# **SAFETY DATA SHEET**

#### Flammable Gas Mixture: Argon / Carbon Dioxide / Carbonyl Sulfide / Ethane / Helium / Hydrogen Sulfide / Methane / Nitrogen

# Section 1. Identification

GHS product identifier	: Flammable Gas Mixture: Argon / Carbon Dioxide / Carbonyl Sulfide / Ethane / Helium / Hydrogen Sulfide / Methane / Nitrogen
Other means of identification	: Not available.
Product use	: Synthetic/Analytical chemistry.
SDS #	: 018035
Supplier's details	: Airgas USA, LLC and its affiliates 259 North Radnor-Chester Road Suite 100 Radnor, PA 19087-5283 1-610-687-5253
24-hour telephone	: 1-866-734-3438

# Section 2. Hazards identification

irritation) - Category 3 AQUATIC HAZARD (ACUTE) - Category 2         GHS label elements Hazard pictograms         Hazard pictograms         :       Image: Im

General : Read and follow all Safety Data Sheets (SDS'S) before use. Read label before use Keep out of reach of children. If medical advice is needed, have product container			
Keep out of reach of children. If medical advice is needed, have product container			
label at hand. Close valve after each use and when empty. Use equipment rated cylinder pressure. Do not open valve until connected to equipment prepared for us Use a back flow preventative device in the piping. Use only equipment of compatil materials of construction. Do not depend on odor to detect presence of gas. Appr suspected leak area with caution.	or or e. le		
<ul> <li>Prevention</li> <li>Keep away from heat, hot surfaces, sparks, open flames and other ignition sources smoking. Use only outdoors or in a well-ventilated area. Avoid release to the environment. Avoid breathing gas.</li> </ul>	. No		
Response: IF INHALED: Remove person to fresh air and keep comfortable for breathing. Ca POISON CENTER or physician if you feel unwell. Leaking gas fire: Do not extingu unless leak can be stopped safely. Eliminate all ignition sources if safe to do so.			
Date of issue/Date of revision         : 4/25/2016         Date of previous issue         : No previous validation         Version         : 0.01	1/13		

### Section 2. Hazards identification

Storage	: Store locked up. Protect from sunlight when ambient temperature exceeds 52°C/125°F. Store in a well-ventilated place.
Disposal	<ul> <li>Dispose of contents and container in accordance with all local, regional, national and international regulations.</li> </ul>
Hazards not otherwise classified	: In addition to any other important health or physical hazards, this product may displace oxygen and cause rapid suffocation.

### Section 3. Composition/information on ingredients

Substance/mixture	:	Mixture
Other means of	:	Not available.
identification		

#### **CAS number/other identifiers**

CAS number	: Not applicable.
Product code	: 018035

Ingredient name	%	CAS number
Carbon Dioxide	2 - 99	124-38-9
methane	13.1 - 99	74-82-8
Helium	0.0001 - 98	7440-59-7
Argon	0.0001 - 98	7440-37-1
ethane	0.0001 - 82	74-84-0
Nitrogen	0.0001 - 82	7727-37-9
hydrogen sulfide	2.5 - 5	7783-06-4
carbonyl sulphide	0.0001 - 0.9999	463-58-1

Any concentration shown as a range is to protect confidentiality or is due to batch variation.

There are no additional ingredients present which, within the current knowledge of the supplier and in the concentrations applicable, are classified as hazardous to health or the environment and hence require reporting in this section.

Occupational exposure limits, if available, are listed in Section 8.

### Section 4. First aid measures

#### Description of necessary first aid measures

Eye contact	nmediately flush eyes with plenty of water, occasionally lifting the upper and lower yelids. Check for and remove any contact lenses. Continue to rinse for at least 10 ninutes. Get medical attention if irritation occurs.
Inhalation	Remove victim to fresh air and keep at rest in a position comfortable for breathing. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask r self-contained breathing apparatus. If not breathing, if breathing is irregular or if espiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It hay be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Set medical attention. If necessary, call a poison center or physician. If unconscious, lace in recovery position and get medical attention immediately. Maintain an open irway. Loosen tight clothing such as a collar, tie, belt or waistband. In case of halation of decomposition products in a fire, symptoms may be delayed. The exposed erson may need to be kept under medical surveillance for 48 hours.
Skin contact	Iush contaminated skin with plenty of water. Remove contaminated clothing and hoes. To avoid the risk of static discharges and gas ignition, soak contaminated lothing thoroughly with water before removing it. Get medical attention if symptoms ccur. Wash clothing before reuse.
Ingestion	s this product is a gas, refer to the inhalation section.
Most important symptoms/ef	acute and delayed
Potential acute health effec	
Eye contact	Contact with rapidly expanding gas may cause burns or frostbite.
Inhalation	larmful if inhaled. May cause respiratory irritation.

Date of issue/Date of revision	: 4/25/2016	Date of previous issue	: No previous validation	Version : 0	0.01 2/13	
--------------------------------	-------------	------------------------	--------------------------	-------------	-----------	--

# Section 4. First aid measures

Skin contact	: Contact with rapidly expanding gas may cause burns or frostbite.
Frostbite	: Try to warm up the frozen tissues and seek medical attention.
Ingestion	: As this product is a gas, refer to the inhalation section.
<u>Over-exposure signs/sym</u>	<u>otoms</u>
Eye contact	: No specific data.
Inhalation	: Adverse symptoms may include the following:, respiratory tract irritation, coughing
Skin contact	: No specific data.
Ingestion	: No specific data.
Indication of immediate me	dical attention and special treatment needed, if necessary
Notes to physician	<ul> <li>In case of inhalation of decomposition products in a fire, symptoms may be delayed.</li> <li>The exposed person may need to be kept under medical surveillance for 48 hours.</li> </ul>
Specific treatments	: No specific treatment.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. If it is suspected that fumes are still present, the rescuer should wear an appropriate mask or self-contained breathing apparatus. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

See toxicological information (Section 11)

# Section 5. Fire-fighting measures

The first state is the second state.	
Extinguishing media	
Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.
Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: Contains gas under pressure. Extremely flammable gas. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. This material is toxic to aquatic life. Fire water contaminated with this material must be contained and prevented from being discharged to any waterway, sewer or drain.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide nitrogen oxides sulfur oxides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. If involved in fire, shut off flow immediately if it can be done without risk. If this is impossible, withdraw from area and allow fire to burn. Fight fire from protected location or maximum possible distance. Eliminate all ignition sources if safe to do so.
Special protective equipment for fire-fighters	: Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

### Section 6. Accidental release measures

Personal precautions, protect	tiv	e equipment and emergency procedures
For non-emergency personnel	:	Accidental releases pose a serious fire or explosion hazard. No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Shut off all ignition sources. No flares, smoking or flames in hazard area. Avoid breathing gas. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Ensure emergency procedures to deal with accidental gas releases are in place to avoid contamination of the environment. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air). Water polluting material. May be harmful to the environment if released in large quantities.
Methods and materials for co	<u>nt</u>	ainment and cleaning up
Small spill	÷	Immediately contact emergency personnel. Stop leak if without risk. Use spark-proof

Small spill	<ul> <li>Immediately contact emergency personnel. Stop leak if without risk. Use spark-proof tools and explosion-proof equipment.</li> </ul>
Large spill	<ul> <li>Immediately contact emergency personnel. Stop leak if without risk. Use spark-proof tools and explosion-proof equipment. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.</li> </ul>

## Section 7. Handling and storage

#### Precautions for safe handling

Protective measures	:	Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Avoid contact with eyes, skin and clothing. Avoid breathing gas. Avoid release to the environment. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous. Do not puncture or incinerate container. Use equipment rated for cylinder pressure. Close valve after each use and when empty. Protect cylinders from physical damage; do not drag, roll, slide, or drop. Use a suitable hand truck for cylinder movement.
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.
Conditions for safe storage, including any incompatibilities	:	Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Store locked up. Eliminate all ignition sources. Keep container tightly closed and sealed until ready for use. Cylinders should be stored upright, with valve protection cap in place, and firmly secured to prevent falling or being knocked over. Cylinder temperatures should not exceed 52 °C (125 °F).

## Section 8. Exposure controls/personal protection

<u>Control parameters</u> <u>Occupational exposure limits</u>

# Section 8. Exposure controls/personal protection

Carbon Dioxide	ACGIH TLV (United States, 3/2015). Oxygen
	Depletion [Asphyxiant].
	STEL: 54000 mg/m <sup>3</sup> 15 minutes.
	STEL: 30000 ppm 15 minutes.
	TWA: 9000 mg/m <sup>3</sup> 8 hours.
	TWA: 5000 ppm 8 hours.
	NIOSH REL (United States, 10/2013).
	STEL: 54000 mg/m <sup>3</sup> 15 minutes.
	STEL: 30000 ppm 15 minutes.
	TWA: 9000 mg/m <sup>3</sup> 10 hours.
	TWA: 5000 ppm 10 hours.
	OSHA PEL (United States, 2/2013).
	TWA: 9000 mg/m <sup>3</sup> 8 hours.
	TWA: 5000 mg/m o hours.
	OSHA PEL 1989 (United States, 3/1989).
	STEL: 54000 mg/m <sup>3</sup> 15 minutes.
	STEL: 34000 mg/m 15 minutes. STEL: 30000 ppm 15 minutes.
	TWA: 18000 mg/m <sup>3</sup> 8 hours.
	TWA: 10000 ppm 8 hours.
methane	Oxygen Depletion [Asphyxiant]
Helium	Oxygen Depletion [Asphyxiant]
Argon	Oxygen Depletion [Asphyxiant]
ethane	Oxygen Depletion [Asphyxiant]
Nitrogen	Oxygen Depletion [Asphyxiant]
hydrogen sulfide	ACGIH TLV (United States, 3/2015).
	STEL: 5 ppm 15 minutes.
	TWA: 1 ppm 8 hours.
	NIOSH REL (United States, 10/2013).
	CEIL: 15 mg/m <sup>3</sup> 10 minutes.
	CEIL: 10 ppm 10 minutes.
	OSHA PEL 1989 (United States, 3/1989).
	STEL: 21 mg/m <sup>3</sup> 15 minutes.
	STEL: 15 ppm 15 minutes.
	TWA: 14 mg/m <sup>3</sup> 8 hours.
	TWA: 10 ppm 8 hours.
	OSHA PEL Z2 (United States, 2/2013).
	AMP: 50 ppm 10 minutes.
	CEIL: 20 ppm
carbonyl sulphide	ACGIH TLV (United States, 3/2015).
	TWA: 5 ppm 8 hours.
	TWA: 3 ppm 3 hours.
Appropriate engineering	: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or
controls	other engineering controls to keep worker exposure to airborne contaminants below any
	recommended or statutory limits. The engineering controls also need to keep gas,
	vapor or dust concentrations below any lower explosive limits. Use explosion-proof
	ventilation equipment.
Environmental exposure	: Emissions from ventilation or work process equipment should be checked to ensure
controls .	they comply with the requirements of environmental protection legislation. In some
	cases, fume scrubbers, filters or engineering modifications to the process equipment
	will be necessary to reduce emissions to acceptable levels.
Individual protection meas	
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before
	eating, smoking and using the lavatory and at the end of the working period.
	Appropriate techniques should be used to remove potentially contaminated clothing.
	Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location

showers are close to the workstation location.

# Section 8. Exposure controls/personal protection

Eye/face protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection	
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection	: Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
Other skin protection	: Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Use a properly fitted, air-purifying or air-fed respirator complying with an approved standard if a risk assessment indicates this is necessary. Respirator selection must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected respirator.

# Section 9. Physical and chemical properties

#### Appearance

<u>Appearance</u>			
Physical state	1	Gas.	
Color	4	Not available.	
Melting/freezing point	:	-86°C (-122.8°F) This is based on data for the following ingredient: hydrogen sulfide. Weighted average: -208.67°C (-343.6°F)	
Critical temperature	:	Lowest known value: -267.9°C (-450.2°F) (helium).	
Odor	:	Not available.	
Odor threshold	4	Not available.	
рН	4	Not available.	
Flash point	4	Not available.	
Burning time	4	Not applicable.	
Burning rate	4	Not applicable.	
Evaporation rate	1	Not available.	
Flammability (solid, gas)	4	Not available.	
Lower and upper explosive (flammable) limits	:	Not available.	
Vapor pressure	4	Not available.	
Vapor density	4	Highest known value: 1.66 (Air = 1) (argon). Weighted average: 0.99 (Air = 1)	
Gas Density (lb/ft <sup>3</sup> )	1	Weighted average: 0.04	
Relative density	1	Not applicable.	
Solubility	4	Not available.	
Solubility in water	1	Not available.	
Partition coefficient: n- octanol/water	;	Not available.	
Auto-ignition temperature	:	Not available.	
Decomposition temperature	:	Not available.	

### Section 9. Physical and chemical properties

SADT : Not available. Viscosity

: Not applicable.

## Section 10. Stability and reactivity

	· · · · · · · · · · · · · · · · · · ·
Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: Avoid all possible sources of ignition (spark or flame). Do not pressurize, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition.
Incompatible materials	: Oxidizers
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Hazardous polymerization : Under normal conditions of storage and use, hazardous polymerization will not occur.

### Section 11. Toxicological information

#### Information on toxicological effects

#### **Acute toxicity**

Product/ingredient name	Result	Species	Dose	Exposure
hydrogen sulfide	LC50 Inhalation Gas.		712 ppm	1 hours
carbonyl sulphide	LC50 Inhalation Gas.		1070 ppm	4 hours

#### Irritation/Corrosion

Not available.

#### **Sensitization**

Not available.

#### **Mutagenicity**

Not available.

#### **Carcinogenicity**

Not available.

#### **Reproductive toxicity**

Not available.

#### **Teratogenicity**

Not available.

#### Specific target organ toxicity (single exposure)

Name	•••	Route of exposure	Target organs
hydrogen sulfide	Category 3	Not applicable.	Respiratory tract irritation

#### Specific target organ toxicity (repeated exposure)

Not available.

# Section 11. Toxicological information

#### Aspiration hazard

Not available.

Information on the likely routes of exposure	: Not available.
Potential acute health effects	
Eye contact	<ul> <li>Contact with rapidly expanding gas may cause burns or frostbite.</li> </ul>
Inhalation	: Harmful if inhaled. May cause respiratory irritation.
Skin contact	: Contact with rapidly expanding gas may cause burns or frostbite.
Ingestion	: As this product is a gas, refer to the inhalation section.
Symptoms related to the phy	sical, chemical and toxicological characteristics
Eye contact	: No specific data.
Inhalation	: Adverse symptoms may include the following:, respiratory tract irritation, coughing
Skin contact	: No specific data.
Ingestion	: No specific data.
Delayed and immediate effect	ts and also chronic effects from short and long term exposure
Short term exposure	
Potential immediate effects	: Not available.
Potential delayed effects	: Not available.
<u>Long term exposure</u>	
Potential immediate effects	: Not available.
Potential delayed effects	: Not available.
Potential chronic health eff	ects
Not available.	
General	: No known significant effects or critical hazards.
Carcinogenicity	: No known significant effects or critical hazards.
Mutagenicity	: No known significant effects or critical hazards.
Teratogenicity	: No known significant effects or critical hazards.
<b>Developmental effects</b>	: No known significant effects or critical hazards.
Fertility effects	: No known significant effects or critical hazards.
Numerical management of toxic	

#### Numerical measures of toxicity

## Section 12. Ecological information

#### Persistence and degradability

Not available.

#### **Bioaccumulative potential**

Product/ingredient name	LogPow	BCF	Potential
Carbon Dioxide	0.83	-	low
methane	1.09	-	low
Helium	0.28	-	low
Argon	0.74	-	low
ethane	1.09	-	low
Nitrogen	0.67	-	low

#### **Mobility in soil**

Soil/water partition	: Not available.
coefficient (Koc)	

Other adverse effects

: No known significant effects or critical hazards.

### Section 13. Disposal considerations

Disposal methods :	The generation of waste should be avoided or minimized wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Empty Airgas-owned pressure vessels should be returned to Airgas. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.

Ontario Designated Substances: None of the components are listed.
Quebec Designated Substances: None of the components are listed.

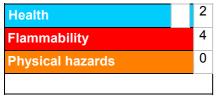

## Section 16. Other information

: Class A: Compressed gas.

Class B-1: Flammable gas. Class D-1A: Material causing immediate and serious toxic effects (Very toxic).

Class D-2B: Material causing other toxic effects (Toxic).

#### Hazardous Material Information System (U.S.A.)

Caution: HMIS® ratings are based on a 0-4 rating scale, with 0 representing minimal hazards or risks, and 4 representing significant hazards or risks Although HMIS® ratings are not required on SDSs under 29 CFR 1910. 1200, the preparer may choose to provide them. HMIS® ratings are to be used with a fully implemented HMIS® program. HMIS® is a registered mark of the National Paint & Coatings Association (NPCA). HMIS® materials may be purchased exclusively from J. J. Keller (800) 327-6868.

The customer is responsible for determining the PPE code for this material.

This reprinted material is not the complete and official position of the National Fire Protection Association, on the referenced subject which is represented only by the standard in its entirety.

Copyright ©2001, National Fire Protection Association, Quincy, MA 02269. This warning system is intended to be interpreted and applied only by properly trained individuals to identify fire, health and reactivity hazards of chemicals. The user is referred to certain limited number of chemicals with recommended classifications in NFPA 49 and NFPA 325, which would be used as a guideline only. Whether the chemicals are classified by NFPA or not, anyone using the 704 systems to classify chemicals does so at their own risk.

#### Procedure used to derive the classification
