Sustainability solutions

At HP, environmental sustainability is at the top of our agenda. Thoughtfully packaged to minimize our carbon footprint, we create energy-efficient devices using recycled materials such as ocean-bound plastics. The result? Beautiful and sustainable devices that reflect our commitment to protecting our planet's future.

Did you know?

1,700,000 pounds of ocean-bound plastic sourced for use in HP products. And we're counting more every day

By 2025, **90%** of displays shipments will be in fiber-based packaging to meet the HP goal of 75% reduction in plastics¹

HP recognized with "Most Efficient of ENERGY STAR® 2020" designation for 19 commercial displays

Make a purchase you can feel good about with a keyboard that has 50% post-consumer recycled plastic content. Cut toxic emissions with HP mice and keyboard, built using low halogen² printed circuit boards.

Commute with the stylish and durable HP Prelude Pro 15.6-inch Backpack. Designed with the environment in mind, this water-resistant bag is made from 65% recycled external fabric.

As part of the world's most sustainable PC portfolio, the HP E-Series and Z by HP displays are designed with the environment in mind. The Z by HP displays take an additional conscious choice with the stands made from 75% recycled aluminum and continue to reduce waterway pollution with 5% of the recycled plastics made from ocean bound plastics.

¹ Compared to 2018. Calculated as the percentage of primary plastic packaging (by weight) reduced per unit shipped. Excludes secondary and tertiary packaging components. Includes HP personal systems and printer hardware packaging. Does not include packaging for the following: Graphics Solutions Business (GSB) hardware other than PageWide XL and DesignJet printers; 3D printing hardware; print supplies; refurbished products; and accessories such as third-party options, drop in box, and aftermarket options.

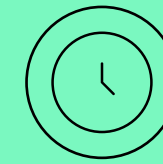

² External power supplies, power cords, cables and peripherals are not Low Halogen. Service parts obtained after purchase may not be Low Halogen.

Wellbeing solutions

Comfort, ergonomics, and organization—these qualities define our creations. Improve your team’s wellbeing with thoughtfully designed devices that support a productive working environment, and watch them grow their potential.

Dock solutions

Say goodbye to the cubicle farm and hello to open, flexible workspaces for an increasingly mobile workforce and all that they bring with them. HP's wide array of best-in-class docking solutions is the perfect answer, providing the mobile workforce and their many devices with quick, convenient, and secure access to networks, printers, displays, and other shared resources.

HP USB-C Dock G5

Get to work with a single cable from your USB-C®-enabled notebook¹ to your displays, devices, and wired network with the versatile, elegant, and space-saving HP USB-C Dock G5. The dock is compatible with HP notebooks, MacBook computers, and other notebooks.²

HP USB-C/A Universal Dock G2

Get to work fast with one cable from your USB-A- and USB-C®-enabled notebooks¹ to your displays, devices, and wired network with the flexible, compact HP USB-C/A Universal Dock G2. The dock is driven by DisplayLink and compatible with HP notebooks, MacBook computers, and other notebooks.²

HP USB-C G5 Essential Dock

Have everything you need to get the job done with this compact dock that keeps your desk clean. With a single USB-C® cable,³ open your ports to all your accessories, connect up to three high-res displays,⁴ stable Ethernet connection, and much more, all while charging your laptop.³ Clear your desk and clear your mind with this HP USB-C G5 Essential Dock.

HP Thunderbolt G4 Dock

Boost your security, productivity, and connectivity with this Thunderbolt™ 4 dock. It protects your network and devices from the moment you log in, supports multi-OS compatibility⁵, and can support up to four 4K displays⁶. Ideal for ITDMs and hybrid workers, this dock also makes home or office device management easy. The 280W version also supports charging of all current HP mobile workstations.

1. For USB-C® functionality, host PC must support the DisplayPort™ Alt mode protocol through its USB-C® port. Thunderbolt™-enabled notebooks will function at USB-C® speeds. Charging and port replication is supported on notebooks that have implemented USB-C® industry specifications. Power button to turn on or wake the system, Wake-on LAN from warm and cold dock, Wake-on LAN from S4/S5, and MAC Address Pass-Through S0, S3, S4, S5 warm and cold dock features only function on HP or HP-supported notebooks. HP does not provide Ethernet and audio drivers on Mac PCs.
2. Based on HP internal testing on select non-HP notebook models compatible with USB-C® industry standards. Certain Alt mode features are not supported, such as power button, MAC Address Pass-Through, Wake-on LAN, and OOB Wake on LAN. Visit the HP Support page to determine your HP notebook's wattage and port specifications. Visit the support page of your non-HP notebook to determine its wattage and port specifications.
3. This dock does not currently support out-of-band MAC Address Pass-Through. This dock does support in-band MAC Address Pass-Through on HP G8 and G9 supported commercial notebooks and requires a NIC driver that can be found on <https://support.hp.com>. In-band MAC Address Pass-Through requires the Windows OS to be running in order to operate. On (S0) and Standby Sleep states (S3) are supported. Out-of-band MAC Address Pass-Through functionality is planned for 1st half of 2023 through a firmware update. For USB-C® alt mode functionality, host PC must support the DisplayPort™ Alt mode protocol through its USB-C® or Thunderbolt™ port. Charging and port replication is supported on notebooks that have implemented USB-C® Alt Mode industry specifications. Power button to turn on or wake the system only functions on HP or HP-supported notebooks. PXE Boot functionality will depend on whether the host systems firmware has the EFI driver available. Connected firmware updates will require the end user to sit through the firmware update process until completed. HP does not provide Ethernet and audio drivers on Mac PCs.
4. Video resolution and support is dependent on the maximum capability of the notebook. Supports 3 x FHD @ 60Hz, 2 x QHD @ 60 Hz, 3 x 4K (requires a DisplayPort™ 1.4 machine with Display Stream Compression. If the system does not support Display Stream Compression, then the system must support DisplayPort™ 1.4 with high-res mode enabled in the system).
5. Backward compatible with USB-C® Alt mode, ports will work at USB-C® Alt mode speeds which are dependent on host specifications.
6. For USB-C® Alt mode, host PC must support Thunderbolt™ 3 or Thunderbolt™ 4 running a DP 1.4 DSC host.

If the system does not support Display Stream Compression, then the system must support DisplayPort™ 1.4 with high-res mode enabled in the system).

2. The Display Stream Compression (DSC) supported version and color format depends on the graphics capability. Display Stream Compression (DSC) is disabled when the display is attached to the VGA port or to an external DP2 VGA dongle.

3. The dock power button is not functional when connected to non-supported HP notebooks or non-HP notebooks.

4. Requires infrastructure that supports 2.5 GB Ethernet speeds.
