairs to lift doors, walls and doors, frames – AGVs are more accurate and more predictable than humans
- Significant reduction in manual handling injuries and minor strains
- Enables more work to be done by less people
- Allows staff more time to care for patients and complete other tasks

**HEAVY DUTY WELDED SERIES** 

# **HEAVY DUTY** WELDED **SERIES CASTORS**

This range is precision built for use under extreme working conditions where a low profile, high load bearing castor is required.

A precision machines swivel ball race provides a smooth swivel action, while a kingpin made of high tensile steel can withstand high side impact loads.

- Nylon, cast iron, or polyurethane centred cast iron wheels
- Stainless steel frames available •
- Australian made forks •

## RICHMOND ROLLING SOLUTIONS

# WASTE BIN CASTORS & SETS

These castors are built to withstand the tough conditions of waste management.

Frequently seen on bulk bins and skips, this range features a heavy duty cast iron steel center for the heaviest of loads.

- SG Iron, rubber cast iron and polyurethane cast iron wheels
- Heavy duty
- · Available in sets

Baseplate dimensions & drilling patterns for Waste Bin castors

# 500 SERIES CASTORS

This range has been designed and manufactured for heavy duty applications including low speed, medium weight towing up to 6kph.

These castors are suitable for industries such as automotive, steel manufacturing and rapid production lines.

- · Large variety of wheel types
- Sealed precision machined ball race
- Heavy duty

# **FORGED HEAD** SERIES CASTORS

Applications including transport and logistics, heavy machinery, warehousing equipment and mobile platforms rely on the extreme shock loading, robust durable kingpin and drop forged steel baseplate of Richmond's Forged Head Series for loads up to 1500kg.

They are a great choice for heavy duty applications requiring a towable option.

- Polyurethane, SG iron, or solid pneumatic wheels •
- Drop forged steel baseplate

**KINGPINLESS CASTORS** 

# **KINGPINLESS CASTORS**

Richmond's kingpinless castors give you the best combination of brute strength with easy maneuverability and rollability. With a choice of Solid Black Nylon or Poly-Tyred Cast Iron Centred wheels with swivel, rigid and brake options these are also one of our most versatile, high-capacity castor series available.

A kingpinless castor is made up of fewer components which therefore requires less maintenance and is suitable for high loads.

The castor's load is also spread over a larger area and swivels more freely.

WHEEL & CASTOR PRODUCT GUID

# SHIPPING CONTAINER CASTOR MOUNTING PLATES

These mounting plates allow castors to be attached to shipping containers. Fitting requires using two left-hand and two right-hand mounting plates.

When used with our 3000 Series castors, the shipping container may have a maximum total loading of 12T, and can be towed at a maximum of 8kph.

When used with our Extra High Performance Series castors, the shipping container may have a maximum total loading of 20T, and can be towed at a maximum of 12kph.

As shipping containers have 2 left fittings and 2 right fittings, 2 x 195CONT-LOCKITL and 2 x 195CONT-LOCKITR must be ordered in addition to your 4 chosen castors.

### **KIT CONTENTS**

- 1 x Left or right corner fitting
- 1 x Locating bush
- 1 x M30 bolt

RICHMOND

- 1 x Flat washer
- 4 x M30 Spring washers & fasteners
- \*Castors sold separately

195CONT-LOCKITL a left side container mounting plate

195CONT-LOCKITR a right side container mounting plate

### To move a container order 2 x 195CONT-LOCKITL, 2 x 195CONT-LOCKITR + 4 castors.

5000kg capacity mount using Extra High Performance Series

3000kg capacity mount using 3000 Series Castor

This range is designed and made to order in Melbourne by our in-house engineering team.

# TOWMASTER SERIES CASTORS

These castors are suitable for towing speeds of up to 24kph, and were initially designed for airport ground support dollies. They are also seen in container handling areas, wharves and manufacturing plants.

- Twin wheel solid pneumatic wheels
- Ideal for tarmac use
- Richmond offers a full maintenance and service program on this castor series

ÌQ.		0	$\bigcirc$		KG	I	Ø	J	J

# SPRING LOADED SHOCK-**ABSORBING CASTORS**

S5088 Reverse View

UP TO 200KG CAPACITY

RICHMOND

These castors have been designed to reduce the impact of shocks during transport. They provide smoother movement, a reduced risk of damage and a quieter ride.

This range is ideal for use in applications on uneven surfaces, where debris are present or when moving delicate items.

- Poly cast iron wheels
- Spring absorbs impact

# **HIGH/LOW TEMPERATURE CASTORS**

# HIGH/LOW TEMP CASTORS

### This range of castors are designed for temperature fluctuation and exposure from -30° to +350° with peaks of up to 400°C.

Featuring castors from across Richmond's entire range, these high and low temperature castors are frequently seen in bakery applications, smoke houses and chillers.

- Wide range of wheel types
- Suitable for temperature ranges from -30° to +350°

### View our full range of high/low temperature wheels on page 91

# **STAINLESS ELITE BOLT CASTORS**

SUITABLE FOR WET ENVIRONMENTS FULL STAINLESS CONSTRUCTION

These castors are manufactured from grade 304 stainless steel for health and hygiene applications, such as on medical or laboratory equipment. They are also seen fitted to food carts that are frequently moved through coolrooms and steamy kitchens. This range can be hose cleaned.

- Stainless steel double ball race swivel head
- Stainless steel thread guard on 100mm and 125mm models
- Plastic thread guard on 75mm models

# **STAINLESS EXCEL** BOLT CASTORS

SUITABLE FOR WET ENVIRONMENTS FULL STAINLESS CONSTRUCTION

This range has a heavy-duty pressed stainless steel frame and full stainless componentry. They are the ideal choice for use in wet areas, frequent wash-down applications and in food and health industries. They can be fitted to equipment and trolleys with multiple options such as pre-fitted threaded inserts, solid drilled metal pintles, expanding pintles or a single bolt or plate fitting.

- Large variety of wheel types
- Ideal for wash-down applications

# STAINLESS HEAVY INDUSTRIAL SERIES CASTORS

### SUITABLE FOR WET ENVIRONMENTS FULL STAINLESS CONSTRUCTION

### These premium heavy-duty castors are suitable for heavier loads of up to 400kg per castor.

They are suitable for wash-down applications due to their polished grade 304 stainless steel construction. Stainless steel roller bearing options are available.

- Stainless steel grease nipple for added lubrication
- Stainless steel upper & lower ball bearings for added corrosion resistance
- Nylon head seal for added protection from water and other outside factors

### MEDI TWIN SI MEDICAL CASTORS ERI

This series has been designed for medical applications such as on medical carts and monitor trolleys. Twin polyurethane wheels are non-marking and provide a smooth ride. These castors are an attractive choice for all medical and healthcare environments, and are available with brakes.

- Non-marking polyurethane wheels
- Available with brakes

# THERMOPLASTIC **RUBBER** MEDICAL CASTORS

These castors are ideal for light to medium duty applications, such as on shower and commode chairs, food service trolleys and racking, utility trolleys and hospital equipment.

Thermoplastic wheels are quiet running, non-marking and offer a low rolling resistance. An enclosed plastic housing design reduces the amount of bacteria that sticks to the castor and components.

- Suitable for wash-down applications
- Attractive grey finish

### **ENCLOSED** PLASTIC DESIGN

Less exposed metal components, reducing the amount of bacteria that sticks to the castor and components.

### ATTRACTIVE GREY **NYLON FRAME**

Suitable for washdown applications.

### **NON-MARKING** WHEELS

## CENTRAL LOCKING MEDICAL CASTORS

This range are ideal for use on hospital beds and equipment. They feature a central locking system, offering free swivel, total lock or directional lock administered via the castor stem. These castors are smooth running, offer positive brake performance, quiet motion and an attractive chrome finish.

- Grey rubber wheels
- Central locking stem system

# **STAINLESS STEEL** CATERING LEGS

Catering legs are suitable for use on catering equipment such as display fridges, preparation tables and bain maries. They are made from grade 304 stainless steel and are interchangeable with leading manufacturers. The use of catering legs allows for easy access underneath equipment to ensure a clean and hygienic environment. They feature an adjusting design, allowing for the quick levelling of your bench or fridge.

Compatible with New Zealand style SKOPE brand display fridge units and bain maries. Plate is in zinc plated mild steel.

CATERPLATEZP

Compatible with major manufacturer display fridges, preparation benches, bain maries, display cabinets etc. This baseplate is made from zinc plated mild steel.

CATERPLATESS

Compatible with major manufacturer display fridges, preparation benches, bain maries, display cabinets etc. This baseplate is made from grade 304 stainless steel.

LOW PROFILE CASTORS

# **LOW PROFILE CASTORS**

These castors are ideal for maintaining a low overall height and centre of gravity without compromising on a high load capacity. The hard-wearing nylon wheels offer low rolling resistance, minimal maintenance and maximum strength. They are suitable for use on manufacturing equipment, electrical cabinets, office equipment and more.

- Low overall height withhigh load capacity
- Swivel plate or bolt hole mounting options .

### LOW PROFILE BOLT CASTOR

Low Profile Castors

This castor is ideal for moving, levelling and immobilising equipment.

It allows for leveling adjustment of up to 10mm over the total height of the castor, offering a multitude of uses.

| Diameter<br>(mm) | Wheel<br>Width<br>(mm) | Wheel<br>Type | Bearing<br>Type | Load<br>Capacity<br>(kg) | Lowered<br>Height<br>(mm) | Max Adjusted<br>Height<br>(mm) | Part<br>Number |  |

# **ADJUSTABLE HEIGHT** CASTOR

### This castor is adjustable from 150mm to 160mm in height.

It is ideal for levelling equipment on uneven floors, or adjusting to a height the best suits your working needs. The levelling action is activated by twisting the top of the castor. This castor is most commonly used on kitchen equipment and is suitable for all kinds of commercial kitchen and industrial applications.

| Diameter<br>(mm) | Wheel<br>Width<br>(mm) | Wheel<br>Type | Bearing<br>Type | Load<br>Capacity<br>(kg) | Lowered<br>Height<br>(mm) | Max Adjusted<br>Height<br>(mm) | Part<br>Number |

# SCAFFOLD CASTORS

These scaffold castors are compatible with Kwik Stage Steel Scaffolding and mobile Aluminium Scaffolding/ Platform products. They are tested and approved to AS1576.2 2009 standards.

They are designed to accommodate a variety of scaffold tubing including mild steel or aluminium with an outer diameter of 48.3mm. Solid round tubing is also suitable with an outer diameter not exceeding 50mm.

The adjustable scaffold castor is designed to accommodate a variety of scaffold tube including mild steel or aluminium with an outer diameter of 48.3mm and internal diameter of 39.46mm.

### TUBE TYPE SCAFFOLD CASTOR TO SUIT 48MM OD TUBE

Additional socket and pin sizes are available. Contact us to find out more.

This castor suits round solid or tubular tube with a maximum outer diameter of 38mm. This castor is not suitable for use on scaffolding.

# **PINTLE TYPE** PLATFORM CASTORS

This castor features a high capacity poly tyred nylon centred wheel design with a swivel lock & brake frame and a 27mm pintle stem. This castor is not suitable for use on scaffolding.

| ÌQ.              |               | 0             | $\bigcirc$    | KG                       | T              |
|------------------|---------------|---------------|---------------|--------------------------|----------------|
| Diameter<br>(mm) | Width<br>(mm) | Wheel<br>Type | Wheel<br>Code | Load<br>Capacity<br>(kg) | Swivel<br>Code |
| 150              | 50            | Polyurethane  | PU6071        | 400                      | S6654B         |

### There Are 3 Common Scaffold Castor Fixing Methods:

### 1: Hollow Nut:

Suitable for Kwik stage steel scaffold leg: 48.3mm OD x 4.0mm wall thickness = 40.3NB, Aluminium Scaffold leg 48.4mm OD x 4.47mm wall thickness = 39.46 nominal bore

**2: Internal Tube:** 

Suitable for Kwik stage steel scaffold leg: 48.3mm OD x 4.0mm wall thickness = 40.3NB, Aluminium Scaffold leg 48.4mm OD x 4.47mm wall thickness = 39.46 nominal bore

Adjustable scaffold castor are designed to accommodate a variety of scaffold tube including mild steel or aluminium with an maximum outer diameter of 48.3mm diameter and internal dimension 38.5mm.

Tube scaffold castor are designed to accommodate a variety of scaffold tubing including mild steel or aluminium with an outer diameter not exceeding 48.3mm.

Solid round stem castors are also suitable with an outer diameter not exceeding 49mm. Solid stem castor fixing requires the stem to be secured in place to ensure it cannot fallout when raised or placed on uneven surfaces.

### **3: Solid Stem:**

Kwik stage steel scaffold leg: 48.3mm OD x 4.0mm wall thickness = 40.3NB Aluminium Scaffold leg 48.4mm OD x 4.47mm wall thickness = 39.46NB

# **SPRING LOADED** GATE CASTORS

This range of spring-loaded gate castors are designed to make opening and closing of residential gates easier. The spring design provides shock absorption features specifically for use on uneven surfaces. The gate mount is integrated into the frame of the castor for ease of fixing to any gate system.

- Rebound rubber or nylon wheels
- Shock absorbing spring design
- For residential gates

### RICHMOND

# **JOCKEY WHEELS**

Jockey wheels are suitable for use on caravans, campers, boat trailers and other trailers used for transporting goods for leisure or business. They are available in swing-up and clamp style models.

**Please Note** 

When moving equipment, the best performance is achieved with the jockey wheel being at its lowest position. Moving equipment with the jockey wheel in a high position is not safe or advised. All load capacities are based on smooth concrete or asphalt surfaces.

# **GLASS HANDLING BALL TRANSFER** CASTORS

These castors have been designed for the smooth and efficient transfer of glass and other flat sheet materials with minimal impact or damage.

They are available in polyurethane or rubber varieties. Rubber ball transfers offer better grip, while polyurethane ball transfers offer a more wear-resistant option.

We can custom design and manufacture glass ball transfer tables. Contact us to find out more.

# **BASEPLATE MOUNTS & STILLAGE FEET**

Richmond has a range of mounting plates to suit most castors. These are ideal for welding to your base frame.

Stillage feet are primarily designed for stillages and crates that need to be stackable. They have a heavy duty press steel construction, a square base for stability and are unpainted, ready to weld.

### How to use the baseplate mounts:

- Weld the baseplate onto your table leg or bench leg etc.
- Using bolts, attach a castor with matching top plate to the baseplate.

BPR01 Base plate size: 96 x 70mm Hole centres: 75 x 45mm Suits bolt size: 8mm Series: Light Industrial

Wheels are the heart and soul of who we are. We have thousands of wheel choices in our standard range, and if we don't have what you're looking for, we can design and manufacture it for you. Our wheels are available with load capacities from 10kg up to 10T, with a large variety of wheel types.

# **PNEUMATIC WHEELS** PLASTIC CENTRED

Plastic centred pneumatic wheels feature a quality corrosion and rust resistant plastic rim, making them ideal for applications in wet or damp environments. They are suitable for use on nursery trolleys, hand trucks, agricultural equipment and more. They are an economical alternative to steel-rimmed pneumatics.

- Plastic rim for use in wet or damp environments •
- Diameters ranging from 150mm to 400mm

# **PNEUMATIC WHEELS**

# **PNEUMATIC WHEELS** STEEL CENTRED

Steel centred pneumatic wheels are ideal for use in garden, industrial and agricultural equipment, as well as on concrete mixers. They are manufactured with one piece or three piece rims.

The 1 piece rims are powder coated and fitted with flange ball bearings. Our premium wheels are zinc plated, fitted with precision bearings and come with 3 piece rims for superior strength and durability.

- Diameters ranging from 210mm to 400mm
- Six tread patterns

# **PUNCTURE PROOF** WHEELS

Puncture proof wheels are filled with foam instead of air, eliminating the possibility of punctures and flat tyres. They are a tough and reliable choice for use on nursery trolleys, hand trucks, wheelbarrows and other rolling equipment. They are available with steel or plastic rims to suit different applications.

- Foam filled tyres eliminate flats
- Plastic or steel rims
- Four tread patterns

### **Tread Types**

# OFFSET **PNEUMATIC** WHEELS

These pneumatic wheels are suitable for use on most hand trolleys with offset hub.

They are available with either 54mm or 60mm offset boss widths.

**BEACH WHEELS** 

# BALLOON BEACH WHEELS

Balloon beach wheels are made from polyurethane and are ideal for use over soft sand, mud, gravel, grass and rock. They can also handle harder surfaces such as concrete footpaths and roads. They are commonly seen on wheelchairs and other mobility equipment.

- For use on soft and uneven terrain
- Commonly seen on wheelchairs and beach carts
- Plastic rust-free hub

PF1105-1

**Please note:** Beach wheels are designed to be inflated to a rating of 2-4 PSI only. They are meant to be slightly squishy like a balloon. A bicycle pump is best for inflation. Compressed air can be used but care must be taken to ensure the wheels are not over-inflated.

# PUNCTURE PROOF NYLON BEACH WHEELS

These wheels are ideal for use over rough and uneven terrain, and due to their solid nylon construction, will not puncture. They are commonly seen on kayak trolleys and other marine equipment.

- For use on rough and uneven terrain
- Commonly seen on kayak trolleys and marine equipment
- Solid nylon construction

### Axles & Axle Mounting Kits to Suit Available

Available in 1" and 20mm Diameters

richmondnz.co.nz

# **RUBBER**/ **PVC TYRED** WHEELS

Rubber and PVC tyred wheels are an excellent low-cost, lightweight and durable solution for outdoor use. They are non-marking and due to their plastic construction, ideal for wash-down applications and prolonged outdoor exposure. They are commonly seen on barbecues, lawn mowers, billy carts, children's buggies and more.

- For prolonged outdoor exposure
- Lightweight and durable .

### Knock on retaining axle caps are available and provide an easy fixing arrangement.

**RUBBER/PVC TYRED WHEELS** 

# RUBBER TYRED NYLON CENTRED WHEELS

These wheels have a rust-free nylon plain bore, making them an ideal choice for permanent outdoor settings. They are commonly seen on outdoor furniture, barbecues and nursery trolleys.

- For permanent outdoor exposure
- Solid rubber wheel
- Rust-free nylon centre

# SEMI-PNEUMATIC RUBBER TYRED WHEELS

### These semi-pneumatic rubber tyred wheels have excellent shock absorbing and puncture proof qualities.

They are commonly seen on portable equipment, steam cleaners, nursery trolleys, compressors and portable welders.

- Puncture proof construction
- Low rolling resistance
- Quiet operation

# RUBBER TYRED NYLON WHEELS

These rubber wheels have a nylon centre which makes them highly resistant to corrosion. They are lightweight while still maintaining a high load bearing capacity. Rubber tyred nylon wheels are a low-cost alternative to rubber tyred cast iron wheels.

- Lightweight with high load capacity
- Corrosion resistant

These wheels have a cast iron centre which results in extra strength and ease of movement. They also offer a cushioned ride, are shock absorbing and are fitted with roller bearings.

Blue tyres in this range are non-marking with high resilience, while black tyres in this range are harder wearing and will therefore last longer.

- Extra strong cast iron centres
- Quiet operation
- Non-marking or hard-wearing wheels

# INSTITUTIONAL **RUBBER** WHEELS

This range of grey rubber wheels are non-marking and feature sealed bearings with matching grey nylon threadguards for added protection. Models marked with \* come with chrome threadguards which are ideal for use in hospitals, schools, home use and light industrial applications.

- Non-marking grey rubber wheels
- Sealed threadguards for protection
- Commonly seen used in institutions

# **ANTI-STATIC RUBBER** WHEELS

Anti-Static Rubber Wheels provide a surface resistivity of less than 10,000  $\Omega$  (OHM). The resistance can increase as a result of mechanical influence. The wheels conform to AS 2050 1978.

The wheels in this range are grey rubber with a nylon centre. Wheels marked with an \* feature a black rubber tyre with a chrome centre. We also produce a large range of anti-static (conductive) polyurethane wheels.

# REBOUND RUBBER WHEELS

These wheels are non-marking, quiet, shock absorbing and have a low rolling resistance. They are ideal for moving lightly loaded equipment over uneven ground.

Rebound rubber wheels roll over small obstructions easily, and are commonly seen on waste bins, laundry trolleys, electrical equipment and other 'handle with care' goods. Stainless steel bearing models are also available.

- High shock absorbing qualities
- Non-marking
- Corrosion resistant models available

## **ELASTIC RUBBER** WHEELS

Elastic rubber wheels are quiet, shock absorbing and provide a cushioned ride for fragile loads. They manoeuvre well over small obstacles, and have a strong resistance to wear and tear. These wheels are not recommended for applications where solvents are present.

Ideal for fragile loads •

RICHMOND

- Quiet and shock absorbing
- Corrosion resistant models with threadguards available

# **REBOUND POLY TYRED** WHEELS

These wheels have a softer than normal tyre, which provides a smoother, quieter ride than most polyurethane or nylon wheels.

The attractive sky blue tyre will remain cleaner than other types and when combined with stainless steel bearings, these wheels are suitable for clean rooms and other applications where aesthetics and performance are crucial.

- Soft and quiet riding
- Tyres remain cleaner than other wheels

## **DONUT PROFILE POLY TYRED ALUMINIUM CENTRED** WHEELS

These polyurethane tyred aluminium centred wheels require 20% less force to move than comparative wheels. The reactive polyurethane wheel tread is chemically and mechanically moulded on to a lightweight aluminium centre.

- 20% less force to move •
- Lightweight aluminium centre

**CROWNED POLY ALUMINIUM WHEELS** 

# CROWNED **POLY TYRED ALUMINIUM CENTRED** WHEELS

Crowned polyurethane wheels offer a much lower rolling resistance compared to traditional flat treaded wheels. They are constructed from a quiet running polyurethane tyre around a lightweight aluminium centre.

They have a high resistance to chemicals and abrasive wear, and feature precision ball bearings for extended bearing life.

- Lower rolling resistance
- Quiet running .
- High resistance to chemicals & abrasive wear •

# **POLY TYRED NYLON CENTRED** WHEELS

These wheels are manufactured from injection moulded polyurethane around a nylon hub. They are hard wearing, non-marking and long lasting with high load carrying abilities.

These wheels are suitable for intermittent use only. If your application required continuous running usage, our engineering department can recommend more suitable polyurethane tyres.

- Hard wearing and non-marking
- High load capacities
- For intermittent use only

# POLY TYRED CAST IRON CENTRED WHEELS

These polyurethane tyred cast iron centred wheels have a hardness ranging from 60A to 75D on the shore scale. They are suitable for intermittent use only. If your application requires continuous running usage, our engineering department can recommend more suitable polyurethane tyres. Special tyres and other polyurethane parts are manufactured in-house.

# DRIVE WHEELS

Drive wheels are polyrurethane tyred with a hardness of 85A on the shore scale. The cast iron centre is bored to provide a transition fit onto a shaft.

These drive wheels are stocked without keyways cut, but if your application requires keyways we can supply on request. These wheels are suitable for intermittent use only. If your application requires continuous running usage, our engineering department can recommend more suitable polyurethane tyres.

- 85A shore scale hardness
- Available with keyways cut on request

# HIGH/LOW **TEMPERATURE** WHEELS

These glass-filled nylon, cast iron, aluminium or high temp polymer wheels are commonly seen on bakery ovens, smoke houses, chillers or applications where there is temperature fluctuation and exposure from -30° to +350°C with peaks up to 400°C.

Aluminium models AL472 and AL473 are fitted with DU Teflon bushes for noiseless ease of use, while AL471 and AL474 are fitted with aluminium bronze bushes for extremely high temperatures.

All wheels can be fitted to a variety of castor frames. Get in touch with our team for a more comprehensive evaluation of your requirements.

# SOLID NYLON WHEELS

These wheels are constructed from virgin nylon and are fully conditioned in an industrial sauna for maximum strength. They are an easy to maintain and durable wheel with low rolling resistance. They are high wearing when compared to equivalent sized rubber wheels. These solid nylon wheels are available in black or white.

- Conditioned for maximum strength
- Plain bore models suitable for wash-down applications
- Available in black or white

To specify wheels in black or white add **BLK** or **WHT** to to the end of the part number.

For example NY501BLK is a 100mm black nylon wheel, and NY501WHT is a 100mm white nylon wheel.

# **POLYURETHANE & NYLON ROLLERS**

# **POLYURETHANE** & NYLON ROLLERS

These polyurethane and nylon rollers are commonly used as replacement parts for pallet jacks and other equipment. They offer good wear resistance, and are available in a number of sizes and configurations. Our engineering department can custom design and manufacture rollers for printing and press applications.

- Replacement parts for pallet jacks & equipment
- Good wear resistance

# CAST IRON & SG IRON WHEELS

Both cast iron and spheroidal graphite iron wheels provide a high capacity with low rolling resistance. They are hard wearing as well as abrasive and heat resistant.

They can be used for high load bearing applications in which loads are left standing for extended periods, as they will always be ready to roll due to their low rolling resistance.

- High load capacity
- Low rolling resistance
- Abrasive and heat resistant

Ci842

# CUSHION RUBBER WHEELS

These wheels can withstand high impact while still offering a soft ride. The steel centre adds additional strength while quality elastic rubber compound tyres result in a softer, shock absorbing ride.

- Soft, shock absorbing ride
- Can withstand high impact

# SOLID PNEUMATIC WHEELS

These wheels are puncture proof for long wear, and feature split pins with rugged bolt-on hubs. The unique formulation of these solid pneumatic wheels provides the performance of a pneumatic tyre but with a much higher load capacity. They are towable up to 24kph and are ideal for tarmac use.

- Towable up to 24kph
- Puncture proof
- High load capacity

# CONCRETE AGITATOR & TRUNNION ROLLERS

These concrete agitator rollers are designed for small to large concrete trucks. They are suitable for all trommel applications with nylon and aluminium rollers made to order.

A full range of spare parts are available for these rollers.

CAPACITY

# **TRACK WHEELS - SINGLE FLANGE**

# **TRACK WHEELS** SINGLE FLANGE

Single flange wheels are designed to run on railway line. They are made from cast iron to suit your application, with axle shafts available.

Track wheels can be flame hardened to increase wear resistance, and are also available as drive wheels. These wheels can also be used on other sections such as RHS.

# **TRACK WHEELS** DOUBLE FLANGE

Double flange wheels are often used where accurate tracking is needed. They are manufactured using K1045 steel, and can be matched with a flat rim wheel to guide on one side of the track only.

Axle shafts are available upon request. These wheels can be flame hardened to increase wear resistance, and are also available as drive wheels.

## **TRACK WHEELS BEAM TROLLEY**

These beam trolley wheels have been designed to fit standard channel and beam sections. They are manufactured using K1045 steel, making them strong and reliable track wheels.

# **TRACK WHEELS** V GROOVE

These V groove track wheels are CNC machined from cast iron, K1045 steel or SG iron. They are suitable for running track wheels on bars, pipes, angle iron or rope.

Capacities can be increased with changes to bearing and shaft configurations. Our engineering department can also design and manufacture V groove track wheels to your specifications.

# **TRACK WHEELS ROPE GROOVE**

These rope groove track wheels are CNC machined from cast iron, K1045 steel or SG iron. They are suitable for running track wheels on bars, pipes, angle iron or rope.

Capacities can be increased with changes to bearing and shaft configurations. Our engineering department can also design and manufacture rope groove track wheels to your specifications.

**BALL TRANFERS** 

# BALL TRANSFER UNITS

Ball transfers enable the smooth and simple transfer of objects in any direction. These ball transfers consist of a large load bearing roller sitting upon many smaller balls encapsulated in a cup. Where moving heavy loads is paramount, multi-directional movement is essential. These ball transfers are commonly used around presses, guillotines and packing machines. They make for perfect transfer stations from one conveyor to another.

Richmond can customise ball transfer tables to suit your application.

# **FLOW RAILS**

### Flow rail systems are gravity driven and ideal for applications where picking and stock turnover is frequent.

They reduce manual handling, by presenting on a stock rotation basis as inventory flows on a first-in-first-out system. They can be easily incorporated into racking or custom framing, providing unlimited solutions in the manufacturing industry.

# SKATE RAILS

Skate rails are a heavy duty alternative to flow rails, and are suitable for heavy industrial loads, pallets and larger, robust cartons.

They are free-flowing and gravity driven. They are designed to reduce costs by reducing manual handling.

|          | Model<br>Number | Load Capacity<br>(kg) | Skate<br>Type | Pitch<br>(mm) | Width<br>(mm) | Roller<br>Diameter (mm) | Length<br>(mm) |

# **CONVEYOR** ROLLERS

Richmond Gravity Conveyor Rollers allow free moving, efficient and safe transportation of goods at any operational stage of a conveyor line. Producing movement via natural forces, gravity conveyors are an economical material handling solution used in many industries for simplicity and functionality.

Spring-loaded shafts provide hassle free maintenance and simple installation. They ensure secure attachment to the conveyor frame (channel) maximising roller and bearing function and performance. Rollers are available in zinc plated steel, nylon and stainless steel for wash down applications.

It is recommended that there be a minimum of three rollers under the goods being transported at any one time. The size of the object being transported can help determine the roller pitch on your conveyor system applying the three roller rule.

Richmond can custom manufacture gravity conveyor rollers to length, diameter and shaft requirements.

### We make conveyor rollers to size. Contact us to find out more.

# CUSTOM CONVEYOR SOLUTIONS

### What do we offer?

- Our onsite engineers can design to any specification
- From concept through to manufacture and installation, we are with you every step of the way
- We have over 60 years of industry experience to back us up. We know conveyors -custom solutions are what we do best.

# No matter the application or industry, Richmond have got a solution. You name it, we've done it.

Warehousing & Distribution

Food Processing

Agricultural

Automotive

### Why choose us?

- On-site engineers ready to tackle your project
- On-site manufacturing machinery
- Solution Nationwide service
- 60+ years of industry experience
- Solution 100% family owned and run

RICHMOND

FLOOR LOCKS

# **FLOOR LOCKS**

Floor locks are designed to stop portable equipment and trolleys from moving. They are foot-operated and feature a long-lasting resilient polyurethane pad and swivel base for uneven floors.

| Extended Height<br>(mm) | Retracted Height<br>(mm) | Stroke | Pedal Length<br>(mm) | Floor Lock<br>Code |
|-------------------------|--------------------------|--------|----------------------|--------------------|
| 155                     | 130                      | 25     | 140                  | 900-2FL            |
| 215                     | 170                      | 45     | 145                  | 900-4FL            |

### FLOOR LOCK OPERATION

- 1. Depress the down pedal as far as it will go. The lock is now set.
- 2. To unlock, press the up pedal until it is level with the down pedal. Release. The base will then retract from the floor.

### **SELECTING & INSTALLING FLOOR LOCKS**

- · It is important to select a model which clears the floor when retracted
- To adapt a floor lock to your current equipment, select a model with an extended height 1.6mm to 6mm greater than the overall height of the castors.
- · The lock must be centred between castors
- When installed the floor lock must be set 5mm from ground level when in the UP position. •

For stainless steel options add SS to the part number e.g. TIR19SQM08SS

For stainless steel options add SS to the part number e.g. TIR25R0M08SS

**ADJUSTABLE FEET & INSERTS** 

Scan to view online AU: richmondau.com

### **LEVELLING FEET** FIXED - RUBBER & STEEL BASE

Used to provide a level, stable base for tables, machinery, or equipment. Richmond's range of adjustable feet help ensure your table, workbench machinery etc. is mounted correctly and levelled on uneven surfaces. Adjustable feet also help to prevent tipping, vibration, wear and noise.

### FIXED - RUBBER BASE

| Size     | Base<br>Diameter (A) | Base<br>Height (B) | Thread<br>Length (C) | Thread<br>(D) | Load<br>Capacity | Part<br>Number |

# SLEEVES & REDUCTION TOP HATS

Richmond's range of sleeves are most commonly used inside roller bearings or plain bore wheels for castors.

A range of top hats are available to reduce precision bearing sizes. Mild steel axles are available from Richmond to suit our wheel range. Axles are easily cut to length to suit any application.

#### **SLEEVES - MILD STEEL**

| OD (A) | ID (B) | Length(C) | Product Code |

#### WHEEL & CASTOR PRODUCT GUIDE

# **PINTLE PARTS**

Solid metal pintles are used to ensure castors and securely fastened into position. Solid pintles are maintenance free, and both solid and threaded metal pintles fit all of our pintle castors.

Threaded metal pintles are used when a variety of thread sizes are required. Other sizes available for quantity order.

#### **EXPANDING PINTLE PARTS - FOR ROUND TUBE**

These expanding pintles are perfect to attach our bolt hole castors into round tubular legs. These pintles are made out of nylon and come with a suitable zinc-plated or stainless steel pintle bolt.

SMPS-32M

# BEARINGS

We use a lot of different types of bearings in the production and assembly of our products. With over 60 years of designing Wheels and Castors behind us, we have deep experience in the choice and use of bearings of all types.

Contact our knowledgeable team for help choosing the perfect bearing for your application.

## **FLANGE BEARINGS**

| Outer Diameter    | Internal Diameter | Product Code |
|-------------------|-------------------|--------------|
| 1 1/8" (28.575mm) | 1/2" (12.7mm)     | FUB-50       |
| 1 3/8" (34.925mm) | 5/8" (15.875mm)   | FBB-62       |
| 1 3/8" (34.925mm) | 3/4" (19.05mm)    | FBB-75       |
| 2" (50.8mm)       | 1" 25.4mm         | FBB-1        |

#### **PRECISION BALL BEARINGS**

| Outer Diameter | Internal Diameter | Bearing Width | Seal Type   | Product Code |
|----------------|-------------------|---------------|-------------|--------------|
| 28mm           | 12mm              | 8mm           | Rubber Seal | 6001-2RS     |
| 40mm           | 3/4" (19.05mm)    | 12mm          | Rubber Seal | 62032RS-75   |
| 40mm           | 17mm              | 12mm          | Rubber Seal | 62032RS-17   |
| 40mm           | 5/8" (15.875mm)   | 12mm          | Rubber Seal | 62032RS-62   |
| 42mm           | 20mm              | 12mm          | Rubber Seal | 60042RS-20   |
| 47mm           | 20mm              | 14mm          | Rubber Seal | 62042RS-20   |
| 47mm           | 3/4" (19.05mm)    | 14mm          | Rubber Seal | 62042RS-75   |
| 52mm           | 1" (25.4mm)       | 15mm          | Rubber Seal | 62052RS-1    |
| 52mm           | 25mm              | 15mm          | Rubber Seal | 62052RS-25   |

#### **BEARING TYPES**

#### PLAIN BORE WHEELS

Are normally polypropylene, nylon or cast iron and are suitable for lighter loads where rolling resistance is not as important. They are used in very wet, corrosive or high heat conditions where better bearings would not survive.

Are fitted to most of our heavy duty wheels. Such wheels have very low rolling resistance and are normally provided with double seal bearings that are 'sealed for life.' If the application required regular greasing, grease nipples can be fitted.

bearings are fitted with oil seal sleeves. The axle design must allow for fine adjustment of distance between bearing cones.

#### ROLLER BEARINGS

Are suitable for medium duty applications. If kept well greased, they can cope with some dirt or water. Best service is given on hardened axles. These bearings do not require axial adjustment.

#### TAPER ROLLER BEARINGS

# BUFFERS

These non-marking round corner and D section buffers are a great way to protect doors and corridor walls. Round buffers are fitted onto a round/square RHS tube and Corner and D section buffers are fitted using self tapering scews.

Ideal for use on flat bed trolleys, mobile tables, as well as hospital beds and equipment. We can also manufacture different shapes and sizes in polyurethane to suit your requirements.

| PVC ROUND BUFFERS - ROUND & SQUARE TUBE FITTING |                                 |              |  |  |
|-------------------------------------------------|---------------------------------|--------------|--|--|
| Buffer Description                              | Measurement                     | Product Code |  |  |
| Round Buffer                                    | Suit 25mm SQUARE x 125 DIA      | BUFFER12     |  |  |
| Round Buffer                                    | Suit 25mm ROUND x 125 DIA       | BUFFER13     |  |  |
| Round Buffer                                    | Suit 32mm ROUND x 125 DIA       | BUFFER14     |  |  |
| Round Buffer                                    | Suit 38mm x 2mm RHS x 125mm DIA | BUFFER15     |  |  |

Fitted to square or round tubular trolley legs before castors, the buffer sits loosely on top of the castor, absorbing and reducing damage.

| PVC ROUND BUFFERS - ROUND & SQUARE TUBE FITTING |                            |              |  |  |
|-------------------------------------------------|----------------------------|--------------|--|--|
| Buffer Description                              | Measurement                | Product Code |  |  |
| Round Buffer                                    | Suit 25mm SQUARE x 125 DIA | BUFFER02     |  |  |
| Round Buffer                                    | Suit 25mm ROUND x 125 DIA  | BUFFER06     |  |  |

Fitted to square or round tubular trolley legs before castors, the buffer sits loosely on top of the castor, absorbing and reducing damage.

| CORNER BUFFERS     |              |              |  |  |  |
|--------------------|--------------|--------------|--|--|--|
| Buffer Description | Measurement  | Product Code |  |  |  |
| Corner Buffer      | 50mm x 19mm  | BUFFER04     |  |  |  |
| Corner Buffer      | 65mm x 25mm  | BUFFER05     |  |  |  |
| Corner Buffer      | 75mm x 25mm  | BUFFER01     |  |  |  |
| Corner Buffer      | 110mm x 25mm | BUFFER16     |  |  |  |
| Corner Buffer      | 103mm x 35mm | BUFFER17     |  |  |  |

Corner buffers are fitted to the square edges of new or existing trolleys to cushion impact against walls or doors.

 D SECTION BUFFER

 Buffer Description
 Measurement

| Measurement           | Product Code |
|-----------------------|--------------|
| 20mm x 30mm W x 7 MTR | BUFFER07     |
|                       |              |

D Section buffers are used to run along trolley edges between corner buffers.

# TRICASTOR STAGE DOLLIES

Custom designed and manufactured by our in-house engineering team, these dollies feature a heavy duty, robust top plate and a high load capacity. These dollies can manoeuvre heavy loads with ease, even in tight spaces making them ideal for theatrical sets and stage equipment.

These dollies provide easy mobility to your sets and equipment and keep your production running by reducing strain and overexertion to the crew as they move sets and equipment around the stage.

The design of these triple wheel dollies is customisable to accommodate a range of different wheel types and capacities. Richmond can custom design and manufacture heavy duty dollies up to 20 tonne to suit to customers requirements. TRICASTOR3

# ENGINEERING SERVICES

We aren't just suppliers - we're creators. Our team have the knowledge and the tools to take every project to the next level.

Whether it's design, design and supply or complete project management, we've got you covered.

# WHAT ARE OUR CAPABILITIES?

## TAILORED AND ENGINEERED SOLUTIONS

Over 60 years experience as a big project, critical component partner for moving bulky items. We design and manufacture practical and uncomplicated solutions that aligns with the project requirements.

## IN-HOUSE MANUFACTURING CAPABILITIES

Our skilled operations team have expertise in the use of manufacturing machinery that enables both a fast turnaround and a high level of quality control. The engineers work side by side with the machine operators.

#### Our manufacturing machinery includes:

- Lathes
- CNC machinery
- Robot Welder
- Casting machinery
- Polyurethane manufacturing
- Liquid nitrogen axle fitting

## **3D PRINTING CAPABILITIES**

Product concepts can be quickly conceptualised and validated.

## F.R.A.S. POLYURETHANE SOLUTIONS

A polymer additive used in the manufacture of polyurethane products makes the solution fire resistant and anti static. Ideal for use in mining, pipeline and fluid transport systems when compliance with Electrical Resistance and Fire Resistance standards are required.

## **NETWORK OF SPECIALISED SUPPLIERS**

Our operations team can quickly source low cost solutions.

## **ISO9001 ACCREDITED**

Our processes are internationally accredited, ensuring a high-quality fit for purpose solution that is rigorously tested and reviewed before delivery to market.

## **FAST TURNAROUND**

From concept to solution our design, sourcing and manufacturing infrastructure enables us to meet the tightest of deadlines.

# **TAILORED ENGINEERING SERVICES**

Specialising in the design and manufacturing of practical turnkey solutions. Need to move something big and heavy? We have what you need.

# HOW DO WE DEVELOP THE BEST SOLUTION FOR YOU?

## At Richmond Wheel and Castor Co. we understand that when it comes to developing tailored solutions it is critical that we:

- Closely consult with our customers from the beginning and validate throughout the design process. The earlier we are involved at the design stage, the easier it is to develop the optimum solution.
- Follow an ISO9001 structured process to ensure all details are managed.

This methodology has ensured our customers are always delivered a cost effective and practical solution and continue to return to Richmond Wheel & Castor Co. for their tailored materials handling requirements.

Richmond's Melbourne-based engineering department can custom design a solution to meet your requirements.

Contact us to find out how we can help with your project.

WHEEL & CASTOR PRODUCT GUIDE

#### JOBO MASCINEN GMBH

#### PIPE ROLLER DESIGN AND MANUFACTURE

**Brief:** Design and manufacture 150 large scale pipe rollers to launch pipe from on-shore to an off-shore docking platform as a part of a major infrastructure upgrade for oil and gas pipelines in Nigeria. These stackable, twin roller assemblies easily nest inside of a shipping container for transport or storage.

**Image:** One of our largest engineering projects to date. The success of the rollers demonstrates our ability to provide a complete turnkey solution from start to finish, including all design, material selection, verification, testing and construction.

#### **JOHN ROBBINS (USA)**

#### **TUNNEL BORING BOGIES AND COMPONENTS**

**Brief:** Supply of 80 x 40-ton capacity tunnel boring bogies, 2 x 80-ton tunnel boring super bogies, and a wide variety of tunnel boring plastic wear plate components, heavy duty weldments, heavy duty guide rollers and FRAS (fire retardant anti-static polymer components).

**Image:** Bogies and components in action on tunnel boring machinery.

**CUSTOM WHEELS & ROLLERS** 

CUSTOM WHEELS AND ROLLERS CAN BE DESIGNED, MANUFACTURED, AND ASSEMBLED TO SUIT YOUR PROJECT REQUIREMENTS

#### **HEDWELD ENGINEERING**

#### HIGH CAPACITY SKID STEER WHEELS FOR TYRE STAND

**Brief:** Supply of 40-Ton capacity skid steer wheels for mining machinery maintenance.

Image: Castors in action on tyre stand.

#### JOHN HOLLAND

#### **TRENCHLESS PIPELINE ROLLERS**

**Brief:** Design and manufacture a 10-ton load capacity pipe roller solution for the transport of water mains pipe through tunnels.

**Image:** This simple and efficient design allows for large carrying capacity and safety at the lowest possible cost.

#### **DOWNER EDI**

#### **HIGH CAPACITY CASTORS**

**Brief:** Design and manufacture 16 x 10-ton capacity castors.

**Image:** 16 x 10-ton capacity castors packed and ready for delivery.

#### CONFIDENTIAL

#### WHEELS FOR WAVE MAKING MACHINE

**Brief:** Design and manufacture heavy duty linear support wheels for wave making machinery.

**Image left:** Machinery produces perfect surfing waves in a man-made lake.

**Image right:** Linear support wheels straight off the production line.

# WHAT DOES THE INDUSTRY HAVE TO SAY ABOUT US?

"Richmond Wheel and Castor Co. is a genuine Australian success story. Since its humble beginnings as a one-man steel trading operation in the 1950s, three generations of the Winslow family have steered the business through recessions, downturns and the global financial crisis to its commanding current day position as one of the longest standing – and most successful – materials manufacturers in Australia." "Richmond met and exceeded the stringent timeline requirements and, utilised manufacturing and assembly in both Melbourne and Perth to ensure satisfactory completion in a compressed timeline."

Regarding Perth slipway project. Manufacturers' Monthly, May 2018 "Richmond is at the forefront of engineered materials handling solutions, including heavy duty castors, machined componentry, wheels, general engineering works and direct access to onsite engineers."

The Australian Pipeliner, official magazine of the Australian Pipelines and Gas Association. March 2016 "Having supplied key infrastructure for Christies Beach Wastewater Treatment Plant and various other major Australian projects, Richmond Wheel and Castors get products and projects moving on custom-built wheels."

The Australian Pipeliner, March 2016

# CUSTOM PIPE ROLLER SOLUTIONS

Here at Richmond, rolling solutions are what we do best. We've been working with the pipeline industry for decades, and our experience is unmatched in the industry. Richmond can design and supply a large range of equipment to the pipeline industry such as:

- Lightweight horizontal rollers
- Bogey transition system rollers
- Stackable pipeline rollers
- Pipe band support rollers
- Precision adjustable pipe rollers
- Pipe roller support slings

Our in-house engineering team can design and manufacture pipe roller equipment to any specification. Big or small, we do it all.
