

Overview Smart-UPS VT® with PDU-Panel

The safest method to bring ultra-high efficiency and scalability to power distribution for business-critical ups

A variety of breaker and connector options can be chosen to supply either three-phase or single-phase power to the load. Safety features of the Power Distribution Modules include a latch that disconnects the breaker from AC utility power, connectors with positive locking mechanisms, and isolation of all touch points. Built-in monitoring supplies information about the power consumption of connected devices.

Smart-UPS VT or Galaxy	Modell Number	
	<p>SUVTP10KH1B2S SUVTP15KH2B4S SUVTP20KH2B2S SUVTP30KH4B4S SUVTR40KH4B5S</p>	<p>Select the desired size of the UPS. For example a SMART-UPS VT or Galaxy UPS with the desired runtime. Start-up is normally included in the part. Installation of the UPS has to be done by a electrician.</p>
