CONQUERING NEW TERRITORY SINCE 1936

When Finnish engineer and orienteer Tuomas Vohlonen invented the mass production method of liquid-filled compasses in 1936, Suunto was born. To this day, Suunto remains at the forefront of innovation in the sports industry. A leading designer and manufacturer of dive computers, sports watches and precision instruments, Suunto's passion is shared by adventurers around the globe.

DESIGNING WITH A PURPOSE

At Suunto, design purity, performance technology and craftsmanship meet to spark emotion. We want to create the most desired sports watches and instruments in the world. Our products are beautifully constructed to perform in the most extreme conditions and to make the user proud to wear one.

THE FEATURES, DISPLAYS AND SPORT SETTINGS AS YOU PREFER SELECT SPORTS, CUSTOMIZE SETTINGS AND ADJUST DISPLAYS ON YOUR WATCH

FOLLOW YOUR PEERS
STAY TUNED ON WHAT YOUR
PEERS ARE UP TO

Epic moments stay with you for longer when saved and shared. Join the Movescount sports community with the free Suunto Movescount App. Use it as a stand-alone sports

app or pair it with Suunto Bluetooth Smart watches or heart rate monitors. The app

offers an easy way to record your sporting activity, follow your progress, and visually

enrich, relive and share your adventures to make every move count.

TRACK YOUR MOVES

The Suunto Movescount App will track your moves with accurate speed, pace and distance. All your moves will be stored in the sports diary, with the data, pitures, maps and movies recorded.

HEART RATE RECORDING

When you use the app together with Suunto Smart Sensor, you can record your heart rate even without your smartphone. Start your move, leave the phone in the locker and go for a swim or head to the gym. Your heart rate is recorded and transferred to the app when you get back.

ENRICH, RELIVE AND SHARE

Add photos to your Moves, create Suunto Movies and share them to inspire your friends and relive your journeys. Join groups of like-minded, follow them and race with your friends in Movescount.com.

Through Suunto Movescount you can now follow the latest news of your peers' activities, and also allow your friends to stay tuned of your progress.

SYNC AND CUSTOMIZE ON THE GO

The Suunto Movescount App is like having Movescount in your pocket. Edit your watch settings, create interval workouts and sync them to your watch on the go. Your Moves tracked with the Suunto Ambit3 or Suunto Traverse will be automatically synced to your smartphone and transferred to Movescount.com.

Connect your Ambit3 or Suunto Traverse GPS watch to your smartphone via Bluetooth Smart using the Suunto Movescount App. Change settings, customize sport modes and keep time and GPS satellite data up to date while on the go.

You can change general watch settings offline (e.g. device language, tone settings, time format). Customizing sport modes requires an internet connection over Wi-Fi or cellular. Carrier data fees may apply on cellular connections.

MOBILE NOTIFICATIONS

Using the Suunto Movescount App on your smartphone, stay up to date by seeing call, text message and push notifications directly on the Suunto Ambit 3 and Suunto Traverse GPS watches. No need to stop your activity to see who's calling!

The Suunto Movescount App is available for iPhone, iPad and Android.

^{**}Compatible with iOS7.1 and Android 4.3 or later devices. Pairing requires Bluetooth 4.0 or later, which is not available in some supported mobile devices.

SUUNTO APPS

POSSIBILITIES BEYOND IMAGINATION

Suunto Apps enables you and the greater sports community to develop sport specific features for Suunto Ambit3 and Traverse watches. Customize your watch by selecting the best Suunto Apps for your activities. They're free! Can't find what you want from the public Suunto Apps? Use the App Designer to create your own.

The Suunto Movescount App is available for iPhone, iPad and Android. It can be downloaded from the App Store and Google Play.

SUUNTO APP EXAMPLES

MULTISPORT SCREEN

RUNNING EFFICIENCY

Develop your running efficiency by recording how many heart beats are needed to run one kilometer/mile. Based on current heart rate and speed, running efficiency is a real-time metric you can follow while running. As the number of beats decreases, efficiency improves.

Challenge yourself by using a virtual competitor. Check your ghost runner's distance as you run. A positive distance means that you are ahead. A negative distance means better pick up your pace.

MARATHON TIME

While running a marathon, you can see an estimate of your finish time based on current speed.

259

OUTDOOR SCREEN

OXYGEN LEVEL

When you are climbing on the highest mountains, the oxygen level app tells you how much oxygen there is in the air. Based on this you can estimate whether you need to take extra oxygen cylinders with you.

ASCENT TO PEAK

When working your way to the summit, this app tells you how high you are. As you are climbing to top of Mount Everest at 8,589 meters, you still have 259 meters to go.

SUNRISE/SUNSET

During your outing, you can check how many hours of light or darkness you have at any point. This handy Suunto App gives an accurate estimate of the time left to sunset or sunrise based on your current location.

SUUNTO SMART SENSOR

HEART RATE FOR MULTISPORT

- _ COMPACT, COMFORTABLE FIT
- _ RECORDS HEART RATE IN SWIMMING AND OTHER SPORTS
- _ COMPATIBLE WITH SUUNTO MOVESCOUNT APP
 AND BLUETOOTH SMART DEVICES

Size really matters. Whatever your sport, Suunto Smart Sensor – the smallest Bluetooth Smart compatible heart rate sensor on the market – measures your heart rate with great comfort and accuracy. While swimming, the sensor stores your heart rate data and when out of the water, the data is transferred wirelessly to your Ambit3 or Traverse watch or Suunto Movescount App. Pairing the sensor with the free Suunto Movescount App, you can also analyze, relive and share your moves to make every move count. The Suunto Smart Sensor comes with a redesigned heart rate belt, and can also be used on its own when attached to compatible sports apparel.

SUUNTO SMART SENSOR*

*The colored belts are available in size M. Black belts come in 3 different sizes. For full list of available product, see details on page 52.

4 STEPS TO YOUR PERSONAL BEST

SUUNTO CONNECTED FAMILY WITH AMBIT3

It doesn't matter why you're moving. Climbing a mountain, racing to the finish line, or just out for the pure pleasure of it, we want to give you the freedom to focus on your goal. The Suunto Connected Family with Ambit3 offers you the ultimate package for planning, following your progress, ensuring optimal recovery and sharing your sports moments. It is Suunto's first Bluetooth® Smart compatible product family.

PLAN YOUR ROUTES AND WORKOUTS

All Ambit3 watches come with full route navigation offering the freedom to explore. Plan your own routes or download one from Movescount. For guided training, Movescount offers training programs and a platform to build and follow your own schedules.

TEST YOUR RECOVERY

The Suunto Connected Family with Ambit3 offers various ways to follow your recovery. With Quick Recovery Test (powered by Firstbeat) you can check your recovery status in just a few minutes by using the Suunto Smart Sensor with your Ambit3. Wear the Suunto Smart Sensor overnight and run the Sleep Recovery Test (powered by Firstbeat) to get an accurate indication of your recovery status in the morning when you wake up. Your Ambit3 will indicate your daily and weekly activity, as well as the remaining recovery time since your last exercise.

OPTIMIZE YOUR PROGRESS

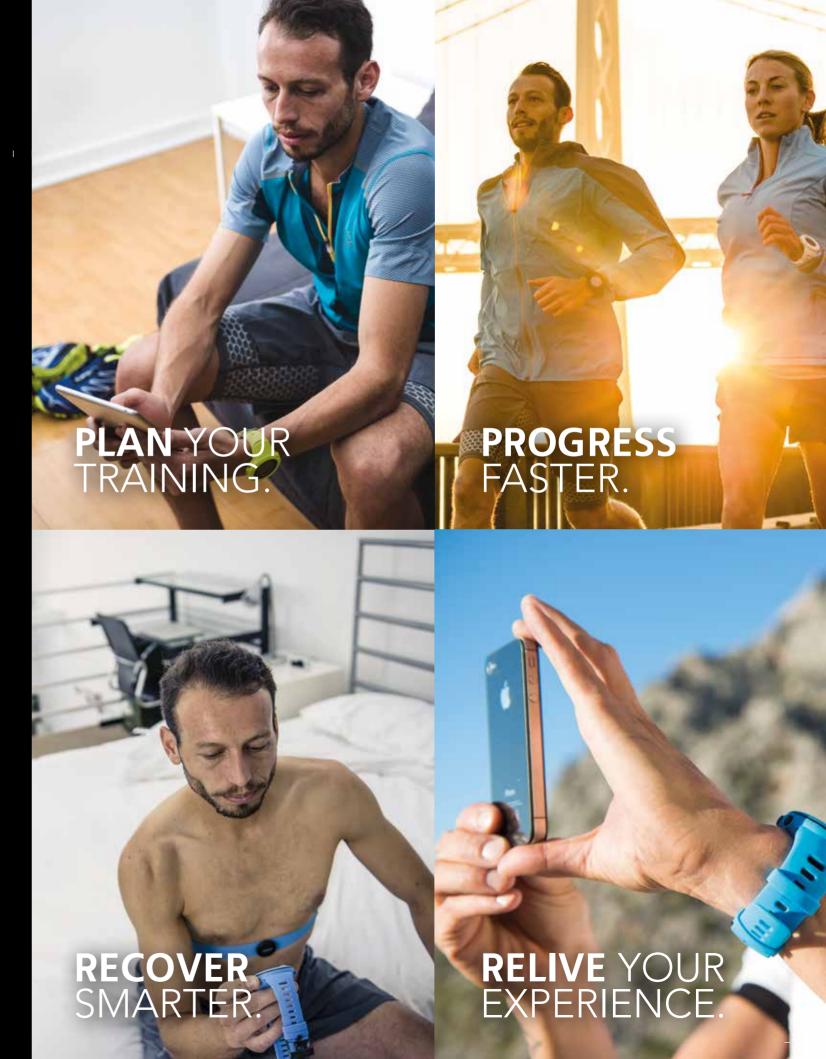

The Ambit3 GPS watches provide accurate speed, pace and distance and, with the Suunto Smart Sensor, let you train within your ideal heart rate zones. The Ambit3 GPS watches offer specialized features for running, cycling and swimming. While running, for instance, you can follow your real time running performance level versus your 30-day average (powered by Firstbeat).

MOVES WITH PHOTOS

With the Suunto Movescount App, take photos with real-time speed, distance or other details shown on the image. Share the photos instantly on your favorite social media, add them to your Suunto Movies and store them with your Move in Movescount. Or with one tap you can turn your Move into a Suunto Movie, a visualization of your track on a 3D map with key metrics. You can embed photos to tell the whole story.

SUUNTO AMBIT3 PEAK

THE ADVENTURE EXPERIENCE

- THE GPS WITH ADVANCED OUTDOOR AND MULTISPORT FUNCTIONS
- SMART MOBILE CONNECTION
- ENRICH, RELIVE AND SHARE YOUR MOVES

The journey to your summit is what it's all about – whether it's a mountain or a personal best. The Suunto Ambit3 Peak is your ultimate GPS watch for sports and adventure. It guides you every step of the way, providing all you need to progress and stay safe on your quest. Connect your watch wirelessly to your smartphone and use the free Movescount App to adjust the watch on the go and visually enrich, relive and share your adventure. There is no better companion out there to make every move count.

SUUNTO MOVESCOUNT APP FEATURES

- _ Track your sports on your smartphone with speed, distance, route, calories
- _ View the map during your exercise
- _ Analyze your progress in detail in Movescount.com
- _ Take photos during your Move showing your current speed, distance, and more
- _ Create a Suunto Movie of your Move with 3D map, key metrics and photos
- _ Share your experience instantly to your social media networks
- Get accurate heart rate and calories with the Suunto Smart
 Sensor or other Bluetooth Smart compatible heart rate monitors
- _ Customize your Ambit3 on the go
- Plan interval workouts (from your smartphone) for Ambit3 watches
- You can change general settings offline (e.g. device language, tone settings, time format). Customizing sport modes requires an internet connection over Wi-Fi or cellular. Carrier data fees may apply on cellular connections.

 Compatible with iOS7.1 and Android Lollipop or later devices.
- Pairing requires Bluetooth Smart.The Suunto Movescount
 App is available in English, Czech, Danish, German, Spanish,
 Finnish, French, Italian, Japanese, Korean, Dutch, Norwegian,
 Polish, Portuguese, Russian, Swedish and Chinese.

SUUNTO PODS AND BELTS

The additional Suunto PODs* measure speed and distance, expand your heart rate monitor's capabilities and send real-time data to your wrist. Disturbance-free ANT transmission technology quarantees zero interference with other HR monitors, power lines, and gym machines. Suunto PODs are compatible with Suunto Ambit and Ambit2 GPS watches, Quest and M5.

Note! The Ambit3 watches are not compatible with ANT+™ (e.g. Suunto ANT PODs, Suunto Dual or Suunto ANT belt).

SUUNTO DUAL COMFORT BELT SS014543000

Pair with your Suunto heart rate monitor or compatible gym equipment. Compatible with all Suunto heart rate monitors (except for Suunto Ambit3 watches).

SUUNTO ANT BELT SS013588000

Pair with your Suunto Ambit, Ambit2, Ambit2 S, Ambit2 R, Quest or M5.

SUUNTO FOOT POD MINI SS016592000

For wireless tracking of speed and distance during training. Weighing only 9 grams, Suunto Foot POD Mini boasts 400-hour battery life. Compatible with Suunto Ambit, Ambit2, Ambit2 S, Ambit2 R, Quest, M5 and ANT+11

SUUNTO MOVESTICK MINI

So small it can stay plugged in to a computer's USB port all the time. It wirelessly transfers training data from Suunto Quest and Suunto M5 to Movescount.com (with PC and Mac). Suunto M5 and Suunto Quest users can also download any training program from Movescount.com.

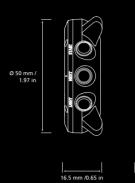

*Peripheral Observation Devices ANT radio technology is proprietary to Dynastream Innovations Inc.

_65

FEATURE INDEX

WITH SUUNTO, WE HAVE THE TOOLS TO GO OUT INTO THE WILD WHERE WE BELONG, BECAUSE AFTER ALL, IT'S IN OUR NATURE.

3D COMPASS

With a conventional electronic compass, you need to hold the compass level to the horizon to get an accurate reading. Suunto's 3D compasses compensate for tilt, allowing you to get a reading regardless of the angle of your wrist.

ACTION PHOTOS WITH DATA OVERLAY

Spice up your Moves with photos taken with the Suunto Movescount app on your smartphone, showing real-time speed, distance or other details on the image. Add more photos in Movescount and share with your friends.

ACTIVITY FEED

With the activity feed in Suunto Movescount App, you can easily keep track of all the people you are following in Movescount. Activate the feed to see their latest Moves, likes and shouts.

ALTIMETER

Determine your current elevation, track your ascent or descent and gauge your overall progress on a climb – ideal for mountaineers, skiers and wilderness travelers.

AUTOMATIC ALTI / BARO SWITCH

Senses movement or lack thereof to automatically switch between altimeter and barometer. When you are climbing, for instance, it records the changes in elevation. And when you stop to rest, it records the changes in the barometric pressure.

BAROMETER

Forecast sudden alterations in the weather by keeping a close eye on the air pressure – and take the necessary precautions to help make your journey safe and successful

BIKE POWER

Suunto Ambit3 PEAK and Ambit3 SPORT support bike power support with Bluetooth Smart devices**. Knowing the power output helps in estimating your efficiency while biking and save energy during long distances.

**Requires an external bike power meter. Ambit3 watches are not compatible with ANT+™ devices.

BREADCRUMB TRAIL

Suunto Traverse automatically creates abreadcrumb trail during your activity recording. The breadcrumb is your instance trackback – if you need to return to your starting location, just turn around and follow the breadcrumb back.

COMPASS

Navigate and pinpoint locations to safely find your way through wilderness and whiteout conditions.

COMPUTER CONNECTIVITY / MOVESCOUNT.COM

Add a new dimension to your next adventure with the online sports community Movescount.com. Make your Move and share it online to showcase your experiences in the wilderness. Upload your Moves directly from your Suunto Ambits, Traverse, Quest and M5, or manually from other devices.

CONNECTIVITY

Connect your GPS watch to your mobile phone and upload your Moves to Movescount.com seamlessly with the Suunto Movescount app. Customize your watch, keep time and GPS satellite data up to date while on the go. See incoming calls, messages and notifications directly on the watch.

DEPTH METER

Use your Suunto Core to calculate your current and maximum depth when on your next snorkeling dive.

FusedAlti™

FusedAlti™ introduces uniquely accurate altitude measurement combining GPS altitude and barometric altitude. GPS-based altitude can have temporary errors caused by e.g. bad satellite arrangement, or reflections and signal blocking by obstacles/buildings. The barometric altitude tends to include some offset caused mostly by changing air pressure. FusedAlti smartly corrects the effect of temporary and offset errors in the final altitude reading.

FusedSpeed™

Suunto introduces a new, patent-pending technology for speed readings called FusedSpeed™. The speed indication is a unique combination of GPS and acceleration sensor readings. The GPS signal is adaptively filtered based on acceleration, giving a more accurate reading at steady speeds and a quicker response to changes in speed.

GPS ALTITUDE (FOR SUUNTO AMBIT2 S AND R)

GPS altitude provides altitude readings directly and without calibration from the GPS data.

HEART RATE IN SWIMMING

During triathlon or any swim session, Suunto Smart Sensor measures your heartrate, buffers it internally and transfers it to your Ambit3 Peak, Ambit3 Sport or Suunto Movescount App when you exit the water.

INTEGRATED GPS

The integrated GPS used in wristop devices, such as Suunto Ambit, is based on the SiRFstarIV technology. The receiver has a very high sensitivity. This helps Suunto Ambit to find GPS satellites much quicker and get steadier readings.

MULTISPORT

Suunto Ambit3 PEAK and Ambit3 SPORT offer multisport support; In one log, you can easily swap sports and constantly see the relevant data while training. Change the sport on-the-go or create a multisport mode in advance in Movescount and download it to your watch – the watch then knows the order of sports you are about to do and adjusts the settings accordingly.

PEAK TRAINING EFFECT

To better reflect the meaning of the Training Effect measurement, Suunto has renamed the measurement to Peak Training Effect (PTE). PTE indicates the impact of a training session on your maximum aerobic performance and is most accurate with medium and high intensity training. The measurement is relative to your current fitness level. The fitter you are, the harder you have to work to reach a higher PTE.

QUICK RECOVERY TEST

You can check your recovery state at any time with a quick recovery test. Just put on Suunto Smart Sensor and start the test. The measurement, analysis and report is performed within just five minutes. Your heart rate, heart rate variation, as well as respiration rate derived from your heart beat are used to give you a cummulative percentage score indicating your overall state of recovery. The higher the percentage, the better your recovery state is.

RECOVERY TIME

Recovery time is an estimate of how long your body needs to recuperate after training. The time is based on the duration and intensity of the session, as well as the overall fatigue, accumulating even at lower intensities. Recovery time accumulates from one session to the next, if you train again before the time has expired.

RUNNING PERFORMANCE

In running sport modes, you can use the Running Performance graph in one of your sport mode displays to follow your performance level during a run. While running, the graph shows your current performance level compared to your 30-day average. At the end of the exercise, your log shows a summary of how your average performance level has developed over the past 30 days.

RUN A ROUTE

Plan fresh routes in Movescount and set your running modes to show routes at the beginning of your run. Select "Run a route", choose the route, and start your run.

RUNNING CADENCE FROM WRIST

Measures running cadence using its builtin accelerometer.

STORM ALARM

Activated by a rapid drop in air pressure, the storm alarm lets you know that something unpleasant is fast approaching.

SUUNTO MOVIE

With the Suunto Movescount App, you can turn your move into a "Suunto Movie" – an animation of your journey visualized with a 3D map, where highlights and photos of the adventure are embedded along the track. The Suunto Movies can even be created on Moves done in the past, as long as they are stored in Movescount and include a GPS track.

SWIMMING

Suunto Ambit3 PEAK and Ambit3 SPORT support swimming. Both watches log your swimming data such as distance, duration, pace, stroke count and rate and efficiency. They also recognise your swimming style – a feature that is handy in analysing your swim afterwards in Movescount. Outdoors you can also log your track while you swim in free style. HR monitoring can be added with the Suunto Smart Sensor.

TRACK BACK

With Track back, you can retrace your route at any point during an exercise. Temporary waypoints are created during your exercise and are used to guide you back to your starting point when you select Track back from the navigation menu.

TRAINING PROGRAMS IN THE WATCH (AMBIT3 PEAK, AMBIT3 SPORT, AMBIT3 RUN)

You can sync your planned moves to the watch and get daily guidance as well as intensity guidance while exercising. Choose a training program from more than 5,000 available in Movescount.com or create your own.

WORKOUT PLANNER

In addition to individual planned Moves and training programs, you can create detailed interval workouts. Use the Workout Planner to define duration and intensity for each interval. Transfer up to five workouts to your watch. Activate the workout at any time during an exercise and get voice guidance for the workout when you use your watch with Suunto Movescount App.

SLEEP RECOVERY TEST

Wearing the Suunto Smart Sensor overnight and performing the Sleep Recovery Test will provide you with a report of how well you recovered during your sleep and your state of recovery when you wake up. The test is based on heart rate variation during your sleep. This Sleep Recovery Test powered by Firstbeat will help you plan your day's trainings.

RUNNING PERFORMANCE INDICATOR

While on the track, you can optimize your training intensity based on real time running performance indication powered by Firstbeat. It will show current level versus the last 30 day's average. If you are training with a Workout Plan done with the Movescount App, you can receive voice guidance over the App.

ROUTE NAVIGATION

All Ambit and Traverse watches come with full route navigation. Plan your own routes on Movescount, from scratch or taking a ready made route from the library. You also decide if you want to follow the roads, or take the shortest route to the destination. Open street maps now give you even better means to discover new landscapes. Once the route is downloaded on the watch, you will be guided to your destination.

VIBRATION ALERT

Suunto Traverse includes vibration alerts for smartphone notifications and other events. Both vibration and tone settings can be adjusted separately.
