KEY FEATURES AND BENEFITS

- DECT wireless freedom to roam up to 100m
- Optimised for Microsoft Lync and most other UC platforms
- Lightest DECT headset on the market
- Multiple wearing styles for additional user comfort
- No interference with Bluetooth and WiFi
- Easy to conference in up to three extra headsets, just by docking during a call
- Energy and bandwidth efficient with adaptive power based on proximity
- Savi 700 Series manages calls on desk phone, mobile and PC with automatic call routing
- Savi 700 Series offers Smart presence technology across multiple devices

RECOGNISING THE OPPORTUNITY

- Organisations already using a full Unified Communications solution, such as Microsoft Lync, Cisco Jabber or Avaya, including video, softphone, Skype and a mobile device
- Those operating in a mixed environment and looking to upgrade to a full virtual collaboration suite

KEY TALKING POINTS

CONSIDERATIONS

Unpredictable background noise, makes call sound unprofessional or callers have to repeat themselves: major cause of irritation and a drain on productivity

With longer calls the norm, minimising strain and maximising comfort is essential

Voice clarity is essential for making sure everyone is understood on a call

Without knowing who is available to take calls, often customer or colleague queries often come at an inconvenient moment or are diverted to voice mail

When collaboration with colleagues is required, the ability to roam away from the desk means faster call resolution

Peace of Mind, How do you make sure your employees always have a working headset

HOW SAVI HEADSETS CAN HELP

- Advance noise cancellation gives enhanced call intelligibility and limits background noise pollution
- Savi wireless headsets give the freedom to take calls to a suitable spot to avoid being disturbed or disturbing colleagues
- Manage calls on multiple devices, deskphone, PC and mobile (Savi 700)
- Wireless headsets offer users the ability to get up from the desk to stretch their legs during long calls
- Ergonomic design and a range of wearing styles offer complete comfort
- Simply standing up during a call can improve speech and wireless headsets make it easier and more comfortable to do this.
- Smart Presence on the Savi 700 Series gives everyone the opportunity to see who is available, meaning calls are only ever routed to people who are on-hand to answer
- If users have to step away from their desks they can switch to mobile devices with the Savi 700
- All headsets are covered by our Advanced Warranty Replacement program: wherever you are. If we can't resolve your headset issue on the phone, we will generally get you an advance replacement to you, free of charge within 24 hours wherever you are in Europe or US*

THE RIGHT WIRELESS (DENSITY)

DECT with adaptive power is better for busy offices with potential wireless density issues
